# TABLE OF CONTENTS

|                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>SEMIDEFINITE PROGRAMMING FOR OPTIMAL PLACEMENT OF PMUS WITH CHANNEL LIMITS CONSIDERING PRE-EXISTING SCADA AND PMU MEASUREMENTS</b> ..... | 1   |
| <i>Nikolaos M. Manousakis ; George N. Korres</i>                                                                                            |     |
| <b>BAD DATA SUPPRESSION THROUGH THE COOPERATION BETWEEN INDEPENDENT STATE ESTIMATORS</b> .....                                              | 8   |
| <i>Marcio Andre Ribeiro Guimaraens ; Milton Brown Do Coutto Filho ; Julio Cesar Stacchini De Souza</i>                                      |     |
| <b>POWER FLOW SOLUTIONS OF AC/DC MICRO-GRID STRUCTURES</b> .....                                                                            | 15  |
| <i>Enrique Acha ; Tom Rubbrecht ; Luis M. Castro</i>                                                                                        |     |
| <b>POWER SYSTEM DYNAMIC PERFORMANCE DURING THE LATE-TIME (E3) HIGH-ALTITUDE ELECTROMAGNETIC PULSE</b> .....                                 | 21  |
| <i>Trevor R. Hutchins ; Thomas J. Overbye</i>                                                                                               |     |
| <b>STOCHASTIC OPTIMAL POWER FLOW FORMULATION TO ACHIEVE EMISSIONS OBJECTIVES WITH ENERGY STORAGE</b> .....                                  | 27  |
| <i>Yashen Lin ; Johanna L. Mathieu ; Jeremiah X. Johnson</i>                                                                                |     |
| <b>RECEDING-HORIZON CONTROL OF DISTRIBUTED GENERATION TO CORRECT VOLTAGE OR THERMAL VIOLATIONS AND TRACK DESIRED SCHEDULES</b> .....        | 34  |
| <i>Hamid Soleimani Bidgoli ; Mevludin Glavic ; Thierry Van Cutsem</i>                                                                       |     |
| <b>ANALYSING CYBER-PHYSICAL ATTACKS TO A SMART GRID: A VOLTAGE CONTROL USE CASE</b> .....                                                   | 42  |
| <i>Lucie Langer ; Paul Smith ; Martin Hutle ; Alberto Schaeffer-Filho</i>                                                                   |     |
| <b>JOINT SCHEDULING OF FREQUENCY CONTROL RESERVES AND ENERGY DISPATCH FOR ISLANDED POWER SYSTEMS</b> .....                                  | 49  |
| <i>Georgios Chatzis ; Line Roald ; Göran Andersson ; Iason Avramiotis-Falireas ; Farzaneh Abbaspourtorbati ; Marek Zima</i>                 |     |
| <b>A MULTI-OBJECTIVE STOCHASTIC APPROACH TO HYDROELECTRIC POWER GENERATION SCHEDULING</b> .....                                             | 56  |
| <i>Antans Sauhats ; Roman Petrichenko ; Karlis Baltputnis ; Zane Broka ; Renata Varfolomejeva</i>                                           |     |
| <b>A COMPOSITE SENSITIVITY FACTOR BASED METHOD FOR NETWORKED DISTRIBUTED GENERATION PLANNING</b> .....                                      | 63  |
| <i>Cuo Zhang ; Yan Xu ; Zhaoyang Dong ; Jin Ma</i>                                                                                          |     |
| <b>AN EFFICIENT APPROACH FOR ROBUST SCOPF CONSIDERING LOAD AND RENEWABLE POWER UNCERTAINTIES</b> .....                                      | 70  |
| <i>Wang Zhang ; Yan Xu ; Zhao Yang Dong ; Yijia Wang ; Rui Zhang</i>                                                                        |     |
| <b>TOWARDS SMART GRID-READY SUBSTATIONS: A STANDARD-COMPLIANT PROTECTION SYSTEM</b> .....                                                   | 77  |
| <i>Martin Büscher ; Matthias Kube ; Klaus Piech ; Sebastian Lehnhoff ; Sebastian Rohjans ; Lars Fischer</i>                                 |     |
| <b>EXPERIMENTAL VALIDATION OF THE DEMAND RESPONSE POTENTIAL OF RESIDENTIAL HEATING SYSTEMS</b> .....                                        | 83  |
| <i>E. A. M. Klaassen ; J. Frunt ; J. G. Sootweg</i>                                                                                         |     |
| <b>A PARALLEL PRIMAL-DUAL INTERIOR-POINT METHOD FOR DC OPTIMAL POWER FLOW</b> .....                                                         | 90  |
| <i>Ariana Minot ; Yue M. Lu ; Na Li</i>                                                                                                     |     |
| <b>A BILEVEL OPTIMAL POWER FLOW BASED ON FRITZ-JOHN NORMALIZED OPTIMALITY CONDITIONS</b> .....                                              | 97  |
| <i>K. C. Almeida ; A. Kocholik ; T. S. P. Fernandes</i>                                                                                     |     |
| <b>HARDWARE-IN-THE-LOOP CO-SIMULATION OF DISTRIBUTION GRID FOR DEMAND RESPONSE</b> .....                                                    | 104 |
| <i>Sergi Rotger-Griful ; Spyros Chatzivasiladiadis ; Rune Hylsberg Jacobsen ; Emma M. Stewart ; Javier Matanza Domingo ; Michael Wetter</i> |     |
| <b>ASSESSING THE BENEFITS OF COORDINATED OPERATION OF AGGREGATED DISTRIBUTED MULTI-ENERGY GENERATION</b> .....                              | 111 |
| <i>Tomislav Capuder ; Pierluigi Mancarella</i>                                                                                              |     |
| <b>WIND POWER PROBABILISTIC FORECAST IN THE REPRODUCING KERNEL HILBERT SPACE</b> .....                                                      | 118 |
| <i>Cristobal Gallego-Castillo ; Alvaro Cuerva-Tejero ; Ricardo J. Bessa ; Laura Cavalcante</i>                                              |     |

|                                                                                                                                                                |            |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>COMPUTATIONAL ANALYSIS OF SPARSITY-EXPLOITING MOMENT RELAXATIONS OF THE OPF PROBLEM.....</b>                                                                | <b>125</b> |
| <i>Daniel K. Molzahn ; Ian A. Hiskens ; Cédric Josz ; Patrick Panciatici</i>                                                                                   |            |
| <b>INTEGRATED ENERGY MANAGEMENT SYSTEM FOR ISOLATED MICROGRIDS .....</b>                                                                                       | <b>132</b> |
| <i>Bharatkumar V. Solanki ; Kankar Bhattacharya ; Claudio A. Cañizares</i>                                                                                     |            |
| <b>ANALYSIS OF THE IMPACT OF GEOMAGNETIC DISTURBANCES ON THE AUSTRIAN TRANSMISSION GRID .....</b>                                                              | <b>139</b> |
| <i>Thomas Halbedl ; Herwig Renner ; Rachel Louise Bailey ; Roman Leonhardt ; Georg Achleitner</i>                                                              |            |
| <b>INTEGRAL DISTRIBUTION GRID PLANNING PROCESS CONSIDERING THE IMPACT OF HEAT PUMP SYSTEMS .....</b>                                                           | <b>144</b> |
| <i>André Seack ; Jan Kays ; Christian Rehtanz</i>                                                                                                              |            |
| <b>DIRECT CONTROL SERVICE FROM RESIDENTIAL HEAT PUMP AGGREGATION WITH SPECIFIED PAYBACK .....</b>                                                              | <b>150</b> |
| <i>E. Georges ; V. Lemort ; B. Cornélusse ; D. Ernst ; Q. Louveaux ; S. Mathieu</i>                                                                            |            |
| <b>ECONOMIC DISPATCH OF FLEXIBILITY OPTIONS FOR GRID SERVICES ON DISTRIBUTION LEVEL .....</b>                                                                  | <b>157</b> |
| <i>Tobias Kornrumpf ; Jan Meese ; Markus Zdrallek ; Nils Neusel-Lange ; Marvin Roch</i>                                                                        |            |
| <b>EVALUATING COMPOSITE APPROACHES TO MODELLING HIGH-DIMENSIONAL STOCHASTIC VARIABLES IN POWER SYSTEMS .....</b>                                               | <b>164</b> |
| <i>Mingyang Sun ; Ioannis Konstantelos ; Simon Tindemans ; Goran Strbac</i>                                                                                    |            |
| <b>ELECTROMECHANICAL DYNAMICS OF OVERHEAD ELECTRIC POWER LINE CONDUCTORS ANALYSED THROUGH THE MODELICA LANGUAGE MODELS .....</b>                               | <b>172</b> |
| <i>Davide Poli ; Giovanni Lutzemberger ; Paolo Pelacchi</i>                                                                                                    |            |
| <b>INFLUENCE OF NON-HARMONIZED CAPACITY MECHANISMS IN AN INTERCONNECTED POWER SYSTEM ON GENERATION ADEQUACY .....</b>                                          | <b>179</b> |
| <i>Hanspeter Höschle ; Cedric De Jonghe ; Daan Six ; Ronnie Belmans</i>                                                                                        |            |
| <b>FLEXIBILIZATION OF STEAM POWER PLANTS AS PARTNERS FOR RENEWABLE ENERGY SYSTEMS.....</b>                                                                     | <b>190</b> |
| <i>M. Richter ; F. Möllenbruck ; F. Obermüller ; A. Knaut ; F. Weiser ; H. Lens ; D. Lehmann</i>                                                               |            |
| <b>OPTIMAL SHORT-TERM OPERATION OF A DISCO INCLUDING VOLTAGE-SENSITIVE LOADS .....</b>                                                                         | <b>198</b> |
| <i>Marcel Chuma Cerbantes ; José Roberto Sanches Mantovani ; Ricardo Fernández-Blanco ; Miguel A. Ortega-Vazquez</i>                                           |            |
| <b>SHORT-TERM VOLTAGE STABILITY IMPROVEMENT BY ACTIVE AND REACTIVE POWER CONTROL USING ADVANCED FAULT RIDE-THROUGH CAPABILITY OF PHOTOVOLTAIC SYSTEMS.....</b> | <b>205</b> |
| <i>Kenichi Kawabe ; Yutaka Ota ; Akihiko Yokoyama ; Kazuyuki Tanaka</i>                                                                                        |            |
| <b>OPTIMAL MODEL FOR ELECTRICITY TARIFF CALCULATION .....</b>                                                                                                  | <b>213</b> |
| <i>R. V. Menta ; E. J. De Oliveira ; L. W. Oliveira ; B. H. Dias ; A. L. M. Marcato</i>                                                                        |            |
| <b>MULTI-PERIOD AC-QP OPTIMAL POWER FLOW INCLUDING STORAGE .....</b>                                                                                           | <b>220</b> |
| <i>Jennifer F. Marley ; Ian A. Hiskens</i>                                                                                                                     |            |
| <b>STOCHASTIC SECURITY CONSTRAINED UNIT COMMITMENT WITH VARIABLE-SPEED PUMPED-STORAGE HYDROPOWER PLANTS .....</b>                                              | <b>227</b> |
| <i>Omid Alizadeh-Mousavi ; Mostafa Nick</i>                                                                                                                    |            |
| <b>AN ALGORITHM FOR THE SEMI-ANALYTICAL COMPUTATION OF FIELDS EMITTED IN LAYERED GROUND BY HVDC ELECTRODES .....</b>                                           | <b>234</b> |
| <i>M. Brignone ; A. Karimi Qombovani ; P. Molfino ; M. Nervi</i>                                                                                               |            |
| <b>PREDICTIVE VOLTAGE CONTROL OF BATTERIES AND TAP CHANGERS IN DISTRIBUTION SYSTEM WITH PHOTOVOLTAICS .....</b>                                                | <b>240</b> |
| <i>Pavan Balram ; Le Anh Tuan ; Ola Carlson</i>                                                                                                                |            |
| <b>UTILIZATION OF EMBEDDED VSC-MTDC SYSTEM FOR SUPPORTING POWER FLOW DURING PRIMARY FREQUENCY CONTROL .....</b>                                                | <b>247</b> |
| <i>Ngoc Tuan Trinh ; Istvan Erlich ; Marcus Zeller ; Klaus Wuerflinger</i>                                                                                     |            |
| <b>COMPARISON OF DIFFERENT CONTROL STRATEGIES FOR ENERGY STORAGE DEVICES .....</b>                                                                             | <b>254</b> |
| <i>Álvaro Ortega ; Federico Milano</i>                                                                                                                         |            |
