TABLE OF CONTENTS

VOLUME 1

C1 COATING OPENING SESSION AND KEYNOTE

Paper & Packaging Innovation	1
<i>Ed Zumbiel</i>	

C2 MARKET TRENDS IN PACKAGING GRADE TRANSFORMATIONS

Retail Ready Packaging	20
<i>Charles P. Klass</i>	
Market Trends in Packaging	33
<i>Dan Malenke</i>	
Trends Lightweight Paper Based Packaging	45
<i>Robert Pederzani</i>	

C3 PAPERBOARD APPLICATIONS

Post Print Laser Marking: A Solution to the Challenge of 100% Calcium Carbonate Coating When Using CO₂ Lasers	54
<i>Roger Bollstroem, Patrick Gane</i>	
Ultrafine Cellulose Particles for Coating	62
<i>Sascha Galic</i>	
The Effect of Paperboard Coating Treatments on Polyethylene Adhesion During Extrusion Coating	71
<i>Don Ventresca, Kelly Frey, Greg Welsch</i>	

C4 SUSTAINABLE PACKAGING

Pigmented Formulations Containing Biobased Nanoparticle Binders for Curtain Coating Applications; Part 1: Rheological Study	92
<i>Ting Chen, Margaret Joyce, Paul D. Fleming, Do Ik Lee, Steven Bloembergen</i>	
Pigmented Formulations Containing Biobased Nanoparticle Binders for Curtain Coating Applications; Part 2: Curtain Stability Analysis	122
<i>Ting Chen, Margaret Joyce, Paul D. Fleming, Do Ik Lee, Steven Bloembergen</i>	
Conversations Around Environmental and Societal Drivers for Materials	146
<i>Ramani Narayan</i>	

C5 COATED PAPER ANALYSIS

Analysis of Microscope Images of Coating Layers That Contain Tagged Starch and Latex	163
<i>Emilia Golebiowska, Douglas Bousfield, William Gramlich</i>	
New Method to Determine Pigment Friability: Example SPCC	175
<i>Cathy Ridgway, Patrick Gane</i>	
Improved Discrete Element Method Model to Predict Coating Layer Mechanical Properties	186
<i>Dan Varney, Douglas Bousfield</i>	

C6 SUCCESS STORIES

Air Floatation Dryer Optimization	207
<i>Don Cesario</i>	
Fast Track Coating Head Conversions at a North American Coated Paper Mill	220
<i>Jeff Gorges</i>	
Cartones Ponderosa PM1: Curtain Coater Installation	225
<i>Pam Hynnek</i>	
Calendering Control by Roll Hardness Measurement	236
<i>Jyrki Laari</i>	

C8 FLEXO PRINTABILITY IN PACKAGING

Paper Without Ink is Silent, Ink Without Paper is...Messy	241
<i>James Ford</i>	

Flexo Printability: Press Technologies	251
<i>Jean Jackson</i>	
Flexo Printability in Packaging	265
<i>Doug Weiss</i>	

C9 RHEOLOGY

Rheology: A Tutorial on the Basics	279
<i>Tony Lyons, Rajan Iyer</i>	
Review of Coating Thickening Mechanisms	300
<i>John Roper</i>	
The Influence of Pigment Concentration, Particle Size Distribution, and Aspect Ratio on Rheology	314
<i>Lisa Weeks, Doug Bousfield, Anthony Lyons</i>	

M3 – YOUNG PROFESSIONALS PRESENT RECRUITING, RETENTION, AND REAL ISSUES FOR YPS IN THE WORKPLACE

How to Attract More Students to the Paper Industry	329
<i>Roland Gong, Karyn Biasca</i>	
Positioning for Success	347
<i>Jonathan Kerr</i>	
Leading From Within	359
<i>Bill Sleeper</i>	

M5 – EMBRACING CHANGE IS SUSTAINABILITY

Improving Without Capital – Releasing the Untapped Potential	374
<i>Erin Saueracker</i>	

M8 – MEETING THE CHALLENGE OF CHANGE THROUGH THE WORKFORCE DEVELOPMENT

Aligning Workforce Development with the Business	381
<i>Patti Phillips</i>	
Suppliers Share Interest in Mill Workforce Development	387
<i>Daryl Wells</i>	

M11 – DIGITAL REVOLUTION: PULP & PAPER MILL OF THE FUTURE – INDUSTRY 4.0 – FUTURE IT OF THE MILL

Prediction and Simulation Analysis at Paper Mills	394
<i>Timo Arra</i>	
PIMA IT Symposium: Future IT of P&P Mill	403
<i>Mike Harwood, Carl-Fredrik Hammarqvist, Christophe Deslandes, Timo Arra</i>	
Cloud Computing for Pulp and Paper Mills	405
<i>Christophe Deslandes</i>	
Future at Paper Mill	413
<i>Carl-Fredrik Hammarqvist</i>	

M12 – DIGITAL REVOLUTION: PULP & PAPER MILL OF THE FUTURE – SMART AND PREDICTIVE USE OF DATA AT MILLS

Big Data Application to Combine the Value Chain Data to Knowledge	422
<i>Matti Hakkinen, Mika Suojarvi, Jari Suihkonen, Michael Gee, Savcor Oy</i>	
Let's Put it on Paper: Data Strategies Towards Operational Excellence	427
<i>Mariana Sandin</i>	
Solving Big Data Problems in a Paper Mill	445
<i>Rick Smith</i>	
Virtual Onsite Presence – Improving Access to Remote Experts	457
<i>Michael Von Grumbkow, Jon Blankenship</i>	

O1 – MAINTENANCE & RELIABILITY

Job Plans for a Reliable Future: Communicating the Essentials	468
<i>Dan Moss</i>	

O2 – MAINTENANCE & RELIABILITY

Basics of Self-Supported Rotary Joint Installation on Steam-Heated Paper Dryers	481
<i>Alan Ives, Ken Lahrke</i>	
Reactive to Proactive & the Application of Strategic Reliability Principles	497
<i>Jay Shellogg</i>	

O3 – MAINTENANCE & RELIABILITY

Motors, Pumps, & Fans. It's the Little Things that Make a Difference!	507
<i>Robert Forstrom</i>	
Overlooking Rockers and Rocker Plates Can Lead to Dryer Component Failures	534
<i>Myron Smith</i>	

PA1 – SUSTAINABILITY – FIBER AND FILLER

Improved Machine Efficiency Through Addition of GCC Filler in Recycled Liner and Medium	540
<i>Lars Andersson</i>	
Enhancing Sustainability in Paper and Board Products	552
<i>Ekhard Beuleke</i>	
Low Energy CTMP in Strong and Bulky Paperboard Plies	556
<i>Gunilla Pettersson</i>	

PA2 – PAPERBOARD SUSTAINABILITY - ADDITIVES

The Benefits of Sustainability: A Mill's Experience	565
<i>Allen Bowdler, Julia Hulbert, Amy Sand, Jack Block, Dan Anderson</i>	
Odor in Recycled Packaging Grades. Identifying the Cause and Finding the Solution	569
<i>David R. Jones</i>	
The Use of a New, On-site-generated Strength and Productivity Additive in Brown Grades Made with Recycled Fibers	574
<i>Jerry Sajbel</i>	

PA3 – SIZING INSIDE AND OUT

Prediction of Starch Penetration During Sizing and Drying	578
<i>Douglas Bousfield</i>	
Optimizing Printing Primers on the Size Press	599
<i>Talia Collins</i>	
A Novel ASA Polymer Emulsifier for Improved Sizing Efficiency	607
<i>William Johnson, Bradley Benz</i>	
Continuous Starch Enzyme Conversion	618
<i>Erik Takens, Susan Sargeant</i>	

PA4 – IMPROVING PRODUCTIVITY USING PROCESS CHEMICALS

Don't Stop Believing...or You CAN Really Get What You Want!	631
<i>Janie Lasik, Allen Bowdler</i>	
Tackling Complex Sheet Production Efficiency and Effluent Quality Issues Using Advanced Bioanalytical Strategies	638
<i>Liliya Lund, Xuejun Wang, Laura Rice, Elisa Luth</i>	
New Commercial Process for Production of Mineral/ Microfibrillated Cellulose Composite Materials Exhibits Great Flexibility	650
<i>David Skuse</i>	

PA5 – WATER QUALITY MANAGEMENT

Innovating Water Disinfection Treatment Programs in the Pulp and Paper Industry	666
<i>Andrew Boal</i>	
Multiparameter Analyzers for Efficient Monitoring of Pulp and Paper Industrial Waters	674
<i>Lori Carey</i>	
Fresh Water Quality – Quality Requirements and Treatment Options	675
<i>David Cifuentes</i>	

PA7 – MICRO/NANO CELLULOSE

Cellulose Filaments: Discovery by FPInnovations of a Novel Strengthening Agent	683
<i>Xujun Hua, Makhlouf Laleg, Thomas Owston</i>	
Physical Properties of Attritor Pulp-containing Handsheets	695
<i>David Knox, Peter Hart, H. J. Moynihan, N. M. Kilgore</i>	
Phosphorylated Nanofibrillated Cellulose: Production and Properties	706
<i>Ali Naderi, Tom Lindstrom, Christoph F. Weise, Goran Flodberg, Jonas Sundstrom, Kristina Junel, Johan Erlandsson, Annmarie Runebjork</i>	

PA8 – ADDITIVE MIXING TECHNOLOGIES

Feeding Point and Mixing Power in Simultaneous Feeding of Filler and Starch	723
<i>Emmi Kallio, Jari Kayhko</i>	
Non-spinning, Fluidizing Flash Mixing Reactor for Synthetic Fibers, Nano- and Micro Fibers and Agressive Chemicals for Board, Paper and Tissue Production	734
<i>Jouni Matula</i>	

VOLUME 2

There's Always Room for Improvement - Flow Solutions in the Coatings and Additives Area	743
<i>Vincent Miller, Jeff Wilmer</i>	

PF1 – DRIER WEB

Estimating Limits of Wet Pressing on Paper Machines	751
<i>David McDonald, Richard Kerekes</i>	
Influence on Sheet Dewatering by Structural Differences in Forming Fabrics	767
<i>Bjorn Sjostrand, Christophe Barbier, Lars Nilsson</i>	
Drier Paper Webs Through Research and Innovation	777
<i>Jun Xu, Gregory Pittman, Chuck Hunter, Beth Cormier, Fred Hanson, David Turpin</i>	

PF2 – CHALLENGES FOR MILLS CONVERTING TO LINERBOARD GRADES

Using Advanced Instrumentation for a Successful Gap Former Conversion from Newsprint/LWC to Corrugating Medium	789
<i>Frank Cunnane</i>	
Converting a Newsprint / P&W Grade Machine to Linerboard Grades....Considerations from an Approach Flow / Stock Preparation Standpoint	799
<i>Richard Turnbull</i>	

PF3 – IMAGING TECHNOLOGY FOR PAPERMAKING

New Possibilities for Comprehensive On-line Web Monitoring and Web Inspection to Improve Papermaking Efficiency and Paper Quality	815
<i>Kari Hilden</i>	
Real-time ROI Morphometrics in High Quality Web Imaging	834
<i>Tommi Huotilainen, Myron Laster, Seppo Riikonen</i>	
On-line Topography Analysis by Photometric Stereo Method – New Tools for Paper and Board Makers	855
<i>Seyhan Nuyan, Ismo Makinen</i>	
Advanced Image Based Measurement Techniques for Analysis of Process Variations	871
<i>Catherine Ostlund, Hannes Vomhoff, Hans Christiansson</i>	

PF4 – FRONTIERS IN FORMING

Aqua Layering Headbox and Furnish Optimization: A Tool for Process Flexibility and Quality Improvement	879
<i>Juan Cecchini, Hannu Turpeinen</i>	
The Effect of Long Fibers in Sheet Properties in Foam Forming	894
<i>Antti Koponen, Katariina Torvinen, Ari Jasberg, Harri Kiiskinen</i>	

PF5 – NEW SHEET MEASUREMENTS TECHNOLOGY

Characterization of Paperboard Formation using Soft X-radiography and Image Analysis	905
<i>Hossein Abedsoltan, Gary Wood, D. Steven Keller</i>	

On-line Tissue Softness Measurement – A Useful Addition to Tissue Automation Concept	917
<i>Tommi Loytyniemi, Seyhan Nuyan, Marko Toskala</i>	
LED Based Color Sensor for Paper Web Measurement and Control	924
<i>Michael O'Hora, Hakan Hjalms</i>	

PF6 – NEW PROCESS CONTROL TECHNOLOGY

Simplified Model Predictive MD Control of Paper Machines	929
<i>Michael Forbes, Cristian Gheorghe, Joyce Choi, Pezhman Nafissi</i>	
An Update on Consistency Transmitter Measurement Technology & Process Considerations	942
<i>Mike Hendricks</i>	
Optimal Operation of a QCS Scanner in a Paper Machine Based on the Information of QCS and WIS Measurements	952
<i>Jukka-Pekka Raunio, Risto Ritala</i>	

PF7 – PERFORMANCE INDICES AND BENCHMARKING

On-line Process Analytics for Improved Process Control	963
<i>Timothy Deschaines</i>	
Visualization of Process, Control and Performance Information	965
<i>Calvin Fu, Seyhan Nuyan, Kevin Rohr</i>	
Innovations in Plant-Wide Monitoring, Diagnostics & Optimization	973
<i>Robert C. Rice</i>	

PF8 – FIBER SUSPENSION DYNAMICS

The Flocculation Response of a Dual Component Retention System Subject to Different Mixing Conditions	987
<i>Paul Krochak, Bo Norman, Lennart Hermansson</i>	
Flow Behavior of Refined Wood Fibre Suspensions	995
<i>Abbas Nikbakht, James Olson, Mark Martinez</i>	

PF9 – APPLICATIONS OF CFD IN PAPERMAKING

Successful CFD Projects: An Overview of Successful Product Development Using Integrated Fluid Modeling and Experiments	1008
<i>John J. Egan, Christopher L. Demler</i>	
Turbulent Stress Measurements of Fibre Suspensions in a Straight Pipe with MRV	1024
<i>Jordan Mackenzie, Agne Swerin, Fredrik Lundell, Daniel Soderbert</i>	
Computer Simulations of Wet Press at a Flexible Individual Fiber Level	1032
<i>Yihsin Tang, Dewei Qi</i>	

PM1 – WHO IS GOING TO DO?

Who Is Going To Do? Kickoff & Roundtable	1054
<i>Jeff Reese</i>	

PM2 – WHO IS GOING TO DO? PANEL DISCUSSION

Paper Optimization Manager, Kapstone Paper	1065
<i>Brad Bowman</i>	
Who's Gonna Do?	1067
<i>William Cone</i>	
Just Get it Done!	1070
<i>Gary Neyer</i>	
Who's Gonna Do? (or How Are We Going to Do?)	1072
<i>Steve Pearson</i>	
Who's Going to Do? Getting Things Done	1076
<i>Steve Smith</i>	

PM3 – WHO IS GOING TO TRAIN? PANEL DISCUSSION

How Much will Mentoring Impact the Future of Training?	1081
<i>Lesley Cook</i>	
Who You Could Turn To For Continuing Education Training	1083
<i>Mary Beth Cornell</i>	

What is Needed and How Will the Training be Done	1089
<i>Mike Kocurek</i>	
Bridging the Knowledge-to-Skills Gap Using the Humble PC	1104
<i>David Leigh</i>	
Developing Leaders for the Future of Our Industry	1112
<i>Chris Luetgen</i>	
Innovative Technology Training Strategy for the Pulp, Papers and Chemical Process Industries	1118
<i>Christie Prout</i>	

PM4 – WHO IS GOING TO DO THE REBUILDS?

Grade Conversion from Graphic to Packaging Paper, A Successful Case Study	1138
<i>Martin Jauch</i>	
How to Effectively Improve Paper Quality? - A Modern Hydraulic Headbox as a Cost Effective Way to Enhance PM Performance	1144
<i>Maja Mejsner</i>	
Reducing the Risks and Raising the Roi in Conversions of Groundwood and Freesheet Machines to Packaging	1148
<i>Daryl Wells, Dave Burton</i>	

PM5 – WHO IS GOING TO MANAGE OUR PROJECTS?

Equipment Installations with Virtual Process Integration: A New Method for Reducing Downtime and Eliminating Change Orders	1160
<i>Dan Goymerac, Dan Bayer, Tonya Dittman</i>	
A Case for Integrated Front-End Engineering and Design	1175
<i>Kenneth Carrillo</i>	

PM6 – WHO IS GOING TO COME UP WITH BETTER MOUSETRAPS?

Optimizing Your Machine Efficiency Through New Seal Strip Technology	1183
<i>Wyatt Boyett</i>	
A New Family of Forming Structures Provide Higher Dewatering, Planar Sheet Surface, and Lower Drag Loads	1188
<i>Frank Cunnane</i>	
Optimizing Waste Water Treatment in Paper Mill Lagoons	1197
<i>Richard Grenville</i>	

PM8 – SUCCESS STORIES

Successful Shoe Press Installation at Greif's Riverville, Virginia Mill	1215
<i>Robby Compton, David Deese, Mitch Heishman</i>	
Optical Process Monitoring with Paper Defect Detection Cameras in Forming and Press Sections on a Gypsum Board Facing Paper Machine	1222
<i>Weig Karton</i>	
Eye Opening Operating Results of Flash Mixing Reactor for Efficient Use of Wet End Additives	1234
<i>Jussi Matula</i>	
Mechanical Seal Selection, Reliability, and Optimization	1244
<i>Dick Reese</i>	
Cartones Ponderosa - Managing Change to Maintain Market Lead	1260
<i>Rex Robertson</i>	
Detailed Project Planning Helps American Eagle Paper Mills Achieve Impressive Results	1268
<i>Andrew Symons, Steve Pepin</i>	

PM9 – WHAT DO I DO WITH ALL THIS DATA?

Capture the Benefits of the 'Stable and Capable Moments'	1270
<i>James Black</i>	
Who is Going to Optimize the Performance of Paper Machine Clothing?	1279
<i>Marcel Lensvelt</i>	
Utilization of Data for Diagnostics & Processes Transparency	1284
<i>Mika Suojarvi</i>	

PM10 – WHO IS GOING TO HELP US OPTIMIZE OUR SYSTEMS?

Optimizing Recycled Paperboard Production - Former Section	1288
<i>Blake Hender</i>	

Pumping Systems Optimization	1299
<i>William Livoti</i>	
Reducing Fresh Water Usage – Disc Filter Save-all Optimization	1314
<i>Nicolas Reinke</i>	

PM11 – WHO CAN HELP US DO?

Help OEMs Help You: Getting Better Designs for Automation and Reliability from Your Suppliers	1318
<i>Marie Getsug</i>	
If You Don't Control Your Destiny Someone Else Will	1337
<i>Janie Lasik</i>	
A Directional Approach to Tasks On the Paper Machine	1343
<i>Michael Mackett</i>	

PM12 – WHO IS GOING TO HELP IMPROVE PAPER PERFORMANCE

Non-destructive Determination of Key Pulp & Paper Process Parameters	1356
<i>Timothy Deschaines</i>	
New Test Method for Predicting Crushing Elasticity in Medium Fluting, a More Relevant Than Total Fluting Test Methods Like Cmt/concora	1358
<i>Thomas Furst</i>	
Impact of Kraft Hardwood and Softwood Pulp Viscosity on Paper Properties	1370
<i>Humphrey Moynihan</i>	

PM13 – WHO IS GOING TO DO? WRAP UP AND ROUNDTABLE

Track Wrap-up	1380
<i>Jeff Reese</i>	

RPTA1 – HOT TOPICS

Offsetting the Costs of Recycled Fiber Wastes	1419
<i>Paul Fowler</i>	
Food Packaging Safety & Mineral Oils Migration	1429
<i>George Fuchs</i>	
Developments in Mineral Oil Hydrocarbons Regulations in Europe	1437
<i>Paul Noe</i>	

RPTA2 – ADVANCES IN PRESSING TECHNOLOGY

Improved Uhle Box Dewatering	1445
<i>Farhad Fereydoonzad</i>	
Improved Performance with Unique Predictive Analytics	1456
<i>Eric Gustafson</i>	
High Performance Pressing on Recycled Paperboard	1468
<i>Rick Phillips</i>	

VOLUME 3

RPTA3 – IMPROVING PULPER OPERATIONS

Hydraflow Continuous Detrashing Systems	1479
<i>Christopher L. Demler</i>	
Opportunities and Approaches for Improving Broke Pulping	1492
<i>Hanna Jokinen</i>	
Pulper Upgrades: Process Considerations and Performance Expectations	1504
<i>William Pitman</i>	
Improving Pulper Operations: Low Energy Recycled Pulp Production	1531
<i>Greg Sleeper</i>	

RPTA4 – IMPROVING DRYER PERFORMANCE

Managing Siphon Life in Small Diameter Dryers: 48" Diameter and Smaller	1546
<i>Rick Hall</i>	

Overview Of Steam System Optimization	1556
<i>Mike Soucy</i>	
Paper Machine Dryer Section Troubleshooting.....	1581
<i>Lawrence Yane</i>	
 <u>T1</u>	
The Profit from Monitoring and Improving Your Process Control.....	1598
<i>Hank Brittain</i>	
 <u>T4</u>	
Alum and Rosin Based Sizing	1641
<i>John Leckey</i>	
 <u>T6</u>	
Low Consistency Refining: 1 Day Training.....	1670
<i>Arvind M. Singhal</i>	
 <u>T8</u>	
Printing and Printability.....	1706
<i>N/A</i>	
 <u>T9</u>	
Introduction to Pigment Coated Paper and Paperboard Grades, Processes and Materials.....	1805
<i>Charles P. Klass</i>	
 <u>TF1 – KEYNOTE SESSION</u>	
T&T Observations.....	1844
<i>Rod Fisher</i>	
 <u>TF2 – ALTERNATIVE FIBERS</u>	
New Kneader-Based Non-wood Pulping System for Tissue Fiber Production.....	1867
<i>Hiroki Nanko</i>	
High-yield Pulp in Tissue and Towel.....	1882
<i>Zhirun Yuan, Jimmy Jong, Stephan Lariviere</i>	
A Review of Non-wood Fibres and Their Applications in Tissue	1894
<i>Xuejun Zou, Hongbin Liu</i>	
 <u>TF3 – UNDERSTANDING AND MEASURING TISSUE SOFTNESS – PANEL DISCUSSION</u>	
Understanding and Measuring Tissue Softness	1905
<i>Jessica Carette</i>	
TSA (Tissue Softness Analyzer) – Objective Measurement of Tissue Softness	1916
<i>Alexander Gruner</i>	
The Complexity of Understanding and Measuring Tissue Softness	1922
<i>Ward Ostendorf, Jeff Sheehan, Monica Ho-Kleinwaechter, Dave Loebker</i>	
Measuring Paper Softness-Leveraging Sensory Hand Feel Panels in R&D and Manufacturing	1927
<i>Nicolette Vanderklaauw, Andrea Cummings, Shuo Wang, Michelle Lyons</i>	
 <u>TF4 – PROCESS CONTROL FOR TISSUE</u>	
Predictive Analytics, Dynamic Suction Roll/Yankee Nip Monitoring and Innovative Cover Venting Deliver Significant Energy Savings and Improved Efficiency on Modern Tissue Machines	1933
<i>Michael Ciccone</i>	
New On-Machine Instrumentation Provides Novel Process Control and Cost Saving Benefits	1940
<i>Frank Cunnane</i>	

Advanced Vibration Tool for Crepe Blade Monitoring	1955
<i>Timothy Patterson, Donald Schultz</i>	

TF5 – STRUCTURED SHEET INNOVATIONS

TAD Structured Sheet for Ultra-Premium Quality	1967
<i>Soren Eriksson</i>	
Measuring the Compressive Response of Embossed and TAD Features in Paper Towels	1986
<i>D. Steven Keller, Guizhou Wang</i>	
Evaluation of the Compressibility of Kitchen Towels	1998
<i>Hannes Vomhoff, Farnaz Farahani, Mikael Bouveng, Catherine Ostlund</i>	

TF6 – OPERATING EFFICIENCY/ENERGY SAVINGS

Transfer Efficiency Study of Spray Systems in High Web Speed Additives	2010
<i>Ben Drummond, Kathleen Brown, Rudi Schick</i>	
How to Minimize Energy and Increase Cleanliness in Tissue Plants: Part 2	2022
<i>Marco Pescantini</i>	
Results from Paper Machine Energy Audits in Wisconsin Tissue Mills	2041
<i>Dick Reese</i>	
Energy Optimization of the Yankee Dryer Hood	2073
<i>Alfredo Sarli</i>	

TF7 – TISSUE PROCESS OPTIMIZATION

Improving Tissue & Converting Machine Efficiency by Detecting Defects and Reducing Breaks	2083
<i>Pete Angle</i>	
Paradigm Shift: Improved Dry Strength in Bath Tissue without Affecting Softness	2093
<i>Joseph Mahoney, J. Todd Sarraf</i>	
Creeping Operating Window-Adhesive and Modifier Contributions	2105
<i>Timothy Patterson</i>	
Advanced Fiber Management for Improved Tissue Machine Productivity and Quality	2115
<i>Jeff Peters</i>	

TF9 – PRACTICAL SOLUTIONS FOR TISSUE

New Regulatory Standards and Practical Solutions for Combustible Dust: A Comprehensive Review	2125
<i>W. Brad Carr</i>	
Liquid Ring Vacuum Pump Energy Savings	2134
<i>Andy Smiltneek</i>	
The Inherent Non-Homogeneous Nature of Cast Iron and its Effect on Creeping	2147
<i>John Holton</i>	

TF10 – STEEL YANKEE PANEL DISCUSSION

Steel Yankees General Topics	2166
<i>Marco Brujas</i>	
Steel Yankee Dryers: The Next Step in their Evolution	2173
<i>Clive Butler</i>	
Can You Identify These Materials Used to Manufacture Yankee Dryers?	2178
<i>Ronald Clarke</i>	
Steel Yankee Dryers and Tissue Making	2192
<i>Magnus Hogman</i>	
Steel Yankee Logistics	2199
<i>Michael Janosch</i>	

Author Index
