TABLE OF CONTENTS

CRUDE/VACUUM DISTILLATION & COKING.....	5
Introduction to Session	5
Introduction of Panelists	6
Safety	7
Question 53: What are your Best Practices used to minimize the time needed to prepare a crude storage tank for safe entry?	7
Question 53: Answer Book Responses	9
Safety	11
Question 54: What are your options and Best Practices for routing liquids in a desalter pressure relief scenario if routed to crude fractionator? If routed to crude fractionator, how should one avoid damage caused by water?	11
Question 54: Answer Book Responses	21
Desalting/Wastewater Treatment Plant.....	24
Question 55: What strategies do you employ to purge solids from recovered oil at the wastewater treatment plant (WWTP) to avoid recycling solids back to the crude unit?	24
Question 55: Answer Book Responses	28
Crude Distillation.....	31
Question 56: Light slop oils are frequently collected and routed back to the crude unit with fresh crude. In a capacity limited crude unit, this results in backing down crude rate. What are your considerations for injecting slop/recovered oils into process units that avoid backing out crude feed?	31
Question 56: Answer Book Responses	36
Desalter	38
Question 57: What are the desalter conditions that may require acidification? If needed, what types of acids do you use and what issues arise downstream?	38
Question 57: Answer Book Responses	40
Wastewater Treatment Plants	45
Question 58: What issues have you seen in your wastewater treatment plant caused by crudes containing biocides? If so, what parameters have you established to control these effects?	45
Question 58: Answer Book Responses	46
Crude Preheat.....	50
Question 59: What is your experience with hot preheat train and heater fouling attributed to waxy crudes? What methods can be used to identify fouling that is specific to wax in crudes?	50

Question 59: Answer Book Responses	52
Crude Distillation.....	54
Question 60: Please describe your experience with the occurrence of phosphorus and barium fouling in the distillate section of the crude tower. What steps have you taken to identify and mitigate the problem?	54
Question 60: Answer Book Responses	61
Question 61: What are the advantages and disadvantages of preflash/pre-topping columns in crude units in terms of operational flexibility to process different API crudes? Please comment on overall energy efficiency and reliability (corrosion).....	65
Question 61: Answer Book Responses	70
Vacuum Distillation	74
Question 62: When increasing the vacuum tower cutpoint, what measures have you employed to mitigate the impact of chlorides in the overhead diesel or light vacuum gas oil sections of the vacuum tower?.....	74
Question 62: Answer Book Responses	77
Vacuum Distillation/Coker	79
Question 63: What type of facilities have you used to cool hot vacuum residue going to storage to avoid plugging problems and facilitate reprocessing?	79
Question 63: Answer Book Responses	84
Coker.....	85
Question 64: What are acceptable makeup water streams that can be used for coke cutting which will not affect the coke quality?	85
Question 64: Answer Book Responses	85
Question 65: Discuss operating conditions and economic drivers to produce maximum diesel from the coker.....	86
Question 65: Answer Book Responses	88
Question 66: Concerning new regulations for lower coke drum pressure prior to opening, what changes will you make?	89
Question 66: Answer Book Responses	91
Closing Remarks	92
TOWN HALL MEETINGS.....	93
Town Hall – Harold Eggert.....	93
Town Hall – Bill Cates	93
Town Hall – Roger Pelham.....	94
Town Hall – Jeff Zurlo	94
