**41st Annual Review of Progress in Quantitative Nondestructive Evaluation  
Volume 34**

**Table of Contents**

<b>Preface: 41<sup>st</sup> Review of Progress in Quantitative Nondestructive Evaluation</b> Leonard J. Bond and Dale E. Chimenti	1
<b>SELECTED PAPERS</b>	
<b>Sparsity regularized image reconstruction</b> Alfred Hero	3
<b>Acoustic imaging with time reversal methods: From medicine to NDT</b> Mathias Fink	13
<b>Ultrasonic imaging of materials under unconventional circumstances</b> Nico Felicien Declercq, Peter McKeon, Yaacoubi Slah, Jingfei Liu, and Anurupa Shaw	24
<b>Non-destructive evaluation of fiber-reinforced composites with a fast 2D fiber-optic laser-ultrasound scanner</b> Ivan Pelivanov, Takashi Buma, Jinjun Xia, Chen-Wei Wei, Alex Shtokolov, and Matthew O'Donnell	43
<b>Summary of NDE of additive manufacturing efforts in NASA</b> Jess M. Waller, Regor L. Saulsberry, Bradford H. Parker, Kenneth L. Hodges, Eric R. Burke, and Karen M. Taminger	51
<b>Damage imaging using Lamb waves for SHM applications</b> Tadeusz Stepinski, Łukasz Ambroziński, and Tadeusz Uhl	63
<b>Computational NDE as an integrated component of ICME</b> James L. Blackshire and Adam Pilchak	75
<b>Ultrasonic linear array validation via concrete test blocks</b> Kyle Hoegh, Lev Khazanovich, Chris Ferraro, and Dwight Clayton	83

<b>The benefits of using time-frequency analysis with synthetic aperture focusing technique</b> Austin Albright and Dwight Clayton	94
<b>Three-dimensional ultrasonic imaging of concrete elements using different SAFT data acquisition and processing schemes</b> Martin Schickert	104
<b>GPR measurements of attenuation in concrete</b> David Eisenmann, Frank J. Margetan, and Brittney Pavel	114
<b>Fast Lamb wave energy shift approach using fully contactless ultrasonic system to characterize concrete structures</b> Suyun Ham and John S. Popovics	122
<b>Effect of surface unevenness on non-contact surface wave measurements using a rolling microphone array</b> Henrik Bjurström and Nils Ryden	128
<b>Measurement and fitting techniques for the assessment of material nonlinearity using nonlinear Rayleigh waves</b> David Torello, Jin-Yeon Kim, Jianmin Qu, and Laurence J. Jacobs	136
<b>A study of internal structure in components made by additive manufacturing process using 3 D X-ray tomography</b> K. Raguvarun, Krishnan Balasubramaniam, Prabhu Rajagopal, Suresh Palanisamy, Romesh Nagarajah, Nicholas Hoye, Dominic Curiri, and Ajay Kapoor	146
<b>Overview of additive manufacturing activities at MTU aero engines</b> Joachim Bamberg, Karl-Heinz Dusel, and Wilhelm Satzger	156
<b>Process monitoring of additive manufacturing by using optical tomography</b> Guenter Zenzinger, Joachim Bamberg, Alexander Ladewig, Thomas Hess, Benjamin Henkel, and Wilhelm Satzger	164
<b>Monitoring system for the quality assessment in additive manufacturing</b> Volker Carl	171
<b>Thermographic process monitoring in powderbed based additive manufacturing</b> Harald Krauss, Thomas Zeugner, and Michael F. Zaeh	177

<b>Ultrasonic online monitoring of additive manufacturing processes based on selective laser melting</b> Hans Rieder, Alexander Dillhöfer, Martin Spies, Joachim Bamberg, and Thomas Hess	184
<b>Designing of sparse 2D arrays for Lamb wave imaging using coarray concept</b> Łukasz Ambroziński, Tadeusz Stepinski, and Tadeusz Uhl	192
<b>Coherent, data-driven Lamb wave localization under environmental variations</b> Joel B. Harley, Chang Liu, Irving J. Oppenheim, David W. Greve, and José M.F. Moura	202
<b>Separation of applied stress and temperature effects on ultrasonic guided wave phase</b> Oleg Lobkis, Chris Larsen, and Richard Roth II	211
<b>Resonant phenomena of circumferential SH waves converted from T(0,1) mode guided waves at non-axisymmetric defects</b> Hideo Nishino, Saygo Ishii, and Takashi Furukawa	221
<b>Guided wave attenuation in pipes buried in sand</b> Eli Leinov, Peter Cawley, and Michael JS Lowe	227
<b>High frequency guided waves for hidden fatigue crack growth monitoring in multi-layer aerospace structures</b> Henry Chan and Paul Fromme	237
<b>Experimental study of A0 Lamb wave tomography</b> Matthias Seher, Peter Huthwaite, Michael Lowe, and Peter Cawley	245
<b>SURFACE WAVES</b>	
<b>Quantitative diagnostics of multilayered composite structures with ultrasonic guided waves</b> Gheorghe Bunget, Fritz Friedersdorf, and Jeong K. Na	254
<b>A study on closed form solution of guided waves scattering amplitude by the use of reciprocity theorem in the cylindrical coordinate</b> Jaesun Lee, Younho Cho, and Jan D. Achenbach	262
<b>Thickness measurements of sub-millimetre thickness foils using Lamb wave dispersion</b> K. L. McAughey, R. S. Edwards, M. D.G Potter, and S. Dixon	265
<b>A study on laser-based ultrasonic technique by the use of guided wave tomographic imaging</b> Junpil Park, Juyoung Lim, Younho Cho, and Sridhar Krishnaswamy	274

## THERMOGRAPHY

<b>Determination of flaw size from thermographic data</b> William P. Winfree, Patricia A. Howell, and Joseph N. Zalameda	280
<b>Thermographic inspection of pipes, tanks, and containment liners</b> Jeremy B. Renshaw, James R. Lhota, Nathan Muthu, and Steven M. Shepard	290
<b>Thermal and destructive interrogation of ceramic matrix composites</b> Greg Ojard, Douglas Doza, Zhong Ouyang, Paul Angel, Imelda Smyth, Unni Santhosh, Jalees Ahmad, and Yasser Gowayed	298
<b>Scanning induction thermography (SIT) for imaging damages in carbon-fibre reinforced plastics (CFRP) components</b> K. Renil Thomas and Krishnan Balasubramaniam	306
<b>Effects of mounting and exciter coupling on vibrothermographic NDE</b> Jyani S. Vaddi, Gabriel Murray, and Stephen D. Holland	314
<b>Ultrasonic vibrothermography using low-power actuators: An impact damage detection case study</b> B. Lamboul, F. Passilly, J.-M. Roche, and D. Balageas	319
<b>EDDY CURRENT</b>	
<b>NDT inspections exploiting invariances on scale transformations</b> Helena Geirinhas Ramos, João Torres, Artur L. Ribeiro, and João Rebello	327
<b>Quantitatively analyzing dielectrical properties of resins and mapping permittivity variations in CFRP with high-frequency eddy current device technology</b> Simone Gäbler, Henning Heuer, Gert Heinrich, and Richard Kupke	336
<b>Developments in near electrical resonance signal enhancement (NERSE) eddy-current methods</b> Robert Hughes and Steve Dixon	345
<b>Effect of varying inspection parameters in crack depth measurements using potential drop method</b> David Utrata and Darrel A. Enyart	353

## ELECTROMAGNETICS–EDDY CURRENT

<b>Determination of crack depth in aluminum using eddy currents and GMR sensors</b> A. Lopes Ribeiro, D. Pasadas, H. G. Ramos, and T. Rocha	361
<b>EC-GMR array with rotating current excitation for multilayered riveted structures inspection</b> Gerges Dib, Guang Yang, Chaofeng Ye, Antonello Tamburrino, Lalita Udpa, and Satish S. Udpa	368
<b>Role of interface conditions in low frequency electromagnetic testing of multilayer structures</b> Aaron J. Cherry, Matthew R. Cherry, John C. Aldrin, Eric Lindgren, Harold A. Sabbagh, Thomas Boehnlein, Ryan Mooers, and Jeremy Knopp	377
<b>Realistic split D differential probe model validation</b> Ryan D. Mooers, John C. Aldrin, and Jeremy S. Knopp	385
<b>Model the effects of core/coil size and defect length on eddy current response</b> Ryan D. Mooers, John C. Aldrin, and Jeremy S. Knopp	395
<b>Optimization of coil design for near uniform interrogating field generation</b> Z. Su, A. Efremov, M. Safdarnejad, A. Tamburrino, L. Udpa, and S. S. Udpa	405
<b>High-frequency eddy current based impedance spectroscopy for characterization of the percolation process of wet conductive coatings</b> Iryna Patsora, Susanne Hillmann, Henning Heuer, Bryan C. Foos, and Juan G. Calzada	414
<b>Dynamic ECA lift-off compensation</b> Benoit Lepage and Charles Brillon	424
<b>Eddy current sensor for in-situ monitoring of swelling of Li-ion prismatic cells</b> Yuri Plotnikov, Jason Karp, Aaron Knobloch, Chris Kapusta, and David Lin	434
<b>Dielectric characterization of high-performance spaceflight materials</b> Nathan Kleppe, Mark A. Nurge, and Nicola Bowler	443
<b>MUSIC imaging method for electromagnetic inspection of composite multi-layers</b> Giacomo Rodeghiero, Ping-Ping Ding, Yu Zhong, Marc Lambert, and Dominique Lesselier	453

<b>Electrical conductivity and magnetic permeability measurement of case hardened steels</b> Yong Tian	462
<b>Evaluation of material microstructure changes in high speed tool steel by the non-collinear wave mixing technique with MST(magnetostrictive transducer)</b> Jeongseok Choi, Dong Jin Lee, and Younho Cho	470
<b>A fast integral equation model with a dedicated Green's kernel for eddy-current inspection of fastener holes</b> Konstantinos Pipis, Anastassios Skarlatos, Dominique Lesselier, and Theodoros Theodoulidis	477
<b>Demonstration of model-based inversion of electromagnetic signals for crack characterization</b> Eric B. Shell, John C. Aldrin, Harold A. Sabbagh, Elias Sabbagh, R. Kim Murphy, Siamack Mazdiyasi, and Eric A. Lindgren	484
<b>Alternating current potential drop for measuring the case depth of hardened steel</b> Mohammad R. Qudus, Yuan Ji, and John R. Bowler	494
<b>TERAHERTZ NDE</b>	
<b>Design and development of an electrically-controlled beam steering mirror for microwave tomography</b> A. Tayebi, J. Tang, P. Roy Paladhi, L. Udpa, and S. Udpa	501
<b>Class of backpropagation techniques for limited-angle reconstruction in microwave tomography</b> P. Roy Paladhi, A. Sinha, A. Tayebi, L. Udpa, and S. Udpa	509
<b>RADIOGRAPHY</b>	
<b>Toward practical 3D radiography of pipeline girth welds</b> Casper Wassink, Martijn Hol, Arjan Flikweert, and Philip van Meer	519
<b>X-ray tomographic in-service inspection of girth welds - The European project TomoWELD</b> Uwe Ewert, Bernhard Redmer, David Walter, Kai-Uwe Thiessenhusen, Carsten Bellon, P. Ian Nicholson, Alan L. Clarke, and Klaus-Peter Finke-Härkönen	525
<b>Industrial applications of automated X-ray inspection</b> N. Shashishekar	534
<b>Active investigation of material damage under load using micro-CT</b> Megha Navalgund, Suraj Zunjarrao, Debasish Mishra, and V. Manoharan	545

<b>Recent progress in 3-D imaging of sea freight containers</b> Theobald Fuchs, Tobias Schön, Jonas Dittmann, Frank Sukowski, and Randolph Hanke	556
<b>Observer POD for radiographic testing</b> Daniel Kanzler, Uwe Ewert, Christina Müller, and Jorma Pitkänen	562
<b>Alkali halide microstructured optical fiber for X-ray detection</b> S. L. DeHaven, R. A. Wincheski, and S. Albin	571
<b>Fast model of electron transport for radiographic spectrum simulation</b> A. Deresch, C. Bellon, G.-R. Jaenisch, and U. Ewert	579
<b>Fast and low-dose computed laminography using compressive sensing based technique</b> Sajid Abbas, Miran Park, and Seungryong Cho	586
<b>Quantitative impact characterization of aeronautical CFRP materials with non-destructive testing methods</b> Denis Kiefel, Rainer Stoessel, and Christian Grosse	591
<b>Detectability limitations with 3-D point reconstruction algorithms using digital radiography</b> Erik Lindgren	599
<b>GUIDED WAVES</b>	
<b>Assessment of ultrasonic NDT methods for high speed rail inspection</b> Jianzheng Cheng and Leonard J. Bond	605
<b>Field trials results of guided wave tomography</b> Arno Volker, Tim van Zon, and Edwin van der Leden	615
<b>Multimode dispersion compensated pulse-echo guided wave inspection</b> R. A. Roberts, E. Peters, and D. E. Chimenti	622
<b>PZT guided waves sensor permanently attached on multi-wire AWG12 cables used as communication medium</b> Gianpiero Trane, Rito Mijarez, Ricardo Guevara, and Arturo Baltazar	631
<b>Adhesive defect detection in composite adhesive joints using phased array transducers</b> Baiyang Ren and Cliff J. Lissenden	640

<b>Guided wave propagation in anisotropic materials and the practical implications for operating point selection</b> O. Putkis and A. J. Croxford	649
<b>Excitability of guided waves in composites with PWAS transducers</b> Yanfeng Shen and Victor Giurgiutiu	658
<b>Axial guided wave technique for rapid inspection of the “Noodle” regions in a stiffened composite component</b> Prabhakaran Manogharan, Prabhu Rajagopal, and Krishnan Balasubramaniam	668
<b>Guided-waves technique for inspecting the health of wall-covered building risers</b> Peter W. Tse, J. M. Chen, and X. Wan	676
<b>Quasi-Rayleigh waves in butt-welded thick steel plate</b> Tuncay Kamas, Victor Giurgiutiu, and Bin Lin	686
<b>Numerical analysis of leaky Lamb wave propagation using a semi-analytical finite element method</b> Takahiro Hayashi and Daisuke Inoue	695
<b>Validation of hybrid SAFE-FE guided wave scattering predictions in rail</b> Craig S. Long and Philip W. Loveday	703
<b>Feature-guided waves (FGW) in plate structures with 90° transverse bends</b> Xudong Yu, Prabhakaran Manogharan, Zheng Fan, and Prabhu Rajagopal	713
<b>Interaction of Lamb waves with geometric discontinuities: An analytical approach compared with FEM</b> Banibrata Poddar and Victor Giurgiutiu	721
<b>Guided wave simulation in plates using split-domain FEM approach</b> S. R. Sandeep Kumar, Sri Harsha Reddy K, Krishnan Balasubramaniam, and Ganesan N	731
<b>Dispersion curves for guided elastic waves in multi-layered anisotropic media generated with the spectral method</b> F. Hernando Quintanilla, M. Lowe, and R. Craster	739

<b>Optimal computation of guided wave propagation and scattering in pipeworks comprising elbows: Numerical and experimental validations and parametric studies</b>	
M. El Bakkali, A. Lhémy, B. Chapuis, F. Berthelot, and S. Grondel	746
<b>1D profiling using highly dispersive guided waves</b>	
Arno Volker, Tim van Zon, Daniel Enthoven, and Wesley Verburg	754
<b>Helical path separation for guided wave tomography</b>	
P. Huthwaite and M. Seher	761
<b>Large scale implementation of guided wave based broken rail monitoring</b>	
Francois A. Burger, Philip W. Loveday, and Craig S. Long	771
<b>Monitoring of corrosion damage using high-frequency guided ultrasonic waves</b>	
D. Chew and P. Fromme	777
<b>Crack depth profiling using guided wave angle dependent reflectivity</b>	
Arno Volker, Lotfollah Pahlavan, and Gerrit Blacquiere	785
<b>On the measurement of guided wavefields via air-coupled ultrasonic transducers</b>	
Jennifer E. Michaels and Thomas E. Michaels	792
<b>Incremental scattering of guided waves from a notch originating at a through-hole</b>	
Xin Chen, Jennifer E. Michaels, and Thomas E. Michaels	799
<b>MATERIALS CHARACTERIZATION</b>	
<b>Characterization of 3D rapid prototyped polymeric material by ultrasonic methods</b>	
Richard Livings, Vinay Dayal, and Dan Barnard	807
<b>Damage localization using ultrasonic methods in multi-layered metallic structures</b>	
Deborah Hopkins, Marvin Datuin, John Aldrin, David Forsyth, Mark Warchol, and Lyudmila Warchol	817
<b>Challenges in the separation and analysis of scattered waves in angle-beam wavefield data</b>	
Alexander J. Dawson, Jennifer E. Michaels, and Thomas E. Michaels	827

<b>Resonance ultrasound spectroscopy forward modeling and inverse characterization of nickel-based superalloys</b>	
Eric Biedermann, Leanne Jauriqui, John C. Aldrin, Brent Goodlet, Tresa Pollock, Chris Torbet, and Siamack Mazdiyasn	835
<b>Case study on NDE characterization metrics for optimization, validation and quality control</b>	
John C. Aldrin, Charles Annis, Harold A. Sabbagh, Eric B. Shell, Jeremy Knopp, and Eric A. Lindgren	845
<b>Ultrasonic wall loss monitoring of rough surfaces</b>	
Attila Gajdacs and Frederic Cegla	856
<b>Structural health monitoring of localized internal corrosion in high temperature piping for oil industry</b>	
Thomas J. Eason, Leonard J. Bond, and Mark G. Lozev	863
<b>An estimation method for echo signal energy of pipe inner surface longitudinal crack detection by 2-D energy coefficients integration</b>	
Shiyuan Zhou, Haoyu Sun, Chunguang Xu, Xiandong Cao, Liming Cui, and Dingguo Xiao	874
<b>Relative measurement of acoustic nonlinear parameters and comparison of sensitivity to thermal aging</b>	
Hogeon Seo, Gang Ren, Jongbeom Kim, and Kyung-Young Jhang	879
<b>Portable wireless ultrasonic systems for remote inspection</b>	
C. H. Zhong, A. J. Croxford, and P. D. Wilcox	883
<b>Ultrasound imaging of stress corrosion cracking</b>	
Lars Horchens, Casper Wassink, and Harvey Haines	891
<b>Economics of online structural health monitoring of wind turbines: Cost benefit analysis</b>	
Jeremy Van Dam and Leonard J. Bond	899
<b>MICROSTRUCTURE</b>	
<b>The effect of martensitic stainless steel microstructure on the ultrasonic inspection of turbine runner joints</b>	
Hamid Habibzadeh Boukani, Samir Mourad Chentouf, Martin Viens, Antoine Tahan, and Martin Gagnon	909

<b>Potential drop strain measurement for creep monitoring</b> Joseph Corcoran, Catrin M. Davies, Peter B. Nagy, and Peter Cawley	917
<b>Voigt, Reuss, Hill, and self-consistent techniques for modeling ultrasonic scattering</b> Christopher M. Kube and Joseph A. Turner	926
<b>Multimode RF sensor for moisture analysis of a high pressure gasket material</b> G. Bogdanov, J. Wiggins, K. Bertagnolli, and R. Ludwig	935
<b>Nondestructive characterization of pipeline materials</b> Brady J. Engle, Lucinda J. Smart, and Leonard J. Bond	943
<b>PHASED ARRAYS</b>	
<b>Optimization of array element pitch for NDE applications</b> Paul D. Wilcox	952
<b>A comparison of 1D and 1.5D arrays for imaging volumetric flaws in small bore pipework</b> T. S. Barber, P. D. Wilcox, and A. D. Nixon	962
<b>Comparison of ultrasonic image features with echodynamic curves for defect classification and characterization</b> Jie Zhang, Sam Wedge, Allan Rogerson, and Bruce Drinkwater	970
<b>Optimization of ultrasonic array inspections using an efficient hybrid model and real crack shapes</b> Maria V. Felice, Alexander Velichko, Paul D. Wilcox, Tim Barden, and Tony Dunhill	978
<b>Investigation of ultrasonic scattering matrix extraction of a surface defect using ultrasonic arrays</b> Peng Yu, Jie Zhang, Tie Gang, and Bruce Drinkwater	987
<b>Depth measurement of small surface-breaking cracks using the Half-Skip Total Focusing Method</b> Maria V. Felice, Alexander Velichko, Paul D. Wilcox, and Christopher J. L. Lane	994
<b>Full-matrix capture with a customizable phased array instrument</b> Gavin Dao, Dominique Braconnier, and Matt Gruber	1001
<b>A finite element model investigation of ultrasonic array performance for inspecting polycrystalline materials</b> A. Van Pamel, P. Huthwaite, C. R. Brett, and M. J. S. Lowe	1007

<b>Development of a pseudo phased array technique using EMATs for DM weld testing</b> Adam C. Cobb, Jay L. Fisher, Nobuyuki Shiokawa, Toshiaki Hamano, Ryoichi Horikoshi, and Nobukazu Ido	1015
<b>Processing ultrasonic inspection data from multiple scan patterns for turbine rotor weld build-up evaluations</b> Xuefei Guan, El Mahjoub Rasselkorde, Waheed Abbasi, and S. Kevin Zhou	1023
<b>An initial investigation into pseudo-coloring for ultrasonic NDE of polycrystalline materials</b> A. Van Pamel, C. R. Brett, and M. J. S. Lowe	1031
<b>Adaptive ultrasonic imaging with the total focusing method for inspection of complex components immersed in water</b> L. Le Jeune, S. Robert, P. Dumas, A. Membre, and C. Prada	1037
<b>COMPOSITES</b>	
<b>Simulation of ultrasonic inspection of curved composites using a hybrid semi-analytical/numerical code</b> Frédéric Reverdy, Steve Mahaut, Nicolas Dominguez, and Philippe Dubois	1047
<b>Ultrasonic defect evaluation using DGS-diagrams modified for the inspection of anisotropic composite materials</b> Martin Spies, Hans Rieder, and Alexander Dillhöfer	1056
<b>Guided waves for the detection and classification of impact damage in composites</b> Bibi Intan Suraya Murat, Pouyan Khalili, and Paul Fromme	1064
<b>Feasibility of PZT ceramics for impact damage detection in composite structures</b> Gerges Dib, Ermias Koricho, Oleksii Karpenko, Mahmood Haq, Lalita Udpa, and Satish S. Udpa	1072
<b>Impact location estimation in anisotropic structures</b> Jingru Zhou, V. John Mathews, and Daniel O. Adams	1081
<b>Progress on automated data analysis algorithms for ultrasonic inspection of composites</b> John C. Aldrin, David S. Forsyth, and John T. Welter	1091
<b>Multitechnique monitoring of fatigue damage in adhesively bonded composite lap-joints</b> Oleksii Karpenko, Ermias Koricho, Anton Khomenko, Gerges Dib, Mahmoodul Haq, and Lalita Udpa	1102

<b>Parametric study using modal analysis of a bi-material plate with defects</b> S. Esola, I. Bartoli, S. E. Horner, J. Q. Zheng, and A. Kotsos	1112
<b>Meso-scale imaging of composite materials</b> R. Grandin and J. Gray	1121
<b>Feasibility of detecting fatigue damage in composites with coda waves</b> Richard Livings, Vinay Dayal, and Dan Barnard	1130
<b>Ultrasonic properties characterization and PAUT inspection of I-shaped CFRP component</b> Zhongbing Luo, Huanqing Cao, and Li Lin	1140
<b>A comparative evaluation of piezoelectric sensors for acoustic emission-based impact location estimation and damage classification in composite structures</b> Bibhisha Uprety, Sungwon Kim, V. John Mathews, and Daniel O. Adams	1146
<b>Detection of disbonds in foam composite assemblies using flexural waves and shearography</b> B. Lamboul, O. Giraud, and D. Osmont	1155
<b>Guided wave energy trapping to detect hidden multilayer delamination damage</b> Cara A. C. Leckey and Jeffrey P. Seebo	1162
<b>Model-based damage evaluation of layered CFRP structures</b> Rafael Munoz, Nicolas Bochud, Guillermo Rus, Laura Peralta, Juan Melchor, Juan Chiachío, Manuel Chiachío, and Leonard J. Bond	1170
<b>Numerical simulation and experimental validation of Lamb wave propagation behavior in composite plates</b> Sungwon Kim, Bibhisha Uprety, V. John Mathews, and Daniel O. Adams	1178
<b>An eddy-current model for three-dimensional nondestructive evaluation of advanced composites</b> Harold A. Sabbagh, R. Kim Murphy, and Elias H. Sabbagh	1186
<b>Comparison of results from different NDE techniques from ceramic matrix composites with varying porosity levels</b> Imelda Smyth, Greg Ojard, Unni Santhosh, Jalees Ahmad, and Yasser Gowayed	1193

<b>Nondestructive evaluation techniques for development and characterization of carbon nanotube based superstructures</b>	
Buzz Wincheski, Jae-Woo Kim, Godfrey Sauti, Elliot Wainwright, Phillip Williams, and Emile J. Siochi	1203
<b>Thermo-oxidative degradation assessment in quasi-isotropic carbon fiber/epoxy composites</b>	
Connor Daily, Dan J. Barnard, Roger W. Jones, John F. McClelland, and Nicola Bowler	1211
<b>A multi-inspection non-destructive testing method for quality evaluation of composite riveted structure</b>	
Weihan Wang, Jingjing He, Jingsong Yang, Shengwang Liu, and Weifang Zhang	1221
<b>Lamb wave dispersion and anisotropy profiling of composite plates via non-contact air-coupled and laser ultrasound</b>	
M. S. Harb and F. G. Yuan	1229
<b>Detection and characterization of impact damage in composite panels using multiple ultrasonic methods</b>	
Westin B. Williams, Thomas E. Michaels, and Jennifer E. Michaels	1239
<b>Damage mapping in structural health monitoring using a multi-grid architecture</b>	
V. John Mathews	1247
<b>NDE of transparent protective panels</b>	
Dan Barnard, Frank J. Margetan, C.-P. Chiou, Aaron Herman, Brittney Pavel, and Sunil K. Chakrapani	1256
<b>Ultrasonic, microwave, and millimeter wave inspection techniques for adhesively bonded stacked open honeycomb core composites</b>	
Clint D. Thomson, Ian Cox, Mohammad Tayeb Ahmed Ghasr, Kuang P. Ying, and Reza Zoughi	1266
<b>Experimental studies on NRUS behavior of impact-damaged composite laminates</b>	
Hyunjo Jeong and Daniel Barnard	1275
<b>Ultrasonic impact damage assessment in 3D woven composite materials</b>	
E. Mannai, B. Lamboul, and J. M. Roche	1280
<b>NONCONTACT AND OPTICAL</b>	
<b>Metal cap flexural transducers for air-coupled ultrasonics</b>	
T. J. R. Eriksson, S. Dixon, and S. N. Ramadas	1287

<b>Determination of surface density of nonporous membranes with air-coupled ultrasound</b> T. P. Lerch	1292
<b>An approach for defect visualization and identification in composite plate structures using air-coupled guided ultrasound</b> Rabi Sankar Panda, Prabhu Rajagopal, and Krishnan Balasubramaniam	1299
<b>Scattered echoes from surface defect in the far field of Rayleigh wave generated by laser</b> Wei Wang, Zheng Zhong, and Yong-dong Pan	1307
<b>Equivalent body-force model for magnetostrictive transduction in EMATs</b> Peter B. Nagy and Remo Ribichini	1316
<b>Virtual environment assessment for laser-based vision surface profiling</b> Adnane ElSoussi, Abed ElRahman Al Alami, and Bassam A. Abu-Nabah	1326
<b>Image mosaicing for automated pipe scanning</b> Rahul Summan, Gordon Dobie, Francesco Guarato, Charles MacLeod, Stephen Marshall, Cailean Forrester, Gareth Pierce, and Gary Bolton	1334
<b>Non-destructive evaluation by 3D digital image correlation method</b> H. Sam Huang	1343
<b>Pulsed laser generation of ultrasound in a metal plate between the melting and ablation thresholds</b> A. G. Every, Z. N. Utegulov, and I. A. Veres	1350
<b>Interaction of ultrasonic waves with surface-breaking defects</b> R. S. Edwards, F. Hernandez-Valle, A. R. Clough, and M. H. Rosli	1360
<b>Detection of hidden defects using near field ultrasonic enhancement</b> A. R. Clough and R. S. Edwards	1368
<b>Developing a laser shockwave model for characterizing diffusion bonded interfaces</b> Jeffrey M. Lacy, James A. Smith, and Barry H. Rabin	1376
<b>Inspection of simulated weld penetration depth using laser-generated Lamb waves and wavelet signal processing</b> Lei Yang and I. Charles Ume	1386

<b>Automated laser-based barely visible impact damage detection in honeycomb sandwich composite structures</b>	
D. Girolamo, L. Girolamo, and F. G. Yuan	1392

#### CIVIL STRUCTURES AND CONCRETE

<b>Non-contact excitation of fundamental resonance frequencies of an asphalt concrete specimen</b>	
Anders Gudmarsson, Nils Ryden, and Björn Birgisson	1401

<b>Effects of moisture on ultrasound propagation in cement mortar</b>	
Taeho Ju, Shuaili Li, Jan Achenbach, and Jianmin Qu	1409

<b>Near field effects and estimation of Poisson's ratio in impact-echo thickness testing</b>	
Oskar Baggens and Nils Rydén	1415

<b>Second harmonic generation using nonlinear Rayleigh surface waves in stone</b>	
Margaret Smith, Gun Kim, Jin-Yeon Kim, Kimberly Kurtis, and Laurence Jacobs	1423

<b>Sensitivity of acoustic nonlinearity parameter to the microstructural changes in cement-based materials</b>	
Gun Kim, Jin-Yeon Kim, Kimberly E. Kurtis, and Laurence J. Jacobs	1431

<b>Detection of structural damage in multiwire cables by monitoring the entropy evolution of wavelet coefficients</b>	
Flor Ibáñez, Arturo Baltazar, Rito Mijarez, and Jorge Aranda	1440

#### NUCLEAR REACTORS

<b>A study on pseudo interface wave technique for CRDM weld defects in nuclear power plants</b>	
Jaesun Lee, Junpil Park, Younho Cho, Hyung Huh, Keun-Bae Park, and Dong-Ok Kim	1448

<b>Finite element modeling of wall-loss sizing in a steam generator tube using a pulsed eddy current probe</b>	
V. K. Babbar, B. Lepine, J. Buck, P. R. Underhill, J. Morelli, and T. W. Krause	1453

<b>3D model generation using an airborne swarm</b>	
R. A. Clark, G. Punzo, G. Dobie, C. N. MacLeod, R. Summan, G. Pierce, M. Macdonald, and G. Bolton	1460

<b>Acoustic emission signal processing technique to characterize reactor in-pile phenomena</b>	
Vivek Agarwal, Magdy S. Tawfik, and James A. Smith	1468

<b>Meso-scale magnetic signatures for nuclear reactor steel irradiation embrittlement monitoring</b> J. D. Suter, P. Ramuhalli, J. S. McCloy, K. Xu, S. Hu, Y. Li, W. Jiang, D. J. Edwards, A. L. Schemer-Kohn, and B. R. Johnson	1476
<b>Study of ultrasonic characterization and propagation in austenitic welds: The MOSAICS project</b> Bertrand Chassignole, Patrick Recolin, Nicolas Leymarie, Cécile Gueudré, Philippe Guy, and Deborah Elbaz	1486
<b>Experimental validation of an 8 element EMAT phased array probe for longitudinal wave generation</b> Florian Le Bourdais and Benoit Marchand	1496
<b>Eddy current signal comparison for tube identification</b> S. W. Glass and R. Vojvodic	1506
<b>Progress towards developing neutron tolerant magnetostrictive and piezoelectric transducers</b> Brian Reinhardt, Bernhard Tittmann, Joy Rempe, Joshua Daw, Gordon Kohse, David Carpenter, Michael Ames, Yakov Ostrovsky, Pradeep Ramuhalli, Robert Montgomery, Hualte Chien, and Bernard Wernsman	1512
<b>Designing a TAC thermometer from a VHTR graphite structure</b> James A. Smith, Dale Kotter, Steven L. Garrett, and Randall A. Ali	1521
<b>Optical coherence tomography for nondestructive evaluation of fuel rod degradation</b> Jeremy B. Renshaw, Thomas P. Jenkins, Benjamin D. Buckner, and Brian Friend	1526
<b>Automatic ultrasonic inspection system for wear determination in calandria tubes of Embalse Nuclear Power Plant</b> Pablo Katchadjian, Carlos Desimone, Alejandro Garcia, Carlos Antonaccio, Fernando Schroeter, and Héctor Molina	1533
<b>A 2D finite element simulation of liquid coupled ultrasonic NDT system</b> Prathamesh N. Bilgunde and Leonard J. Bond	1543
<b>NONLINEAR ULTRASONICS</b>	
<b>Modeling the nonlinear hysteretic response in DAE experiments of Berea sandstone: A case-study</b> Claudio Pecorari	1553
<b>Nonlinear guided waves in plates undergoing localized microstructural changes</b> Vamshi Krishna Chillara and Cliff J. Lissenden	1561

<b>Monitoring microstructural evolution in irradiated steel with second harmonic generation</b> Kathryn H. Matlack, Jin-Yeon Kim, James J. Wall, Jianmin Qu, and Laurence J. Jacobs	1570
<b>Depth profile characterization with noncollinear beam mixing</b> Shaun L. Freed and Jeong K. Na	1576
<b>Stress measurement in thick plates using nonlinear ultrasonics</b> Zeynab Abbasi and Didem Ozevin	1583
<b>Effect of localized microstructural evolution on higher harmonic generation of guided wave modes</b> Gloria Choi, Yang Liu, Xiaochu Yao, and Cliff J. Lissenden	1592
<b>Numerical study of material nonlinearity assessment based on non-collinear ultrasonic wave mixing</b> Ziyin Zhang, Peter B. Nagy, and Waled Hassan	1599
<b>Fatigue crack damage detection using subharmonic component with nonlinear boundary condition</b> Weiliang Wu, Yanfeng Shen, Wenzhong Qu, Li Xiao, and Victor Giurgiutiu	1609
<b>An analytical and numerical study of the nonlinear reflection at a stress-free surface</b> Anne Romer, Jin-Yeon Kim, and Laurence J. Jacobs	1616
<b>Using nonlinear ultrasound measurements to track thermal aging in modified 9%Cr ferritic martensitic steel</b> Daniel Marino, Jin-Yeon Kim, Laurence J. Jacobs, Alberto Ruiz, and Young-Sang Joo	1624
<b>Evaluation of nonlinear impact resonance spectroscopy method for detecting delayed ettringite formation</b> M. M. N. Rashidi, A. Paul, J.-Y. Kim, L. J. Jacobs, and K. E. Kurtis	1632
<b>Nonlinear ultrasonic assessment of stress corrosion cracking damage in sensitized 304 stainless steel</b> Florian Morlock, Laurence J. Jacobs, Jin-Yeon Kim, Preet Singh, and James J. Wall	1641
<b>Clutter noise reduction for phased array imaging using frequency-spatial polarity coherence</b> Rui Gongzhang, Anthony Gachagan, and Bo Xiao	1648

<b>Surface estimation methods with phased-arrays for adaptive ultrasonic imaging in complex components</b>	1657
S. Robert, P. Calmon, M. Calvo, L. Le Jeune, and E. Iakovleva	
<b>Structural health monitoring method based on the entropy of an ultrasonic sensor network for a plate-like structure</b>	1667
Erick Rojas and Arturo Baltazar	
<b>SIGNAL PROCESSING</b>	
<b>The effect of surface roughness on extrapolation from thickness C-scan data using extreme value theory</b>	1677
Daniel Benstock and Frederic Cegla	
<b>A synthetic aperture routine to approximate Rayleigh surface wave imaging scans over anisotropic media</b>	1688
Matthew Cherry, Shamachary Sathish, and Adam Pilchak	
<b>Image processing algorithms for automated analysis of GMR data from inspection of multilayer structures</b>	1697
Oleksii Karpenko, Seyed Safdernejad, Gerges Dib, Lalita Udpa, Satish Udpa, and Antonello Tamburrino	
<b>Polychromatic sparse image reconstruction and mass attenuation spectrum estimation via B-spline basis function expansion</b>	1707
Renliang Gu and Aleksandar Dogandžić	
<b>Oversampling in virtual visual sensors as a means to recover higher modes of vibration</b>	1717
Ali Shariati and Thomas Schumacher	
<b>MODELING</b>	
<b>Investigation of the validity of the elastic Kirchhoff approximation for rough cracks using a finite element approach</b>	1722
Fan Shi, Wonjae Choi, Elizabeth Skelton, Mike Lowe, and Richard Craster	
<b>Modelling NDE pulse-echo inspection of misorientated planar rough defects using an elastic finite element method</b>	1730
J. R. Pettit, A. E. Walker, and M. J. S. Lowe	
<b>Weld quality inspection using laser-generated Lamb waves: Finite element study</b>	1738
Lei Yang and I. Charles Ume	

<b>High order Nystrom method for acoustic scattering</b> Kun Chen, Siming Yang, Jiming Song, and Ron Roberts	1744
<b>Simulation of the UT inspection of planar defects using a generic GTD-Kirchhoff approach</b> Vincent Dorval, Michel Darmon, Sylvain Chatillon, and Larissa Fradkin	1750
<b>Recent modelling advances for ultrasonic TOFD inspections</b> Michel Darmon, Adrien Ferrand, Vincent Dorval, Sylvain Chatillon, and Sébastien Lonné	1757
<b>Inspection of spar-core bond in helicopter rotor blades using finite element analysis</b> Sunil Kishore Chakrapani, Daniel J. Barnard, and Vinay Dayal	1766
<b>FEA study of non-linear effect of coupling media to Sonic infrared imaging</b> Yuyang Song and Xiaoyan Han	1774
<b>A thermographic approach for surface crack depth evaluation through 3D finite element modeling</b> Mohammed Basheer, Nithin PV, Parag Ravindran, and Krishnan Balasubramaniam	1782
<b>3D finite element modeling of Lamb wave scattering from a sessile water droplet</b> Hongye Liu, Jennifer E. Michaels, Xin Chen, Thomas E. Michaels, and Cunfu He	1790
<b>Modelling grain-scattered ultrasound in austenitic stainless-steel welds: A hybrid model</b> O. Nowers, D. J. Duxbury, A. Velichko, and B. W. Drinkwater	1797
<b>Analysis of critically refracted longitudinal waves</b> Ning Pei and Leonard J. Bond	1805
<b>High-speed GPU-based finite element simulations for NDT</b> P. Huthwaite, F. Shi, A. Van Pamel, and M. J. S. Lowe	1815
<b>Ultrasonic inspection to quantify failure pathologies of crimped electrical connections</b> K. Elliott Cramer, Daniel F. Perey, and William T. Yost	1820
<b>BENCHMARK</b>	
<b>Semi-analytical solution to the 2014 eddy current benchmark problem</b> Roberto Miorelli, Christophe Reboud, Charitini Voulgaraki, Nikolaos Poulakis, and Theodoros Theodoulidis	1826

<b>Radiography benchmark 2014</b> G.-R. Jaenisch, A. Deresch, C. Bellon, A. Schumm, F. Lucet-Sanchez, and P. Guerin	1834
<b>Results of the 2014 UT modeling benchmark obtained with models implemented in CIVA: Solution of the FMC-TFM ultrasonic benchmark problem using CIVA</b> Sylvain Chatillon, Sébastien Robert, Philippe Brédif, Pierre Calmon, Guillaume Daniel, and François Cartier	1847
<b>Experiment vs simulation RT WFNDEC 2014 benchmark: CIVA results</b> D. Tisseur, M. Costin, B. Rattoni, C. Vienne, A. Vabre, G. Cattiaux, and T. Sollier	1856
<b>UNCERTAINTY OF NDE</b>	
<b>Stochastic inverse problems: Models and metrics</b> Elias H. Sabbagh, Harold A. Sabbagh, R. Kim Murphy, John C. Aldrin, Charles Annis, and Jeremy S. Knopp	1865
<b>Assessing inversion performance and uncertainty in eddy current crack characterization applications</b> John C. Aldrin, Harold A. Sabbagh, Charles Annis, Eric B. Shell, Jeremy Knopp, and Eric A. Lindgren	1873
<b>Forward propagation of parametric uncertainties through models of NDE inspection scenarios</b> Matthew Cherry, Harold Sabbagh, John Aldrin, Jeremy Knopp, and Adam Pilchak	1884
<b>Toward automated interpretation of integrated information: Managing "big data" for NDE</b> Elizabeth Gregory, Tyler Lesthaeghe, and Stephen Holland	1893
<b>Identification of thermal degradation using probabilistic models in reflectance spectroscopy</b> A. K. Criner, A. J. Cherry, A. T. Cooney, T. D. Katter, H. T. Banks, Shuhua Hu, and Jared Catenacci	1898
<b>On a framework for generating PoD curves assisted by numerical simulations</b> S. Mohamed Subair, Shweta Agrawal, Krishnan Balasubramaniam, Prabhu Rajagopal, Anish Kumar, Purnachandra B. Rao, and Jayakumar Tamanna	1907
<b>A structural integrity assessment framework using SAFT and XFEM</b> Xuefei Guan, Xiang Ren, Wen Jiang, and S. Kevin Zhou	1915
<b>Combining of different data pools for calculating a reliable POD for real defects</b> Daniel Kanzler, Christina Müller, and Jorma Pitkänen	1924

**Simulated probability of detection maps in case of non-monotonic EC signal response** 1933  
P. Calmon, F. Jenson, and C. Reboud

**Lamb wave-based damage quantification and probability of detection modeling for fatigue life assessment of riveted lap joint** 1940  
Jingjing He, Dengjiang Wang, and Weifang Zhang

#### UT MEASUREMENTS

**Investigation of a comprehensive confidence measure in NDE** 1948  
Portia Banerjee, Seyed Safdarnejad, Lalita Udpa, and Satish Udpa

**Automated metrology and NDE measurements for increased throughput in aerospace component manufacture** 1958  
Charles N. MacLeod, S. Gareth Pierce, Maxim Morozov, Rahul Summan, Gordon Dobie, Paul McCubbin, Coreen McCubbin, Scott Dearie, and Gavin Munro

**Automated full matrix capture for industrial processes** 1967  
Roy H. Brown, S. Gareth Pierce, Ian Collison, Ben Dutton, Jerzy Dziewierz, Joseph Jackson, Timothy Lardner, Charles MacLeod, and Maxim Morozov

**Robotic path planning for non-destructive testing of complex shaped surfaces** 1977  
Carmelo Mineo, Stephen Gareth Pierce, Ben Wright, Pascual Ian Nicholson, and Ian Cooper

**Development of training modules for magnetic particle inspection** 1988  
Daigo Kosaka, David J. Eisenmann, Darrel Enyart, Norio Nakagawa, Chester Lo, and David Orman

**Development of general X-ray scattering model** 1994  
Joe Gray and Scott Wendt

**2014 Attendees List** 2002
