TABLE OF CONTENTS

VOLUME 1

Australian Rainfall and Runoff – The Interim Climate Change Guideline	1
<i>B. Bates, D. McLuckie, S. Westra, F. Johnson, J. Green, J. Mummery, D. Abbs</i>	
Preliminary Assessment of the Impact of Climate Change on Design Rainfall IFD Curves	9
<i>B. Bates, D. Argueso, J. Evans, A. Griesser, D. Jakob, A. Seed, R. Lau, E. Lehmann, A. Phatak, D. Abbs, S. Lavender, K. Nguyen, T. Rafter, M. Thatcher, F. Zheng, S. Westra, M. Leonard</i>	
Is ARR 2015 A Watershed Moment for How We Manage Hydrologic Data?	17
<i>M. Babister, P. Brady, M. Retallick, J. Ball</i>	
Transitioning Drainage into Urban Water Cycle Management	24
<i>P. Coombes</i>	
WRF simulations of future changes in rainfall IFD curves over Greater Sydney	33
<i>J. Evans, D. Argueso</i>	
Creating Long Duration Areal Reduction Factors	39
<i>S. Podger, J. Green, C. Jolly, C. The, C. Beesley</i>	
Very Frequent Design Rainfalls – An Enhancement to the New IFDs	48
<i>C. The, C. Beesley, S. Podger, J. Green, C. Jolly, M. Hutchinson</i>	
National Estimates of Rare Design Rainfall	56
<i>J. Green, C. Beesley, A. Frost, S. Podger, C. The</i>	
Benchmarking estimates of Intensity-Frequency-Duration (IFD) design rainfalls for the Current Climate Regime	64
<i>C. Beesley, J. Green</i>	
Analysis of loss values for Australian rural catchments to underpin ARR guidance	72
<i>P. Hill, Z. Graszkwicz, M. Loveridge, R. Nathan, M. Scoriah</i>	
Assessing the credibility of downscaled rainfall extremes for the Greater Sydney region – a novel approach using blended radar/gauge data	80
<i>D. Jakob, A. Griesser, A. Seed</i>	
Application of Spatial and Space-Time Patterns of Design Rainfall to Design Flood Estimation	88
<i>P. Jordan, R. Nathan, A. Seed</i>	
Developing water level maps in the joint probability zone influenced by extreme tide and rainfall events	96
<i>M. Leonard, S. Westra, F. Zheng, M. Babister, I. Varga</i>	
Testing of Monte Carlo and Design Event Models for Flood Estimation	104
<i>F. Ling, P. Pokhrel, W. Cohen, K. Robinson, S. Blundy</i>	
Testing of continuous simulation models for flood estimation	112
<i>P. Pokhrel, F. Ling, W. Cohen</i>	
Short Duration Areal Reduction Factors: Sydney, Melbourne and Brisbane	121
<i>P. Stensmyr, M. Babister, M. Adam</i>	
Comparison of catchment average rainfall IFD analysis to 2013 IFD and ARFs	122
<i>P. Stensmyr, M. Babister</i>	
Testing design inputs from various ARR revision projects within a Monte Carlo framework	130
<i>M. Loveridge, M. Babister, M. Retallick, I. Testoni</i>	
Estimation of pre-burst rainfalls for design flood estimation in Australia	131
<i>M. Loveridge, M. Babister, P. Stensmyr, M. Adam</i>	
Testing the suitability of rainfall temporal pattern ensembles for design flood estimation	132
<i>M. Loveridge, M. Babister, M. Retallick, I. Testoni</i>	
A Tail of Two Models: Estimating the Annual Exceedance Probability of Probable Maximum Precipitation	133
<i>R. Nathan, M. Scoriah, P. Jordan, S. Lang, G. Kuczera, M. Schaefer, E. Weinmann</i>	
The need for future updating of Australian Rainfall and Runoff	144
<i>J. Ball, M. Babister, M. Retallick, I. Testoni, R. Nathan</i>	
Testing the incorporation of at site data with the RFFE Model 2015	145
<i>M. Retallick, M. Adam, W. Weeks, M. Babister, J. Ball</i>	
Testing the RFFE Model 2015	146
<i>W. Weeks, M. Retallick, M. Babister, A. Rahman, M. Adam</i>	
Evolving an Australian Design Procedure for Structure Blockages	154
<i>E. Rigby, W. Weeks</i>	
Outcomes from a pilot study to investigate pre-burst rainfall depths for Australian catchments	162
<i>M. Scoriah, P. Hill, R. Nathan, Z. Graszkwicz</i>	
Incorporating Design Life into Flood Risk Assessment – a Guidance for Stationary and Non-Stationary Conditions	163
<i>R. Thomson, L. Drynan, A. Veldema, B. Phillips, M. Babister</i>	
Planning for Flood Risk	164
<i>D. McLuckie, A. Toniato</i>	
Revised Guidance on Selection of Approaches to Flood Estimation	173
<i>R. Nathan, J. Ball</i>	
The New Regional Flood Frequency Estimation Model for Australia: RFFE Model 2015	184
<i>A. Rahman, K. Haddad, M. Haque, G. Kuczera, E. Weinmann, P. Stensmyr, M. Babister, W. Weeks</i>	
Defining and Calculating Continuing Loss for Flood Estimation	193
<i>S. Lang, P. Hill, M. Scoriah, D. Stephens</i>	

Database Underpinning the RFFE Model 2015 in the New Australian Rainfall and Runoff	202
<i>A. Rahman, K. Haddad, M. Haque, W. Caballero</i>	
Combining long and short duration areal reduction factors	210
<i>S. Podger, J. Green, P. Stensmyr, M. Babister</i>	
Is the Science and Data underpinning the Rational Method Robust for use in Evolving Urban Catchments	219
<i>P. Coombes, M. Babister, T. McAlister</i>	
Defensive Engineering – the Wivenhoe Dam Case	235
<i>H. Hobart</i>	
The Influence of Climate Teleconnections on Streamflow in the Snowy Mountains	242
<i>B. Stutsel, R. Walton, J. Callow, H. McGowan</i>	
A Tale of Two Calibrations – Upgrading the Baralaba Mine Flood Model	250
<i>T. McGrath, B. Mo</i>	
Priorities for updated Probable Maximum Precipitation products - results from a user survey	258
<i>K. Xuereb, D. Jakob, D. Walland</i>	
Application of particle filtering methods to a conceptual rainfall-runoff model	266
<i>A. Newman, G. Kuczera, D. Kavetski</i>	
Hydraulic Fracture and Microseismicity in Unconventional Formations using a Coupled Stress-Fracture-Flow Model	274
<i>H. Liu, A. Chan</i>	
The WDTF Validator and a framework for validating XML documents	282
<i>M. Henderson, M. Byrnes, S. Kao, D. Lowe</i>	
The Bureau of Meteorology’s Water Resources Assessment suite	290
<i>M. Watson, A. Elmahdi, A. Terracini</i>	
Equatorial Shallow Lake Evaporation	297
<i>A. Rogan, B. Meynink</i>	
Assessing drought severity from Multi-Temporal GIMMSNDVI and rainfall interactions	306
<i>G. Ayele, S. Demissie, S. Tilahun, J. Jeong, M. Jemberie</i>	
Vocabularies and vocabulary services for water data	315
<i>S. Cox, J. Yu, D. Lowe</i>	
Flood Study in Qatar – Challenges and Opportunities	323
<i>A. Mamoon, B. Regan, C. Sylanteng, A. Rahman, A. Alkader</i>	
Groundwater information at the Bureau: providing a national picture	331
<i>E. Carrara, E. Nation, J. Sharples</i>	
Murrumbidgee Irrigation Operation and Planning System (MIOPS)	339
<i>L. Williams, C. Smith, J. Ayats, X. Valls, J. Hornbuckle</i>	
The Bureau of Meteorology’s National Water Account: how it can help us understand our water resources better	347
<i>D. Moliere, P. Fiddes</i>	
Hydrologic and Hydraulic Investigations in Myanmar: Case Study	354
<i>P. Comino</i>	
Emergency Action Plans (EAPs) for Referable Dams in Ipswich	362
<i>P. Comino, H. Baldwin, C. Gonzalez</i>	
Suitability of ARR Guidelines as an Alternative Blockage Policy for Wollongong	370
<i>A. Barthelmess, P. Nichols</i>	
A Verification of the Hydrological Impact of 20 Years of Infill Development in an Urban Catchment	379
<i>D. Kemp, B. Myers</i>	
Instilling realistic time series characteristics in ensemble streamflow forecasts from a Bayesian joint probability-based postprocessor	387
<i>T. Zhao, J. Bennett, Q. Wang, D. Robertson</i>	
Site wide water management for a large coal mine expansion	395
<i>P. Wells, A. Russell, A. Worley, S. Wright</i>	
The Bureau of Meteorology’s National Water Account: progressive enhancements and improvements to reporting	404
<i>S. Chandra, S. Barua, W. Alankarage, P. Fiddes, M. Hafeez</i>	
Spatial Distribution of the Trends in Annual Maximum Flood Flow in North Australian River Catchments	412
<i>A. Rahman, K. Haddad, E. Ishak, E. Hajani, O. Laz, F. Karim</i>	
Disaster Management Tool – Is the age of the CPU over?	420
<i>J. Charalambous</i>	
Sizing of Green Infrastructure Treatment Trains for Stormwater Management	428
<i>V. Jayasooriya, A. Ng, S. Muthukumar, C. Perera</i>	
An assessment of the monitoring methods and data limitations for inflow and infiltration in sewer networks	436
<i>M. Jayasooriya, P. Dahlhaus, A. Barton, P. Gell</i>	
Impact of Climate Data Uncertainty on Estimated System Yield	443
<i>B. Berghout, B. Henley, G. Kuczera</i>	
Effectiveness of reuse dams on irrigated dairy farms in reducing discharge of water and nutrients to regional drainage systems	452
<i>L. Finger, T. Kumaran</i>	
Comparison of Spatial Vine Copula and Ordinary Kriging interpolation methods of daily rainfall with radar information	460
<i>Y. Gyasi-Agyei</i>	

The AWRA coupled landscape and river modelling framework – science and development	469
<i>J. Vaze, D. Dutta, R. Crosbie, N. Viney, D. Penton, J. Teng, B. Wang, S. Kim, J. Hughes, A. Yang, J. Vleeshouwer, L. Peeters, C. Ticehurst, X. Shi, W. Dawes</i>	
Rapid assessment of forest fire impacts on streamflow for Melbourne	478
<i>K. Tan, R. Nathan, R. Brown, H. Chan, B. Rhodes</i>	
Strategic Water Resources Planning Under Uncertainty – Risk-Based Approach to Derive Drought Response	
Action Points	486
<i>K. Tan, D. Flower, B. Rhodes, C. FitzGerald</i>	
Comparison of a Regional Monte Carlo Simulation Technique Against ARR-RFFE 2015 Model for Eastern New South Wales	494
<i>W. Caballero, A. Rahman</i>	
Calibration approaches for a large scale river system model for water accounting - scientific development, application and opportunities	502
<i>D. Dutta, S. Kim, J. Hughes, J. Vaze, A. Yang</i>	
Accounting for uncertainty in cost benefit analysis: a generalised framework for natural hazard adaptation in the coastal zone	510
<i>T. Ramm, C. White, S. Franks</i>	
Detection of Trends in Extreme Rainfall Events in NSW, Australia	518
<i>E. Hajani, A. Rahman, E. Ishak, A. Rahman</i>	
Rapid, Rainfall Probability Driven, Flood Forecast Mapping	526
<i>C. Smythe, G. Newell</i>	
A Time of Concentration Method of Estimation for use on Natural Catchments on the Sunshine Coast	535
<i>G. Newell, C. Smythe</i>	
Advances in climate change impact assessment for Sydney’s water supply	543
<i>S. Maheswaran, G. Kibria, J. Martin</i>	
Design Rainfall Estimation in Qatar: Selection of the Best-fit Probability Distribution	551
<i>A. Mamoon, A. Rahman</i>	
Practical aspects of water supply system optimization: Use of optimization model in future planning	559
<i>G. Kibria, S. Maheswaran, G. Kuczera</i>	
Early SMAP Soil Moisture Product Validation Over Australia Using Cosmic-Ray Probes	567
<i>A. Moneris, D. McJannet, C. Rudiger, J. Walker, S. Chan, A. Colliander, N. Das, S. Kim</i>	
A Top Down Mine Site Water Balance Model Structure	573
<i>W. Meynink, A. Rogan</i>	
Reconciliation of Design Flood Estimates for the Brisbane River Catchment Flood Study	592
<i>R. Ayre, F. Diermanse, D. Carroll, P. Hart, L. Toombes</i>	
Scientific Progress on Seasonal Streamflow Forecasting	601
<i>Q. Wang, D. Robertson, J. Bennett, A. Schepen, M. Li, Y. Song, N. Tuteja, D. Shin, S. Zhou, J. Lerat, P. Feikema</i>	
Improving access to groundwater data using GroundWaterML2	609
<i>B. Simons, E. Nation, P. Dahlhaus</i>	
Use of NARClIM Rainfall Data for Simulating Streamflow in the Williams River Catchment	617
<i>N. Lockart, G. Willgoose, G. Kuczera, A. Keim, A. Chowdhury, N. Manage</i>	
Modelling Daily Rainfall along the East Coast of Australia Using a Compound Distribution Markov Chain Model	625
<i>A. Chowdhury, N. Lockart, G. Willgoose, G. Kuczera, A. Kiem, N. Manage</i>	
Assessment of merged seasonal streamflow forecasts for 40 catchments across Australia	633
<i>A. Schepen, Q. Wang, D. Robertson</i>	
Parallel computing enabled calibration tool for system-wide calibration of a river system model	641
<i>A. Yang, J. Hughes, D. Dutta, S. Kim, J. Vaze</i>	
Optimisation Modelling Applications for Melbourne’s Water Resource Management	649
<i>U. Kularathna, B. Rhodes, J. Ravalico, T. Rowan, K. Tan</i>	
Operational modelling system development for short-term and seasonal streamflow forecasting services	657
<i>D. Shin, A. MacDonald, D. Kent, P. Hapuarachchi, K. Plastow, R. Laugesen, C. Pickett-Heaps, J. Lerat, A. Kabir, N. Tuteja</i>	
Ocean Inundation, climate change and policy planning – is the Flood approach suitable?	665
<i>R. Swan, D. Provis, P. Bicknell</i>	
Seamless Water Forecasting for Australia – vision, progress-to-date and challenges	674
<i>D. Jayasuriya, N. Tuteja, J. Perkins</i>	
Comparison of Flood Frequency Analysis by Annual Maximum and Peak over Threshold Approaches for Fitzroy River, Western Australia	682
<i>S. Herath, A. Basnayake, D. Coremans</i>	
Inland Flood Inundation Analysis in Derby Townsite, Australia	691
<i>D. Coremans, A. Basnayaka</i>	
Modelling the Effect of Tide and River Flow on Coastal Flood Inundation in Derby, Australia	700
<i>A. Basnayaka, D. Coremans</i>	
Methods for Managing Stage-Discharge Curves	708
<i>S. Hamilton</i>	
Modelling Impacts of Projected Future Climate on Floodplain Inundation in a Tropical River Catchment	717
<i>F. Karim, C. Petheram, C. Ticehurst, S. Marvanek, M. Hasan</i>	
The Controlling Factors in the Daily and Monthly Groundwater Recharge Estimation Using the Water Table Fluctuation Method	725
<i>X. Shi, J. Vaze, R. Crosbie</i>	

The effect of barrage flow manipulation on sediment deposition and scouring patterns at the River Murray mouth	733
<i>J. Fuller, M. Gibbs, J. Eaton</i>	
Using multi-objective optimization as a tool for discovery: Development of operating rules for Perth's IWSS	741
<i>G. Kuczera, L. Cui, C. Xu, C. Jeevaraj, M. Canci</i>	
Emulating Macquarie Marshes Hydrodynamics using River Basin Simulation Based on Network Flow Programming	750
<i>R. Borwell, L. Wen, J. Rodriguez, G. Kuczera</i>	
ALERT2™ transmission protocol, next generation real-time hydrologic monitoring standard	758
<i>J. Logan, R. Thompson, I. Gayl</i>	
Revisiting the Calibration of Conceptual Hydrological Models Using Newton-type Optimization Algorithms	766
<i>Y. Qin, G. Kuczera, D. Kavetski</i>	
Flash Flooding Risk Assessment in East Coast of Australia Using Instantaneous Unit Hydrographs	775
<i>N. Senevirathne, G. Willgoose</i>	
Operational Flood Forecasting in Tasmania: a series of case studies	783
<i>C. Velasco-Forero, C. Jolly</i>	

VOLUME 2

Kriging-Based Geostatistical Approach for Rain Gauge Network Design - A Case Study in the Middle Yarra River Catchment, Australia	791
<i>S. Adhikary, A. Yilmaz, N. Muttil</i>	
Assessment of Surface Water and Groundwater Sources for Establishing Safe Urban Water Supply System in Faridganj Municipality, Bangladesh	799
<i>S. Adhikary, T. Chaki, M. Rahman</i>	
Naughty thoughts about drought rarity	807
<i>D. Reed</i>	
Development of a hydrodynamic model for operation of the Komati and Lomati Rivers using the HEC-RAS Ungauged Lateral Inflows module	815
<i>M. Kleynhans, S. Dhlamini, V. Jonker, J. Visser</i>	
Tasmanian Irrigation – Developing Sustainable Irrigation Schemes	823
<i>N. Byrne, C. Murdoch</i>	
Tasmanian Irrigation – Incorporating Hydrology into the Design of Irrigation Schemes	828
<i>C. Murdoch, N. Byrne, A. Maynard</i>	
Exploiting climate state information in urban water supply planning and operation	833
<i>L. Zhang, G. Kuczera, A. Kiem</i>	
Community Pressure on Managing Stormwater in North Queensland Coastal Areas	841
<i>I. Brown</i>	
A Quantified Assessment of the Benefits of Rainfall Tanks in Flood Prone Urban Catchments	850
<i>D. Wood, A. Veldema</i>	
Transforming Flood Mapping Outputs to Decision Making Inputs	858
<i>A. Veldema, R. Swan</i>	
Implementing Australian Digital Forecast Database (ADFD) forecasts in Hydro Tasmania's Dynamic Inflow Forecasting System	863
<i>K. Robinson, S. Blundy, R. Parkyn</i>	
Whole of Basin Flood Modelling	871
<i>H. Betts, G. Milligan, R. Caird, A. Chapman</i>	
A new method for simulating stormwater networks in TUFLOW GPU	879
<i>D. Copelin, B. Regan</i>	
Hydrological and Water System Modelling to Inform an Options Assessment for Augmentation of Water Supply for Darwin	887
<i>C. Wilson, C. Seccull, T. Durling</i>	
SRTM data: when is it appropriate?	899
<i>E. Symons, A. Chapman</i>	
Developing a seasonal environmental watering tool	907
<i>A. Home, A. Costa, N. Boland, S. Kaur, J. Szemis, M. Stewardson</i>	
A Decision Making Framework for Incorporating Sea Level Rise into Local Planning	915
<i>H. Mirfenderesk, D. Carroll</i>	
Utilising the AWAP gridded rainfall dataset to enhance flood hydrology studies	923
<i>M. Scoriah, S. Lang, R. Nathan</i>	
Real-time water resources information used for water sharing in a Tasmanian irrigation community	932
<i>P. Smethurst, B. Morrison, A. Almeida, J. Carins, A. Davenport, G. Edeson, J. Ellison, D. Keast, D. Lemon, D. Penton, Q. Bai, P. Taylor, D. Worledge</i>	
WIRADA from the Inside – Successfully Delivering Water Research into Operations	940
<i>R. Argent, W. McDonald</i>	
Development of a Vegetation Dynamics Model for Freshwater Wetland Assessment in the Macquarie Marshes	948
<i>S. Sandi, J. Rodriguez, P. Saco, N. Saintilan, L. Wen, G. Kuczera</i>	
WIRADA – Australia Benefits from Water Research	956
<i>R. Argent</i>	

Change Detection: Effect of Wildfire on Water Quality	964
<i>M. Yu, T. Bishop, F. Ogtrop, C. Chafer</i>	
The Value of Water Monitoring	972
<i>S. Hamilton, M. Doyle, I. Cordery</i>	
Australian Water Resources Assessment Modelling System (AWRAMS)- informing water resources assessment and national water accounting	979
<i>A. Elmahdi, M. Hafeez, A. Smith, A. Frost, J. Vaze, D. Dutta</i>	
A model-based comparative study of catchment grouping for improved predictions in ungauged basins	987
<i>B. Wang, J. Vaze, Y. Zhang, J. Teng</i>	
A Cross-domain Standard for Representing Timeseries Data	995
<i>D. Lowe, P. Taylor, J. Tomkins, S. Cox, F. Guillaud, P. Hershberg, J. Lindsey, A. Ritchie, M. Utech</i>	
High-resolution soil moisture monitoring across Australia : Opportunities for farming applications	1002
<i>C. Rudiger, I. Dharssi, M. McCaskill, O. Merlin, A. Monerris, E. Morse-McNabb, L. Renzullo, D. Ryu, W. Wagner</i>	
A synoptic climatology of heavy rainfall in Hobart	1010
<i>P. Fox-Hughes, C. White</i>	
A history of drought in the Murray Darling Basin – factors influencing drought initiation	1018
<i>D. Verdon-Kidd, B. Scanlon, T. Ren, N. Fernando</i>	
A Review on the Impact of Dam Breach Assumptions on Final Study Outcomes	1026
<i>D. Niven, Z. Dore</i>	
The Bureau’s Operational AWRA Modelling System in the context of Australian landscape and hydrological model products	1035
<i>M. Hafeez, A. Smith, A. Frost, S. Srikanthan, A. Elmahdi, J. Vaze, I. Prosser</i>	
Denosing natural inflows to reservoirs using wavelet approach	1043
<i>P. Pokhrel, K. Robinson, F. Ling, J. Peterson</i>	
Testing the Statistics of Dynamically Downscaled Rainfall Data for the East Coast of NSW	1051
<i>N. Manage, N. Lockart, G. Willgoose, G. Kuczera, A. Kiem, A. Chowdhury</i>	
Application of the Monte Carlo Method to Estimate Warning Times to Critical Levels in a High Consequence Dam	1059
<i>W. Cohen, E. Birch, F. Ling, P. Pokhrel</i>	
Climate Change impacts on future water allocation in Tasmania	1067
<i>K. Adams, B. Graham, S. Gurung</i>	
Hydrological Drought Assessment in Northern Victoria, Australia	1075
<i>D. Mimrose, L. Jayasuriya, M. Bari, M. Bhuiyan</i>	
Developing a flood vulnerability index for a case study area in Melbourne	1083
<i>S. Rashetnia, A. Yilmaz, N. Muttil</i>	
A critical examination of new inflow and streamflow reconstructions for Tasmania, southeastern Australia	1091
<i>K. Allen, E. Cook, S. Allie, S. Nichols, R. Evans, F. Ling, G. Carson, P. Baker</i>	
The art of data interpretation: data challenges in the Pioneer Valley	1099
<i>C. Musgrove</i>	
Changes to the Intensity-Frequency-Duration (IFD) Design Rainfalls across Tasmania	1107
<i>C. Jolly, C. Velasco-Forero, J. Green</i>	
Updating a Real Time Flow Modelling System for Warragamba Dam	1115
<i>J. Martin, C. Styrdom, M. Abedin</i>	
Implementation of Source, the National Hydrologic Modelling Platform, by the MDBA	1123
<i>M. Bethune, A. Korn, A. Bishop, G. Adams, R. Carr</i>	
Future changes in Extreme East Coast Lows	1131
<i>J. Evans, A. Pepler, A. Luca, F. Ji, L. Alexander, D. Argueso</i>	
Decision support systems and environmental water management in the Murrumbidgee Valley	1139
<i>C. Mackay, N. Nachiappan, N. Nandakumar</i>	
Use of exploratory data analysis for cost effective monitoring of water quality data	1147
<i>A. Sutadian, N. Muttil, A. Yilmaz, C. Perera</i>	
A Decade of Observations of Local Water Cycle Management at the Buderim Escape Project	1155
<i>P. Coombes, G. Downs</i>	
Use of AWRA-L and AWRA-R in the Bioregional Assessment program	1163
<i>N. Viney, Y. Zhang, J. Arancibia, B. Wang, S. Marvanek, F. Karim, M. Gilfedder, S. Aryal, X. Shi, A. Yang, L. Peeters, R. Crosbie, J. Vaze</i>	
The Potential Impact of Acid Mine Drainage on Vaal River System Water Resource Availability	1171
<i>C. Talanda, P. Rooyen, J. Rademeyer</i>	
Envisioning Hydrometric Data to Enhance Management of River Systems	1180
<i>S. Banjavcic, J. Sloat, S. Bird, A. Schmidt</i>	
Water Resource Analysis of the Mokolo River System for Future Power Generation in South Africa	1188
<i>C. Talanda, B. Mwaka, C. Ntuli, P. Rooyen</i>	
SWIFT2: Advanced Software for Continuous Ensemble Short-term Streamflow Forecasting	1197
<i>J.-M. Perraud, J. Bennett, R. Bridgart, D. Robertson</i>	
Spatial Analysis of Australian Seasonal Rainfall Anomalies and their Relation to East Coast Lows on the Eastern-Seaboard	1205
<i>C. Twomey, A. Kiem</i>	
A Structured Procedure for Developing Sustainable Operating Plans for Complex Water Resources Systems	1213
<i>W. Godoy, A. Barton, B. Perera</i>	

Dewatering large volumes of high temperature water from underground mines	1221
<i>R. Markoski</i>	
The National Integrated Water Information System (NIWIS) for South Africa	1229
<i>A. Sambo, A. Pott, D. Kime, C. Strydom</i>	
Changed Design Temporal Patterns with Higher Temperatures	1237
<i>C. Wasko, A. Sharma</i>	
Relating observations to long term averages using Linked Data	1245
<i>G. Squire, P. Taylor, A. Haller, D. Percival, A. Woolf</i>	
An Efficient Sampling Method for Fast and Accurate Monte Carlo Simulations	1253
<i>F. Diermanse, D. Carroll, J. Beckers, R. Ayre</i>	
New Design Rainfalls for Australia	1261
<i>J. Green, C. Beesley, C. The, S. Podger</i>	
An Investigation of Integrating Monte Carlo Methods with Laurenson’s Method: A Case Study on Kingston, Tasmania	1269
<i>J. Klaric, D. Carlson, G. Fields</i>	
A new web based water information service leveraging the Australian Water Resources Assessment Modelling System	1276
<i>A. Smith, M. Hafeez, J. Rahman, S. Baron-Hay, D. Shipman</i>	
How and why are floods changing in Australia?	1284
<i>F. Johnson, C. White, A. Dijk, M. Ekstrom, J. Evans, D. Jakob, A. Kiem, M. Leonard, A. Rouillard, S. Westra</i>	
Updating the stormwater wetland guidance: trends, issues and future prospects for the sharing of industry best practice	1292
<i>G. Rua, J. Mullaly, A. O’Neill</i>	
Review of the Decision process for stormwater management in Western Australia	1300
<i>A. Bhandari, E. Monk, B. Till</i>	
The potential for irrigated agriculture in the gulf region of northern Australia –the role of science	1309
<i>C. Petheram, P. Stone, I. Watson</i>	
Droughts and pluvials in the Murray-Darling Basin over the past two and a half millennia	1317
<i>M. Ho, A. Kiem, D. Kidd</i>	
Integrated surface – ground water interaction approaches that can account for water quantity and quality transport	1325
<i>A. Herron, R. Cresswell, B. Barnett, V. Puech, L. Cetin</i>	
Assessing the Uncertainty in Future Runoff Estimates Due to Variability in Outputs of a Global Climate Model	1333
<i>M. Haque, A. Rahman, G. Kibria, F. Karim, D. Hagare</i>	
Improved visibility of data for Tarraleah Canal and the operational benefits	1340
<i>M. Ross, S. Byleveld</i>	
Using forecasting and prediction to inform decision making, improve flood routing and water resource system operations	1348
<i>D. Lovell, W. Wang</i>	
Area Wise Very High Resolution Soil Moisture Availability Estimation Using Heterogeneous Remote Sensing	1356
<i>R. Dutta, H. Mueller, A. Das, D. Smith</i>	
Wellington Catchment - Plantings Estate Restoration Project	1362
<i>G. Blake, B. Barr</i>	
Estimating Design Flood Magnitude for a Vietnamese Catchment	1370
<i>P. Thi, J. Ball</i>	
Who Owns the Water?	1380
<i>E. Mooring, W. Peirson</i>	
Designing stakeholder engagement processes for river basin management: using culture as an analytical tool	1388
<i>K. Daniell</i>	
Dynamic streamflow forecasts within an uncertainty framework for 100 catchments in Aus	1396
<i>J. Lerat, C. Pickett-Heaps, D. Shin, S. Zhou, P. Feikema, U. Khan, R. Laugesen, N. Tuteja, G. Kuczera, M. Thyer, D. Kavetski</i>	
Can You Afford to Ignore Open Source Software?	1404
<i>A. Nazarov</i>	
Condition Inspection of Rainwater Tanks in Melbourne	1413
<i>M. Moglia, K. Gan, N. Delbridge, G. Tjandraatmadja, E. Gulizia, C. Pollard, A. Sharma, S. Cook</i>	
Water Quality Management in an Integrated Water Supply System	1418
<i>D. Minson, F. Anwar</i>	
Multiday Design Rainfall (MDR) Curves	1425
<i>W. Meynink</i>	
Scientific foundations for a continuous ensemble flood and short-term forecasting service	1433
<i>D. Robertson, Q. Wang, J. Bennett, D. Shreshtha, M. Li, Y. Song, J. Perraud</i>	
Estimation of flood risk for linear transport infrastructure using continuous simulation modelling	1441
<i>P. Jordan, R. Nathan, W. Weeks, P. Waskiw, A. Herron, L. Cetin, G. Rogencamp, C. Stephens, C. Russell</i>	
A synoptic climatology of heavy rainfall in Hobart	1449
<i>P. Fox-Hughes, C. White</i>	
The Bureau’s Operational AWRA Modelling System in the context of Australian landscape and hydrological model products	1457
<i>M. Hafeez, A. Smith, A. Frost, S. Srikanthan, A. Elmahdi, J. Vaze, I. Prosser</i>	
Towards a Space-Time Observation System for Soil Moisture	1465
<i>M. Wimalathunge, T. Bishop, A. Horta</i>	

Optimisation of short-term planning of a water grid using Source	1472
<i>S. Ashbolt, S. Maheepala, B. Perera</i>	
An Assessment of use of the Ensemble Kalman Filter Methods in Real-Time Flow Forecasting for River Operation	1480
<i>N. Nandakumar, E. Jeremiah, N. Nachiappan</i>	
Flood magnitude, frequency and duration in river catchments in the Australian tropical region	1488
<i>F. Karim, M. Hasan, C. Petheram</i>	
Evaluation of AWRA-L for national drought and soil moisture monitoring	1496
<i>A. Frost, A. Ramchurn, M. Hafeez</i>	
The impact of East Coast Lows (ECL) on eastern Australia’s hydroclimate – do we need to consider sub-categories of ECLs?	1506
<i>A. Kiem, C. Twomey, N. Lockart, G. Willgoose, G. Kuczera</i>	
Monte Carlo Modelling in Decision Making	1514
<i>M. Babister, M. Retallick, M. Loveridge, I. Testoni, C. Varga, R. Craig</i>	
Improving Model Flows Using All Available Streamflow Data – Methodology, Assumptions, Benefits and Drawbacks	1523
<i>C. Egan</i>	
Water Data Online – A one-stop shop for water observations data in Australia	1530
<i>T. Boston, P. Sheahan, C. Michl</i>	
Parallel and Distributed Computation in Design Flood Estimation	1538
<i>P. Brady, J. Ball</i>	
Oakey Flood Forecast System	1545
<i>D. Danielsson, B. Boulton, M. Springolo, S. Moffett</i>	
Assessing techniques for reconstructing paleoclimate rainfall in the Murray-Darling Basin, Australia, in the absence of in situ archives	1553
<i>M. Ho, A. Kiem, D. Kidd</i>	
Establishing the hierarchy of influence of drivers of seasonal rainfall variability in South Australia to inform seasonal rainfall forecasting	1561
<i>C. Tozer, A. Kiem, D. Verdon-Kidd</i>	
The impact of East Coast Lows (ECL) on eastern Australia’s hydroclimate – do we need to consider sub-categories of ECLs?	1569
<i>A. Kiem, C. Twomey, N. Lockart, G. Willgoose, G. Kuczera</i>
