1st International Conference on Formal Structures for Computation and Deduction

FSCD 2016, June 22–226, 2016, Porto, Portugal

Edited by

Delia Kesner

Brigitte Pientka

LIPIcs – Vol. 52 – FSCD'16 www.dagstuhl.de/lipics

Editors

Delia Kesner
IRIF, Université Paris-Diderot
Paris, France
beditor@uni-city.edu

Brigitte Pientka
School of Computer Science
Montreal, Canada
bpientka@cs.mcgill.ca

ACM Classification 1998
F. Theory of Computation, F.1 Computation by abstract devices, F.2 Analysis of algorithms and problem complexity, F.3 Logics and meanings of programs, F.4 Mathematical logic and formal languages, D.1 Programming techniques, D.2.4 Software/Program Verification, D.3 Programming languages, I.2.3 Deduction and Theorem Proving, I.2.4 Knowledge Representation Formalisms and Methods, E.1 Data Structures

ISBN 978-3-95977-010-1

Published online and open access by
Schloss Dagstuhl – Leibniz-Zentrum für Informatik GmbH, Dagstuhl Publishing, Saarbrücken/Wadern, Germany. Online available at http://www.dagstuhl.de/dagpub/978-3-95977-010-1.

Publication date
June, 2016

Contents

Preface
Delia Kesner and Brigitte Pientka 0:ix–0:x

Invited Talks

Compositional Compiler Verification for a Multi-Language World
Amal Ahmed 1:1–1:1

Coalgebras and Higher-Order Computation: a GoI Approach
Ichiro Hasuo 2:1–2:2

Teaching Foundations of Computation and Deduction Through Literate Functional Programming and Type Theory Formalization
Gérard Huet 3:1–3:2

Verified Analysis of Functional Data Structures
Tobias Nipkow 4:1–4:2

Regular Research Papers

Strong Normalization for the Parameter-Free Polymorphic Lambda Calculus Based on the Ω-Rule
Ryota Akiyoshi and Kazushige Terui 5:1–5:15

Normalisation by Evaluation for Dependent Types
Thorsten Altenkirch and Ambrus Kaposi 6:1–6:16

Minimal Paradefinite Logics for Reasoning with Incompleteness and Inconsistency
Ofer Arieli and Arnon Avron 7:1–7:15

Structural Interactions and Absorption of Structural Rules in BI Sequent Calculus
Ryuta Arisaka 8:1–8:18

Environmental Bisimulations for Delimited-Control Operators with Dynamic Prompt Generation
Andrés Aristizábal, Dariusz Biernacki, Sergueï Lenglet, and Piotr Polesiuk 9:1–9:17

Complexity of Acyclic Term Graph Rewriting
Martin Avanzini and Georg Moser 10:1–10:18

Nominal Narrowing
Mauricio Ayala-Rincón, Maribel Fernández, and Daniele Nantes-Sobrinho 11:1–11:17

Synthesis of Functional Programs with Help of First-Order Intuitionistic Logic
Marcin Benke, Aleksy Schubert, and Daria Walukiewicz-Chrząszcz 12:1–12:16

Classical Extraction in Continuation Models
Valentin Blot 13:1–13:17

Proving Correctness of Logically Decorated Graph Rewriting Systems
Jon Haël Brenas, Rachid Echahed, and Martin Strecker 14:1–14:15

1st International Conference on Formal Structures for Computation and Deduction (FSCD 2016).
Editors: Delia Kesner and Brigitte Pientka
Leibniz International Proceedings in Informatics
LIPICS Schloss Dagstuhl – Leibniz-Zentrum für Informatik, Dagstuhl Publishing, Germany

New Results on Morris's Observational Theory: The Benefits of Separating the Inseparable
Flavien Breuvart, Giulio Manzonetto, Andrew Polonsky, and Domenico Ruoppolo 15:1–15:18

Modular Focused Proof Systems for Intuitionistic Modal Logics
Kaustuv Chaudhuri, Sonia Marin, and Lutz Straßburger 16:1–16:18

The Independence of Markov's Principle in Type Theory
Thierry Coquand and Bassel Mannaa 17:1–17:18

On Undefined and Meaningless in Lambda Definability
Fer-Jan de Vries 18:1–18:15

The Intersection Type Unification Problem
Andrej Dudenhefner, Moritz Martens, and Jakob Rehof 19:1–19:16

Computing Connected Proof(-Structure)s From Their Taylor Expansion
Giulio Guerrieri, Luc Pellissier, and Lorenzo Tortora de Falco 20:1–20:18

Strongly Normalising Cyclic Data Computation by Iteration Categories of Second-Order Algebraic Theories
Makoto Hamana 21:1–21:18

Non-ω-Overlapping TRSs are UN
Stefan Kahrs and Connor Smith 22:1–22:17

Complexity Hierarchies and Higher-Order Cons-Free Rewriting
Cynthia Kop and Jakob Grue Simonsen 23:1–23:18

Weighted Relational Models for Mobility
James Laird 24:1–24:15

Focusing in Orthologic
Olivier Laurent 25:1–25:17

Functions-as-Constructors Higher-Order Unification
Tomer Libal and Dale Miller 26:1–26:17

Homological Computations for Term Rewriting Systems
Philippe Malbos and Samuel Mimram 27:1–27:17

Reversible Term Rewriting
Naoki Nishida, Adrián Palacios, and Germán Vidal 28:1–28:18

Certifying Confluence of Almost Orthogonal CTRSs via Exact Tree Automata Completion
Christian Sternagel and Thomas Sternagel 29:1–29:16

Category Theory in Coq 8.5
Amin Timany and Bart Jacobs 30:1–30:18

Formal Languages, Formally and Coinductively
Dmitriy Traytel 31:1–31:17

Normalisation by Random Descent
Vincent van Oostrom and Yoshihito Toyama 32:1–32:18

System Descriptions

Ground Confluence Prover Based on Rewriting Induction
Takahito Aoto and Yoshihito Toyama 33:1–33:12

Globular: An Online Proof Assistant for Higher-Dimensional Rewriting
Krzysztof Bar, Aleks Kissinger, and Jamie Vicary 34:1–34:11

Interaction Automata and the ia2d Interpreter
Stéphane Gimenez and David Obwaller 35:1–35:11

Automating the First-Order Theory of Rewriting for Left-Linear Right-Ground Rewrite Systems
Franziska Rapp and Aart Middeldorp 36:1–36:12
