## **NBiS 2016**

### **Session 1: Intelligent Networking**

|                                                                                                                                       |    |
|---------------------------------------------------------------------------------------------------------------------------------------|----|
| Node Placement in Wireless Mesh Networks: A Comparison Study<br>of WMN-SA and WMN-PSO Simulation Systems .....                        | 1  |
| <i>Shinji Sakamoto, Tetsuya Oda, Makoto Ikeda, Leonard Barolli, Fatos Xhafa,<br/>and Isaac Woungang</i>                               |    |
| Experimental Results of a Raspberry Pi Based WMN Testbed in Indoor<br>Environment: A Comparison Study of LoS and NLoS Scenarios ..... | 9  |
| <i>Tetsuya Oda, Donald Elmazi, Masafumi Yamada, Ryoichiro Obukata,<br/>Leonard Barolli, and Makoto Takizawa</i>                       |    |
| Performance Analysis of WMNs by WMN-GA Simulation System<br>for Exponential Distribution Considering EDCA and DCF .....               | 15 |
| <i>Ilir Shinko, Tetsuya Oda, Admir Barolli, Vladi Kolici, Leonard Barolli,<br/>and Fatos Xhafa</i>                                    |    |

|                                                                                                                                                                         |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Performance Analysis of WMNs by WMN-GA Simulation System for Different WMN Architectures and TCP Congestion-Avoidance Algorithms Considering Uniform Distribution ..... | 22 |
| <i>Admir Barolli, Tetsuya Oda, Ilir Shinko, Leonard Barolli, Fatos Xhafa, and Makoto Takizawa</i>                                                                       |    |
| Selection of Actor Nodes in Wireless Sensor and Actor Networks Considering as a New Parameter Actor Congestion Situation .....                                          | 29 |
| <i>Donald Elmazi, Evjola Spaho, Elis Kulla, Tetsuya Oda, Makoto Ikeda, and Leonard Barolli</i>                                                                          |    |
| A GA-based Simulation System for WMNs: Performance Analysis for Different WMN Architectures Considering Transmission Rate and OLSR Protocol .....                       | 37 |
| <i>Keita Matsuo, Tetsuya Oda, Admir Barolli, Makoto Ikeda, Leonard Barolli, and Fatos Xhafa</i>                                                                         |    |

## **Session 2: Network Protocols and Models**

|                                                                                                                                |    |
|--------------------------------------------------------------------------------------------------------------------------------|----|
| Subscription Initialization (SI) Protocol to Prevent Illegal Information Flow in Peer-to-Peer Publish/Subscribe Systems .....  | 42 |
| <i>Shigenari Nakamura, Tomoya Enokido, and Makoto Takizawa</i>                                                                 |    |
| A Model for Energy-Aware Migration of Virtual Machines .....                                                                   | 50 |
| <i>Dilawaer Duolikun, Ryo Watanabe, Tomoya Enokido, and Makoto Takizawa</i>                                                    |    |
| Evaluations of Wireless V2X Communication Systems of for Winter Road Surveillance Systems .....                                | 58 |
| <i>Noriki Uchida, Kenta Ito, Go Hirakawa, and Yoshitaka Shibata</i>                                                            |    |
| Evaluation of Different DTN Routing Protocols in an Opportunistic Network Considering Many-to-One Communication Scenario ..... | 64 |
| <i>Evjola Spaho, Kevin Bylykbashi, Leonard Barolli, Vladi Kolici, and Algenti Lala</i>                                         |    |
| Privacy-Aware Routing for Sharing Sensitive Information across Wide-Area Networks .....                                        | 70 |
| <i>Antonio Colella, Aniello Castiglione, Alfredo De Santis, Christian Esposito, and Francesco Palmieri</i>                     |    |
| A Study of Packet Sampling Methods for Protecting Sensors Deployed on Darknet .....                                            | 76 |
| <i>Masaki Narita, Keisuke Kamada, Kanayo Ogura, Bhed Bahadur Bista, and Toyoo Takata</i>                                       |    |

## Session 3: Mobile and Wireless Networks

|                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------|-----|
| A Balanced Energy Adaptive Routing Protocol with Sector Based Node Selection in Underwater WSNs .....                             | 84  |
| <i>Saman Cheema, Nadeem Javaid, Shahzad Amin Sheikh, Zahoor Ali Khan, and Umar Qasim</i>                                          |     |
| MC: Maximum Coverage Routing Protocol for Underwater Wireless Sensor Networks .....                                               | 91  |
| <i>Arshad Sher, Nadeem Javaid, Ghufraan Ahmed, Saif Ul Islam, Umar Qasim, and Zahoor Ali Khan</i>                                 |     |
| Performance Comparison of Sender-Based and Receiver-Based Scheduling MAC Protocols for Underwater Sensor Networks .....           | 99  |
| <i>Faisal Alfouzan, Alireza Shahrabi, Seyed Mohammad Ghoreyshi, and Tuleen Boutaleb</i>                                           |     |
| An Improvement in Zone Routing Protocol Using Bloom Filter .....                                                                  | 107 |
| <i>Yuria Oigawa and Fumiaki Sato</i>                                                                                              |     |
| Power Control Scheme for Underlay Approach in Cognitive Radio Networks .....                                                      | 114 |
| <i>Monika Pathak, Sanjay K. Dhurandher, Isaac Woungang, Bhagyashri Tushir, Vinesh Kumar, Makoto Takizawa, and Leonard Barolli</i> |     |
| A Zero Watermarking Scheme for Data Integrity in Wireless Sensor Networks .....                                                   | 119 |
| <i>Khizar Hameed, M. Saleem Khan, Idrees Ahmed, Zuhaib U. Ahmad, Abid Khan, Aun Haider, and Nadeem Javaid</i>                     |     |

## Session 4: Network Security and Privacy

|                                                                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Challenge of Deep Learning against CAPTCHA with Amodal Completion and Aftereffects by Colors .....                                                                   | 127 |
| <i>Tomoka Azakami, Chihiro Shibata, and Ryuya Uda</i>                                                                                                                |     |
| Proposal and Evaluation of Cyber Defense System Using Blacklist Refined Based on Authentication Results .....                                                        | 135 |
| <i>Hirofumi Nakakoji, Yasuhiro Fujii, Yoshiaki Isobe, Tomohiro Shigemoto, Tetsuro Kito, Naoki Hayashi, Nobutaka Kawaguchi, Naoki Shimotsuma, and Hiroaki Kikuchi</i> |     |
| A Browser Scanner: Collecting Intranet Information .....                                                                                                             | 140 |
| <i>Rio Hosoi, Takamichi Saito, Takayuki Ishikawa, Daichi Miyata, and Yongyan Chen</i>                                                                                |     |
| SGM: A Subgroup Management Scheme Using K-Means Clustering in M2M Systems .....                                                                                      | 146 |
| <i>Jihoon Hong, Mirang Park, and Naonobu Okazaki</i>                                                                                                                 |     |
| A Defense Method against Distributed Slow HTTP DoS Attack .....                                                                                                      | 152 |
| <i>Tetsuya Hirakawa, Kanayo Ogura, Bhed Bahadur Bista, and Toyoo Takata</i>                                                                                          |     |

|                                                                                                                                  |     |
|----------------------------------------------------------------------------------------------------------------------------------|-----|
| A Micro Biometric Authentication Mechanism Considering Minute Patterns of the Human Body: A Proposal and the First Attempt ..... | 159 |
| <i>Masahiro Fujita, Yuto Mano, Takuya Kaneko, Kenta Takahashi, and Masakatsu Nishigaki</i>                                       |     |

## **Session 5: Database, Data Mining and Big Data**

|                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------|-----|
| A Cyber Physical System of Smart Micro-Grids .....                                                          | 165 |
| <i>Alba Amato, Rocco Aversa, Beniamino Di Martino, and Salvatore Venticinque</i>                            |     |
| A Prediction-Based Smart Meter Data Generator .....                                                         | 173 |
| <i>Nadeem Iftikhar, Xiufeng Liu, Finn Ebertsen Nordbjerg, and Sergiu Danalachi</i>                          |     |
| Adaptive Focused Website Segment Crawler .....                                                              | 181 |
| <i>Tanaphol Suebchua, Arnon Rungsawang, and Hayato Yamana</i>                                               |     |
| JsFlow: Integration of Massive Streams and Batches via JSON-based Dataflow Algebra .....                    | 188 |
| <i>Hirotooshi Cho, Hiroaki Shiokawa, and Hiroyuki Kitagawa</i>                                              |     |
| Transient Stability Analysis of an Islanded Microgrid under Variable Load .....                             | 196 |
| <i>Muhammad Babar Rasheed, Muhammad Awais, Nadeem Javaid, Waseem Nazar, Umar Qasim, and Zahoor Ali Khan</i> |     |

## **Session 6: Energy Efficient Networks**

|                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A Performance Analysis in the One-Way Full Duplex Relaying Network .....                                                                           | 204 |
| <i>Tam Nguyen Kieu, Khanh Nhan Nguyen Huu, Nguyen Ngoc Long, Hung Ha Duy, Thuan Do Dinh, and Miroslav Voznak</i>                                   |     |
| Multi-level Power Consumption and Computation Models and Energy-Efficient Server Selection Algorithms in a Scalable Cluster .....                  | 210 |
| <i>Hiroki Kataoka, Atsuhiko Sawada, Dilawaer Duolikun, Tomoya Enokido, and Makoto Takizawa</i>                                                     |     |
| Selection Algorithms to Select Energy-Efficient Servers for Storage and Computation Processes .....                                                | 218 |
| <i>Atsuhiko Sawada, Hiroki Kataoka, Dilawaer Duolikun, Tomoya Enokido, and Makoto Takizawa</i>                                                     |     |
| Energy Aware Dynamic Routing Using SDN for a Campus Network .....                                                                                  | 226 |
| <i>Malik Najmus Siraj, Nadeem Javaid, Qaisar Shafi, Zaheer Ahmed, Umar Qasim, and Zahoor Ali Khan</i>                                              |     |
| The Improved Redundant Delay Time-Based (IRDTB) Algorithm to Perform Computation Type Application Processes in Heterogeneous Server Clusters ..... | 231 |
| <i>Tomoya Enokido and Makoto Takizawa</i>                                                                                                          |     |

|                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------|-----|
| EEORS: Energy Efficient Optimal Relay Selection Protocol for Underwater<br>WSNs .....                        | 239 |
| <i>Anwar Khan, Mudassir Ejaz, Nadeem Javaid, Muhammad Qaisar Azeemi,<br/>Umar Qasim, and Zahoor Ali Khan</i> |     |

## **Session 7: Multimedia Applications**

|                                                                                                                                                                                  |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Performance of H.264, H.265, VP8 and VP9 Compression Standards for High<br>Resolutions .....                                                                                     | 246 |
| <i>Juraj Bienik, Miroslav Uhrina, Michal Kuba, and Martin Vaculik</i>                                                                                                            |     |
| Recommendation System that Presents the Recommendation Sentence<br>in Alignment with the Contents .....                                                                          | 253 |
| <i>Yuto Ishida, Takahiro Uchiya, and Ichi Takumi</i>                                                                                                                             |     |
| Instant Video Share and View System for Ski-Jump Training Using Cheap<br>Devices .....                                                                                           | 260 |
| <i>Nobuyoshi Sato, Noriyuki Umeki, Yoshitoshi Murata, and Akimasa Suzuki</i>                                                                                                     |     |
| An Engineering Education Support System Using Projection-Based AR .....                                                                                                          | 267 |
| <i>Toshiyuki Haramaki and Hiroaki Nishino</i>                                                                                                                                    |     |
| A Fuzzy-Based Reliability for JXTA-overlay P2P Platform Considering Data<br>Download Speed, Peer Congestion Situation, Number of Interaction<br>and Packet Loss Parameters ..... | 273 |
| <i>Yi Liu, Oda Tetsuya, Evjola Spaho, Keita Matsuo, Leonard Barolli, and Fatos Xhafa</i>                                                                                         |     |

## **ADPNA 2016**

### **Session 1: Distributed and Parallel Systems**

|                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------|-----|
| Risk Assessment Based on User's Viewpoint for Mobile Ad Hoc Network .....                                         | 280 |
| <i>Shigeaki Tanimoto, Shunsuke Shiraki, Motoi Iwashita, Tohru Kobayashi,<br/>Hiroyuki Sato, and Atsushi Kanai</i> |     |
| Social Media Mediation System for Elderly People: Message Exchange<br>Learning Type Switching Method .....        | 286 |
| <i>Toru Kobayashi, Kazushige Katsuragi, Taishi Miyazaki, Kenichi Arai,<br/>Tomoya Sakai, and Makoto Fujimura</i>  |     |
| An Eco Model of Process Migration with Virtual Machines .....                                                     | 292 |
| <i>Ryo Watanabe, Dilawaer Duolikun, Tomoya Enokido, and Makoto Takizawa</i>                                       |     |
| Peer-to-Peer Network System and Application Design on Multiple Virtual<br>Networks .....                          | 298 |
| <i>Nanami Imada and Kazunori Ueda</i>                                                                             |     |

|                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------|-----|
| The Optimization of PID Control Strategy in VAV System Based on Bacterial Foraging Algorithm .....                                         | 303 |
| <i>Li Chen</i>                                                                                                                             |     |
| Proposal of a Zoo Walk Navigation System for Regional Revitalization .....                                                                 | 307 |
| <i>Yuki Shinotsuka, Tomoyuki Ishida, Kazuhiro Takahagi, Misaki Iyobe, Akatsu Norio, Kaoru Sugita, Noriki Uchida, and Yoshitaka Shibata</i> |     |

## DEMoC 2016

### Session 1: Data Engineering and Mobile Computing

|                                                                                                                  |     |
|------------------------------------------------------------------------------------------------------------------|-----|
| A Distributed Video Processing System for Internet Live Broadcasting Services .....                              | 311 |
| <i>Satoru Matsumoto, Tomoki Yoshihisa, Tomoya Kawakami, Yoshimasa Ishi, and Yuuichi Teranishi</i>                |     |
| A Navigation System for Controlling Sightseeing Route by Changing Presenting Information .....                   | 317 |
| <i>Ruiwei Shen, Tsutomu Terada, and Masahiko Tsukamoto</i>                                                       |     |
| Estimating Trajectory of Inhabitants with Sparsely Aligned Infrared Sensors .....                                | 323 |
| <i>Kazuya Murao, Tsutomu Terada, Ai Yano, and Ryuichi Matsukura</i>                                              |     |
| Hybrid Broadcasting System for Webcast .....                                                                     | 330 |
| <i>Takeshi Ozaki and Yusuke Gotoh</i>                                                                            |     |
| Clustering for Similar Recipes in User-Generated Recipe Sites Based on Main Ingredients and Main Seasoning ..... | 336 |
| <i>Akiyo Nadamoto, Shunsuke Hanai, and Hidetsugu Nanba</i>                                                       |     |
| GPU Acceleration of Content-Based Image Retrieval Based on SIFT Descriptors .....                                | 342 |
| <i>Yuta Kusamura, Yusuke Kozawa, Toshiyuki Amagasa, and Hiroyuki Kitagawa</i>                                    |     |

## HETNET 2016

### Session 1: Heterogeneous Networking and Applications

|                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------|-----|
| Topic-Based Causally Ordered Delivery of Event Messages in a Peer-to-Peer (P2P) Model of Publish/Subscribe Systems ..... | 348 |
| <i>Hiroki Nakayama, Shigenari Nakamura, Tomoya Enokido, and Makoto Takizawa</i>                                          |     |
| Improving Node Security in MANET Clusters: A Comparison Study of Two Fuzzy-Based Systems .....                           | 355 |
| <i>Mirjeta Alinci, Takaaki Inaba, Donald Elmazi, Evjola Spaho, Vladi Kolici, and Leonard Barolli</i>                     |     |

|                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------|-----|
| Joint Attack: A New Privacy Attack for Incremental Data Publishing .....                                     | 364 |
| <i>Torsak Soontornphand and Juggapong Natwichai</i>                                                          |     |
| Two-Stage Centroid Localization for Wireless Sensor Networks Using<br>Received Signal Strength .....         | 370 |
| <i>Zengfeng Wang, Yujuan Sun, Hao Zhang, and Tingting Lu</i>                                                 |     |
| Proposition of Division-Based Broadcasting System over Wireless LAN .....                                    | 376 |
| <i>Yusuke Gotoh and Yuki Takagi</i>                                                                          |     |
| Improved Genetic Algorithm Based Energy Efficient Routing in Two-Tiered<br>Wireless Sensor Networks .....    | 382 |
| <i>Muhammad Zain-Ul-Abidin, Muhammad, Hammad Maqsood, Umar Qasim,<br/>Zahoor Ali Khan, and Nadeem Javaid</i> |     |

## INVITE 2016

### Session 1: Multimedia Applications and Virtual Reality

|                                                                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Multilingual Digital Signage Using iBeacon Communication .....                                                                                                              | 387 |
| <i>Tetsuro Ogi, Kenichiro Ito, and Shigeyuki Konita</i>                                                                                                                     |     |
| A Collection and Delivery Method of Contents in Tourism with Location<br>Information .....                                                                                  | 393 |
| <i>Go Hirakawa, Ryoichi Nagatsuji, and Yoshitaka Shibata</i>                                                                                                                |     |
| 3D Modeling of Reconstruction Plan at Sanriku Coast for Great East Japan<br>Earthquake: Visualization of the Reconstruction Plan for Effective Information<br>Sharing ..... | 397 |
| <i>A. Doi, K. Oshida, Y. Takashima, K. Sakakibara, and T. Itoh</i>                                                                                                          |     |
| Fusion Visualization System as an Open Science Foundation .....                                                                                                             | 401 |
| <i>Hideo Miyachi, Koji Koyamada, Daisuke Matsuoka, and Isamu Kuroki</i>                                                                                                     |     |
| Fundamental Consideration on Possibility of Meta Realistic Sensation<br>Communication Technology .....                                                                      | 405 |
| <i>Yasuo Ebara</i>                                                                                                                                                          |     |
| Tourist Information System Based on Beacon and Augmented Reality<br>Technologies .....                                                                                      | 410 |
| <i>Yoshitaka Shibata and Katsumi Sasaki</i>                                                                                                                                 |     |

## INWC 2016

## Session 1: Mobile Computing and Communication

|                                                                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Performance Evaluation of a Fuzzy-Based Connection Admission Control System for Wireless Cellular Networks Considering Security and Priority Parameters ..... | 414 |
| <i>Takaaki Inaba, Donald Elmazi, Shinji Sakamoto, Tetsuya Oda, Makoto Ikeda, and Leonard Barolli</i>                                                          |     |
| An Improved Message Suppression Controller Considering Delayed Acknowledgment for VANETs .....                                                                | 420 |
| <i>Daichi Koga, Makoto Ikeda, and Leonard Barolli</i>                                                                                                         |     |
| Control of Envelope Pulse through Nonlinear and Dispersive Medium .....                                                                                       | 425 |
| <i>Hiroshi Maeda, Jianming Jin, and Kazuya Tomiura</i>                                                                                                        |     |
| Distributed Topology Control Protocols for Underwater Sensor Networks .....                                                                                   | 429 |
| <i>Hina Nasir, Nadeem Javaid, Shaharyar Mahmood, Umar Qasim, Zahoor Ali Khan, and Furqan Ahmed</i>                                                            |     |
| Performance Evaluation of an Accessory Category Recognition System Using Deep Neural Network .....                                                            | 437 |
| <i>Yuki Sakai, Tetsuya Oda, Makoto Ikeda, and Leonard Barolli</i>                                                                                             |     |
| Numerical and Experimental Study on Transmission Spectrum of Waveguide with Periodic Structure .....                                                          | 442 |
| <i>Hiroshi Maeda, Kazuya Tomiura, and Jianming Jin</i>                                                                                                        |     |

## ISSE 2016

### Session 1: Intelligent and Smart Environments

|                                                                                                                                                 |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Performance Evaluation of an Ambient Intelligence Testbed for Improving Quality of Life: Evaluation Using Mean Shift Clustering Algorithm ..... | 447 |
| <i>Ryoichiro Obukata, Tetsuya Oda, Donald Elmazi, Makoto Ikeda, Keita Matsuo, and Leonard Barolli</i>                                           |     |
| Performance Evaluation of an IoT-based e-Learning Testbed Considering OLSR Protocol in a NLoS Environment .....                                 | 451 |
| <i>Masafumi Yamada, Tetsuya Oda, Yi Liu, Keita Matsuo, Makoto Ikeda, and Leonard Barolli</i>                                                    |     |
| Realistic Home Energy Management System Using Exogenous Grid Signals .....                                                                      | 458 |
| <i>Adnan Ahmad, Nadeem Javaid, Saeed Ahmad, Shah Saud, Umar Qasim, and Zahoor Ali Khan</i>                                                      |     |
| Related Word Recommendation Mechanism for Speech Dialogue System .....                                                                          | 464 |
| <i>Yuto Ishida, Takahiro Uchiya, Kouhei Yamamoto, Daisuke Yamamoto, Ryota Nishimura, and Ichi Takumi</i>                                        |     |

|                                                                          |     |
|--------------------------------------------------------------------------|-----|
| Localization in Wireless Sensor Networks Based on RSS Rank Vectors ..... | 469 |
| <i>Zengfeng Wang, Hao Zhang, and Tingting Lu</i>                         |     |

## TwCSec 2016

### Session 1: Secure Systems and Applications

|                                                                                                                                                 |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| An Intrusion Tolerance Scheme for a Cloud of Databases Environment .....                                                                        | 474 |
| <i>Syrine Chatti and Habib Ounelli</i>                                                                                                          |     |
| A Neural Network Based User Identification for Tor Networks: Comparison<br>Analysis of Different Activation Functions Using Friedman Test ..... | 480 |
| <i>Tetsuya Oda, Ryoichiro Obukata, Masafumi Yamada, Masahiro Hiyama,<br/>Leonard Barolli, and Makoto Takizawa</i>                               |     |
| Panoramic Image Mosaics Using Local Wavelet-Features .....                                                                                      | 488 |
| <i>Feng Guo and Ying Wang</i>                                                                                                                   |     |
| Three Dimensional Reconstruction from Single Uniform Texture Image<br>with Unknown Lighting Conditions .....                                    | 492 |
| <i>Yujuan Sun and Qiuming Ma</i>                                                                                                                |     |
| Longest Common Sub-sequence Computation and Retrieve for Encrypted<br>Character Strings .....                                                   | 496 |
| <i>Minghao Zhao, Zhen Li, Yilei Wang, and Qiuliang Xu</i>                                                                                       |     |
| A Survey of Prevention/Mitigation against Memory Corruption Attacks .....                                                                       | 500 |
| <i>Takamichi Saito, Ryohei Watanabe, Shuta Kondo, Shota Sugawara,<br/>and Masahiro Yokoyama</i>                                                 |     |

## WSSM 2016

### Session 1: Web Services

|                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------|-----|
| A Handy Real-Time Location System for Community Bus Service .....                                            | 506 |
| <i>Ryousuke Iiya, Erjing Zhou, Michitoshi Niibori, Masaru Kamada, Osamu Saitou,<br/>and Susumu Shibusawa</i> |     |
| Attendance Management System Using a Mobile Device and a Web<br>Application .....                            | 510 |
| <i>Jun Iio</i>                                                                                               |     |
| A Reservation System for Oral Exam of Programming Class .....                                                | 516 |
| <i>Masaki Kohana and Shusuke Okamoto</i>                                                                     |     |
| A Real-Time Web-Cast System for Classes in the BYOD Style .....                                              | 520 |
| <i>Daiki Ito, Michitoshi Niibori, and Masaru Kamada</i>                                                      |     |

|                                                                                                                  |     |
|------------------------------------------------------------------------------------------------------------------|-----|
| A Proposal of Distributed Autonomous Cooperative System about Exclusive<br>Web Crawling for Cyber Security ..... | 526 |
| <i>Yoshihiro Kawano and Eiji Nunohiro</i>                                                                        |     |

## **Session 2: Analysis and Developments**

|                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------|-----|
| A Preliminary Experiment of Tweet Filtering by Back Propagation .....                                                             | 530 |
| <i>Shumpei Fujii, Michitoshi Niibori, and Masaru Kamada</i>                                                                       |     |
| An Intensive Analysis on the Usage Situation of the Mobile Services<br>in Japanese High Schools: Why and How are They Used? ..... | 536 |
| <i>Tadashi Okada, Jun Iio, Yoshihiko Kubota, and Tatsuhiko Yonekura</i>                                                           |     |
| A C++ Header Library for Web Applications .....                                                                                   | 541 |
| <i>Shusuke Okamoto and Masaki Kohana</i>                                                                                          |     |
| A Structure Editor for the English Language .....                                                                                 | 546 |
| <i>Marina Nakano, Emi Masuda, and Masaru Kamada</i>                                                                               |     |
| Estimation of Tags via Comments on Nico Nico Douga .....                                                                          | 550 |
| <i>Hiroki Sakaji, Masaki Kohana, Akio Kobayashi, and Hiroyuki Sakai</i>                                                           |     |
| <b>Author Index</b> .....                                                                                                         | 554 |
