

# **2016 China International Conference on Electricity Distribution (CICED 2016)**

**Xi'an, China  
10-13 August 2016**

**Pages 1898-2545**

**IEEE Catalog Number: CFP1676F-POD  
ISBN: 978-1-4673-9071-2**

|                                                                                                                                   |    |
|-----------------------------------------------------------------------------------------------------------------------------------|----|
| CP0049                                                                                                                            |    |
| Control Strategy of STATCOM for Asymmetrical Load Compensation                                                                    | 1  |
| CP0096                                                                                                                            |    |
| Control Method of Islanded Microgrid to Improve Reactive Power Sharing and Power Quality*                                         | 4  |
| CP0097                                                                                                                            |    |
| A Method Based on 2DOF-IMC to Voltage Low-Frequency Oscillation Suppression in High-Speed Railway Traction Network*               | 9  |
| CP0101                                                                                                                            |    |
| Analysis of Main Technical Problems for XS and JS $\pm 800\text{kV}$ UHVDC Projects System Test                                   | 14 |
| CP0104                                                                                                                            |    |
| A Power Quality Forecast Assessment of Bin-zhou Electrified Railway Based on PSASP                                                | 19 |
| CP0107                                                                                                                            |    |
| Comparison of Different Time-frequency Analysis Methods for Sparse Representation of PD-induced UHF Signal                        | 24 |
| CP0108                                                                                                                            |    |
| Research on Evaluation System of Power Control Architecture of Active Distribution Grid                                           | 29 |
| CP0109                                                                                                                            |    |
| Common Information Model and Its Application Based On Source and Load Interactive System                                          | 35 |
| CP0110                                                                                                                            |    |
| Study on Quality Fuzzy Synthetic Evaluation Method for Power Transformer Based on Life Cycle Theory                               | 39 |
| CP0113                                                                                                                            |    |
| The Platform of Monitoring and Analysis for Solar Power Data                                                                      | 43 |
| CP0114                                                                                                                            |    |
| Research on Calculation Method of Space Electric Field around Paralleled Double-Circuit Lines and Effects of Phasing Arrangements | 49 |
| CP0115                                                                                                                            |    |
| Research on the Load Characteristics of Inverter and Constant Speed Air Conditioner and the Influence on Distribution Network     | 55 |
| CP0119                                                                                                                            |    |
| A Novel On-line Identification for Thevenin Equivalent Parameters of Power System Regarding Persistent Disturbance Condition      | 59 |

|                                                                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| CP0120                                                                                                                                                   |     |
| Research on Intelligent Load Transfer Strategy based on Distribution Automation                                                                          | 67  |
| CP0128                                                                                                                                                   |     |
| Research of Principle and Site Trial Method for DC Current Transformer in the Converter Station                                                          | 70  |
| CP0131                                                                                                                                                   |     |
| Frequency Domain Harmonic Model of Electric Vehicle Charger Using Three-Phase Uncontrolled Rectifier                                                     | 74  |
| CP0132                                                                                                                                                   |     |
| Research and Application of Load Balance Approach for Distribution Based on Big Data                                                                     | 79  |
| CP0134                                                                                                                                                   |     |
| Optimal Layout and Scale of Charging Stations for Electric Vehicles                                                                                      | 85  |
| CP0144                                                                                                                                                   |     |
| Comparison and Analysis of Protection Latency Time between Intelligent and Traditional Substations                                                       | 90  |
| CP0145                                                                                                                                                   |     |
| Research on the Single-Phase Single-Stage Photovoltaic Grid-Connected Current Source Inverter                                                            | 95  |
| CP0146                                                                                                                                                   |     |
| Impacts of the Frequency Effects on Partial Discharge Characteristics of the High Frequency Power Transformer Insulation                                 | 102 |
| CP0147                                                                                                                                                   |     |
| A Modified Grid Voltage Feedforward Method to Improve the Stability-Robustness of the Grid-Connected Voltage Source Converter under Weak Grid Conditions | 106 |
| CP0150                                                                                                                                                   |     |
| The Research and Optimum Design for Vacuum Circuit Breaker with Spring Mechanism                                                                         | 111 |
| CP0153                                                                                                                                                   |     |
| Reliability Improvement of Long Distance Transmission Line Protection in Indonesia                                                                       | 116 |
| CP0154                                                                                                                                                   |     |
| Methods for Transient AC Overvoltage Reduction at Wind Farm Terminal                                                                                     | 120 |
| CP0155                                                                                                                                                   |     |
| The Discuss of Protection Strategy of HVDC Flexible Transmission Systems                                                                                 | 126 |
| CP0160                                                                                                                                                   |     |
| State Estimation for Active Distribution Networks based on Multisource Hybrid Measurements                                                               | 130 |

|                                                                                                                              |     |
