# TABLE OF CONTENTS

|                                                                                                                                     |     |
|-------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>ADDITIVE MANUFACTURING USING CONCRETE: A BRIDGE TOO FAR?</b> .....                                                               | 1   |
| <i>R. Bohan</i>                                                                                                                     |     |
| <b>APPLICATION CONSIDERATIONS FOR LED LIGHT FIXTURES IN PROCESS INDUSTRY<br/>PRODUCTION ENVIRONMENTS</b> .....                      | 11  |
| <i>D. Jenkins, B. Morse</i>                                                                                                         |     |
| <b>ASSESSING CEMENT PLANT THERMAL PERFORMANCE</b> .....                                                                             | 17  |
| <i>J. Kline, C. Kline</i>                                                                                                           |     |
| <b>BURNER MANAGEMENT SYSTEM DESIGN AND APPLICATION FOR CEMENT PLANTS</b> .....                                                      | 31  |
| <i>A. Rieland</i>                                                                                                                   |     |
| <b>CEMENT PLANT FAN EFFICIENCY UPGRADES</b> .....                                                                                   | 39  |
| <i>A. Ray, D. Couse</i>                                                                                                             |     |
| <b>CEMENT PLANT WASTE HEAT RECOVERY HEAT-TO-HORSEPOWER</b> .....                                                                    | 50  |
| <i>B. Hunter, A. Ray</i>                                                                                                            |     |
| <b>DRONE TECHNOLOGY AS APPLIED TO THE CEMENT INDUSTRY</b> .....                                                                     | 61  |
| <i>A. Rice</i>                                                                                                                      |     |
| <b>ENERGY EFFICIENCY IN CALIFORNIA CEMENT PLANTS ACCESSING UTILITY<br/>PROGRAM RESOURCES</b> .....                                  | 66  |
| <i>R. Sperberg, R. Kniss, T. Ruegg</i>                                                                                              |     |
| <b>ENVIRONMENTAL PRODUCT DECLARATIONS – TRANSPARENCY REPORTING FOR<br/>SUSTAINABILITY</b> .....                                     | 73  |
| <i>D. Shepherd</i>                                                                                                                  |     |
| <b>FIELD EVALUATION OF A MULTI-COMPONENT FTIR CEMS AGAINST PS-15, PS-18 AND<br/>PROCEDURE 6</b> .....                               | 78  |
| <i>S. Gibbons, J. Peeler, H. Vergeer</i>                                                                                            |     |
| <b>HEAT TRANSFER IN ROTARY KILNS: A RETROSPECT</b> .....                                                                            | 93  |
| <i>R. Bohan</i>                                                                                                                     |     |
| <b>IMPROVING PRODUCT UNIFORMITY &amp; PROCESS EFFICIENCY IN RAPIDLY CHANGING<br/>MARKET CONDITIONS USING PGNAA TECHNOLOGY</b> ..... | 99  |
| <i>A. Montera, T. Rawlsky, A. Krishnan, A. Sheshadri</i>                                                                            |     |
| <b>MERCURY REDUCTION-THE PLANT EXPERIENCE</b> .....                                                                                 | 107 |
| <i>T. Kerby</i>                                                                                                                     |     |
| <b>PORTLAND CEMENT MACT - ADOPTING A HOLISTIC CULTURE OF COMPLIANCE</b> .....                                                       | 116 |
| <i>N. Pivar, R. Hershey, C. Polizzi</i>                                                                                             |     |
| <b>PREHEATER TOWER BEST SAFETY PRACTICES</b> .....                                                                                  | 131 |
| <i>J. Fredlake, T. Spaits</i>                                                                                                       |     |
| <b>PROTECTING VOLTAGE TRANSFORMERS FROM SWITCHING INDUCED TRANSIENTS<br/>AND FERRORESONANCE</b> .....                               | 138 |
| <i>T. Abdelazim, T. Dionise, R. Yanniello</i>                                                                                       |     |
| <b>REDUCING NOX FROM EXISTING CEMENT KILN LINES</b> .....                                                                           | 155 |
| <i>L. Ricci, J. Hook, J.-C. Royer</i>                                                                                               |     |
| <b>RELEVANT ASPECTS THAT AFFECT THE COSTS OF CEMENT PLANT FACILITIES</b> .....                                                      | 163 |
| <i>G. Etse, J. Grassetto, M. Perosa</i>                                                                                             |     |
| <b>STATIONARY VS. SEMI-MOBILE CRUSHING PLANT IN COMPARISON</b> .....                                                                | 171 |
| <i>T. Fischer</i>                                                                                                                   |     |
| <b>THE LEAN ENERGY AND THE REDUCTION OF ENERGY COST AND GHG EMISSIONS: A<br/>PROVEN APPROACH</b> .....                              | 178 |
| <i>J.-C. Paradis, D. Calder</i>                                                                                                     |     |
| <b>TOO BIG TO FAIL?</b> .....                                                                                                       | 184 |
| <i>G. Lynskey</i>                                                                                                                   |     |
| <b>VALUE OF INSULATED BUS BARS IN REDUCING ARCING FAULT DURATION IN LOW<br/>VOLTAGE SYSTEMS</b> .....                               | 189 |
| <i>R. Rajvanshi, T. Hawkins</i>                                                                                                     |     |
| <b>WASTE HEAT RECOVERY &amp; HEAT TRANSFER EXPERIENCE IN CEMENT</b> .....                                                           | 196 |
