SSRC 2016 ANNUAL MEETING

Session 1A - TECHNICAL PRESENTATIONS: LATERAL TORSIONAL BUCKLING of BEAMS/GIRDERS in BRIDGES and BUILDINGS

- Lateral Torsional Buckling of Steel Bridge Girders.....1
Raphaël Thiébaud and Jean-Paul Lebet, Ecole Polytechnique Fédérale de Lausanne, Lausanne, Switzerland; André Beyer, CTICM, Saint-Aubin, France; Nicolas Boissonnade, University of Applied Sciences of Western Switzerland – Fribourg, Fribourg, Switzerland
- Stability Considerations for the Construction of Steel I-Girder Bridges Using the Incremental Launching Method.....20
Maria Emilia Ponton and Andres F. Robalino, ADSTREN, Quito, Ecuador; Telmo Andres Sanchez, Universidad San Francisco de Quito, Quito, Ecuador
- Lateral Torsional Buckling of Welded Wide Flange Beams.....39
Md. Imran Kabir and Anjan K. Bhowmick, Concordia University, Montreal, QC, Canada
- Influence of Plate Stiffener Geometry on LTB Capacity.....53
Piyachai Chansuk, Aaron G. Freidenberg, Craig E. Quadrato and Megan M. Rogers, United States Military Academy, West Point, NY

Session 1B - TECHNICAL PRESENTATIONS: STABILITY of THIN WALLED MEMBERS

- Experimental Studies on the Composite Action in Wood-Sheathed and Screw-Fastened Built-Up Cold-Formed Steel Columns.....63

David C. Fratamico, Shahabeddin Torabian and Benjamin W. Schafer, Johns Hopkins University, Baltimore, MD; Kim J. R. Rasmussen, University of Sydney, Sydney, Australia
- Stability of Buried Corrugated Metal Pipe....88
P. Graham Cranston and Matthew C. Richie, Simpson Gumpertz & Heger Inc., Waltham, MA; Luiz C. M. Vieira, Jr., University of Campinas, Campinas, Brazil
- Full Field Cold-Formed Steel Column Buckling Measurements with High Resolution Image-Based Reconstruction.....104
Abraham Lama Salomon and Christopher D. Moen, Virginia Polytechnic Institute and State University, Blacksburg, VA ; Dave Fratamico and Benjamin W. Schafer, Johns Hopkins University, Baltimore, MD
- Axial Stability of Columns Composed of Combined Sigma CFS.....120
Mohamed El Aghoury, Ain Shams University, Cairo, Egypt; Maged T. Hanna, Housing and Building National Research Center, Giza, Egypt; Essam A. Amoush, Higher Technological Institute, Tenth of Ramadan City, Egypt

Session 2A - TECHNICAL PRESENTATIONS: WEB STABILITY of I-SHAPED MEMBERS

- Shear Strength of Unstiffened Steel Plate Girders.....132
Aaron J. Daley, Brown + Kubican Structural Engineers, Lexington, KY; D. Brad Davis, University of Kentucky, Lexington, KY; Donald W. White, Georgia Institute of Technology, Atlanta, GA
- *Paper not Available* - Vertical, Bending, and Warping Stresses from Field Testing of Skewed Steel I-Girder Bridges
Jennifer McConnell, University of Delaware, Newark, DE
- Revisiting Web Compression Buckling for Wide Flange Sections.....148
Fatmir Menkulasi and Nahid Farzana; Louisiana Tech University, Ruston, LA; Christopher D. Moen and Matthew R. Eatherton, Virginia Polytechnic Institute and State University, Blacksburg, VA
- Improved Stability Design of Longitudinally Stiffened Plate Girders.....164
Lakshmi P. Subramanian and Donald W. White, Georgia Institute of Technology, Atlanta, GA

Session 2B - TECHNICAL PRESENTATIONS: SPECIAL TOPICS in STRUCTURAL STABILITY

- Dynamic Stability of Deep and Slender Wide-Flange Steel Columns – Full Scale Experiments.....183
Ahmed Elkady and Dimitrios G. Lignos, McGill University, Montreal, QC, Canada
- Finite Element Simulation of Buckling of Extended Beam-to-Girder Shear Tab Connections under Gravity Induced Shear Force.....203
Mohammad Motallebi, Dimitrios G. Lignos and Colin A. Rogers, McGill University, Montreal, QC, Canada
- Buckling of FRP Long Tubes Lined with Steel Pipe under External Pressure.....223
Hayder A. Rasheed, Kansas State University, Manhattan, KS
- Stability Design of Columns with Intermediate Gravity Loads.....232
Lip H. Teh, University of Wollongong, Wollongong, Australia; Benoit P. Gilbert, Griffith University, Gold Coast, Australia

SSRC 2016 ANNUAL STABILITY CONFERENCE

Session 1 - Stability at High Temperature Conditions

- Welcome to the 2016 SSRC Annual Stability Conference
Benjamin W. Schafer, Johns Hopkins University, Baltimore, MD
- Experimental Examination of Creep Buckling of Steel Columns in Fire.....248
Mohammed A. Morovat, Michael D. Engelhardt, Todd A. Helwig and Eric M. Taleff, University of Texas at Austin, Austin, TX
- Analysis and Design of Noncompact and Slender Rectangular CFT Columns Subjected to Ambient and Elevated Temperature.....262
Zhichao Lai and Amit H. Varma, Purdue University, West Lafayette, IN; Hua Yang, Harbin Institute of Technology, Harbin, China; Anil Agarwal, Indian Institute of Technology Hyderabad, Telangana, India

Session 2 - STABILITY OF BEAM-COLUMNS

- Elasto-Plastic Stress States and Reduced Flexural Stiffness of Steel Beam-Columns.....273
Barry T. Rosson, Florida Atlantic University, Boca Raton, FL
- Stability of Perforated Cold-Formed Steel Beam-Columns.....290
Yared Shifferaw and Trevor Rabare, Drexel University, Philadelphia, PA
- Finite Element Modeling Protocols and Parametric Analyses for Short Cold-Formed Steel Zee-Section Beam-Columns.....305
Shahabeddin Torabian and Benjamin W. Schafer, Johns Hopkins University, Baltimore, MD; Hamed Amouzegar and Mazdak Tootkaboni, University of Massachusetts, Dartmouth, MA
- An Introspective Assessment of Buckling and Second-Order Load-Deflection Analysis Based Design Calculations.....317
Woo Yong Jeong, Oğuzhan Toğay, Ajinkya M. Lokhande and Donald W. White, Georgia Institute of Technology, Atlanta, GA

Session 3 - STABILITY BRACING BEHAVIOR and CONSEQUENCES of INADEQUATE BRACING

- The Impact of Girder Geometry and Bracing Details on the Stability of Steel Tub Girder.....337
Yang Wang, Stalin Armijos Moya, John Kintz, Todd A. Helwig, Patricia Clayton, Michael D. Engelhardt, and Eric Williamson, University of Texas at Austin, Austin, TX
- Stiffened Shear Diaphragm Design Requirements for Bracing of Beams.....352

Colter E. Roskos, Paul Biju-Duval and Todd A. Helwig, University of Texas at Austin, Austin, TX

- Buckling and Design of Columns with Intermediate Elastic Torsional Restraint.....369
Hannah B. Blum and Kim J.R. Rasmussen, University of Sydney, Sydney, Australia
- Instability of Solar Power Tower Structures during Construction.....383
Cliff D. Bishop, Morgan Griffith and Brian M. McDonald, Exponent Inc., Menlo Park, CA

Session 4 - STABILITY of STEEL FRAMES and SYSTEMS

- Progressive Collapse Resistance of Composite Steel Frame Structures under Corner Column Removal.....397
Safa S. Masajedian and Robert G. Driver, University of Alberta, Edmonton, AB, Canada
- New Euler-type Progressive Collapse Curves for Steel Frames.....408
Simos Gerasimidis and Panos Pantidis, University of Massachusetts, Amherst, MA
- Dynamic Stability of Planar Frames Supported by Elastic Foundation.....422
Bulent N. Alemdar, Bentley Systems, Inc., Carlsbad, CA; Çiğdem Dinçkal, Çankaya University, Ankara, Turkey
- Effect of Girder Continuity and Imperfections on System Buckling of Narrow I-Girder Systems.....442
Liwei Han and Todd A. Helwig, University of Texas at Austin, Austin, Texas

Session 5 - ADVANCES and APPLICATIONS of GENERALIZED BEAM THEORY

- GBT-Based Buckling Analysis of Circular Cylindrical Steel Shells under Uniform External Pressure.....452
Cilmar Basaglia and Leandro Palermo Jr., University of Campinas, Campinas, Brazil; Dinar Camotim and Nuno Silvestre, Technical University of Lisbon, Lisbon, Portugal
- Recent Developments in the GBT-Based Numerical Modeling of Steel-Concrete Composite Beams.....471
Rodrigo Gonçalves, Universidade Nova de Lisboa, Caparica, Portugal; David Henriques and Dinar Camotim, Technical University of Lisbon, Lisbon, Portugal
- GBT-Based Buckling Analysis of Thin-Walled Steel Frames with Semi-Rigid Joints.....487
Enio Mesacasa Jr. and Maximiliano Malite, University of São Paulo, Brazil; Cilmar Basaglia, University of Campinas, Brazil; Dinar Camotim, Technical University of Lisbon, Lisbon, Portugal

Session 6 - IMPACT of IMPERFECTIONS on STABILITY

- The Effect of Geometric Imperfections on the Flexural Buckling Strength of Tapered Spirally Welded Steel Tubes.....513
Angelina Jay, Fariborz Mirzaie and Andrew Myers, Northeastern University, Boston, MA; Shahabeddin Torabian, Abdullah Mahmoud and Benjamin W. Schafer, Johns Hopkins University, Baltimore, MD; Eric Smith, Keystone Tower Systems, Westminster, CO
- Effect of Imperfections on Faceplate Slenderness Requirements for SC Walls.....524
Saahastaranshu R. Bhardwaj and Amit H. Varma, Purdue University, West Lafayette, IN; Kai Zhang, Westinghouse Electric Company, Pittsburgh, PA
- Influence of Imperfections on the Local Buckling Response of Hollow Structural Shapes.....535
Joanna Nseir, Marielle Hayeck, Elsy Saloumi and Nicolas Boissonnade, University of Applied Sciences of Western Switzerland – Fribourg, Fribourg, Switzerland

Session 7 - STABILITY of ANGLES, CHANNELS, and Z-SHAPED MEMBERS

- Short-to-Intermediate Slender Pin-Ended Cold-Formed Steel Equal-Leg Angle Columns: Experimental Investigation and DSM Design.....554
Alexandre Landesmann and Renato Cruz, Federal University of Rio de Janeiro, Brazil; Dinar Camotim and Pedro B. Dinis, Technical University of Lisbon, Lisbon, Portugal
- Discrete Bracing Displacement Compatibility Solutions for Cold-Formed C- and Z-Sections in Flexure in Torsion.....588

Michael W. Seek, Old Dominion University, Norfolk, VA

- Quantitative Determination of Elastic Buckling Modes for Cold-Formed Steel Members.....601
Robert S. Glauz, RSG Software, Inc., Lee's Summit, MO

Session 8 - ADVANCES in ANALYSIS and DESIGN FOR STABILITY

- Constrained Finite Element Method for the Modal Analysis of Thin-walled Members with Holes.....618
Sándor Ádány, Budapest University of Technology and Economics, Budapest, Hungary
- Elastic Buckling Mode Decomposition of Displacement, Strain Energy and Stress Components for Thin-Walled Structural Members.....638
Junle Cai and Cristopher D. Moen, Virginia Polytechnic Institute and State University, Blacksburg, VA
- *Paper not Available* - Energy Dissipation of Transversely-Loaded, Rubber-Filled Closed Sections
Konstantinos V. Belivanis and Todd A. Helwig, University of Texas at Austin, Austin, TX
- Local-Distortional-Global Interaction in Cold-Formed Steel Lipped Channel Columns: Behavior, Strength and DSM Design.....654
Pedro B. Dinis and Dinar Camotim, Technical University of Lisbon, Lisbon, Portugal; Ben Young, The University of Hong Kong, Hong Kong, China

Session 9 - BEEDLE PRESENTATION SESSION: PROFESSOR ROGER A. LaBOUBE

- Beedle Presentation: Cold-Formed Steel - Research to Practice.....688

Roger A. LaBoube, Missouri University of Science & Technology, Rolla, MO
- Distortional Failure of Cold-Formed Steel Beams under Uniform Bending: Behavior, Strength and DSM Design.....702
André Dias Martins, Dinar Camotim and Pedro B. Dinis, Technical University of Lisbon, Lisbon, Portugal; Alexandre Landesmann, Federal University of Rio de Janeiro, Brazil
- Impact of Fabrication Tolerances on Cold-Formed Steel Section Properties, Stability, and Strength.....729
Astrid Winther Fischer, Technical University of Denmark, Lyngby, Denmark; Benjamin W. Schafer, Johns Hopkins University, Baltimore, MD

Session 10 - STABILITY of CASTELATED BEAMS and TAPERED MEMBERS

- Collapse Analyses on Spirally Welded Tapered Tubes using EC3 Generated Imperfections.....745
Abdullah Mahmoud, Shahabeddin Torabian and Benjamin W. Schafer, Johns Hopkins University, Baltimore, MD; Angelina Jay, Fariborz Mirzaie and Andrew T. Myers, Northeastern University, Boston, MA; Eric Smith, Keystone Tower Systems, Westminster, CO
- Strong-Axis Flexural Buckling of Cellular and Castellated Members.....756
Delphine Sonck and Jan Belis, Ghent University, Ghent, Belgium
- Ultimate Strength of Tapered Bridge Girders under Combined Bending and Shear.....772
Metwally Abu-Hamd, Cairo University, Giza, Egypt; Farah El-Dib, Housing and Building National Research Center, Giza, Egypt

Session 11 - STABILITY of WALL SYSTEMS

- Cyclic Simulation of Cold-Formed Steel Shear Walls with Corrugated Steel Sheathing.....790
Mahsa Mahdavian and Cheng Yu, University of North Texas, Denton, TX; Wenying Zhang, Tongji University, Shanghai, China; Chu Ding and Cristopher D. Moen, Virginia Polytechnic Institute and State University, Blacksburg, VA
- Stiffness, Stability, and Strength of Floor-to-Wall Connections in Ledger-Framed Cold-Formed Steel Construction.....803
Deniz Ayhan and Benjamin W. Schafer, Johns Hopkins University, Baltimore, MD

- Nonlinear Analyses of Stiffened Steel Plate Shear Walls Considering Gravity Effects.....818
Qihong Zhao and Jing Qiu, Tianjin University, Tianjin, China
- Ultimate Strength of Expanded Metal Panels Subjected to Shear Loading.....834
Carlos Graciano, National University of Colombia, Bogotá, Colombia; Paulo Teixeira and Gabriela Martínez, Simón Bolívar University, Caracas, Venezuela

SSRC PAPERS IN THE AISC SESSION

- Automated Damage Detection and Structural Modelling with Laser Scanning.....842
Yujie Yan and Jerome F. Hajjar, Northeastern University, Boston, MA; Burcu Guldur, Hacettepe University, Ankara, Turkey; Luke Yoder, Varun Kasireddy, Daniel Huber, Sebastian Scherer and Burcu Akinci, Carnegie Mellon University, Pittsburgh, PA
- New Component-Based Model for Single-Plate Shear Connections with Pre-tension.....862
Jonathan M. Weigand, National Institute of Standards and Technology (NIST), Gaithersburg, MD
