# 2016 5th Brazilian Conference on Intelligent Systems

## BRACIS 2016

### Table of Contents

|                                  |      |
|----------------------------------|------|
| Message from General Chairs..... | xiii |
| Message from Program Chairs..... | xiv  |
| Organizing Committee.....        | xv   |
| Program Committee.....           | xvi  |
| Reviewers.....                   | xix  |
| Steering Committee.....          | xxi  |
| Sponsors.....                    | xxii |

---

### Best Papers

|                                                                                                        |    |
|--------------------------------------------------------------------------------------------------------|----|
| (Deep) Learning from Frames .....                                                                      | 1  |
| <i>Jônatas Wehrmann, Rodrigo C. Barros, Gabriel S. Simões, Thomas S. Paula,<br/>and Duncan D. Ruiz</i> |    |
| Investigating Selection Strategies in Multi-objective Probabilistic Model Based<br>Algorithms .....    | 7  |
| <i>Andrei Strickler, Olacir Castro Jr., Aurora Pozo, and Roberto Santana</i>                           |    |
| Knowledge Representation for Argumentation in Agent-Oriented Programming<br>Languages .....            | 13 |
| <i>Alison R. Panisson and Rafael H. Bordini</i>                                                        |    |
| Object-Oriented Reinforcement Learning in Cooperative Multiagent Domains .....                         | 19 |
| <i>Felipe Leno da Silva, Ruben Glatt, and Anna Helena Real Costa</i>                                   |    |
| Tree-Based Grammar Genetic Programming to Evolve Particle Swarm<br>Algorithms .....                    | 25 |
| <i>Péricles B.C. Miranda and Ricardo B.C. Prudêncio</i>                                                |    |
| Using Preferences over Sources of Information in Argumentation-Based<br>Reasoning .....                | 31 |
| <i>Alison R. Panisson, Victor S. Melo, and Rafael H. Bordini</i>                                       |    |

## Machine Learning and Data Mining I

|                                                                                                                  |    |
|------------------------------------------------------------------------------------------------------------------|----|
| Hyper-Parameter Tuning of a Decision Tree Induction Algorithm .....                                              | 37 |
| <i>Rafael G. Mantovani, Tomáš Horváth, Ricardo Cerri, Joaquin Vanschoren,<br/>and André C.P.L.F. de Carvalho</i> |    |
| An Accurate Gaussian Process-Based Early Warning System for Dengue<br>Fever .....                                | 43 |
| <i>Julio Albinati, Wagner Meira Jr., and Gisele L. Pappa</i>                                                     |    |
| Supervised Microalgae Classification in Imbalanced Dataset .....                                                 | 49 |
| <i>Iago Corrêa, Paulo Drews Jr., Márcio Silva de Souza, and Virginia Maria Tavano</i>                            |    |
| Automatic Selection of Learning Bias for Active Sampling .....                                                   | 55 |
| <i>Davi P. dos Santos and André C.P.L.F. de Carvalho</i>                                                         |    |

## Planning and Scheduling

|                                                                                               |    |
|-----------------------------------------------------------------------------------------------|----|
| Solving Atomix with Pattern Databases .....                                                   | 61 |
| <i>Alex Gliesch and Marcus Ritt</i>                                                           |    |
| Using the Causal Graph to Enhance Translations to Solve Contingent<br>Planning Problems ..... | 67 |
| <i>Ignasi Andrés and Leliane Nunes de Barros</i>                                              |    |
| Improved Airport Ground Traffic Control with Domain-Dependent Heuristics .....                | 73 |
| <i>Augusto B. Corrêa, André G. Pereira, and Marcus Ritt</i>                                   |    |
| Extreme Risk Averse Policy for Goal-Directed Risk-Sensitive Markov Decision<br>Process .....  | 79 |
| <i>Valdinei Freire and Karina Valdivia Delgado</i>                                            |    |

## Learning and Neural Networks

|                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------|-----|
| Extreme Learning Machines for Datasets with Missing Values Using<br>the Unscented Transform .....                              | 85  |
| <i>Diego P.P. Mesquita, João P.P. Gomes, and Leonardo R. Rodrigues</i>                                                         |     |
| Towards Knowledge Transfer in Deep Reinforcement Learning .....                                                                | 91  |
| <i>Ruben Glatt, Felipe Leno da Silva, and Anna Helena Realí Costa</i>                                                          |     |
| Co-MLM: A SSL Algorithm Based on the Minimal Learning Machine .....                                                            | 97  |
| <i>Wesley L. Caldas, João P.P. Gomes, Michelle G. Cacaís, and Diego P.P. Mesquita</i>                                          |     |
| Evaluating Binary Encoding Techniques for WiSARD .....                                                                         | 103 |
| <i>Andressa Kappaun, Karine Camargo, Fabio Rangel, Fabrício Firmino,<br/>Priscila Machado Vieira Lima, and Jonice Oliveira</i> |     |
| A Voronoi Diagram Based Classifier for Multiclass Imbalanced Data Sets .....                                                   | 109 |
| <i>Evandro J.R. Silva and Cleber Zanchettin</i>                                                                                |     |

|                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------|-----|
| Determining the Structure of Decision Directed Acyclic Graphs for Multiclass Classification Problems ..... | 115 |
| <i>Thaise M. Quiterio and Ana C. Lorena</i>                                                                |     |

## IA/IC Applications

|                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------|-----|
| Pixel Clustering for Face Recognition .....                                                                                     | 121 |
| <i>Tiago B.A. de Carvalho, Maria A.A. Sibaldo, Ing Ren Tsang, George D.C. Cavalcanti, Ing Jyh Tsang, and Jan Sijbers</i>        |     |
| No-Reference Image Quality Assessment Using Texture Information Banks .....                                                     | 127 |
| <i>Pedro Garcia Freitas, Welington Y.L. Akamine, and Mylène C.Q. Farias</i>                                                     |     |
| Image-Set Matching by Two Dimensional Generalized Mutual Subspace Method .....                                                  | 133 |
| <i>Bernardo B. Gatto and Eulanda M. dos Santos</i>                                                                              |     |
| Image Classification Using Sum-Product Networks for Autonomous Flight of Micro Aerial Vehicles .....                            | 139 |
| <i>Bruno Massoni Sguerra and Fabio G. Cozman</i>                                                                                |     |
| Fault Detection in Hard Disk Drives Based on Mixture of Gaussians .....                                                         | 145 |
| <i>Lucas P. Queiroz, Francisco Caio M. Rodrigues, Joao Paulo P. Gomes, Felipe T. Brito, Iago C. Brito, and Javam C. Machado</i> |     |
| Musical Scales Recognition via Deterministic Walk in a Graph .....                                                              | 151 |
| <i>Andrés Eduardo Coca S. and Liang Zhao</i>                                                                                    |     |

## Evolutionary Computation

|                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------|-----|
| Metaheuristic Design Pattern: Visitor for Genetic Operators .....                                                        | 157 |
| <i>Giovani Guizzo and Silvia R. Vergilio</i>                                                                             |     |
| Revisiting the Sequential Symbolic Regression Genetic Programming .....                                                  | 163 |
| <i>Luiz Otavio V.B. Oliveira, Fernando E.B. Otero, Luis F. Miranda, and Gisele L. Pappa</i>                              |     |
| Time Series Imputation Using Genetic Programming and Lagrange Interpolation .....                                        | 169 |
| <i>Damarens C.O. de Resende, Ádamo Lima de Santana, and Fábio Manoel França Lobato</i>                                   |     |
| Discovery Biological Motifs Using Heuristics Approaches .....                                                            | 175 |
| <i>Jader M. Caldonazzo Garbelini, André Yoshiaki Kashiwabara, and Danilo Sipoli Sanches</i>                              |     |
| Adaptive Operator Selection in NSGA-III .....                                                                            | 181 |
| <i>Richard A. Gonçalves, Carolina P. Almeida, Lucas M. Pavelski, Sandra M. Venske, Josiel N. Kuk, and Aurora T. Pozo</i> |     |

|                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----|
| Many-Objective Evolutionary Algorithms for Multicast Routing with Quality of Service Problem .....                                      | 187 |
| <i>Thiago Fialho de Queiroz Lafetá, Marcos Luiz de Paula Bueno, Christiane Regina Soares Brasil, and Gina Maira Barbosa de Oliveira</i> |     |

## **Agents and Multiagent Systems**

|                                                                                                     |     |
|-----------------------------------------------------------------------------------------------------|-----|
| A Trust and Reputation Framework for Game Agents: Providing a Social Bias to Computer Players ..... | 193 |
| <i>Fabio S. do Couto, Carla A.D.M. Delgado, and João C.P. da Silva</i>                              |     |
| Allocating Social Goals Using the Contract Net Protocol in Online Multi-agent Planning .....        | 199 |
| <i>Rafael C. Cardoso and Rafael H. Bordini</i>                                                      |     |
| Evaluating the SBR Algorithm Using Automatically Generated Plan Libraries .....                     | 205 |
| <i>Giovani Farias, Lucas Hilgert, Felipe Meneguzzi, and Rafael H. Bordini</i>                       |     |
| Evaluating the Impact of Reputation-Based Agents in Social Coalition Formation .....                | 211 |
| <i>Cristina Verçosa Pérez Barrios de Souza and Fabricio Enembreck</i>                               |     |
| Reasoning about Trust and Belief in Possibilistic Answer Set Programming .....                      | 217 |
| <i>Gabriel Maia and João Alcântara</i>                                                              |     |

## **Pattern Recognition and Cluster Analysis**

|                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------|-----|
| Allocation of Volunteers in Non-governmental Organizations Aided by Non-supervised Learning .....       | 223 |
| <i>Carlos M.M. Bezerra, Danilo R.B. Araújo, and Valmir Macario</i>                                      |     |
| Estimating the Number of Clusters Based on Sequential Clustering Algorithms .....                       | 229 |
| <i>Eduardo Machado Real</i>                                                                             |     |
| Random Walk in Feature-Sample Networks for Semi-supervised Classification .....                         | 235 |
| <i>Filipe Alves Neto Verri and Liang Zhao</i>                                                           |     |
| DualRadviz: Preserving Context between Classification Evaluation and Data Exploration with RadViz ..... | 241 |
| <i>Igor Bueno Corrêa and André C.P.L.F. de Carvalho</i>                                                 |     |
| Anomaly Detection under Cost Constraint .....                                                           | 247 |
| <i>Bruno Barbarioli and Renato M. Assunção</i>                                                          |     |
| A Bio-inspired Optimization Technique for Cluster Ensembles Optimization .....                          | 253 |
| <i>Huliane M. Silva, Anne M.P. Canuto, Inácio G. Medeiros, and João C. Xavier Jr.</i>                   |     |

## Natural Language Processing

|                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A Method for Automatic Determination of the Feature Vector Size for Text<br>Categorization .....                                                      | 259 |
| <i>Rogério C.P. Fragoso, Roberto H.W. Pinheiro, and George D.C. Cavalcanti</i>                                                                        |     |
| Discriminating between Brazilian and European Portuguese National Varieties<br>on Twitter Texts .....                                                 | 265 |
