

# **10th International Conference on Pressure Surges 2008**

System Design, Simulation,  
Monitoring and Control

Edinburgh, United Kingdom  
14 – 16 May 2008

**Editor:**

**S. Hunt**

ISBN: 978-1-5108-3648-8

## CONTENTS

<b>FOREWORD</b>	1
<b>HIGHLIGHT ADDRESSES</b>	
Towards integrating fluid transients issues into pipe system design through a risk management approach <i>A Anderson, University of Newcastle, UK</i>	5
Thomas Young's research on fluid transients: 200 years on <i>A S Tijsseling, Eindhoven University of Technology, The Netherlands; A Anderson, Newcastle University, UK</i>	21
<b>HYDRO</b>	
Surge chamber issues associated with the design of the Braamhoek hydroelectric pumped storage scheme <i>A P Boldy, HydroSim Consultants Limited, UK; C Logan, Braamhoek Consultants Joint Venture, UK</i>	37
Hydraulic transients in Socorridos pump-storage hydropower system <i>D I C Covas, H M Ramos, A Betâmio de Almeida, Technical University of Lisbon, Portugal</i>	47
Pump-turbine runner lifting during load acceptance: an exploration of possible causes <i>D Liu, F Wang, Hohai University, China; K Q Zhang, B Karney, University of Toronto, Canada</i>	65
<b>AIR RELATED TOPICS</b>	
Improvement of the method for calculation of liquid transient pipe flow with column separation <i>A Adamkowski, M Lewandowski, The Szewalski Institute of Fluid-Flow Machinery of the Polish Academy of Sciences, Poland</i>	83
Sub-atmospheric transient pressure conditions – where and what it may influence in design <i>D L McPherson, B Karney, University of Toronto, Canada</i>	99
Air movement in water pipelines – some new developments <i>M J Little, J C Powell, P B Clark, Black &amp; Veatch, UK</i>	111

## LEAKAGE AND BLOCKAGE

- Leak and feature detection in a water distribution network 125  
*M Taghvaei, S B M Beck, J B Boxall, W J Staszewski, University of Sheffield, UK; A Seth, Yorkshire Water Services Ltd, UK*
- An application of real-time unsteady flow simulation in a leakage detection software 137  
*H Kossatz, Petrobras Research Centre (retired), Brazil*
- A transient-based technique to locate depleted appliance trap seals within the building drainage system 153  
*D A Kelly, J A Swaffield, D P Campbell, M Gormley, L B Jack, Heriot-Watt University, UK*
- Field validation of transient analysis for in-line valve condition assessment 169  
*N S Arbon, M Stephens, M F Lambert, A R Simpson, B Lucas, University of Adelaide, Australia; G Milsom, J Braendler, SA Water, Australia*

## SURGE PROTECTION

- The use of air valves as protection devices in pressure hydraulic transients 183  
*V B Espert, J Garcia-Serra, Polytechnic University of Valencia, Spain; E Koelle, Unicamp Faculty of Engineering, Brazil*
- First do no harm – avoiding pressure surge solutions that make the problem worse 199  
*P B M Glover, Halcrow Group Ltd, UK*
- A comparison of a pressure vessel and flywheel for surge mitigation in a long pipeline system 211  
*V Cantone, R Stevens, Parsons Brinckerhoff, Australia; A R Simpson, M F Lambert, University of Adelaide, Australia*
- Design and modelling of water hammer protection in water supply pipelines 227  
*B Madin, SMEC Australia; R Austin, Wallingford Software, Australia; A Sprigg, GHD, Australia*
- Non-reflective boundary design through remote sensing and PID control valve 243  
*B Karney, Q Zhang, S Pejovic, University of Toronto, Canada; F Wang, Hohai University, China*

## OIL/GAS/PETROCHEMICAL

- Surge protection of a marine terminal: an analysis of relief systems' dynamic response 259  
*H Kossatz, Petrobras Research Centre (retired), Brazil*

Detection of gas pockets in dendritic wastewater mains 271  
*I Pothof, Deltares | Delft Hydraulics, The Netherlands;*  
*F Clemens, Delft University of Technology, The Netherlands*

Fully interactive pipeline simulation – Go beyond the liquid parts 287  
and apply control schemes  
*J Theakston, N Jansen, Simulation Software Limited, UK*

### **SURGES IN PLASTIC PIPES**

Pressure wave propagation in buried HD-PE pipelines 303  
*H-B Horlacher, Technical University of Dresden, Germany;*  
*M Standfuß, Water Supply Association Elbaue-Ostharz, Germany*

Experimental and numerical analysis of hydraulic transients in PVC 317  
pipes  
*A K Soares, D I C Covas, Technical University of Lisbon, Portugal;*  
*L F R Reis, University of São Paulo, Brazil*

von Neumann stability analysis of a method of characteristics 333  
visco-elastic pipeline model  
*A C Zecchin, A R Simpson, M F Lambert, University of Adelaide,*  
*Australia*

### **UNSTEADY FRICTION**

Parameters affecting water hammer in a high-head hydropower 351  
plant with Pelton turbines  
*U Karadžić, P Vukoslavčević, Faculty of Mechanical Engineering,*  
*Montenegro; A Bergant, Litostroj E.I. d.o.o., Slovenia*

Reconciliation of measured and predicted unsteady skin friction 365  
*A E Vardy, J Brown, University of Dundee, UK;*  
*S He, University of Aberdeen, UK*

The momentum flux coefficient for modelling steady and unsteady 379  
head losses in turbulent pipe flow  
*A Ch H Kruisbrink, Deltares | Delft Hydraulics, The Netherlands;*  
*A S Tijsseling, Eindhoven University of Technology,*  
*The Netherlands*

### **CASE STUDIES & INDUSTRIAL EXPERIENCE**

Transient abnormal conditions in a sewage pumping system at 403  
Lisbon metropolitan zone  
*H M Ramos, D I C Covas, A Betâmio de Almeida,*  
*Technical University of Lisbon, Portugal*

Dynamic modelling of the Thames Water Ring Main 415  
*S L Murray, J C Powell, Black & Veatch, UK;*  
*P Relton, Thames Water, UK*

Measurements and modeling of transients in laboratory exhaust ductwork <i>D C Wiggert, Michigan State University, USA;</i> <i>C S Martin, Georgia Institute of Technology, USA</i>	429
Operational hydraulics of the SMART project, Kuala Lumpur <i>A Perrott, Mott MacDonald, UK</i>	443
<b>OPEN CHANNEL</b>	
Enabling the MacCormack original scheme to perform dam-break flow by fitting a smoothed initial condition on a fixed non-uniform grid <i>J Leandro, University of Exeter, UK; H M Ramos, Technical University of Lisbon, Portugal</i>	459
Filling of branched pipelines with undulating elevation profiles <i>T Razak, B Karney, University of Toronto, Canada</i>	473
A shock-capturing approach for simulating gravity flows, pressurized flows and the simultaneous occurrence of gravity and pressurized flows <i>A S León, A R Schmidt, M H García, University of Illinois, USA;</i> <i>M S Ghidaoui, The Hong Kong University of Science and Technology, Hong Kong</i>	489
<b>IMPORTANT LIMITATIONS IN THEORETICAL MODELLING</b>	
Method of characteristics in quasi-steady compressible flows <i>A E Vardy, University of Dundee, UK</i>	505
Issues in 'benchmarking' fluid transients software models <i>A Anderson, Newcastle University, UK;</i> <i>A Bergant, Litostroj E.I. d.o.o., Slovenia</i>	519
Rapid filling analysis of pipelines using an elastic model <i>A Malekpour, B Karney, University of Toronto, Canada</i>	539
Time scales and FSI in oscillatory liquid-filled pipe flow <i>A S Tijsseling, Eindhoven University of Technology,</i> <i>The Netherlands; A E Vardy, University of Dundee, UK</i>	553
<b>AUTHOR INDEX</b>	569
