# 25th Canadian Congress of Applied Mechanics (CANCAM 2015)

Progress in Canadian Mechanics Volume 1

London, Ontario, Canada
31 May – 4 June 2015

**Editors:**

**J.M. Floryan**
**L. Jiang**
**O.R. Tutunea-Fatan**

ISBN: 978-1-5108-3689-1

**Printed from e-media with permission by:**

Curran Associates, Inc.

# Table of Contents

**Plenary Lecture**

The Changing Face of Applied Mechanics 1967-2015....2
*David S. Weaver*

The Generation of Stress in the Storage Particles of Lithium-Ion Batteries....5
*Robert M. McMeeking*

Assessing Wind Speeds in Tornadoes from Observed Damage....6
*Greg Kopp*

Recent Advances in Adaptive Metastructures for Structural Dynamics Enhancement....7
*Kon-Well Wang*

Vortices....8
*Stavros Tavoularis*

Design and Micro/Nano-Engineering of Functional Materials, Surfaces and Devices: from Fundamentals to Applications…...9
*Jun Yang*

**Actuation and Smart Materials**

Dynamic Analyses of a Viscoelastic Dielectric Elastomer Oscillator....11
*Jianyou Zhou, Liying Jiang, Roger E. Khayat*

Dynamic Analysis of a Vibration Shaker Based on a Dielectric Elastomer Actuator....15
*Ujjaval Gupta, Hareesh Godaba, Jian Zhu*

Durability of a New Generation of Basalt-FRP Reinforcing Bars....19
*Mohamed Hassan, Brahim Benmokrane*

**Advanced Manufacturing**

An Improvement of Fixtureless Inspection for Non-Rigid Parts Based on Filtering Sample Points....24
*Sasan Sattarpanah Karganroudi, Jean-Christophe Cuillière, Vincent Francois, Souheil-Antoine Tahan*

Nd:YAG Laser Surface Treatment of Stainless Steel 304 Sheets....28
*Mitra Radmanesh, AmirKianoosh Kiani*

Measurement Methods and Data Representations for Mechanical Part Refurbishment/Replacement....32
*H.M.H. Bubshait, Allan D. Spence*

Current State-of-the-Art in Modeling and Simulation of Laser Polishing Process....36
*Shirzad Mohajerani, Evgueni Bordatchev, O. Remus Tutunea-Fatan*

Development of Ultrasonic Surface Treatment Device....40
*Yanjun Qian, H. J. Kwon*

Human Head and Face Detection and Tracking Using Single Camera to Improve Human Robot Interaction.....44
*Sumesh Kunwar, Meysar Zeinali.*

Parameter-Driven Geometric Modeling of Retroreflective Features.....48
*Sama Hussein, Benjamin Hamilton, Evgueni Bordatchev, O. Remus Tutunea-Fatan*

Experimental Study of Touch Probing with a Five Axis Machine Tool.....52
*Md Mizanur Rahman, J.R.R. Mayer*

Ice-Microtome Design for Procurement and Crystal Analysis of Ice Thin Sections.....56
*Steve Bruneau, Ashley Sullivan, Zetian Zhang, Bruce Colborne*

Strategies in Single Point Inverted Cutting for Fabrication of Structured Surfaces.....60
*Ben Hamilton, Sama Hussein, O. Remus Tutunea-Fatan, Evgueni Bordatchev*

**Aerodynamics**

Analysis of Wind Turbine Stall Using Tuft Flow Visualization.....65
*Tyler E. Gallant, David A. Johnson*

CFD Modeling of the Wind Chamber Used for Radioactive Particle Resuspension Experiment.....69
*Sharman Perera, Edward Waller, Paul Walsh, Andrew Doxtator, Ali Akhtar*

Effects of Wind Tunnel Model End Conditions on Low Reynolds Number Airfoil Studies.....74
*Mark Feero, Pierre Sullivan, Philippe Lavoie*

Large-Eddy Simulation of Turbulent Round Jets in Crossflows.....78
*Paul Ziadé, Pierre Sullivan*

Measurement of Rotating Wind Turbine Blade Angle of Attack with a Five-Hole Pressure Probe.....82
*Tyler E. Gallant, David A. Johnson*

Wingtip Vortex Control Via Tip-Mounted Half-Delta Wings.....86
*Ying Yu Su, Steve Choi, Tim Lee*

Near Wake Flow Topology of Ahmed Bodies.....90
*Graham Feltham, Alis Ekmekci*

Vortex Shedding in the Wakes of Finned Cylinders.....96
*Jeff McClure, Serhiy Yarusevych*

Propagation of Fluctuations and Flow Separation on an Unsteadily Loaded Airfoil.....100
*Andrew S. Tenney, Jacques Lewalle*

Flow-Topology Around a Cylinder Submerged in Different Width Wake.....104
*Md. Mahbub Alam, Longjun Wang, Yu Zhou*

**Biological Fluid Mechanics**

The Effect of Sinus Geometry on the Turbulence Downstream of a Bileaflet Heart Valve.....109
*Laura Haya, Stavros Tavoularis*

PIV Measurement of Jets Through Model Mitral Valve with Different Suture Configurations.....113
*Anna Chtchetinina, Lyes Kadem, Hoi Dick Ng*

Ascertaining the Influence of Intraglottal Vortices upon the Dynamics of the Vocal Folds.....117
*Brian Q. Kettlewell, Sean D. Peterson*

A Computational Fluid Dynamics Model of Failing Fontan Circulation for Use in the Design of a Novel Treatment.....121
*Matthew G. Doyle, Wanyu Zhang, Fabian Alvarado, Haruki Ide, Lars Grosse-Wortmann, Richard D. Weisel, Osami Honjo, Leonard W. Tse, Cristina H. Amon*

Experimental Investigation of Hemodynamic Variations Inside Abdominal Aortic Aneurysm During Change of Posture.....125
*Hani Abulkhair, Lyes Kadem*

Non-Newtonian Blood-Mimicking Fluid for Particle Image Velocimetry.....129
*Adam J Fortais, John R de Bruyn, Tamie L Poepping*

Lumped Parameter Model of Flow Through the Carotid Bifurcation.....133
*Onaizah Onaizah, Tamie Poepping, Mair Zamir*

Computational Modeling of Microbubble Distribution in Microvascular Networks.....137
*Daniel Goldman, Graham M. Fraser, Christopher G. Ellis*

Evaluating Flow Disturbances in the Carotid Bifurcation.....140
*Tamie L. Poepping, Amanda L. DiCarlo, Onaizah Onaizah, Mair Zamir*

The Role of Heparin Sulphate in Endothelial Cell Leukocyte Attachment in Regions of Spatial Wall Shear Stress Gradients.....144
*Scott Cooper, Richard L. Leask*

Laser Doppler Velocimetry Measurements of Wall Shear Stress Under Steady and Pulsatile Flow Conditions in a Parallel Plate Flow Chamber.....147
*Hamed Avari, Eric Savory*

**Biomaterials**

On the Energetics of the Edge of an Open Lipid Bilayer.....152
*Meisam Asgari, Aisa Biria*

Study of Laser Adjustable Sutures for Trabeculectomy.....156
*Kongying Xie, Husam Elkaseh, Eddie B. Moss, Robert J. Campbell, Yong Jun Lai*

Flexible Armors Inspired from Natural Fish Scales and Osteoderms.....160
*Roberto Martini, Ravi Chintapalli, Francois Barthelat*

Doctor Blading Artificial Nacre and Bone.....161
*Mohammad Mirkhalaf, Francois Barthelat*

A Model for the Collagen Fibrils in Biological Soft Tissues.....162
*Meisam Asgari, Hossein K. Heris, Luc Mongeau*

Validation of a Novel Tonometry Device for the Developing World.....166
*Melanie Chin, Tim Newson, Gord Campbell*

**Biomechanics**

Nonlinear Mechanical Response of Porcine Knee Joint.....171
*Marcel Rodriguez, LePing Li*

Enhancing Biocompatibility of Grade 4-Titanium Using Laser Surface Texturing for Bone and Tissue Transplant Applications.....174
*Mitra Radmanesh, AmirKianoosh Kian*

Contact Stress Analysis of Surface Guided Knee Implant Using Finite Element Modeling.....177
*Ida Khosravipour, Yunhua Luo, Shabnam Pejhan, Urs P. Wyss*

Experimental Apparatus for Analysis of Bone Removal During Surgical Resurfacing Procedures.....181
*Jonathan Kusins, O. Remus Tutunea-Fatan, Louis Ferreira*

Indicators of Motion Induced Interruption Occurrences in Heavy-Weather Sea Conditions.....185
*N.R. Bourgeois, R.G. Langlois*

**Boundary Layers**

Fluctuating Pressures and Flow Characteristics Within Separation Bubbles on Surface-Mounted Prisms.....190
*Abul Fahad Akon, Gregory Alan Kopp*

Numerical Simulation of Laminar Shear-Layer Reattachment in a Planar Sudden Expansion.....194
*Nima Moallemi, Joshua Brinkerhoff*

Vortex Visualization and Characterization in the Laminar Separation Bubble over a NACA 0018 Airfoil.....198
*Andrew Lambert, Serhiy Yarusevych*

Modeling of Dielectric Barrier Discharge Actuator for Airflow Control.....202
*Mohammadreza Ghazanchaei, Kazimierz Adamiak, G. S. Peter Castle*

Numerical Investigation of Blockage Development in an Aeroengine Transonic Axial Compressor Stage.....206
*Shady Ali, Eric Savory, Chao Zhang*

**Combustion and Flames**

Test Methodology for Comparing Wildland Fire Chemical Treatments.....211
*Shammawi A. Anderson, Andre G. McDonald*

Modified Biodiesel Chemical Kinetics Based on Numerical Simulation in an Ignition Quality Tester.....215
*Mahmoud Elhalwagy, Chao Zhang*

Buoyant Instabilities and Flame Spread in Wildland Fires: Implication of the Need for Scaling Instability Analysis.....219
*M.A. Finney, J.D. Cohen, J.A. Forthofer, S.S. McAllister, N.K. Akafuah, K. Saito, M.J. Gollner, D.J. Gorham*

Structured Natural Convection …….....223
*J.M. Floryan, M.Z. Hossain, A. Bassom*

**Computational Fluid Dynamics**

Characteristics of New Mode of Instability in a Channel with Longitudinal Grooves.....228
*A. Mohammadi, J. M. Floryan*

Spectral Algorithm for Analysis of Flows in Vibrating Channels.....232
*S. Zandi, A. Mohammadi, J.M. Floryan*

Three-Dimensional Spectrally-Accurate Algorithm for the Navier-Stokes Equations.....237
*Md. Sakib, J. M. Floryan*

Hydrodynamic Study of Gas-Particle Interaction in an FCC Downer Reactor.....241
*Tatiana López, Carlos A. Bustamante, César Nieto*

Numerical Simulation of Displacement Flow of Viscoplastic Fluids.....245
*A. Eslami, K. Alba, I.A. Frigaard, S.M. Taghavi*

Shear-Thinning Effects on Nanofiber Formation by Centrifugal Spinning.....249
*S. M. Taghavi, R.G. Larson*

Two-Dimensional Hydrodynamics Study of FCC Riser Reactor by Eulerian-Eulerian Approach.....253
*Natalia Gómez, Carlos A. Bustamante, César Nieto*

Oil Flow Visualization of the Laminar Separation Bubble on a SD 7037 Airfoil.....257
*Faegheh Ghorbanishohrat, David A. Johnson*

Dispersed Phase Single-Particle Lagrangian and Correlation Dimensional Statistics in Kinematically Simulated Turbulence.....261
*S. A. Murray, M. F. Lightstone, S. Tullis*

Numerical Investigation of Jet Pump with Twisted Tapes.....265
*Arpita Srivastava, Shaligram Tiwari, Mani Annamalai*

CFD Simulation of Spray Cooling Systems.....269
*M. Jafari, R.M. Barron, R. Balachandar*

Effect of Microstructured Roughness on Micro-Droplet Dynamics.....273
*S.M.Reza Attarzadeh, Moussa Tembely, Ali Dolatabadi*

Simulation of Aysmmetric Turbulent Channel Flow with Roughness on One Wall.....277
*Ming Teng, Donald J. Bergstrom*

Spectral Algorithm for Linear Stability Analysis of Flow in Ribbed Annuli.....281
*H. V. Moradi, J. M. Floryan*

**Computational Solid Mechanics**

Use of Rigid Bar Elements in Finite Element Analysis.....286
*Kevin Brooks, Nader Zamani*

Simulating Debris Impacts into Tornado Saferooms with LS-DYNA.....290
*Yevgeniy Parfilko, Benjamin Varela*

Transient Heat Flow Analysis Using FEA and Laplace Transform-Based Collocation Method.....293
*Amir Khalilollahi, Enayat Mahajerin, Gary Burgess*

Structural Topology Optimization with Adaptive Mesh Refinement and De-Refinement.....297
*Alexandre Nana, Jean-Christophe Cuillière, Vincent François*

On the Importance of Thermal Effects in Dislocation Dynamics Simulations.....301
*Oxana Skiba, Robert Gracie*

A Phase-Field Modeling of the Microstructural Evolution in Ti-6Al-4V Alloy Under Mechanical Loading.....305
*Jianhui Zhai, Yu Su*

A Novel Design of the Heat Echanger of an Aircraft's Environmental Controller.....309
*Negin Shahbazian, Mohammad Anisur Rahman, Kamran Behdinan*

Redesign of a DC-Link Capacitor for an Aircraft Power and Thermal Management Controller.....313
*Mohammad Anisur Rahman, Negin Shahbazian, Kamran Behdinan*

A Coupled Dynamic Simulation of Hydraulic Fracturing.....317
*Matin Parchei-Esfahani, Robert Gracie*

Computational Modeling and Calibration of a 3D Metal Foam Heat Sink…….....321
*Shahzada P. Aly, Khaled S. Al-Athel, Abul Fazal M. Arif, Javad Mostaghimi*

**Convection**

Thermodynamics and Fluid Mechanics of Heavy Water and Supercritical Water.....326
*Robert L. Varty*

Study of AL2O3/Water Nanofluid in a Multiport Slab Heat Exchanger.....330
*Mohammed Ismail, Shahram Fotowat, Amir Fartaj*

Transient Heat Transfer Behavior in the Liquid Domain of a PCM During Phase Change.....334
*Mohammad Bashar, Kamran Siddiqui*

Thermal Drift Due to Modulated Dual Heating.....338
*M. Z. Hossain, J. M. Floryan*

Convective Heat Transfer Due to Multiple Circular Jets Impinging on a Large Cylinder.....342
*Chris Csernyei, Anthony G. Straatman*

**Drops, Bubbles**

Computational Study of Multiphase Transport Through Fuel Cell Flow Channel.....347
*Abbas Ghasemi, Yanzhou Qin, Xianguo Li*

Relation Between Paint Application Parameters and Droplet Diameter: A Way to Improve Efficiency and Reduce Air Emissions.....351
*Rajan Ray, Paul Henshaw*

Experimental Investigation of Particles Turbulence in A High Reynolds Vertical Pipe Flow.....355
*Rouholluh Shokri, Sina Ghaemi, David S. Nobes, R. Sean Sanders*

The Effect of Mesh-Type Bubble Breaker on Two Phase Vertical Co-Current Flow.....359
*Alan Kalbfleisch, Kamran Siddiqui*

Characterization of the Two-Phase Flow Due to a Holed Bubble Breaker Inside an Effervescent Atomizer Using High-Speed Imaging.....363
*Mona Hassanzadeh Jobehdar, Kamran Siddiqui, Aly H. Gadallah, Wajid A. Chishty*

**Elasticity/Plasticity**

Effect of Irradiation and Thermal Recovery on the Hardness of Inconel 800H and AISI 310 Alloys.....368
*H. Rajakumar, R.J. Klassen*

Cyclic Plasticity Modelling of Wrought Magnesium Alloys.....372
*Ali Roostaei, Hamid Jahed*

Plastic Deformation of Gold Micro Spheres.....376
*AZM Ariful Islam, V Bhakhri, Robert J. Klassen*

Indentation-Induced Deformation Behaviour of Magnesium.....380
*V. Bhakhri, M. Haghshenas, R. Oviasuyi, R.J. Klassen*

Plastic Buckling Paradox for Plates in Biaxial Loading.....384
*Suresh Shrivastava, Bob Munlemvo Mayemba*

**Experimental Methods**

Electrical Resistivity of Sands.....388
*Zaid Al-Qaysi, Abouzar Sadrekarimi*

Reynold Number Effect on Forward Facing Step in Pressure Gradient.....392
*Hassan Iftekhar, Weijie Shao, Martin Agelin-Chaab*

Mixing Characteristics in Turbulent Orifice Jets.....397
*Yaw Y. Afriyie, Mark F. Tachie, Mikhail Koupriyanov, Tom Epp*

Experimental and Numerical Study of Flow Characteristics Through a Gradual Contraction…….....401
*Sarwesh Mali, Ali Nematollahi, Ebenezer E. Essel, Mark F. Tachie*

Applications of Fiber Bragg Grating Sensors to Strain Measurements of AZ31B Extrusion in Rotating Bending Cyclic Tests.....405
*Bahareh Marzbanrad, Ehsan Toyserkani, Hamid Jahed*

Flow Around 2D Bluff Bodies Mounted Close to a Floor.....409
*Hassan Iftekhar, Martin Agelin-Chaab*

Experimental Investigation on Overpressures in a Scale Model of Sidedraw Silo During Emptying.....413
*Chenying Dong, Kun Pang, Fang Yuan, Liying Jiang*

Design of Kolsky Bar to Characterize the Dynamic Response of Elastomer Under High Strain Rate.....417
*Muhammad Salman Chaudhry, Alex Czekanski, Roger Carrick*

Temperature Measurements in Industrial Scale Spray Cooling Systems.....423
*M. Jafari, R. Balachandar, R.M. Barron*

Numerical Investigation of the Bearing Capacity of Ring Foundations on Clay.....427
*Maha Al Massri, Timothy A. Newson*

**Fluid-Structure Interactions**

Sloshing of Supported Shells Conveying Fluid.....432
*Michael P. Païdoussis, Kostas Karazis*

Transient Loading on Nuclear Steam Generator Tubes During a Two-Phase Blowdown.....436
*Ouajih Hamouda, David S. Weaver, Jovica Riznic*

Numerical Modeling of Tornadic Load on a Tall Building.....440
*Zoheb Nasir, Girma T. Bitsuamlak*

Transition in Dynamical Behaviour of a Flexible Slender Cylinder Subjected to Axial Flow, with a Variable Support at the Upstream End.....444
*Mojtaba Kheiri*

**Fracture Mechanics**

Shape Effect of Traction-Separation Law on Dynamic Fracture of X80 Pipeline Steel.....449
*Y.J. Wang, C.Q. Ru*

Residual Stress State in Single-Edge Notched Tension Specimen Caused by the Local Compression Technique.....451
*Yifan Huang, Wenxing Zhou*

Cohesive Zone Model for Temperature Dependent Fracture Analysis of Pipeline Steel.....455
*Sourayon Chanda, CQ Ru*

Overcoming Brittleness Through Bio-Inspiration and Microarchitecture.....459
*Mohammad Mirkhalaf, Ahmad K. Dastjerdi, Francois Barthelat.*

Simulation of Dent-Crack Defect in Pipeline Using FEA.....460
*Hossein Ghaednia, Sreekanta Das, Jamshid Zohrehheydariha*

Understanding the Strain Distributions Caused by a Dent Defect.....464
*Hossein Ghaednia, Sreekanta Das, Jamshid Zohrehheydariha, Sara Kenno*

**Geophysical Fluid Dynamics**

Examination of Helmholtz Vortex Laws Using Rankine Combined Vortices in Circular Cylinders.....469
*Josué Njock Libii*

Spatio-Temporal Dynamics of a Street Canyon Flow from Combined Field and Wind Tunnel Experiments.....474
*Laurent Perret, Karin Blackman, Eric Savory*

The Flow Field of an EF5 Tornado in a Supercell Windstorm…….....478
*W.E. Lin, A. Ozyoruk, E. Savory, L.G. Orf*

Evaluating the Performance of Inflow Boundary Condition Models for Rans Simulation of ABL Flow Over Complex Topography.....482
*Tibebu H. Birhane, Girma T. Bitsuamlak*

Unsteady Rans Modelling of Density-Driven Experimental Thunderstorm Downbursts.....487
*Matthew Roberto, Chris Oreskovic, Eric Savory, Juliette Porto*

Experimental Characterizaton of Flow Around an Escarpment.....491
*Ryan Kilpatrick, Kamran Siddiqui, Horia Hangan*

**Mechatronics**

Optical Fiber Sensors for In-Situ Monitoring of Lithium Ion Batteries.....496
*Hamid Alemohammad, AbdulRahman Ghannoum, Liliana Zdravkova, Krishna Iyer, Patricia Nieva*

A Novel Nonlinear Amplitude-Modulation Gyroscope Incorporating Internal Resonance.....500
*S. Amir Mousavi Lajimi, Navid Noori, Amr Marzouk, Behraad Bahreyni, Farid Golnaraghi*

Scale Experimental Test Vehicle for Rollover Study.....504
*Paul White, Rhyse Maryniuk, Sobhan Sadri, Christine Wu*

State of Charge Estimation of Li-ion Batteries Using the Dynamic 2nd-Order Smooth Variable Structure Filter.....509
*Hamed Hossein Afshari, Andrew Gadsden, Ryan Ahmed, Saeid Habibi*

Development of Residential HVAC Control and Demand Management System Using Intelligent Strategy Planning Models.....513
*Nima Alibabaei, Alan S. Fung, Kaamran Raahemifar*

Positioning Accuracy Recovery for RRR Compliant Mechanism System under PZT Actuator Failure.....517
*Xuejun Wang, Wenjun Zhang, Changli Liu*

**Micro- and Nano-fluids**

Experimental Study on Enhancement of Heat Transfer Using Nanoparticles Based Fluids.....522
*Nabeel Al-Rawahi, Myo Tay Zar Myint, Joydeep Dutta*

Combining Micromilling and Liquid-Based Solvent Bonding for Ultra-Rapid Fabrication of Plastic Microchips.....526
*Alwin M. D. Wan, Edmond W. K. Young*

Design Considerations for On-Chip Biosensing in Microfluidic Cardiovascular Models.....528
*Jeremy Wong, Craig A. Simmons*

A Novel Microfluidic Switch Design with Response Characteristics to High Acceleration.....532
*Weirong Nie, Huang Liu, Liying Jiang*

**Multibody/Vehicle Dynamics**

Automated Design Synthesis of LQR Controllers for Road Vehicle Active Suspension Systems.....537
*Eungkil Lee, Yuping He*

Symbolic Integration of Finite Element Models with Dynamic Multibody Systems.....541
*Yiteng Liang, Joydeep Banerjee, John McPhee, Asaad Sellmann, Orang Vahid Araghi*

Acausal Modelling for Dynamic Multibody Simulation of Damped Three-Dimensional Flexible Beams.....546
*Joydeep Banerjee, John McPhee*

Design and Analysis of an Interconnected Suspension for a Small Off-Road Vehicle.....550
*Bruce P Minaker, Zheng Yao*

Viscoelastic Multibody Dynamics of Whiplash.....554
*Mohamed T.Z. Hassan, S.A. Meguid*

Road Profile Recovery Using Onboard Acceleration Data.....558
*Fei Hu, Bruce P Minaker, Mehrzad Abdollahi*

**Multicomponent Materials**

Numerical Prediction on Elastic Properties of Chopped Fiber Reinforced Composites.....563
*Hui Liu, Liying Jiang, Danielle Zeng, Yang Li*

Design of Stiffness by Controlled Organization of Microstructure in an Elastomeric Nanocomposite.....567
*Peiying Jennifer Tsai, Suvojit Ghosh, Peidong Wu, Ishwar K. Puri*

The Influence of Filler Volume Fraction on Sensitivity to Distributed Strain in Carbon Nanofiber/Polyurethane Nanocomposites.....571
*T. N. Tallman, K. W. Wang*

Effect of Surface Treatment on the Strength and the Environmental Durability of Bond at the Metal-Polymer Composite Interface.....575
*Syeda Noor E Sumaiya, Shailesh Chekurthi, J. Raghavan, Sitarz Blaine, Brian D McMillan*

Strain-Rate-Dependent Mixed Mode Failure Analysis of Unidirectional Carbon Fiber Reinforced Composite Laminates.....579
*Shailesh Chekurthi, J. Raghavan*

Computational Homogenization of Metal Matrix Composites.....583
*M. U. Siddiqui, A. F. M. Arif*

**Nanostructures and MEMS**

Multiscale Modelling of Thermo-Electro-Mechanical Behaviours of Gallium Nitride Nanowires: Size and Temperature Dependence of the Piezoelectric Potential.....589
*Jin Zhang, S. A. Meguid*

Sound Absorption by Multilayer of Micro perforated Membranes.....593
*Xiaobing Cai, Jun Yang*

Air Bubble Assisted Detection for Micro Mass Sensors.....597
*Jacky Chow, Yong Jun Lai*

Laser Modification of Printed Graphene-Oxide (GO) and Graphene-Cellulose (G-CMC) Thin Films.....601
*Dogan Sinar, George K. Knopf, Suwas Nikumb*

Remote Manipulation of 3D Printed Complex Magnetic Architecture after Surface Modification.....605
*Dongxing Zhang, Jun Yang*

A Rapid Method for Preparation of Metal Coated 3D Printed Objects.....608
*Qiuquan Guo, Mingjun Hu, Xiaobing Cai, Jun Yang*

A Multifunctional MEMS Sensor System for Brake System Applications.....611
*Rogelio Hernández Aguirre, Patricia Nieva, Amir Khajepour*

Natural Frequencies of Double and Triple Walled Carbon Nanotubes Using Finite Element Formulation.....615
*Ishan Ali Khan, Seyed M. Hashemi*

Friction Behaviour of Hexagonal-Shaped Graphene Islands Grown on Copper by Chemical Vapour Deposition (CVD)….619
*Philip Egberts*

**Non-Newtonian Fluids**

Displacement Flows in Slightly Converging Channels.....621
*R. Mollaabbaasi, K. Alba, S. M. Taghavi*

A Microfluidic Method for Optical Studies of Early Stage Biofilm Response to Applied Shear Stresses.....625
*M. Parvinzadeh Gashti, J. Greener*

Two-Layer Flow of Immiscible Non-Newtonian Fluids: Linear Stability Analysis.....630
*K. Alba, S.M. Taghavi*

Effect of Nanoparticles on Rheological Properties of Herschel-Bulkley Fluids.....634
*R.Mollaabbasi, S.H. Noie*

Magnetorheological Effects from Tracer Residence Time Distribution in Nanofluid Poiseuille Flows.....638
*F. Larachi, P. Hajiani*

**Porous Media**

A Computational Model of Temperature Monitoring at a Leakage in a Leak Detection System of a Pipeline.....643
*A. S. Bhuiyan, M. A. Hossain, J. M. Alam*

Buoyancy-Driven Flows in a Confined Porous Medium.....648
*Chunendra K. Sahu, M. R. Flynn*

Carbon Sequestration Modelling Using Stabilized Finite Element Methods.....652
*Chris Ladubec, Robert Gracie*

Reaction-Driven Flow in a Porous Medium.....656
*Jared Penney, Marek Stastna*

Modelling Solids Separation in Rotating Belt Filters Using a Semi-Empirical Numerical Approach.....660
*Christopher T. DeGroot*

**Renewable Energy Systems**

A Numerical Study of Basement Heat Losses.....665
*Lam Dang, Wey H. Leong*

Seasonal Performance Investigation of a Dual Tank Solar-Assisted Heat Pump System.....669
*Carsen J. Banister, Michael R. Collins*

Optimized Load Allocation of Boilers Using Mixed Integer Non-Linear Programming for Reduced Natural Gas Consumption.....674
*Altamash Ahmad Baig, Alan S. Fung*

Improved Gasification Through Torrefaction of Biomass.....678
*Prabir Basu, Manoj Kumar Raut, Bishnu Acharya*

The Role of HRW Systems in Reducing Greenhouse Gas Emission and Energy Savings of Ontario-Based Plants.....682
*Afarin Amirirad, Alan S. Fung*

A New Design for the Improvement of Uniform Cooling in Aircooled Li-ion Battery Stacks.....686
*Soroush Arghavan, Mohammadhadi Akbari*

An Air Source Heat Pump for Hydronic Home Heating, Application of an Air Based Photovoltaic/Thermal Collector…….691
*Omid Nemati, Alan S. Fung*

Comparison Analysis of Weather Normalization for Industrial Plants Using Prism and Excel.....695
*Md Maniruzzaman Akan, Alan S Fung, Tamima Ahmed*

Energy Benchmarking Analysis Based on Ventilation Consumption of Small and Medium Powder Coating Industries in the Greater Toronto Area (GTA).....699
*Tamima Ahmed, Alan S. Fung*

Experimental Performance Study of a Vertical and a Horizontal Ground Loops Coupled to a Ground Source Heat Pump System.....703
*Waleed S. Alzahrani, Alan S. Fung, Wey H. Leong*

**Turbulence**

Boundary Layers Properties for Turbulent Taylor-Couettepoiseuille Flows in a Narrow-Gap Cavity.....708
*Poncet Sébastien, Viazzo Stéphane*

Very-Lage-Scale Direct Numerical Simulation of the Canonical Flat-Plate Boundary Layer.....712
*Jean-Pierre Hickey, Xiaohua Wu*

Turbulet Flow Behind a Partially Blocking Grid…….....716
*Fama Fouladi, Paul Henshaw, David S-K. Ting*

The Turbulent Structure of Inner Layer over Superhydrophobic Surface.....720
*Babak Vajdi Hokmabad, Sina Ghaemi*

Effect of Aspect Ratio on the Near Field Dynamics of Free Surface Jet.....724
*Anuvrat Mishra, Mark F. Tachie, David C.S. Kuhn*

**Turbulence & Vortex Dynamics**

Suppression of Vortex Shedding for Flow Past around a Circular Cylinder using Splitter Plate.....729
*Abdelkrem Eltaggaz*

Quasi-Steady Hypothesis and Conductor Galloping.....734
*Karine Lavertu, André Laneville, Hachimi Fellouah*

Large Eddy Simulation of Suspended Sediments in Turbulent Flow.....738
*M. Dallali, V.Armenio*

Spatial Development of the Zone of Negative Turbulence Production in an Asymmetry Channel Flow.....742
*Ali Esmaeilnejad, Sina Ghaemi*

**Vibration of Structures**

Recreation of Random Vibration During Truck Transportation.....747
*Enayat Mahajerin, Gary Burgess*

Fourth Order Approximate Solutions for the Undamped Free Vibration of Strongly Nonlinear Oscillators Subject to Initial Displacements.....751
*Vinicius B. F. Rabelo, M. L. Liu*

Seismic Response Investigations of Nonlinear Single-Degree of-Freedom Systems Equipped with Gyromass Dampers…755
*Reza Mirza Hessabi, Jiejing Zhou, Oya Mercan*

High-Cycle Fatigue Testing on Aero-Engine Blade.....759
*Nima Bahrani, Kamran Behdinan*

A Structured Approach for Solving the Inverse Eigenvalue Problem of a Beam with a Grounded Mass-Spring Attachement.....763
*Farhad Mir Hosseini, Patrick Dumond, Natalie Baddour*

Stochastic Dynamics and Stability of a Class of Mems Gyroscopes.....767
*Soroush Arghavan, Mohamed Bognash, Samuel Asokanthan*

Transient Response of a Sandwich Structure Damped with a Fibrous Core Material.....771
*Elsa Piollet, Guilhem Michon, Annie Ross*

Vibration Control of Tall Buildings Using Aerodynamic Optimization.....775
*Ahmed Elshaer, Girma Bitsuamlak, Ashraf El-Damatty*

Bouncing Dynamics Considerations for Micro Switch Design.....779
*Mohamed Bognash, Tianfu Wang, Samuel Asokanthan*

Horizontal Models of Unbonded Fiber Reinforced Elastomeric Isolators.....783
*Niel Van Engelen, Michael Tait, Dimitrios Konstantinidis*

Nonlinear Thermo-Electro-Mechanically Induced Vibration of FGPM Beams…….....787
*M. Komijani, R.Gracie*

The Inverse Eigenvalue Determinant Method for Jacobi and Tridiagonal Matrices.....790
*Patrick Dumond, Natalie Baddour*

Vibration Analysis of Coupled Axial and Transverse Vibrations of Oil Well Drill Strings Without Effect of Drilling Mud.....794
*Mohammad Damshenas, Mohammad Taghi Ahmadian*

Seismic Analysis for Composite Conical Tanks.....800
*Ahmed Elansary, Ashraf El Damatty*

Low-Frequency Vibrations of Inhomogeneous Elastic Structures with Contrast Properties.....804
*Danila Prikazchikov, Olga Sergushova*

Seismic Behaviour of Steel Liquid-Filled Conical Tanks Designed Under Hydrostatic Pressure.....808
*A. Musa, A.A. El Damatty*

An Algorithm for Optimal Seat Selection for Heavy Mobile Machinery in Different Industrial Vibration Environments…..812
*Xiaoxu Ji, James P. Dickey, Tammy R. Eger*

Asymmetric Influences on the Energy Dissipation Properties of a Metastable Module Excited Near Resonance.....816
*Narayanan Kidambi, R.L. Harne, K.W. Wang*

Vibration Analysis of Drill String Under Inclined Drilling Including Stick-Slip Phenomenon with the Effect of Drilling Mud Injection.....820
*Mohammad Damshenas*

**Wind Engineering**

Applicability of Quasi-Steady Theory on Building Point Pressures.....827
*Chieh-Hsun Wu, Gregory A. Kopp*

Large Scale Particle Streak Velocimetry in the Windeee Dome.....832
*Dan-Stefan Parvu, Adrian Costache, Horia Hangan*

Effect of Atmospheric Wind on a Ground Mounted Solar Panel Array....836
*Chowdhury Jubayer, Horia Hangan*

Aerodynamic and Acoustic Effects of a Serrated Trailing Edge on Wind Turbine Blades....840
*Nicholas Tam, Kobra Gharali, David A. Johnson*

Large Eddy Simulation of Wind-Induced Pressure on a Low Rise Building....844
*B. Hajra, H. Aboshosha, G. T. Bitsuamlak*

**Author Index**....848
