Table of Contents

Proceedings of the 40th International Technical Conference on Clean Coal & Fuel Systems

Keynote Address: Clean Coal: Global Challenges and Opportunities

Dr. Andrew Minchener, General Manager, IEA Clean Coal Centre, UNITED KINGDOM.....1

International Highlights

Chris Zygarlicke, Energy & Environmental Research Center

1. Development of Highly Efficient Technology of Purification of SO₂-containing Flue Gases with Production of Valuable Secondary Product

V. Kaplan and I. Lubomirsky, Weizmann Institute of Science, ISRAEL; and N. Dosmukhamedov, Kazakh Polytechnic Institute, named after K.I. Satpaev, KAZAKHSTAN.....19

20. Electrochemical Reduction of CO₂ to Chemicals and Fuels

Dan Wang, Madhivanan Muthuvel, Fei Lu, Maral Vahdatzaman, and Gerardine G. Botte, Center for Electrochemical Engineering Research, Department of Chemical and Biomolecular Engineering, Russ College of Engineering and Technology, USA.....30

25. The Challenge of Energy Storage in Europe: Focus on Power to Fuel

Efthymia-Ioanna Koytsoumpa, Christian Bergins, Torsten Buddenberg, and Emmanouil Kakaras, Mitsubishi Hitachi Power Systems Europe GmbH, GERMANY; Song Wu, Mitsubishi Hitachi Power Systems America USA; and Ómar Sigurbjörnsson and K. C. Tran, Carbon Recycling International, ICELAND.....31

115. Storage of Heat in Phase Changing Material

Janusz Lichota, Wroclaw University of Technology, POLAND.....44

Post Combustion CO₂ Capture I & II

Dr. Erik Meuleman, CSIRO Energy Flagship, AUSTRALIA

3. Reducing the Cost of Solid Sorbent-Based CO₂ Capture through Utilization of Waste Heat

Edward Levy and Joshua Charles, Lehigh University, and William Morris and Sharon Sjostrom, ADA-ES Inc., USA.....53

9. Pilot Development of a Nanoporous, Super-hydrophobic Membrane Contactor Process for Post-Combustion CO₂ Capture

Shiguang Li, S. James Zhou, Travis Pyrzynski, and Howard Meyer, Gas Technology Institute; and Yong Ding and Ben Bikson, PoroGen Corporation, USA.....65

24. The Indirectly Heated Carbonate Looping Process for CO₂ Capture – A Concept with Heat Pipe Heat Exchanger

Daniel Hoeflberger, and Prof. Juergen Karl, Chair of Energy Process Engineering, University of Erlangen-Nuremberg, GERMANY.....66

82. 3-CO₂ Capture by Calcium Sorbents in Oxy-Combustion Condition <i>Halina Pawlak-Kruczek, Marcin Baranowski, and Monika Serafin Tkaczuk, Politechnika Wroclawska, POLAND.....</i>	76
56. Technical and Economical Assessment of the Indirectly Heated Carbonate Looping Process <i>Markus Junk, Michael Reitz, Jochen Ströhle, and Bernd Epple, Institute for Energy Systems and Technology, Technische Universität Darmstadt, GERMANY.....</i>	86
54. Update on PCC at the CSIRO; Focus on Process and Equipment Innovation, and of IHI's New Pilot Plant for Long Term Assessment at AGL Loy Yang <i>Dr. Erik Meuleman, Aaron Cottrell, S. Huang, Dr. Ashleigh Cousins, Pauline Pearson, James Jansen, G. Puxty, L. Wardhaugh, and P.H.M. Feron, CSIRO Energy Flagship, AUSTRALIA.....</i>	98
76. 2015 Status Update from the National Carbon Capture Center <i>Roxann Laird and Ruth Ann Yongue, Southern Company Services, USA.....</i>	100
101. Carbon Capture from Coal-Fired Power Plants using Amine Functionalized Solid Adsorbent: A Simulation Study <i>Sahil Bangar, Deepak Pudasainee, Arvind Rajendran, Rajender Gupta, Department of Chemical and Materials Engineering, University of Alberta, CANADA.....</i>	101

Oxy-Fuel Technology I & II

Dr. Ligang Zheng, CANMET Canada, and Prof. Klas Andersson, Chalmers University, SWEDEN

2. Oxyfuel Derived CO₂ Compression Experiments with NO_x, SO_x and Mercury Removal – Experiments Involving Compression of Slip-Streams of “Real” Oxyfuel CO₂ from the Callide Oxyfuel Project (COP) <i>Rohan Stanger, Tim Ting, and Terry Wall, Chemical Engineering, the University of Newcastle, NSW, AUSTRALIA.....</i>	103
23. Overview and Status of DOE's Advanced Combustion Program <i>Briggs M. White, Ph.D. U.S. Department of Energy, National Energy Technology Laboratory, Advanced Energy Systems Division, USA.....</i>	115
39. Comparison of Flame Stability under Air and Oxy-fuel Conditions for an Aero-dynamically Stabilized Pulverized Coal Swirl Flame <i>M. Habermehl, J. Hees, D. Zabrodiec and R. Kneer, Institute of Heat & Mass Transfer (WSA), RWTH Aachen University, GERMANY.....</i>	123
29. Sulfur Trioxide Formation during Oxy-Coal Combustion <i>Nujhat Choudhury and Bihter Padak, University of South Carolina, Department of Chemical Engineering, USA.....</i>	135
16. Assessing the Roles of Particle Radiation and Fragmentation during Oxy-Combustion of Coal and Biomass Blends <i>Gautham Krishnamoorthy, Department of Chemical Engineering, University of North Dakota, and Muhammad Sami, ANSYS, USA.....</i>	147

- 52. Formation and Control of NO_x and SO_x in Pressurized Oxy-fuel Combustion Systems**
Sima Ajdari, Fredrik Normann, and Klas Andersson, Department of Energy and Environment, Chalmers University of Technology, SWEDEN; and Won Yang, and Tae-Young Mun, Thermochemical Energy System R&BD Group, Korea Institute of Industrial Technology, KOREA.....159
- 50. An Attempt to Measure the Emissivity of Burning Coal Particles in Oxy-Fuel Atmospheres: Test Rig Calibration and First Results**
Philipp Graeser, and Martin Schiemann, Ruhr-Universität Bochum, GERMANY.....171
- 84. Experimental and Numerical Study of Pulverized Lignite Combustion in Air and Oxy-fuel Conditions**
Robert Lewtak, Institute of Power Engineering, and Halina Pawlak-Kruczek, and M. Ostrycharczyk, Department of Mechanical and Power Engineering, Wrocław University of Technology, POLAND.....183

Low Rank Coal Utilization

Prof. Dr. Klaus R.G. Hein, Energy & Environment, GERMANY

- 6. Slow Pyrolysis of Low-Ranked Turkish Coal: A Study of Kinetic Modelling**
Özge Çepelioğullar, Hanzade Haykırı-Açma, and Serdar Yaman, Istanbul Technical University, Chemical and Metallurgical Engineering Faculty, Department of Chemical Engineering, TURKEY.....197
- 7. Feasibility Study of Electricity Generation from Discard Coal in South Africa**
B. North, A. Engelbrecht, and B. Oboirien, CSIR Materials Science and Manufacturing (Energy Materials), SOUTH AFRICA.....208
- 66. Detailed Modeling of Pyrolysis of Large Lignite Particles**
Simcha Singer, Assistant Professor, Marquette University, Dept. of Mechanical Engineering, USA.....220
- 62. Effects of Microwave Irradiation Treatment on Sodium Release during Lignite Combustion**
Yingzu Liu, Ronald Whiddon, Yong He, Zhihua Wang, Junhu Zhou, Kefa Cen, State Key Laboratory of Clean Energy Utilization, Zhejiang University, CHINA.....232

Gasification Technologies I, II & III

Massood Ramezan, Leonardo Technologies, Inc. and Dr. Lawrence Bool, Praxair, Inc.

- 95. U.S. DOE's Advanced Gasification Technologies Program - An Update**
Jenny B. Tennant, Technology Manager - Gasification Systems, U.S. DOE, National Energy Technology Laboratory, USA.....240
- 64. Entrained Flow Gasification Behaviour of Victorian Brown Coal at Low Temperatures**
Tao Xu and Sankar Bhattacharya, Department of Chemical Engineering, Monash University, AUSTRALIA.....242

98. New Intrinsic-Based Submodel for Char-Particles Gasification in Fixed Bed and Fluidized Bed Gasifiers

S. Schulze, Institute of Energy Process Engineering and Chemical Engineering, Technische Universität Bergakademie Freiberg, GERMANY; and Petr Nikrityuk, Department of Chemical and Materials Engineering, University of Alberta, CANADA.....251

58. Predicting Emissions from Coal Gasifiers Using an Equivalent Reactor Network Approach with Detailed Chemistry

Chen-Pang Chou, and Stefano Orsino, Ansys Inc., USA; and Pravin Nakod, Ansys, Inc., INDIA.....261

103. Warm Syngas Cleanup Technology at Polk Power Plant

Ben Gardner, RTI International, USA.....N/A

99. Analysis of Soot Formed during Pyrolysis of Asphaltene in a Drop Tube Furnace

Vinoj Kurian, Nirlipt Mahapatra, Ben Wang, Mehdi Alipour, and Rajender Gupta, Department of Chemical and Materials Engineering, University of Alberta; Frans Martens, Nexen Energy ULC, CANADA.....273

100. Experimental and Theoretical Studies on Volume Based Heating using DC Discharge – Energy Storage

O. Ajuwon, M. Rahman, P. Nikrityuk, R. Gupta, Department of Chemical and Materials Engineering, University of Alberta, CANADA.....275

85. Miscanthus Gasification in BFB for CHP Application

Mathieu Insa, and Olivier Authier EDF R&D; Jacques Poirier, CNRS-CEMHTI; Anthony Dufour and Guillain Mauviel, CNRS-LRGP; Yann Rogaume and Pierre Girods, LERMAB; Arnaud Delebarre, CNRS-LEMETA; Caroline Wathy, NovaBiom; and Léa Dieckhoff, EIFER, FRANCE.....277

114. Coal-to-Gas Boiler Conversion

Stephen Black and Scott Yarbrough, RILEY POWER INC., a Babcock Power Inc. Company; Bill Hovis, TEi Construction Services Inc., A Babcock Power Inc. Company; Bryan Lewis, Domtar Corporation, USA.....278

17. Update on the Polk Power Station SO₂ Carbon Capture/Re-claimed Water Project

Byron Burrows, Tampa Electric Co., USA.....279

26. A Measurement Device for Online Monitoring of Total Tar in Gasification Systems

A. Gredinger, D. Schweitzer, H. Dieter and G. Scheffknecht, Institute of Combustion and Power Plant Technology – IFK, University of Stuttgart, GERMANY.....281

11. Reaction Kinetics of Pressurized Entrained Flow Coal Gasification: CFD Modeling and Validation

Stefan Halama, Institute for Energy Systems, Technische Ukniversitat Munchen, and Hartmut Spliethoff (Bavarian Center for Applied Energy Research), Institute for Energy Systems, Technische Universität München and ZAE Bayern, GERMANY.....293

28. Investigation of Gasification Reaction of Pulverized Char under N₂/CO₂ Atmosphere in a Small-scale Fluidized Bed Reactor

T. Kreitzberg, H.D. Haustein, B. Gövert and R. Kneer, Institute of Heat & Mass Transfer (WSA), RWTH Aachen University, GERMANY.....301

77. Pilot-Scale Demonstration of Advanced Hydrogen and CO₂ Separation Membrane Technology

Joshua J. Stanislawski, Scott G. Tolbert, Tyler J. Curran, E, Michael L. Swanson, Energy & Environmental Research Center, University of North Dakota, USA.....313

94. Simulation Analysis of Co-gasification of Low Rank Coal (LRC) and Biomass

John Dooher, Adelphi University & Dooher Institute of Physics and Energy; Marco J. Castaldi, Chemical Engineering Department, The City College of New York City University of New York, USA; and Zhixiao Zhang, School of Mechanical Engineering, Hangzhou Dianzi University, CHINA.....314

Multi Emissions Control

Chris Smyrniotis, Fuel Tech, Inc.

14. HClear™ Technology: A Solution-Based Approach to HCl Abatement

Ian Saratovsky, PhD, Kent W. Schulz, Chris R Smyrniotis, Emil P Rivera, and Heng Wang, Fuel Tech, Inc., USA.....324

75. Advanced Chemistry Modeling for SO₂, and HCl Removal by Dry Sorbent Injection

Guisu Liu, Liming Shi and Baiyun Gong, Mobotec LLC, USA.....334

57. Complying with the EPA Clean Power Plan – A Techno-economical Overview

Edze Diemer, Simon Leiser and Berend Vreugdenhil, Energy Research Center of the Netherlands, THE NETHERLANDS.....343

40. Enel Approach and Experience on the Zero Liquid Discharge Project

Matteo Toschi, Cristiana La Marca, Angela Mangiaracina, and Danila Cumbo, ENEL Ingegneria e Ricerca; Vincenzo Cenci, and Andrea Mungai, ENEL - Generation and Energy Management, Thermal Plant Development and Technical Support; and Claudio Mosti, ENEL - Generation and Energy Management, La Spezia Power Plant Maintenance, ITALY.....344

Advanced Energy Conversion Systems

Massood Ramezan, Leonardo Technologies, Inc.

63. Production of Hydrogen from Pet-Coke by Electrochemical Process

Moises I. Salazar-Gastélum and Gerardine G. Botte, Center for Electrochemical Engineering Research, Department of Chemical and Biomolecular Engineering, Russ College of Engineering and Technology, Ohio University, USA.....346

68. Integrated Gasification and Solid Oxide Fuel Cell System

Stephan Herrmann, Matthias Gaderer and Hartmut Spliethoff (ZAE Bayern), Institute for Energy Systems, Technische Universität München, GERMANY.....347

53. **Process Simulation and Exergy Analysis for Integrated Brown Coal Pyrolysis Gasification**
Baiqian Dai, and Lian Zhang, Department of Chemical Engineering, Monash University, AUSTRALIA; Jianfang Cui and Yatao Wang, Clean Coal R&D Center, Kailuan Coal Mining Co. Ltd., CHINA.....356

81. **Supplying Water to Power Plants with Desalination Technology**
Chen Yinbiao, Guohua Power Branch, China Shenhua Energy Co., Ltd., and Zhang Jianli, Desalination Research Laboratory, Shenhua Guohua Electric Power Research Institute, CHINA.....368

Advances in Coal Research

Chris Zygarlicke, Energy & Environmental Research Center

61. **Generation of a Reduced Chemical Kinetic Mechanism for Coal Combustion**
Dr. Seongyool Ahn, and Dr. Kenji Tanno, CRIEPI; and Prof. Hiroaki Watanabe, Kyushu University, JAPAN.....375

69. **Simulation of Fine Dust Emission from Coal Combustion**
Christoph Wieland, Ulrich Kleinhans, and Hartmut Spliethoff, Technische Universität München, Lehrstuhl für Energiesysteme, GERMANY.....382

118. **Reclaiming and Recycling Coal Fly Ash for Beneficial Reuse with the STAR Process**
William Fedorka, Jimmy Knowles and John Castleman, The SEFA Group, USA.....918

Biomass Co-Firing Utilization I & II

Les Marshall, Ontario Power Generation

30. **The Impact of Co-combustion on Acid Gas and Mercury Emissions**
Siqiang Qin, Reinhold Spörl, Jörg Maier, and Günter Scheffknecht, IFK - Institute of Combustion and Power Plant Technology, Universität Stuttgart, GERMANY.....394

83. **Characterization of Torrefied Biomass Depends on Process Condition**
Halina Pawlak-Kruczek, Jacek Zgóra, and Krystian Krochmalny, Politechnika Wrocławsk, POLAND.....406

49. **Application of Coal Fly Ash as Additive in Full-Scale Pulverized Wood Pellet-Firing Boilers**
Preben V. Messerschmidt, Yuanjing Zheng, and Niels Houbak, Ramboll A/S, DENMARK.....420

89. **Packed Bed Torrefaction of Verge Grass to 'Bio-Coal'**
Y. Joshi, E. Krishnamurthy, V. Mohan, M. Di Marcello, and W. De Jong, Process & Energy, Delft University of Technology, THE NETHERLANDS.....429

15. **Pulverized Torrefied Beech Wood as a Fuel For Power Plants: Kinetics and Boiler Furnace Simulation**
Sven Haarmann, Martin Schiemann, and Viktor Scherer, Ruhr-Universität Bochum; and Martin Ehmman, and Christian Kuhr, Mitsubishi Hitachi Power Systems Europe GmbH, GERMANY.....441

59. Demonstration of Biomass Steam Gasification with in-situ CO₂ Capture in a 200 kW_{th} Pilot Plant

D. Schweitzer, M. Beirow, A. Gredinger, N. Armbrust, G. Waizmann, H. Dieter, and G. Scheffknecht, Institute of Combustion and Power Plant Technology – IFK, University of Stuttgart, GERMANY.....454

32. Using Oxygen to Manage NO_x and Carbon Burnout In Swirl-Stabilized Flames

Steven Owen, Daniel Ellis, and Dale R. Tree, Brigham Young University; and Yuan Xue and Kenneth Kaiser, Air Liquide, USA.....466

44. End Use Performance of Torrefied Biomass in Pulverized Fuel Furnaces and Gasifiers

C. Ndibe, G. Vonk, J. Maier, and G. Scheffknecht, Institute of Combustion and Power Plant Technology, Universität Stuttgart, GERMANY; J. Koppejan, Procede Biomass BV; and S. Leiser, C. Vilela, M. Carbo, and J. Kiel, Energy Research Center of the Netherlands, THE NETHERLANDS; and A Nordin, Umea University, SWEDEN.....478

60. Determination of Char Combustion Kinetics of Torrefied Biomass by Use of Stereoscopic Pyrometry

Nikita Vorobiev, and Martin Schiemann, Ruhr-Universität Bochum, GERMANY.....490

Overcoming Fireside Fouling and Slagging in Coal and Biomass Systems

Christopher J. Zygarlicke, Energy & Environmental Research Center

13. Optimizing Slag, Fouling and SO₃ Control For Boilers Firing High Iron/High Sulfur Coal

Kent W. Schulz, Chris R. Smyrniotis Emelito P. Rivera, Ian Saratovsky PhD, and Douglas C. Gagnon, Fuel Tech, Inc., USA.....502

47. Influence of Coal Type on Growth and Gravity Shedding of Ash Deposition in Slagging Condition

Naoki Sato, Shunichiro Ueno Dedy Eka Priyanto, Emi Ohno, and Yoshiaki Matsuzawa, IHI Corporation; Yasuaki Ueki, Ryo Yoshiie, and Naruse Ichiro, Nagoya Nagoya University, JAPAN.....513

42. An Examination on the Influence of the Oxidation State of Iron on the Spectral Radiative Emissivity of Synthetic Ash Layers

Jeanette Gorewoda, Martin Schiemann, and Viktor Scherer, Department of Energy Plant Technology, Ruhr University Bochum; and M. Neuroth RWE Power AG, Forschung & Entwicklung, Kraftwerk Niederaußem, GERMANY.....524

Combustion Technologies and Issues

J.J. Letcavits, AEP, and Alan Paschedag, Covanta

67. Emissions from Cofiring Coals

Yiannis A. Levendis, Aidin Panahi, and Emad Rokni, Mechanical and Industrial Engineering, Northeastern University, USA.....533

51. Effect of Oxygen Enriched Air on High Intensity Combustion and Emission

Ahmed O. Said and Ashwani K. Gupta, The Combustion Laboratory, Dept. of Mechanical Engineering, University of Maryland, College Park, USA.....545

- 31. Temperature Measurement Using Infrared Spectral Band Emission from H₂O**
Daniel Ellis, and Dale R. Tree, Brigham Young University, USA.....551
- 87. Ash Formation and Deposition of Blend Coal Combustion in a 100kW Laboratory Furnace**
Zhonghua Zhan, Andrew Fry, and Jost O.L. Wendt, Department of Chemical Engineering and Institute for Clean and Secure Energy, University of Utah, USA.....563
- 88. Pilot-Scale Investigation of Heat Flux and Radiation from and Oxy-coal Flame**
Andrew Fry, Jennifer Spinti, and Eric Eddings, Department of Chemical Engineering and Institute for Clean and Secure Energy, University of Utah, USA.....575

Chemical Looping I, II & III

Dr. Ronald Breault, National Energy Technology Laboratory, U.S. Department of Energy

- 36. Phase Transformations and Microstructure Changes in Iron Oxide CLC Based Carriers**
Tegan Simmonds, Professor Peter Hayes, Dr. Jeff Chen and Professor Evgueni Jak, PYROSEARCH, The University of Queensland, Brisbane, AUSTRALIA.....587
- 74. Reduction and Oxidation Kinetics for Hematite Chemical Looping Combustion of Methane**
Ronald W. Breault, and Jarred Carpenter, National Energy Technology Laboratory, U.S. Department of Energy; and Esmail R. Monazam, REM Engineering Services, PLLC, USA.....599
- 111. Reduction of Mn-Fe Oxides in CO/CO₂ Gas Atmospheres Relevant to Chemical-Looping Combustion Applications**
Elisheba Radke, Jiang Chen, and Peter C. Hayes, PYROSEARCH, The University of Queensland, AUSTRALIA.....603
- 109. The Effect of Thermal Treatment of Hematite Ore for Chemical Looping Combustion of Methane**
Dr. Ronald W. Breault and Justin M. Weber, National Energy Technology Center, U.S. Department of Energy, USA.....615
- 78. Determining CLOU Reaction Reactivity for Combined Manganese Oxygen Carriers and Experimental Issues during the Work**
Xiang Zhan, Volkmar Frick, and Henrik Leion, Chalmers University of Technology, SWEDEN.....620
- 80. A Cost-effective Oxygen Carrier from Red Mud for Coal-fueled Chemical-looping Combustion**
Liangyong Chen and Prof. Kunlei Liu, University of Kentucky, USA.....630
- 86. Status of Alstom's Chemical Looping Program**
Herbert E. Andrus and John Chiu, ALSTOM Power, Inc., USA.....631
- 37. Operation of a 100 kW Chemical-Looping Combustor for Solid Fuels Using Natural Minerals as Oxygen Carrier**
Carl Linderholm and Anders Lyngfelt, Department of Energy and Environment, Chalmers University of Technology, Göteborg, SWEDEN.....632

55. **Chemical-looping Combustion of Hard Coal: Autothermal Operation of a 1 MWth Pilot Plant**
Peter Ohlemüller, Jochen Ströhle, and Bernd Epple, Institute for Energy Systems and Technology, Technische Universität Darmstadt, GERMANY.....644
35. **The Use of Fe-based Ores as Oxygen Carriers for Chemical Looping Combustion of Victorian Brown Coal**
Makarios Wong, Sharmen Rajendran, Tao Xu, and Shankar Bhattacharya, Department of Chemical Engineering, Monash University, AUSTRALIA.....656
34. **Shale Gas-to-Syngas (STS) Chemical Looping Process for Stable Shale Gas Conversion to High Purity Syngas**
Andrew Tong, Mandar Kathe, Elena Chung, Niranjani Deshpande, Lang Qin, Ankita Majumder, Tien-Lin Hsieh, Liang Zeng, Siwei Luo and L.-S. Fan, The Ohio State University, USA.....N/A
5. **An Eulerian Approach to CFD Simulation of a Chemical-Looping Combustion Reactor with Chemical Reactions**
Ramesh Agarwal and Subhdeep Banerjee, Washington University in St. Louis, USA.....668
21. **Thermodynamic Analysis of a Pre-Combustion Chemical Looping Process for Power Production Integrated with a Coal Gasification Combined Cycle**
Vincenzo Spallina, Fausto Gallucci, Martin van Sint Annaland, Chemical Process Intensification, Chemical Engineering and Chemistry, Eindhoven University of Technology, Eindhoven, THE NETHERLANDS; Fabio C. Arienti, Matteo C. Romano, Group of Energy Conversion Systems, Energy Department, Politecnico of Milano, Milano, ITALY.....680
38. **Dynamic Simulation of Chemical-looping Systems Integrated in Steam Power Plants**
Chen Chen, Lu Han, Kyle D. Such, Zhiquan Zhou, and George M. Bollas, Department of Chemical & Biomolecular Engineering, University of Connecticut, USA.....692
33. **Numerical Simulation Comparison of Two Reactor Configurations for Chemical-Looping with Oxygen Uncoupling**
Matthew A. Hamilton, Kevin J. Whitty, and JoAnn S. Lighty, The University of Utah, Department of Chemical Engineering, USA.....704
43. **Chemical Looping Combustion Reference Plant Designs and Sensitivity Studies**
Robert Stevens, National Energy Technology Laboratory, U.S. Department of Energy; Richard Newby, Vasant Shah, Norma Kuehn, and Dale Keairns, Booz Allen Hamilton, Inc. - NETL, USA.....716

Mercury and Air Toxic Standards (MATS)

Dr. Edmundo Vasquez, Clyde Bergemann

65. **Oxidation Efficiency of Elemental Mercury Over SCR Catalysts**
Hsing-Wang Li, Chi-Liang Chen and Chyi-Woei Young, New Materials R & D Department, China Steel Corporation (CSC), TAIWAN.....728

72. A New Chemical Approach to Reducing Selenium in FGD Wastewater
Eric Zubovic, GE Power & Water, USA.....735

73. Coal Creek Station MATS System- Wet FGD Hg Removal
Jared Pozarnsky, Senior Systems Engineer, GRE - Coal Creek Station, USA.....N/A

96. Measurement of Corrosion Rate Associated with Halogen for Hg Oxidation
Kevin Davis, Jacob Beutler and Brad Adams, Reaction Engineering International; Mandar Gadgil and Steve Feeney, Babcock & Wilcox; and Murray Abbott, Chem-Mod LLC, USA.....736

Improvements for Existing Power Plants

Dr. Nenad Sarunac, University of North Carolina at Charlotte

4. The Current Trends in Conventional Power Plant Technology on Two Continents from the Perspective of EPC and OEM

Gosia Stein-Brzozowska, Dr. Christian Bergins, Dr. Michalis Agraniotis, Prof. Emmanouil Kakaras, Mitsubishi Hitachi Power Systems Europe GmbH, GERMANY; Allan Kukoski, and Dr. Song Wu Mitsubishi Hitachi Power Systems America – Energy and Environment, Ltd., USA.....737

8. Options for Improving Efficiency of Existing Coal-Fired Power Plants
Nenad Sarunac, Ph.D., University of North Carolina at Charlotte, USA.....752

27. Design and Initial Operating Experience of a 150 MWe Utility Boiler Upgrade To Optimize Carbon Capture & Storage

Brian Jordan, Babcock & Wilcox Power Generation Group Canada; and Darcy Holderness, Mechanical Integrated Carbon Capture and Sequestration, SaskPower, CANADA.....753

107. Low Temperature Combustion Air Preheat Experience at Coal Creek Station
Mark Ness, Great River Energy, USA.....765

116. Biomass Co-Firing at Existing Power Plants: An Opportunity for CO₂ Reduction Compliance in the U.S. and China

Emily McGlynn, Xiomen Chen, Yitian Zhang, Ying Zuo, and Josh Berg, The Earth Partners, USA.....766

Advanced Coal Beneficiation I & II

Dr. David G. Osborne, Somerset International Australia Pty Ltd., Australia

91. Principals of Coal Selection for Advanced Beneficiation
Graham O'Brien, Bruce Firth, Karryn Warren, and Priyanthi Hapugoda, CSIRO Energy, and Dr. David G. Osborne, Somerset International Australia Pty Ltd., AUSTRALIA.....853

104. Laser-assisted Enzymatic Conversion of Coal into Liquid Fuels
Richard Troiano and Adrienne Tallarom, Somerset Coal International, AUSTRALIA.....864

105. Application of the Reflux Classifier for Coal Macerals Separation	
<i>Wei Xie, Rohan Stanger, Terry Wall, John Lucas, and Merrick Mahoney, Chemical Engineering University of Newcastle; and Dave Osborne, Somerset international Australia Pty Ltd, AUSTRALIA.....</i>	866
106. Continuous Air Dense Medium Fluidized Bed Coal Beneficiation	
<i>Ebrahim Azimi, and Jozef Szymanski, Department of Civil & Environmental Engineering; and Moshfiqur Rahman, and Rajender Gupta, Department of Chemical & Materials Engineering, University of Alberta, CANADA.....</i>	877
108. Maximizing Profitability Through Efficient Coal Processing and Blend Optimization	
<i>Dr. Peter J. Bethell, Cardno, AUSTRALIA.....</i>	879
22. Bioconversion of Coal Waste to Methane – Study of Microbial Community, Conversion Pathway and Property of the Residual Coal	
<i>Yanna Liang, Ji Zhang, Peter M Yau, Rohit Pandey, and Satya Harpalani, Southern Illinois University, USA.....</i>	887
92. Premium Coal Fuels with Advanced Coal Beneficiation	
<i>Louis Wibberley, CSIRO Energy Technology, and Dr. Dave Osborne, Somerset International Australia Pty Ltd., AUSTRALIA.....</i>	899
102. Pyrolysis of a Single Asphaltene Particle	
<i>Satarupa Dhir, Nirlipt Mahapatra, Mehdi Alipour, and Rajender Gupta, Department of Chemical and Materials Engineering, University of Alberta; Frans Martens, Nexen Energy ULC, CANADA.....</i>	909
117. State of the Art Dry Coal Beneficiation for Plant Performance Improvement	
<i>Jan Verboomen, Australian Inspection Technologies, AUSTRALIA.....</i>	911
