# 2016 IEEE 36th International Conference on Distributed Computing Systems

## ICDCS 2016

### Table of Contents

|                                                     |      |
|-----------------------------------------------------|------|
| Message from the ICDCS 2016 General Co-Chairs ..... | xiv  |
| Message from the ICDCS 2016 Program Committee ..... |      |
| Co-Chairs .....                                     | xv   |
| Organizing Committee .....                          | xvi  |
| Technical Program Committees .....                  | xvii |
| Keynotes .....                                      | xxv  |

---

#### Tutorials

|                                                                                                                     |    |
|---------------------------------------------------------------------------------------------------------------------|----|
| A Look at Basics of Distributed Computing .....                                                                     | 1  |
| <i>Michel Raynal</i>                                                                                                |    |
| Cognitive Technologies for Smarter Cities .....                                                                     | 12 |
| <i>Martin G. Kienzle</i>                                                                                            |    |
| Reflecting on the Past, Preparing for the Future: From Peer-to-Peer to Edge-Centric<br>Computing .....              | 22 |
| <i>Alberto Montresor</i>                                                                                            |    |
| Software-Based Networks: Leveraging High-Performance NFV Platforms to Meet<br>Future Communication Challenges ..... | 24 |
| <i>K. K. Ramakrishnan</i>                                                                                           |    |

#### Session 1A: Distributed Fault Tolerance and Dependability

|                                                                                                                                             |    |
|---------------------------------------------------------------------------------------------------------------------------------------------|----|
| INSPECTOR: Data Provenance Using Intel Processor Trace (PT) .....                                                                           | 25 |
| <i>Jörg Thalheim, Pramod Bhatotia, and Christof Fetzer</i>                                                                                  |    |
| PAG: Private and Accountable Gossip .....                                                                                                   | 35 |
| <i>Jérémie Decouchant, Sonia Ben Mokhtar, Albin Petit, and Vivien Quéma</i>                                                                 |    |
| Practical Intrusion-Tolerant Networks .....                                                                                                 | 45 |
| <i>Daniel Obenshain, Thomas Tantillo, Amy Babay, John Schultz, Andrew Newell,<br/>Md. Edadul Hoque, Yair Amir, and Cristina Nita-Rotaru</i> |    |

|                                                                                               |    |
|-----------------------------------------------------------------------------------------------|----|
| Gremlin: Systematic Resilience Testing of Microservices .....                                 | 57 |
| <i>Victor Heorhiadi, Shriram Rajagopalan, Hani Jamjoom, Michael K. Reiter, and Vyas Sekar</i> |    |

## **Session 1B: Cloud and Datacenter Networks 1**

|                                                                                                   |    |
|---------------------------------------------------------------------------------------------------|----|
| CRONets: Cloud-Routed Overlay Networks .....                                                      | 67 |
| <i>Chris X. Cai, Franck Le, Xin Sun, Geoffrey G. Xie, Hani Jamjoom, and Roy H. Campbell</i>       |    |
| Riptide: Jump-Starting Back-Office Connections in Cloud Systems .....                             | 78 |
| <i>Marcel Flores, Amir R. Khakpour, and Harkeerat Bedi</i>                                        |    |
| The Internet is for Porn: Measurement and Analysis of Online Adult Traffic .....                  | 88 |
| <i>Faraz Ahmed, M. Zubair Shafiq, and Alex X. Liu</i>                                             |    |
| Tuning the Aggressive TCP Behavior for Highly Concurrent HTTP Connections<br>in Data Center ..... | 98 |
| <i>Jiawei Huang, Jianxin Wang, Tao Zhang, Jianer Chen, and Yi Pan</i>                             |    |

## **Session 2A: Distributed Data Management and Analytics**

|                                                                                |     |
|--------------------------------------------------------------------------------|-----|
| A Performance Analysis of Incentive Mechanisms for Cooperative Computing ..... | 108 |
| <i>Carlee Joe-Wong, Youngbin Im, Kyuyong Shin, and Sangtae Ha</i>              |     |
| GraphH: Heterogeneity-Aware Graph Computation with Adaptive Partitioning ..... | 118 |
| <i>Christian Mayer, Muhammad Adnan Tariq, Chen Li, and Kurt Rothermel</i>      |     |
| Minimum-Cost Cloud Storage Service Across Multiple Cloud Providers .....       | 129 |
| <i>Guoxin Liu and Haiying Shen</i>                                             |     |

## **Session 2B: Mobile Systems**

|                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------|-----|
| A Realistic and Optimized V2V Communication System for Taxicabs .....                                   | 139 |
| <i>Yang Wang, Erkun Yang, Wei Zheng, Liusheng Huang, Hengchang Liu, and Binxin Liang</i>                |     |
| Optimal Marching of Autonomous Networked Robots .....                                                   | 149 |
| <i>Buri Ban, Miao Jin, and Hongyi Wu</i>                                                                |     |
| RichNote: Adaptive Selection and Delivery of Rich Media Notifications to Mobile<br>Users .....          | 159 |
| <i>Md. Yusuf Sarwar Uddin, Vinay Setty, Ye Zhao, Roman Vitenberg,<br/>and Nalini Venkatasubramanian</i> |     |

## **Session 3: Best Paper Nominees**

|                                                                                                      |     |
|------------------------------------------------------------------------------------------------------|-----|
| Decentralized Context Sharing in Vehicular Delay Tolerant Networks<br>with Compressive Sensing ..... | 169 |
| <i>Kun Xie, Wang Luo, Xin Wang, Dongliang Xie, Jiannong Cao, Jigang Wen,<br/>and Gaogang Xie</i>     |     |

|                                                                                                   |     |
|---------------------------------------------------------------------------------------------------|-----|
| RuleTris: Minimizing Rule Update Latency for TCAM-Based SDN Switches .....                        | 179 |
| <i>Xitao Wen, Bo Yang, Yan Chen, Li Erran Li, Kai Bu, Peng Zheng, Yang Yang, and Chengchen Hu</i> |     |

|                                                                        |     |
|------------------------------------------------------------------------|-----|
| RITM: Revocation in the Middle .....                                   | 189 |
| <i>Pawel Szalachowski, Laurent Chuat, Taeho Lee, and Adrian Perrig</i> |     |

## **Session 4A: Distributed Systems and Software**

|                                                                                 |     |
|---------------------------------------------------------------------------------|-----|
| A Distributed Auctioneer for Resource Allocation in Decentralized Systems ..... | 201 |
| <i>Amin M. Khan, Xavier Vilaça, Luís Rodrigues, and Felix Freitag</i>           |     |

|                                                                                 |     |
|---------------------------------------------------------------------------------|-----|
| Datacomp: Locally Independent Adaptive Compression for Real-World Systems ..... | 211 |
| <i>Peter A. H. Peterson and Peter L. Reiher</i>                                 |     |

|                                                                                  |     |
|----------------------------------------------------------------------------------|-----|
| Hybrid Content-Based Routing Using Network and Application Layer Filtering ..... | 221 |
| <i>Sukanya Bhowmik, Muhammad Adnan Tariq, Lobna Hegazy, and Kurt Rothermel</i>   |     |

|                                                                     |     |
|---------------------------------------------------------------------|-----|
| Exploiting Causality to Engineer Elastic Distributed Software ..... | 232 |
| <i>K. R. Jayaram</i>                                                |     |

|                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------|-----|
| RUSH: A RobUst ScHeduler to Manage Uncertain Completion-Times in Shared<br>Clouds .....               | 242 |
| <i>Zhe Huang, Bharath Balasubramanian, Michael Wang, Tian Lan, Mung Chiang, and Danny H. K. Tsang</i> |     |

## **Session 4B: Distributed Algorithms and Theory 1**

|                                                                                 |     |
|---------------------------------------------------------------------------------|-----|
| The Same Speed Timer in Population Protocols .....                              | 252 |
| <i>Yuichi Sudo, Toshimitsu Masuzawa, Ajoy K. Datta, and Lawrence L. Larmore</i> |     |

|                                                                               |     |
|-------------------------------------------------------------------------------|-----|
| Interactive Wireless Charging for Energy Balance .....                        | 262 |
| <i>Sotiris Nikoletseas, Theofanis P. Raptis, and Christoforos Raptopoulos</i> |     |

|                                                                                                    |     |
|----------------------------------------------------------------------------------------------------|-----|
| Nearly Optimal Distributed Algorithm for Computing Betweenness Centrality .....                    | 271 |
| <i>Qiang-Sheng Hua, Haoqiang Fan, Ming Ai, Lixiang Qian, Yangyang Li, Xuanhua Shi, and Hai Jin</i> |     |

|                                                                                                   |     |
|---------------------------------------------------------------------------------------------------|-----|
| An Efficient Lock-Free Logarithmic Search Data Structure Based<br>on Multi-dimensional List ..... | 281 |
| <i>Deli Zhang and Damian Dechev</i>                                                               |     |

|                                                                         |     |
|-------------------------------------------------------------------------|-----|
| Characterizing the Computational Power of Anonymous Mobile Robots ..... | 293 |
| <i>Mattia D'Emidio, Daniele Frigioni, and Alfredo Navarra</i>           |     |

## **Session 5A: Security and Privacy 1**

|                                                                            |     |
|----------------------------------------------------------------------------|-----|
| CryptoLock (and Drop It): Stopping Ransomware Attacks on User Data .....   | 303 |
| <i>Nolen Scaife, Henry Carter, Patrick Traynor, and Kevin R. B. Butler</i> |     |

|                                                        |     |
|--------------------------------------------------------|-----|
| Amnesia: A Bilateral Generative Password Manager ..... | 313 |
| <i>Luren Wang, Yue Li, and Kun Sun</i>                 |     |

|                                                                                        |     |
|----------------------------------------------------------------------------------------|-----|
| Know Your Phish: Novel Techniques for Detecting Phishing Sites and Their Targets ..... | 323 |
| <i>Samuel Marchal, Kalle Saari, Nidhi Singh, and N. Asokan</i>                         |     |
| BotMeter: Charting DGA-Botnet Landscapes in Large Networks .....                       | 334 |
| <i>Ting Wang, Xin Hu, Jiyong Jang, Shouling Ji, Marc Stoecklin, and Teryl Taylor</i>   |     |

## **Session 5B: Mobile Crowdsensing and Crowdsourcing**

|                                                                                                     |     |
|-----------------------------------------------------------------------------------------------------|-----|
| Enabling Privacy-Preserving Incentives for Mobile Crowd Sensing Systems .....                       | 344 |
| <i>Haiming Jin, Lu Su, Bolin Ding, Klara Nahrstedt, and Nikita Borisov</i>                          |     |
| Quality-Aware and Fine-Grained Incentive Mechanisms for Mobile Crowdsensing .....                   | 354 |
| <i>Jing Wang, Jian Tang, Dejun Yang, Erica Wang, and Guoliang Xue</i>                               |     |
| Toward Optimal DoS-Resistant Authentication in Crowdsensing Networks<br>via Evolutionary Game ..... | 364 |
| <i>Na Ruan, Lei Gao, Haojin Zhu, Weijia Jia, Xiang Li, and Qi Hu</i>                                |     |
| Resource-Aware Photo Crowdsourcing Through Disruption Tolerant Networks .....                       | 374 |
| <i>Yibo Wu, Yi Wang, Wenjie Hu, Xiaomei Zhang, and Guohong Cao</i>                                  |     |

## **Session 6A: Cloud Service and Storage**

|                                                                                                                                                      |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Mayflower: Improving Distributed Filesystem Performance Through SDN/Filesystem<br>Co-Design .....                                                    | 384 |
| <i>Sajjad Rizvi, Xi Li, Bernard Wong, Fiodar Kazhamiaka, and Benjamin Cassell</i>                                                                    |     |
| A Parity-Based Data Outsourcing Model for Query Authentication and Correction .....                                                                  | 395 |
| <i>Shixin Tian, Ying Cai, and Zhenbi Hu</i>                                                                                                          |     |
| Cure: Strong Semantics Meets High Availability and Low Latency .....                                                                                 | 405 |
| <i>Deepthi Devaki Akkoorath, Alejandro Z. Tomsic, Manuel Bravo, Zhongmiao Li,<br/>Tyler Crain, Annette Bieniusa, Nuno Preguiça, and Marc Shapiro</i> |     |
| Flexible Instance: Meeting Deadlines of Delay Tolerant Jobs in the Cloud<br>with Dynamic Pricing .....                                               | 415 |
| <i>Xiaomeng Yi, Fangming Liu, Zongpeng Li, and Hai Jin</i>                                                                                           |     |
| SpotLight: An Information Service for the Cloud .....                                                                                                | 425 |
| <i>Xue Ouyang, David Irwin, and Prashant Shenoy</i>                                                                                                  |     |

## **Session 6B: Social Networks and Mobile Sensing**

|                                                                                            |     |
|--------------------------------------------------------------------------------------------|-----|
| Routing and Scheduling of Social Influence Diffusion in Online Social Networks .....       | 437 |
| <i>Hui-Ju Hung, De-Nian Yang, and Wang-Chien Lee</i>                                       |     |
| Social Graph Publishing with Privacy Guarantees .....                                      | 447 |
| <i>Faraz Ahmed, Alex X. Liu, and Rong Jin</i>                                              |     |
| ChitChat: An Effective Message Delivery Method in Sparse Pocket-Switched<br>Networks ..... | 457 |
| <i>Douglas McGeehan, Dan Lin, and Sanjay Madria</i>                                        |     |

|                                                                                                                  |     |
|------------------------------------------------------------------------------------------------------------------|-----|
| On Source Dependency Models for Reliable Social Sensing: Algorithms<br>and Fundamental Error Bounds .....        | 467 |
| <i>Shuochao Yao, Shaohan Hu, Shen Li, Yiran Zhao, Lu Su, Lance Kaplan, Aylin Yener,<br/>and Tarek Abdelzaher</i> |     |

|                                                                     |     |
|---------------------------------------------------------------------|-----|
| Efficient Top-k Result Diversification for Mobile Sensor Data ..... | 477 |
| <i>Masahiro Yokoyama and Takahiro Hara</i>                          |     |

## **Session 7A: Energy Management and Green Distributed Computing**

|                                                                                                                    |     |
|--------------------------------------------------------------------------------------------------------------------|-----|
| Energy Minimization for Quality-Constrained Video with Multipath TCP<br>over Heterogeneous Wireless Networks ..... | 487 |
| <i>Jiyan Wu, Bo Cheng, and Ming Wang</i>                                                                           |     |

|                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------|-----|
| Efficient Resource Allocation and Consolidation with Selfish Agents: An Adaptive<br>Auction Approach ..... | 497 |
| <i>Richard T. B. Ma</i>                                                                                    |     |

|                                                                                |     |
|--------------------------------------------------------------------------------|-----|
| HIDE: AP-Assisted Broadcast Traffic Management to Save Smartphone Energy ..... | 509 |
| <i>Ge Peng, Gang Zhou, David T. Nguyen, Xin Qi, and Shan Lin</i>               |     |

## **Session 7B: Smart Communities and Internet of Things**

|                                                                       |     |
|-----------------------------------------------------------------------|-----|
| Accurate Spatial Calibration of RFID Antennas via Spinning Tags ..... | 519 |
| <i>Chunhui Duan, Lei Yang, and Yunhao Liu</i>                         |     |

|                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------|-----|
| WiLocator: WiFi-Sensing Based Real-Time Bus Tracking and Arrival Time Prediction<br>in Urban Environments ..... | 529 |
| <i>Wenping Liu, Jiangchuan Liu, Hongbo Jiang, Bicheng Xu, Hongzhi Lin, Guoyin Jiang,<br/>and Jing Xing</i>      |     |

|                                                                                                                     |     |
|---------------------------------------------------------------------------------------------------------------------|-----|
| CACE: Exploiting Behavioral Interactions for Improved Activity Recognition<br>in Multi-inhabitant Smart Homes ..... | 539 |
| <i>Mohammad Arif Ul Alam, Nirmalya Roy, Archan Misra, and Joseph Taylor</i>                                         |     |

## **Session 8A: Distributed Algorithms and Theory 2**

|                                                                                      |     |
|--------------------------------------------------------------------------------------|-----|
| Overlay Design for Topic-Based Publish/Subscribe under Node Degree Constraints ..... | 549 |
| <i>Chen Chen, Yoav Tock, and Hans-Arno Jacobsen</i>                                  |     |

|                                                                                                |     |
|------------------------------------------------------------------------------------------------|-----|
| Service Placement for Detecting and Localizing Failures Using End-to-End<br>Observations ..... | 560 |
| <i>Ting He, Novella Bartolini, Hana Khamfroush, InJung Kim, Liang Ma, and Tom La Porta</i>     |     |

|                                                               |     |
|---------------------------------------------------------------|-----|
| Live Exploration of Dynamic Rings .....                       | 570 |
| <i>G. A. Di Luna, S. Dobrev, P. Flocchini, and N. Santoro</i> |     |

|                                                   |     |
|---------------------------------------------------|-----|
| Randomized Load Balancing in Finite Regimes ..... | 580 |
| <i>Antonie S. Godtschalk and Florin Ciucu</i>     |     |

## Session 8B: Mobile Networks and Protocols

|                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------|-----|
| Spectrum Matching .....                                                                                              | 590 |
| <i>Yanjiao Chen, Linshan Jiang, Haofan Cai, Jin Zhang, and Baochun Li</i>                                            |     |
| CACA: Link-Based Channel Allocation Exploiting Capture Effect for Channel Reuse<br>in Wireless Sensor Networks ..... | 600 |
| <i>Junghyun Jun, Solchan Yeon, Titir Kundu, Dharma P. Agrawal, and Jaehoon Jeong</i>                                 |     |
| An Analysis of Onion-Based Anonymous Routing for Delay Tolerant Networks .....                                       | 609 |
| <i>Kazuya Sakai, Min-Te Sun, Wei-Shinn Ku, Jie Wu, and Faisal S. Alanazi</i>                                         |     |
| Directional Beam Alignment for Millimeter Wave Cellular Systems .....                                                | 619 |
| <i>Jie Zhao, Xin Wang, and Harish Viswanathan</i>                                                                    |     |
| Measurement, Modeling, and Analysis of TCP in High-Speed Mobility Scenarios .....                                    | 629 |
| <i>Qingfang Liu, Ke Xu, Haiyang Wang, Meng Shen, Li Li, and Qingyang Xiao</i>                                        |     |

## Session 9A: Cloud and Datacenter Networks 2

|                                                                               |     |
|-------------------------------------------------------------------------------|-----|
| Backlog-Aware SRPT Flow Scheduling in Data Center Networks .....              | 639 |
| <i>Tong Zhang, Fengyuan Ren, and Ran Shu</i>                                  |     |
| An NFV Orchestration Framework for Interference-Free Policy Enforcement ..... | 649 |
| <i>Xin Li and Chen Qian</i>                                                   |     |
| Bandwidth-Greedy Hashing for Massive-Scale Concurrent Flows .....             | 659 |
| <i>Tian Pan, Bin Liu, Xiaoyu Guo, Yang Li, and Haoyu Song</i>                 |     |
| Fast Total Ordering for Modern Data Centers .....                             | 669 |
| <i>Amy Babay and Yair Amir</i>                                                |     |

## Session 9B: Security and Privacy 2

|                                                                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A De-compositional Approach to Regular Expression Matching for Network Security<br>Applications .....                                                                           | 680 |
| <i>Eric Norige and Alex Liu</i>                                                                                                                                                 |     |
| Privacy-Preserving Data Classification and Similarity Evaluation for Distributed<br>Systems .....                                                                               | 690 |
| <i>Qi Jia, Linke Guo, Zhanpeng Jin, and Yuguang Fang</i>                                                                                                                        |     |
| Secure Surfing: Privacy-Preserving Speeded-Up Robust Feature Extractor .....                                                                                                    | 700 |
| <i>Qian Wang, Shengshan Hu, Jingjun Wang, and Kui Ren</i>                                                                                                                       |     |
| D-DEMOS: A Distributed, End-to-End Verifiable, Internet Voting System .....                                                                                                     | 711 |
| <i>Nikos Chondros, Bingsheng Zhang, Thomas Zacharias, Panos Diamantopoulos,<br/>Stathis Maneas, Christos Patsonakis, Alex Delis, Aggelos Kiayias,<br/>and Mema Roussopoulos</i> |     |

## Poster Session

|                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------|-----|
| Deadline-Sensitive User Recruitment for Probabilistically Collaborative Mobile<br>Crowdsensing .....  | 721 |
| <i>Mingjun Xiao, Jie Wu, He Huang, Liusheng Huang, and Chang Hu</i>                                   |     |
| RF-ISee: Identify and Distinguish Multiple RFID Tagged Objects in Augmented<br>Reality Systems .....  | 723 |
| <i>Jianqiang Sun, Lei Xie, Qingliang Cai, Chuyu Wang, Jie Wu, and Sanglu Lu</i>                       |     |
| OmniFlow: Coupling Load Balancing with Flow Control in Datacenter Networks .....                      | 725 |
| <i>Kaiyuan Wen, Zhuzhong Qian, Sheng Zhang, and Sanglu Lu</i>                                         |     |
| Approximate Agreement under Mobile Byzantine Faults .....                                             | 727 |
| <i>Silvia Bonomi, Antonella Del Pozzo, Maria Potop-Butucaru, and Sébastien Tixeuil</i>                |     |
| Preserving Incumbent Users' Privacy in Server-Driven Dynamic Spectrum Access<br>Systems .....         | 729 |
| <i>Yanzhi Dou, He Li, Kexiong (Curtis) Zeng, Jinshan Liu, Yaling Yang, Bo Gao, and Kui Ren</i>        |     |
| On MinMax-Memory Claims for Scientific Workflows in the In-memory Cloud<br>Computing .....            | 731 |
| <i>Yang Wang, Chengzhong Xu, Shuibing He, and Xian-He Sun</i>                                         |     |
| On the Efficiency of Decentralized Search in Expert Networks .....                                    | 733 |
| <i>Liang Ma, Mudhakar Srivatsa, Derya Cansever, Xifeng Yan, Sue Kase, and Michelle Vanni</i>          |     |
| Virtual Machine Level Temperature Profiling and Prediction in Cloud Datacenters .....                 | 735 |
| <i>Zhaohui Wu, Xiang Li, Peter Garraghan, Xiaohong Jiang, Kejiang Ye,<br/>and Albert Y. Zomaya</i>    |     |
| Strategic Security Resource Allocation for Internet of Things .....                                   | 737 |
| <i>Antonino Rullo, Daniele Midi, Edoardo Serra, and Elisa Bertino</i>                                 |     |
| FSQCN: Fast and Simple Quantized Congestion Notification in Data Center Ethernet .....                | 739 |
| <i>Chang Ruan, Jianxin Wang, and Wanchun Jiang</i>                                                    |     |
| Practical Concurrent Wireless Charging Scheduling for Sensor Networks .....                           | 741 |
| <i>Peng Guo, Xuefeng Liu, Tingfang Tang, Shaojie Tang, and Jiannong Cao</i>                           |     |
| A Geometric Windowing Algorithm in Network Data-Plane Verification .....                              | 743 |
| <i>Richard Chen, Toru Mano, Takeru Inoue, Kimihiro Mizutani, Hisashi Nagata,<br/>and Osamu Akashi</i> |     |
| Dslash: Managing Data in Overloaded Batch Streaming Systems .....                                     | 745 |
| <i>Robert Birke, Mathias Bjoerkqvist, Evangelia Kalyvianaki, and Lydia Y. Chen</i>                    |     |
| Distributed Online Data Aggregation in Dynamic Graphs .....                                           | 747 |
| <i>Quentin Bramas, Toshimitsu Masuzawa, and Sébastien Tixeuil</i>                                     |     |
| Efficient Free-Rider Detection Using Symmetric Overlays .....                                         | 749 |
| <i>João Silva, Xavier Vilaça, Hugo Miranda, and Luís Rodrigues</i>                                    |     |

|                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------|-----|
| Distributed Encoding for Multiple-Inherited Locators to Accommodate Billions of Objects in the Internet ..... | 751 |
| <i>Xiaozhe Shao, Feng Wang, Lixin Gao, Kenji Fujikawa, and Hiroaki Harai</i>                                  |     |
| Sprout: A Functional Caching Approach to Minimize Service Latency in Erasure-Coded Storage .....              | 753 |
| <i>Vaneet Aggarwal, Yih-Farn R. Chen, Tian Lan, and Yu Xiang</i>                                              |     |

| <i>Franz J. Hauck and Jörg Domaschka</i>                                                                      |     |

## Demo Session

|                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------|-----|
| DMZtore: A dispersed Data Storage System with Decentralized Multi-factor Access Control (Demo) .....                            | 757 |
| <i>Ertem Esiner, Shun Hanli Hanley, and Anwitaman Datta</i>                                                                     |     |
| Milk Carton: A Face Recognition-Based FTR System Using Opportunistic Clustered Computing .....                                  | 759 |
| <i>Edgar Marko Trono, Manato Fujimoto, Hirohiko Suwa, Yutaka Arakawa, and Keiichi Yasumoto</i>                                  |     |
| Memory Efficient One-Sided Communication Library “ACP” in Globary Memory on Raspberry Pi 2 .....                                | 761 |
| <i>Yoshiyuki Morie, Hiroaki Honda, Takeshi Nanri, Taizo Kobayashi, Hidetomo Shibamura, Ryutaro Susukita, and Yuichiro Ajima</i> |     |
| An SDN-Based Multipath GridFTP for High-Speed Data Transfer .....                                                               | 763 |
| <i>Che Huang, Chawanat Nakasan, Kohei Ichikawa, and Hajimu Iida</i>                                                             |     |
| An Endpoint Communication Profiling Tool for Distributed Computing Frameworks .....                                             | 765 |
| <i>Andrea Rosà, Lydia Y. Chen, and Walter Binder</i>                                                                            |     |
| Cruisers: A Public Automotive Sensing Platform for Smart Cities .....                                                           | 767 |
| <i>Yin Chen, Jin Nakazawa, Takuro Yonezawa, Takafumi Kawsaki, and Hideyuki Tokuda</i>                                           |     |
| DL-Store: A Distributed Hybrid OLTP and OLAP Data Processing Engine .....                                                       | 769 |
| <i>Kaiwen Zhang, Mohammad Sadoghi, and Hans-Arno Jacobsen</i>                                                                   |     |
| Middleware for Proximity Distributed Real-Time Processing of IoT Data Flows .....                                               | 771 |
| <i>Yugo Nakamura, Hirohiko Suwa, Yutaka Arakawa, Hirozumi Yamaguchi, and Keiichi Yasumoto</i>                                   |     |
| Federation of Private IaaS Cloud Providers through the Barter of Resources .....                                                | 773 |
| <i>Francisco Brasileiro and Eduardo Falcão</i>                                                                                  |     |
| Publish/Subscribe for Mobile Applications Using Shared Dictionary Compression .....                                             | 775 |
| <i>Christoph Doblender, Kaiwen Zhang, and Hans-Arno Jacobsen</i>                                                                |     |
| Real-Time Client-Side Phishing Prevention Add-On .....                                                                          | 777 |
| <i>Giovanni Armano, Samuel Marchal, and N. Asokan</i>                                                                           |     |
