

Pipelines 2016

Out of Sight, Out of Mind, Not Out of Risk

Proceedings of the Pipelines 2016 Conference

Kansas City, Missouri, USA
17-20 July 2016

Volume 1 of 3

Editors:

Bryon L. Livingston
Anna Pridmore
Jim Geisbush

Cliff Cate III
Jeffrey W. Heidrick

ISBN: 978-1-5108-2966-4

Printed from e-media with permission by:

Contents

Alternate Projects and Corrosion

“Fit for Purpose” Design of a Desalinated Seawater Pipeline.....	1
José E. Bruce and José M. Adriasola	
Alternative Project Deliveries for Sewer Collections Systems—Developing and Implementing the Sullivan’s Island Turnkey Sewer Rehab Construction Program	13
James W. Shelton and Greg Gress	
An Experimental Study on the Mechanical Capability of a Rubber Gasket Joint in a Ductile Cast Iron Pipeline under Stretch-Bending.....	23
Yang Han, Junfeng Duan, and Jiahao Chen	
Annular Fluid Pressure Analysis of the Sabine Neches Levee Direct Pipe Crossing	31
A. E. Sparks and J. L. Robison	
Changes during the Weathering of Polyurethane Water Pipeline Coatings.....	44
S. G. Croll, M. Buratto, T. Calzone, C. Gu, D. Robinson, S. M. Smith, V. Upadhyay, and B. D. Keil	
CMAR Project Delivery Method Facilitates the Construction of a Large-Diameter Pipeline and Treatment Plant Upgrade Project, Allowing Timely Access to Much-Needed Water Resources in North Texas.....	57
David Burkhart	
Cost Performance of Job Order Contracting (JOC) Applied to Wastewater Pipeline Engineering and Construction Projects.....	64
Tober Francom, Samuel T. Ariaratnam, and Mounir El Asmar	
Design and Fabrication of Reducing Elbows	71
Jack Call and Chris Sundberg	
Design-Build Approach to a Major Crossing Avoids Environmental and Third Party Impacts and Saves \$10 Million.....	98
Bill Williams, Andrew Stevens, Bill Zietlow, and Randy Parks	

Electrochemical Characterization of the Soils Surrounding Buried or Embedded Steel Elements.....	110
Xingyu Wang, Xiaoning Qi, Zhibin Lin, Jinhui Wang, and Na Gong	
Energy Efficiency through Material Selection.....	117
Derek B. Scott and Maury D. Gaston	
Logic over Paradigms: Introducing Large-Diameter Pipelines for Efficient Freight Movement in Southern California	129
Richard I. Mueller	
Meeting the Evolving Challenges of the Relocation of a 90-Inch Concrete Cylinder Pipeline by the Use of a Design Build Delivery Vehicle for Hot Tapping and Plugging.....	139
Charles Herckis	
Planning and Execution of the Southern Delivery System Startup—Five Years in the Making	151
Joseph Rasmussen, Matthew Schultz, and J. Russell Snow	
Preparing an Envision Application for a \$2.5 Billion Dollar Project	161
Elizabeth R. Blackwelder, Sangita Rana, Rachel Ickert, and Russel Gibson	
Protecting Wastewater Transmission Systems from Potential Damage Caused by Air Pockets through the Use of Appropriately-Sized Air Valves	170
D. Kim Sorensen and Naftali Zloczower	
Quantifying Pipe Corrosion and Deterioration with Pipe Penetrating Radar	184
Csaba Ékes	
Statistical Modeling of Corrosion Failures in Natural Gas Transmission Pipelines	195
Mustafa M. Cobanoglu, Sharareh Kermanshachi, and Ivan Damnjanovic	
Steel Corrosion Detection Using Fiber Bragg Grating Sensors	205
Fodan Deng, Ying Huang, and Fardad Azarmi	
Corrosion Control of Paralleling Bar-Wrapped Concrete Cylinder Pipelines Utilizing an Existing Cathodic Protection System: Two for the Price of One	213
Matthew Snow and Jose L. Villalobos	
Utility Risk Management in Transmission Line Construction.....	219
G. N. Young, S. P. DiBenedetto, and V. Hutchison	

Zinc-Coated Ductile Iron Pipe.....228
 Maury D. Gaston

Condition Assessment

**12” Ductile Iron Forcemain Inspection in the Dead of Winter:
 What Could Possibly Go Wrong?237**
 William (Bill) Jappy

**A Risk-Based Condition Assessment of Process Piping for the
 San Jose-Santa Clara Regional Wastewater Facility245**
 Derek M. Wurst

**An Accelerometer-Based Real-Time Monitoring and Leak Detection
 System for Pressurized Water Pipelines.....257**
 Samer El Zahab, Fadi Mosleh, and Tarek Zayed

**Achieving Cost Efficiency through a Programmatic Approach to Condition
 Assessment.....269**
 Ahmad Habibian

Advances in the Technologies for Assessing Metallic Pipelines281
 Randy Williams, Allison Stroebele, Greg Taber, and Dave Kurtz

**Application of Neural Networks in Predicting the Remaining Useful
 Life of Water Pipelines292**
 Z. Zangenehmadar and O. Moselhi

Condition Assessment and Risk Analysis: What Tool Is the Right Tool?.....309
 Lisa Douglas and Shaun Pietig

**Condition Assessment and Service Life Analysis of an Asbestos-Cement
 Sewer Pipe321**
 M. Radlinski and J. Wolf

**Condition Assessment of Critical Transmission Pipelines at the
 Central Arizona Project334**
 Jim Geisbush

**Condition Assessment of a Wood Stave Intake, a Hand Dug Tunnel, and
 Concrete Cylinder Pipelines344**
 D. Buonadonna

**Conducting Safe, Extended Off-Tether Manned Entry Pipeline and Tunnel
 Inspections—The El Monte Raw Water Pipeline Inspection354**
 James W. Shelton and Emily Sadowsky

Energy Pipeline Integrity Water and Slope Crossing Assessments	362
Dave Richardson, Michael Byle, and Melissa Koob	
Evaluating the Effects of Damage in Ductile Iron Pipelines: Identifying the Critical Defect Size	372
Ali Alavinasab and Masood Hajali	
Evaluation of the Impact of Typical Imperfections in Hand-Applied CFRP Liners in Pressure Pipelines by Hydrostatic Testing.....	385
Rasko P. Ojdrovic, Murat Engindeniz, Nico Meyer, and Scott Arnold	
From Reactive to Active—Bringing Real-Time Monitoring to the Heart of Water Utility Operations and Asset Management	396
Cliff Jones	
How to Defer \$100 Million in Pipeline Repair Costs: El Monte Pipeline Inspection and Condition Assessment Project	406
Kirstin Byrne, James Cathcart, and Richard VanderSchaaf	
Leak Detection in Buried Pipes Using Ground Penetrating Radar—A Comparative Study	417
M. Abouhamad, T. Zayed, and O. Moselhi	
Lessons Learned from a Comprehensive City of Phoenix 24-Inch Ductile Iron Force Main Condition Assessment	425
Bethany McDonald, Ryan Riggs, Anita Pritchard, and Graham E. C. Bell	
Lining Large Pipes with the New Generation of Cementitious Lining Materials	438
Norman E. “Ed” Kampbell	
Main Breaks, Leakage, and Distribution System Evaluations	448
Frank J. Blaha and Jian Zhang	
Managing the Risk of Critical Water Trunk Mains: A Municipal Perspective	460
Yafei Hu, Wenqing Yang, Chris Macey, Michael Moncrieff, and Amir Agha	
Nationwide Survey on the Pipe Performance for Drinking Water and Force Main Pressure Pipe Applications.....	471
Jashanveer Singh and Sunil K. Sinha	
New Technologies and Applications of a Multi-Sensor Condition Assessment for Large-Diameter Underground Pipe Infrastructure	481
Csaba Ékes	

Not All Data Is Created Equal: Impact on Decision Making	490
Craig Daly, Chongyang Kate Zhao, Minh Smith, and Gert Van Der Walt	
Numbers Still Don't Lie—PCCP Performance Based on a Statistical Review of Fifteen Years of Inspection and Monitoring Data	506
Jorge A. Rodriguez, Brian Gresehover, Tym Armstrong, Joshua Hill, and Allison Stroebele	
One Voice for Sewer Condition Assessment and Asset Management	515
Phil Lewis, Yongwei Shan, and Hossein Khaleghian	
PCCP Condition Assessment: Are Current Numerical Models Too Conservative?	527
Shaoqing Ge and Sunil K. Sinha	
Performance Index and Prediction Model for Assessing the Remaining Life of Force Mains.....	538
Berk Uslu, Sunil K. Sinha, and Walter L. Graf	
Performance Monitoring of Extreme Large-Diameter Prestressed Concrete Cylinder Pipe with Distributed Fiber Optic Sensors.....	553
Xin Feng, Wenjing Wu, Sheng Zhong, Tong Zhu, and Jing Zhou	
PIPEiD: Pipeline Infrastructure Database.....	565
Sunil Sinha, Walter Graf, Peter Kraft, Fred Pfeifer, and David Hughes	
Populating Utility Risk Envelopes.....	575
James H. Anspach and Cesar A. Quiroga	
Prioritize Your Capital Spending: Make Informed Decisions Using Non-Destructive Acoustic Testing	585
M. Katz, D. Johnston, and R. Bincsik	
Risk Assessment for the Region of Peel's Lake-Based Water Supply System	598
Aman Singh, Roop Lutchman, Italia Ponce, and Imran Motala	
Sewer Inspection Prioritization Using a Defect-Based Bayesian Belief Network Model.....	613
Mohamed Elmasry, Tarek Zayed, and Alaa Hawari	
Smart Water Technology in Theory and Practice: A Californian Case Study on Pressure Transient.....	626
Cliff Jones and Ben Smither	

The True Causes of AC Pipe Failures—According to the Data637
 Dan Ellison and David Spencer

Thinking Outside the Pipe—DC Water’s Experience in Evaluating the Impact of Adjacent Construction on Masonry Sewer Tunnels648
 Steve Bian, Satish Soni, and Renni Zhao

Transient Hydraulics Modeling of Pressurization and Expulsion of Air Pockets in Water Pipelines Using Single Phase Pipeline Hydraulics Software658
 David Cheng and Borith Seng

Tucson Water’s Opportunistic Program Approach to Asbestos Cement Assessments and Longevity.....668
 Mike Ambroziak and Britt Klein

Using Electrical Continuity Testing to Improve PCCP Inspection Results676
 Bethany McDonald, Ryan Riggs, and Aimée Conroy

Visualizing Buried Risks: The Interpretation of Condition Assessment Data for San Diego County Water Authority’s Large-Diameter Pipelines.....686
 Martin R. Coghill and Chaosok Yek

Performance Assessment Model for Water Networks696
 M. Ismaeel and T. Zayed

Fast-Track Designs

Drought Triggers Fast-Paced Design.....708
 Christopher Haeckler and Jaime Ordonez

Ductile Iron Piping Systems Used in the Design and Construction of the Panama Canal Third Set of Locks Project.....718
 Jeffrey E. Erwin, Remigijus Aruna, and Gabriel E. Restrepo

From Reactive to Proactive: A Pipeline Owner’s Change in Philosophy.....730
 Anna Pridmore and Rasko Ojdrovic

Holistic and Efficient Sewage System Development for Delhi.....740
 Deepika, Raman Kumar, and Foster McMasters

Integration Investigation: How Do We Incorporate a New Water Supply into a Growing Water System?750
 Stephanie Cecil and David Bennett

Lessons Learned in the Planning, Design, and Construction of the Carlsbad Desalination Conveyance Pipeline.....758
 Mark W. Bush and Steve Tedesco

Navajo Gallup Water Supply Project Pipeline Design and Construction Evaluation.....768
 Andrew Robertson

Trends in Oil and Gas Pipeline Siting and the Need for Additional Engineering and Scientific Analysis Early in the Design Phase.....778
 S. Ryan, K. Freeman, M. Gartman, K. Demuth, and G. Jones

Jurisdictions and Survey

Improved Open-Ditch Pipeline As-Built System794
 Jan Van Sickle

A Proactive Approach Helps to “Secure the Corridors”806
 Scott Christensen, Todd Perimon, Michael Britch, Joelle Bennett, and John Plattsmier

Comparison of Construction Methods for Underground Freight Transportation in Texas.....817
 Amir Tabesh, Mohammad Najafi, Seyedmohammadsadegh Jalalediny Korky, Taha Ashoori, and Niloofar Rezaei

Data Collection Techniques for Subsurface Utility Planning on a University Campus: A Case Study827
 Kristopher B. Harbin

Development of a Web-Based GIS Modeling Platform for Pipeline Asset Management.....838
 Bhaskar Dasari and Sunil K. Sinha

Evaluation of Applications and the Comparison of Routes for Underground Freight Transportation in Texas.....847
 Niloofar Rezaie, Amir Tabesh, Mohammad Najafi, Baosong Ma, and Seyedeh Hosna Mousavipour

Ground Truth: Low Distortion Map Projections for Engineering, Surveying, and GIS.....857
 Michael L. Dennis

Tarrant Regional Water District: Integrated Pipeline; Real-Time As-Built for Construction.....870
 Lauren Tijerina, Jeff Coffey, Mark McGuire, Erin Atkinson, and Matt Gaughan

Integration of Utility Locations, Surveying, and ROW Mapping to Support the Planning-Level Design of over 200 Miles of Pipeline884
 William Landin, Joshua Cowden, Monica Griffitt, Andrew D. Dempsey, and Fred Easton Jr.

Jurisdictional Issues with Pipeline Permitting and Agency Approvals: Challenges and Solutions for the Gillette Madison Pipeline Project894
 Kate Henske and Levi Jensen

Large-Diameter Tunnel Challenges during the Integrated Pipeline (IPL) Project904
 Jonathan D. Shirk

Managing Utilities in 3D Design and Construction Workflow.....913
 Cesar Quiroga and James Anspach

Mobile Lidar Guidelines to Support Utility Asset Management along Highways922
 G. V. Roe, M. S. O’Banion, and M. J. Olsen

Monitoring Geotechnical Assets along Pipeline Corridors Using Manned and Unmanned Aerial Platform-Based Photogrammetry933
 Rüdiger Escobar-Wolf, Thomas Oommen, Colin Brooks, and Richard Dobson

Navigating Conflicting Crossing Jurisdictions for the St. Joseph Effluent Force Main939
 R. C. (Chris) Brockway and Don Gilpin

Navigating Multiple Jurisdictions within a Special Utility District949
 David Kahlich, Michael Lehrburger, Chandler Wilson, and Christina Baca

Pipeline and Survey Data for Long-Term Asset Management959
 Nathan D. Faber and Randall C. Hill

Pipeline Crossings Lead to an Environmental Miracle in Cambridge, Massachusetts.....967
 C. Emerson Olander, Kevin Raftery, and Catherine Woodbury

Surveying the Documentation Necessary during Design979
 Randall C. Hill and Scott T. Gibson

Surveying Monuments, Control Staking, and the Settlement Monitoring Needed during Construction.....987
 Randall C. Hill and Scott T. Gibson

The Importance of Quality Data for GIS Maps.....993
 D. C. Williams

**Unmanned Aircraft Systems-Based Photogrammetry for
 Ground Movement Monitoring1000**
 Farid Javadnejad and Daniel T. Gillins

Natural Disaster Mitigation

**Can the Design Criteria in AWWA M11 Serve the Users’
 Common Objective of “Doing More With Less?”1012**
 Jey K. Jeyapalan, Indrasenan Thusyanthan, and Arul M. Britto

**Case Study: Logan CSO Interceptor Installation beneath an
 Existing Improved Channel1024**
 Jordan Carrier

**Comparative Analysis of Raw Water Transmission System Design
 with Field Hydraulic Testing: Hydraulic and Surge Startup Testing for a
 Raw Water Transmission System1034**
 Christopher Ott, Kiersten Lee, Thomas J. Charles, Matthew Schultz, and
 Joseph Rasmussen

**Development, Evaluation, and Installation of a New Improved PVC (iPVC)
 Pipe for Water Applications1046**
 Dave Hughes, Chandan Venkatesh, Agnes Hye Jung Lee,
 Ameya Brahmanand Paradkar, and Mohammad Najafi

Earthquake-Resistant Ductile Iron Pipe, Valve, and Hydrant System1061
 Maury D. Gaston and Ryan S. Ratcliffe

Forensic Analysis of a Large-Diameter Knife Gate Valve Performance.....1072
 Christopher Trautner and Rasko Ojdrovic

**Goshen—A Call to Action: LWC’s Response and Infrastructure
 Improvements1083**
 Andrew F. Williams

**Improving the Performance of Steel Pipe Welded Lap Joints in
 Geohazard Areas1090**
 David L. McPherson, Matthew Duffy, Evangelia Koritsa, Spyros A. Karamanos,
 and John R. Plattsmier

Rerounding of Deflected Buried Pipe Subjected to Internal Pressure1102
 Mehdi S. Zarghamee and Atis A. Liepins

Tsunami Migration Forces Acting on Surface Pipeline Facilities and Countermeasures1115
 T. Tanaka, T. Mayumi, and Y. Ono

A Water Transmission Pipeline across the Longest Bridge in Arkansas, Spanning the Arkansas River1127
 J. T. Vetter, W. C. Hall, and D. Shumard

Waterhammer Pressure Intensity in House Service Pipelines1139
 A. Malekpour and D. McPherson

Plan and Design

A Framework to Evaluate the Life Cycle Costs and Environmental Impacts of Water Pipelines1152
 Albert Thomas, Bharadwaj R. K. Mantha, and Carol C. Menassa

Atlanta Gas Light Company’s Integrated System Reinforcement Program1164
 Stephen L. Wassell

Avoid the Squeeze on Your Wallet and Pipeline: ARV Strategies1177
 K. Rutherford and K. LaBree

An Arlington, Texas, High Pressure Gas Line’s Exposure and Repair1185
 Rick Besancon

Degrees of Freedom: Value/Risk Engineering for Large Diameter Pipe in Soft Ground Conditions1197
 Troy R. Hotchkiss and Ed Weaver

DEM Analysis on the Mechanical Behavior of Buried Pipe during Sheet-Pile Extraction1207
 K. Terada, K. Ono, S. Takahara, T. Miki, Y. Sawada, and T. Kawabata

Design Challenges and Sustainability Provisions for the Paradise Whitney Interceptor1218
 Greg Gould and Michael Fleury

Design of Concrete Pressure Pipelines for Thrust Restraint Using AWWA Manual M91227
 Mehdi S. Zarghamee

The DigIndy CSO Tunnel System1239
 Maceo R. Lewis IV and Nick J. Maynard

Eliminating the Grand River Overflows: 27 Years in the Making	1248
Britton Evans	
Finite Element Analysis of the Mechanical Behavior of Mitered Steel Pipe Elbows under Bending and Pressure.....	1255
Spyros A. Karamanos, Konstantinos Antoniou, Brent Keil, and Robert J. Card	
Hatfield Trunk Sewer: The Challenges of Constructing a Deep Sewer in an Urban Environment.....	1270
Clay Herndon and Andrea Brinkley	
Lessons Learned Installing a Critical Large-Diameter Spiral Welded Steel Water Pipe under New York Harbor	1279
Gedas Grazulis, Ronald S. Brown, and Richard Mielke	
Lessons Learnt from Horizontal Auger Boring School.....	1290
Tom Iseley and Seyed Saleh Behbahani	
Location of the Neutral Axis for the Determination of Yield and Ultimate Moment Capacities of Concrete Pressure Pipes	1299
Sri Rajah	
Performance of Buried Steel-Reinforced High-Density Polyethylene (SRHDPE) Pipes in a Shallow Cover under a Test Truck Load in a Full-Scale Field Test	1312
Deep Kumar Khatri, Jie Han, Robert L. Parsons, and James J. Brennan	
Sioux City, Iowa, Utilizes a Horizontal Directional Drill (HDD) to Install Twin 36” Casings for Sanitary Sewer Siphons	1325
Peter Merten, Josiah Holst, and David Reuter	
Steel Specifications for Welded Steel Pipe.....	1336
Vic DeGrande, Ralph Hayden, Joel Olmos, and Jeff Stember	
The Big Horn Well Connection Project: Unique Challenges of a Cross-Country Pipeline in Wyoming	1348
Jeffrey Rosenlund	
The City of Lafayette, Louisiana: Another Positive First Experience with HDD Installation Using Ductile Iron Pipe.....	1358
R. R. Carpenter, Chris Richard, Boyd Simon, and P. Chuck Solomon	
The Existing Atoka Pipeline Surge Protection System: The Full Story	1369
Rami Issa, John L. Hare, Sam Samandi, Simon Hernandez, and Christopher Ferguson	

Utilizing the Total Cost Equation When Selecting Pipeline Material1379
 Roy W. Mundy II

**What Every Conveyance Designer Should Know about Air Valves and
 Air Valve Assemblies1388**
 Roger Beielser

Rehabilitation

**66-Inch Sewer Interceptor Rehabilitation in a Recreational
 Corridor of the Trinity River1400**
 Jerry Snead II and James McDonald

**A Case History of an Emergency Large-Diameter Valve Replacement
 after Catastrophic Failure on a Major Regional Water Main1410**
 Matthew J. Duffy, John Plattsmier, Tyler Wubbena, and Matt Nussbaumer

**A Comparative Study of Soil Pressure and Deformation of Pipes
 Installed by the Open-Cut Method and Trenchless Technology1420**
 Nilo Tsung, Mingming Zheng, Mohammad Najafi, and Saleh Mehraban

**A Revolutionary City’s Multi-Faceted Emergency Repair under the
 Governor’s Avenue1431**
 Jonathan E. Kunay and Nicholas J. Rystrom

**Addressing Emergency Projects Identified during
 Condition Assessments Can Be Challenging1442**
 Tim F. Taylor and Lara Kammereck

**Analyses of the Failure of an Embankment Slope and Its Influence on the
 Pipeline Installed in that Embankment Slope1454**
 Tetsuji Kitano, Shusuke Fujita, Hitoshi Ogura, and Atsushi Suganuma

Buried and Forgotten—Challenges from the Past1464
 C. A. Johnson and F. Brown III

**Carbon Fiber Pipeline Repair—Destructive Testing and
 Agency Experience1473**
 Nathan D. Faber and Martin R. Coghill

DC Water 22-Foot Brick Sewer Emergency Repair1483
 Steve Bian, Anna Pridmore, Murat Engindeniz, Ben Deaton, and
 Rasko P. Ojdrovic

Dealing with the Results of Advanced Inspection Technology—Emergency Rehabilitation of the St. James Interceptor Siphon by CIPP Methods in Winnipeg, Manitoba, Canada.....	1493
Chris Macey, Adam Braun, Marv McDonald, Armand Delaurier, and Kas Zurek	
Design and Fabrication Concepts of Steel Liners for the Rehabilitation of Large-Diameter Pressure Pipelines.....	1504
Henry H. Bardakjian and Michael R. McReynolds	
Discovery to Solution Implementation: NTMWD Addresses Degraded Piping under a Major Highway.....	1515
Steven Long, Travis Markham, Mike Larsen, Anna Pridmore, Rasko Ojdrovic, and Murat Engindeniz	
Distribution System Transient Monitoring in the 21st Century—The Future Has Arrived	1523
Matthew Sellers, Scott Williams, and Steven C. Seachrist	
Emergency Repairs Where a 45%+ Slope Is the Preferred Option	1534
Brian D. Bartle, Michael Blanchette, and George Sidhu	
Emergency Waterline Replacement in Kansas City: Crossing the Blue River by Horizontal Directional Drilling.....	1547
David Reuter and Kelly Finn	
Evaluation of Unintended Live Load Effects on Buried Pipelines.....	1556
Peter D. Nardini, Rasko Ojdrovic, and Steven DelloRusso	
Evolution of the CFRP Repair of Pipelines—The Road to a Well-Established Technology	1568
Mehdi S. Zarghamee and Murat Engindeniz	
Extreme Makeover for a 60-Year-Old High Service Pump Station: Transitioning from Horizontal to Vertical Pumps	1578
Clayton C. Barnard and Jeff Hogan	
Fiberglass Pipe Is Helping Solve the World’s Drinking Water Shortage	1589
Jeffrey LeBlanc and Matthew Sternisha	
Getting Ahead of a Pipeline Failure: Proactive Condition Assessment and Rehabilitation for a 48-Inch PCCP Wastewater Force Main in West Palm Beach.....	1600
Ray Thomson, Vivek Galav, Robert J. Card, and Shawn Waldeck	

Got a Lot of Wire Breaks, Now What? An Overview of the Santa Clara Valley Water District’s Emergency Repair of a 96-Inch PCCP and Changes in Program and Policies.....	1613
Tony T. Ndah and James Stephen Crowley	
HDD Construction Observation and Documentation: Risk Management and the Role of the Engineer	1628
Mark A. Miller and Sarkar M. Sayem	
How Much to Spend on Sewer Inspection, Renewal, and Replacement? A Risk-Based Assessment for DC Water	1641
Seth Anderson, Seth Finnicum, Ella Garcia, and Jennifer Howells	
Large-Diameter, Non-Circular Trunk Sewer Rehabilitation Using GRP Composites.....	1653
Chris Macey, Adam Braun, Kas Zurek, and Stacy Cournoyer	
Large-Diameter Microtunneling and MTBM Wet Retrieval at the Gilboa Dam Reconstruction Project	1664
B. Marquis, J. Vickers, J. Gerlach, and J. Diamante	
Lowell Waterline Rehabilitation: A Case Study.....	1674
Michael Lehrburger, Steve Austin, and Julie Koehler	
Meeting the Challenges to Replace a Valve on a Toxic Carbon Dioxide Transmission Line Using In Service Welding and Hot Tapping and Plugging.....	1685
Charles Herckis	
Model Experiments for the Mechanical Behavior of Buried Rehabilitated Pipes under Eccentric Loading.....	1698
S. Takahara, K. Ono, Y. Sawada, and T. Kawabata	
A NASA Rocket Stand 36”-112” Dia. Cooling System’s Complex Pipe Replacement	1710
B. Nash Williams	
Permanent Leak Detection for Water Pipelines: Using Technology to Identify Leaks Prior to Pipeline Failures	1721
Eric Stacey	
Pipe Replacement Strategies for Aging and Seismic Issues.....	1732
John Eidinger and Jennifer Cioffi	
Pipeline Rehabilitation: Minimizing Impacts and Reducing Maintenance	1744
Douglas Mikeworth and Kelly Davis	

Planning, Designing, and Executing an Asbestos Cement Pipe Bursting Project with Municipal Forces1756
 E. A. Ambler, P. Dyke, C. Schreiner, B. Fletcher, and F. Fresneda

Proper Tools and Techniques for the Inspection, Structural Observation, and Field Quality Control of Hand-Applied Fiber Reinforced Polymer (FRP) Pipeline Rehabilitation Systems1766
 P. Wasco, T. J. Gerard, A. J. Wagner, and S. F. Arnold

Rapid Microtunneling Installation of 1050-mm (42-in.) Fiberglass-Reinforced Polymer Mortar Sewer Pipe1775
 Bijan Khamanian and Bruce Corwin

Rehabilitation of High Consequence Water Mains In Lieu of Replacement1781
 John C. Matthews and Susan Donnally

Rehabilitation of the Etiwanda Pipeline1789
 Michael McReynolds, Kelly Murphy, and Bill Sleeper

Repair of a Riveted Steel Penstock in the Mormon Flat Dam with Carbon FRP.....1799
 M. Ehsani, C. Hurley, and J. Ahumada

Silicon Valley Mid-Summer Emergency: Santa Clara Addresses the Peak-Demand Repair of a 96-Inch Pipeline1810
 Peter Nardini II, Rasko Ojdrovic, and Anna Pridmore

Steel Curved Pipe Jacking Construction under Complicated Conditions for a Curved Pipe Roof.....1820
 Peng Zhang, Baosong Ma, Cong Zeng, Hongming Xie, Daowei Wang, and Xuan Li

Strategic Integration of Risk-Based Asset Management to Improve Large-Diameter Pipelines1830
 Mark G. Wade

Culvert Reline under I-91, Middletown, CT1839
 Hugh B. Mickel and Jon R. Hagert

The Importance of a Post-Installation Inspection of Carbon Fiber Reinforced Polymer Strengthening of Prestressed Concrete Cylinder Pipe.....1850
 Olena Lytvyn, Robert J. Card, and Alexis J. Valdes

The Role of Resilience in the Rehabilitation Planning of Water Pipeline Systems.....1856
 Kalyan R. Piratla, John C. Matthews, and Zeinab Farahmandfar

Val Vista Water Transmission Main Rehabilitation—Steel Slip Lining of a 90” PCCP1865
 David Markert and Cole Kratochvil

Seismic

3D Finite Element Seismic Simulation of Steel Pipelines Embedded in Different Backfills1875
 Prapon Somboonyanon and Ceki Halmen

A Unique Solution to a Unique Problem: Large-Diameter Pipeline Seismic Retrofit Mitigates Landslide Hazards1887
 Darren Baune

Pipeline Security with Restrained Joint Ductile Iron Pipe during Seismic Events.....1899
 Richard W. Rowell
