

11th IIR Conference on Phase Change Materials and Slurries for Refrigeration and Air Conditioning 2016

Refrigeration Science and Technology Proceedings
2016-2

Karlsruhe, Germany
18-20 May 2016

ISBN: 978-1-5108-2589-5

Table of contents

Michael Kauffeld Foreword by the President of the Scientific and Organizing Committee	3
---	---

Opening session

Thomas B. Johansson Energy of a Sustainable World	11
Hans-Martin Henning Conversion of energy systems and role of thermal storage	12

Supercooling effect

Georg Hagelstein, Stefan Gschwander Nucleation of PCMs in confined geometries	15
Georg Ernst, Michael Kauffeld Influence of the wall surface roughness on the supercooling degree of water flowing inside a heat exchanger	23

Rheological parameters of PCM slurries

Virginia Vasile, Horia Necula, Adrian Badea, Remi Revellin, Jocelyn Bonjour, Phillipe Haberschill Experimental analysis on rheological and heat transfer characteristics of paraffin/water	32
Michel Pons, Hong-Ming Hoang, Anthony Delahaye, Laurence Fournaison Coupled effects of slurry rheology, heat transfers and thermodynamics on performance of secondary refrigeration loops in steady-state operation	41
Tobias Kappels, Hanu Lucian, Clemens Pollerberg Rheological investigations of paraffin based phase change slurry using a Pipe viscosimeter	51

Heat capacity and conductivity - DSC measurements

Michael Brütting, Stephan Vidi, Frank Hemberger, Hans-Peter Ebert Measurement of thermal conductivity and heat capacity of phase change materials with the longitudinal heat flow method	62
Stefan Gschwander, Thomas Haussmann, Georg Hagelstein, Camila Barreneche, Gerrard Ferrer, Luis F. Cabeza, Gonzalo Diarce, Wolfgang Hohenauer, Daniel Lager, Christoph Rathgeber, Peter Hennemann, Harald Mehling, Conchita Penalosa, Ana Lazaro Standardization of PCM characterization via DSC	70

Building applications

Modar Yasin, Felix Klinker, Helmut Weinländer Passive cooling power of two different cooling ceilings with PCM in two offices	77
Helmut Weinländer, Felix Klinker Monitoring of PCM systems for building applications	86
Milan Ostry, Pavel Charvat Thermally activated structures using latent heat storage technique	94
Andreas Hantsch A case study on the application of phase-change materials in buildings	101
Johan Van Bael, Jan Diriken, Filip Leemans, Robbe Salenbien, Martine Baelmans, Luis F. Cabeza Comparison of a single stage and a multi stage latent heat storage for domestic hot water delivery	107

PCM applications in heat exchangers and enhancing heat conductivity of PCM

Tunay Özcan, Michael Kauffeld Latent heat storage with polyethylene enhanced with aluminium stripes	113
Renato Lazzarin, Simone Mancin, Marco Noro Experiment for the evaluation of aluminium foams for improving heat transfer in PCM thermal storages	122
Hong Minh Hoang, Fabien Raoult, Denis Leducq Potential use of phase change materials in a display cabinet: development of a dynamic modelling approach	132
Benedetta Copertaro, Roberto Fioretti, Paolo Principi Experimental analysis on a novel air heat exchanger containing PCM	142

Particle Size and Properties of (Ice) Slurries

- Ruri Hidema, Hiroshi Suzuki, Hideki Sato, Yoshiyuki Komoda, Kohei Nakamura
Particle sedimentation depression with stabilizers and surfactants on phase change materials 152
- Monika Ignatowicz, Ake Melinder, Björn Palm
Measurements of standard seawater calls for minor adjustments of seawater ice slurry properties 162
- Matthias Koffler, Michael Kauffeld
Particle size distribution in ice slurry systems – analysis of dual-view particle images 171

Salt and CO₂ Hydrate Slurries

- Thomas Dufour, Jeremy Oignet, Hong Ming Hoang, Denis Leduq, Anthony Delahaye, Laurence Fournaison, Michel Pons
Dynamic modelling of secondary refrigeration loop with CO₂ hydrate slurry 181
- Thomas Dufour, Jeremy Oignet, Hong Ming Hoang, Denis Leduq, Anthony Delahaye, Laurence Fournaison, Michel Pons
Impact of pressure on the dynamic behavior of CO₂ hydrate slurry during storage process 189
- Hongxia Zhou, Carlos Infante Ferreira
TBAB hydrate slurry based latent heat thermal storage system 198
- Henri Schmit, Peter Hennemann, Christoph Rathgeber, Stefan Hiebler
Tool for the estimation of the melting enthalpy of PCM based on binary mixtures of salt and water 208
- Henri Schmit, Manuel Frank, Christoph Rathgeber, Stefan Hiebler
Investigation of K₂HPO₄·6H₂O as phase change slurry (PCS) 217

Encapsulated PCM and hot PCM

Sophia Niedermaier, Artur Gähring, Stefan Gschwander Optimization of the formulation of a phase change slurry	227
Lin Xie, John Burger, Masahiro Kawaji Experimental and analytical investigation of thermal energy storage system for automotive applications	236
Hiroshi Suzuki, Masato Tamaru, Ruri Hidema, Yoshiyuki Komoda Fabrication characteristics of phase change materials of silica hard-shell microcapsules	246
Min-Suk Kong, Jorge L. Alvarado, Wilson Terrell Thermal performance of microencapsulated phase change material slurries in a heated helical coil	254

Ice Slurry - Novel techniques

Christoph Steffan, Marcus Honke, Mathias Safarik Operational experiences with an ice slurry cold thermal storage system using the R718 direct evaporation ice generation	264
Jakob Schaaf, Michael Kauffeld Induction melting boundary layer of ice	275
Marcus Honke, Christoph Steffan, Mathias Safarik Applications of the direct evaporation vacuum freezing technology	283
