# TABLE OF CONTENTS

|                                                                                                                                             |            |
|---------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>H<sub>∞</sub> DYNAMIC OUTPUT FEEDBACK CONTROL OF POWER SYSTEMS WITH ELECTRIC VEHICLES .....</b>                                          | <b>1</b>   |
| <i>N.T. Pham ; L.V. Hien ; H. Trinh ; K.P. Wong</i>                                                                                         |            |
| <b>AN IMPROVED STABILITY CRITERION FOR TIME-DELAY POWER SYSTEMS WITH ELECTRIC VEHICLES AND HIGH VOLTAGE DIRECT CURRENT POWER LINKS.....</b> | <b>7</b>   |
| <i>N.T. Pham ; L.V. Hien ; H. Trinh ; K.P. Wong</i>                                                                                         |            |
| <b>FEASIBILITY ANALYSIS AND COMPARISON OF DIFFERENT TYPES OF ELECTRIC VEHICLES .....</b>                                                    | <b>13</b>  |
| <i>Chaohang Zhang ; Jianwei Chen ; Yuhang Wang ; Guibin Wang ; Zhao Xu</i>                                                                  |            |
| <b>A COMPARATIVE STUDY OF DIFFERENT TRANSFORMER CONNECTIONS FOR RAILWAY POWER SUPPLY-MITIGATION OF VOLTAGE UNBALANCE.....</b>               | <b>19</b>  |
| <i>G. Firat ; Guangya Yang ; H.A.H. Al-Ali</i>                                                                                              |            |
| <b>A NOVEL FAULT RIDE THROUGH CONTROL STRATEGY FOR DFIG WIND TURBINE IN WEAK SYSTEMS.....</b>                                               | <b>25</b>  |
| <i>Min Hong ; Huanhai Xin ; Zhen Wang ; Deqiang Gan ; Chenbo Xu ; Shengfeng Yang</i>                                                        |            |
| <b>INVESTMENT DEMANDS IN VARIOUS STAGES OF POWER NETWORK DEVELOPMENT .....</b>                                                              | <b>31</b>  |
| <i>Bo Zou ; Ying Zhou ; Fushuan Wen ; Liexiang Hu ; Qian Xu ; Zhou Lan</i>                                                                  |            |
| <b>HARDWARE-IN-THE-LOOP (HIL) TEST OF DEMAND AS FREQUENCY CONTROLLED RESERVE (DFR) .....</b>                                                | <b>37</b>  |
| <i>Q. Wu ; J.K. Zimmermann ; J. Østergaard ; A.H. Nielsen</i>                                                                               |            |
| <b>ASSET MANAGEMENT IN POWER SYSTEMS.....</b>                                                                                               | <b>43</b>  |
| <i>Chang Liu ; Guori Huang ; Kan Zhang ; Fushuan Wen ; M.A. Salam ; S.P. Ang</i>                                                            |            |
| <b>CONTROL STRATEGIES OF BATTERY ENERGY STORAGE SYSTEMS FOR SMOOTHING WIND POWER FLUCTUATIONS .....</b>                                     | <b>48</b>  |
| <i>Xiaolei Wang ; Lei Sun ; Fushuan Wen ; M.A. Salam ; S.P. Ang</i>                                                                         |            |
| <b>A LANGUAGE CHOQUET INTEGRAL OPERATOR-BASED BLACK-START GROUP DECISION-MAKING METHOD .....</b>                                            | <b>52</b>  |
| <i>Weihua Li ; Xindong Liu ; Fushuan Wen ; M.A. Salam ; S.P. Ang</i>                                                                        |            |
| <b>VULNERABILITY ANALYSIS FOR TRANSMISSION LINES: FRAMEWORK AND METHODOLOGY .....</b>                                                       | <b>58</b>  |
| <i>Xindong Liu ; Weihua Li ; Can Chen ; Fushuan Wen ; Jianfen Zhang ; Yulong Huang</i>                                                      |            |
| <b>TRANSMISSION PLANNING WITH RENEWABLE GENERATION AND ENERGY STORAGE .....</b>                                                             | <b>64</b>  |
| <i>Jing Zheng ; Fushuan Wen ; Minglei Zhou ; Liexiang Hu ; Qian Xu ; Zhou Lan</i>                                                           |            |
| <b>DESIGN AND APPLICATION OF ENERGY ROUTER TO REALISE ENERGY INTERNET .....</b>                                                             | <b>70</b>  |
| <i>L.C. Xin ; Z.Y. Dong ; Y.L. Sun ; J.M. Hou ; J.W. Liu</i>                                                                                |            |
| <b>A HEURISTIC BEST-FIT CLUSTERING APPROACH FOR REMOTE METERING SMART GRID NETWORKS .....</b>                                               | <b>76</b>  |
| <i>H. Miao ; G. Chen ; Z.Y. Dong</i>                                                                                                        |            |
| <b>ASSESSING THE FEASIBILITY OF THE INTERCONNECTED POWER MARKET IN AUSTRALIA.....</b>                                                       | <b>82</b>  |
| <i>Zeya Wang ; Zhao Yang Dong ; Xin Zhang ; Jun Hua Zhao</i>                                                                                |            |
| <b>A GOOD POINT SET-BASED KNOWLEDGEBASE GENERATION SCHEME FOR POWER SYSTEM INTELLIGENT DYNAMIC SECURITY ASSESSMENT .....</b>                | <b>88</b>  |
| <i>Yuchen Zhang ; Yan Xu ; Zhao Yang Dong ; Xuekuan Xie ; Guo Chen ; Chao Lu</i>                                                            |            |
| <b>AN IMPROVED HYBRID APPROACH FOR TRANSIENT STABILITY-CONSTRAINED OPTIMAL POWER FLOW .....</b>                                             | <b>94</b>  |
| <i>X. Xie ; R. Zhang ; Z.Y. Dong ; Y. Zhang</i>                                                                                             |            |
| <b>IMPROVED GRID CONNECTION OPERATION OF TYPE-III WIND TURBINE UNDER UNBALANCED FUNDAMENTAL AND DISTORTED GRID VOLTAGES .....</b>           | <b>100</b> |
| <i>Heng Nian ; Chenwen Cheng</i>                                                                                                            |            |
| <b>INSTANTANEOUS POWER ANALYSIS AND CONTROL OF THREE-PHASE GRID-CONNECTED VSC UNDER UNBALANCED GRID FAULTS .....</b>                        | <b>106</b> |
| <i>Xiong Du ; Yue Wu ; Shida Gu ; Heng-Ming Tai ; Pengju Sun ; Yongliang Ji</i>                                                             |            |
| <b>OFFSHORE WIND ENERGY WITH HVDC TRANSMISSION: RECENT DEVELOPMENT IN JAPAN.....</b>                                                        | <b>112</b> |
| <i>N. Kimura</i>                                                                                                                            |            |

|                                                                                                                                           |            |
|-------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>RESEARCH OF POWER SYSTEM ONLINE DYNAMIC SECURITY ASSESSMENT APPLICATION EXPANSION .....</b>                                            | <b>117</b> |
| <i>Sun Shuming ; Yan Jianfeng ; Yu Zhihong ; Lv Ying ; Lu Guangming ; Shi Dongyu ; Xie Chang</i>                                          |            |
| <b>STUDY ON THE INTEGRATION ARCHITECTURE OF ELECTRIC POWER BIG DATA BASED ON FOUR KINDS OF INTEGRATION PATTERNS .....</b>                 | <b>123</b> |
| <i>X.Q. Huang ; K.D. Zhang ; C. Chen ; Y.J. Cao ; C.Q. Chen</i>                                                                           |            |
| <b>QUESTIONNAIRE DESIGNING, MULTI-AGENT MODELING AND ANALYZING OF EV USERS' TRAVELING WILLINGNESS .....</b>                               | <b>129</b> |
| <i>J. Wu ; Y. Xue ; D. Xie ; K. Li ; F. Wen ; J. Zhao ; Y. Ding</i>                                                                       |            |
| <b>RESOLVE CORONA DISCHARGES IN THE GENERATOR STATOR WINDINGS .....</b>                                                                   | <b>135</b> |
| <i>Huang Wei ; Y.K.C. Wilson</i>                                                                                                          |            |
| <b>DEVELOPMENT OF A DFIG-BASED WIND TURBINE MODELLING BY USING ADAMS, FAST, AND MATLAB .....</b>                                          | <b>141</b> |
| <i>Yuan-Kang Wu ; Yi-Liang Hu ; Mao-Hsiung Chiang</i>                                                                                     |            |
| <b>ENERGY STORAGE TECHNOLOGIES FOR FUTURE ELECTRIC POWER SYSTEMS .....</b>                                                                | <b>147</b> |
