23rd International Conference on
FLUID SEALING
Manchester, United Kingdom: 2nd – 3rd March 2016

CONTENTS

FOREWORD	1
ELASTOMER IN EXTREME CONDITIONS	
Development of a procedure to accurately measure the low temperature operating limits of elastomeric seals <i>A Douglas, O Devlen, M Mitchell, D Edwin-Scott, European Sealing Association</i>	5
Analysing failure within elastomeric seals during installation <i>R J Winslow, A G Thomas, J J C Busfield, Queen Mary University of London, UK</i>	17
A comparative study of simulated and experimental results for an extruding elastomeric component <i>S Connolly, Y Gorash, A Bickley, University of Strathclyde, UK</i>	31
LEAKAGE AND EMISSION	
Predicting leakage in packed stuffing boxes <i>M Kazemnia, A-H Bouzid, Ecole de Technologie Supérieure, Canada</i>	45
MECHANICAL SEALS	
The high pressure spiral groove dry gas seal performance by considering the relationship of the viscosity and the pressure of the gas <i>P Song, A Ma, H Xu, Kunming University of Science and Technology, China</i>	63
Sealing solution for pumps operating with the seawater loaded with silica particles <i>A P Nyemeck, T Ledauphin, M Adjemout, Latty International, France</i>	73

RECIPROCATING SEALS

- Predicting leakage and friction of hydraulic rod sealing systems by three-dimensional surface parameters 85
M Stoll, L Hörl, W Haas, University of Stuttgart, Germany
- Friction behaviour of surface textured elastomeric seals in pneumatic actuators 97
M Zimmermann, M Wangenheim, Leibniz Universität Hannover, Germany
- Evaluation of dynamic contact between rubber and metal surfaces by electric resistance method 111
Y Sakai, N Hosonuma, H Mizuta, N Suzuki, NOK Corporation, Japan

STATIC SEALS

- Effect of high temperature on structural behaviour of metal-to-metal seal in a pressure relief valve 121
A Anwar, Y Gorash, W Dempster, R Hamilton, D Nash, University of Strathclyde, UK
- Novel semi metallic gasket: further developments and applications 133
S Bond, The Flexitallic Group, USA; J Jamalyaria, Y Li, Flexitallic LP, USA

SURFACE EFFECTS

- The wettability of sealing materials and its effect on sealing performance 147
P Schuler, W Haas, University of Stuttgart, Germany
- Cost-efficient production of plasmopolymeric coatings on rotary shaft sealings 163
D Paulkowski, K Vissing, M I Santos, Fraunhofer-Institut für Fertigungstechnik und Angewandte Materialforschung IFAM, Germany
- Effect of corrosion on abrasive wear in a range of materials 171
L Giourntas, F Brownlie, G Karafyllias, T Hodgkiess, A M Galloway, University of Strathclyde, UK
- Improvements in mechanical seal surface characterization and measurement 183
A Bean, Corning Specialty Materials, USA
