

# **2nd Australasian Acoustical Societies Conference (ACOUSTICS 2016)**

Brisbane, Australia  
9 - 11 November 2016

Volume 1 of 2

ISBN: 978-1-5108-3739-3

**Printed from e-media with permission by:**

Curran Associates, Inc.  
57 Morehouse Lane  
Red Hook, NY 12571

**Some format issues inherent in the e-media version may also appear in this print version.**

## Table of Contents

<b>00 Plenary 1</b>	<b>7</b>
The underwater soundscape around Australia . . . . .	8
<b>00 Plenary 2</b>	<b>18</b>
Why is it so hard to design a concert hall with excellent acoustics? . . . . .	19
<b>00 Plenary 3</b>	<b>34</b>
Wind Turbine Sound: Past present and future . . . . .	35
<b>00 Plenary 4</b>	<b>52</b>
The Historical and Current Challenge of Environmental Noise Nuisance . . . . .	53
<b>1A: Architectural Acoustics Design Workshop 1</b>	<b>68</b>
Room Acoustics for Listening (Invited Paper) . . . . .	69
Room Acoustic Design of the Queensland University of Technology Creative Industries Precinct Phase 2 (CIP2) . . . . .	79
Light transparency and sound absorption . . . . .	89
<b>1B: Environmental Noise and Vibration</b>	<b>97</b>
A Case Study of Specialist Acoustic Advice for a Large Multi-Stage Industrial Development on a Rural Greenfield Site . . . . .	98
Auralisation for Airport Noise Impact Assessments: Measurements and Applications .	107
Cost optimisation of noise control for industrial buildings . . . . .	117
<b>1C: Acoustical Practice 1</b>	<b>124</b>
Validity of acoustic test data and design risks associated with manufacturers test data	125
Noise in Building 1980 to 2015 . . . . .	131
Parametric investigation of caf acoustics . . . . .	138
<b>1D: Marine Bioacoustics 1</b>	<b>144</b>
Using acoustics to study biological activity in the Perth Canyon Western Australia .	145
Marine mammals and the impacts of anthropogenic noise: Considerations for the design of large acoustic behavioural response studies such as BRAHSS . . . . .	154
<b>1E: Rail Noise 1</b>	<b>166</b>
Annoyance from the sudden onset of noise . . . . .	167
Comparison of rail noise prediction methodologies for elevated rail designs . . . . .	172
A Smorgasbord of Railway Dynamic and Acoustic Phenomena . . . . .	182
<b>2A: Architectural Acoustics Design Workshop 2</b>	<b>192</b>
Fresnel Zones and Spheroids for Room Acoustics . . . . .	193
Broadband acoustic scattering with modern aesthetics from random 3D terrain surfaces generated using the Fourier Synthesis algorithm . . . . .	203
Modelling baffle configurations in virtual rooms . . . . .	213
<b>2B: Acoustical Analysis</b>	<b>223</b>
Acoustic Absorption Behaviour of a Tall Carbon Nanotube Forest . . . . .	224
Time-domain estimation of acoustic radiation modes and active structural acoustic control . . . . .	234
Recent progress in research on virtual sound barriers . . . . .	244

The influence of the interaction between ideational factors frequencies and stimulus factors on reported unpleasantness of recorded sounds . . . . .	254
<b>2C: Acoustical Practice 2</b>	<b>262</b>
Uncertainties in Acoustics . . . . .	263
Managing risk in acoustics: The role of a consulting professional . . . . .	270
A working acoustician's guide to compliance and the NCC (BCA) . . . . .	276
<b>2D: Marine Bioacoustics 2</b>	<b>283</b>
Examining the value of the Acoustic Variability Index in the characterisation of Australian marine soundscapes . . . . .	284
Integrating echo-sounder and underwater video data for demersal fish assessment . . . . .	297
Transmission of marine seismic survey air gun array signals in Australian waters . . . . .	305
Developing active broadband acoustic methods to investigate the pelagic zone of the Great Australian Bight . . . . .	315
<b>2E: Rail Noise 2</b>	<b>321</b>
An Examination of the Relationship Between the Nature of the Traffic Noise Source and the Resultant Internal Noise Levels Determined under QDC MP 4.4 . . . . .	322
Use of ISO Measurement Uncertainty Guidelines to Determine Uncertainties in Noise & Vibration Predictions and Design Risks . . . . .	327
Wear simulation for boundary lubricated radially loaded spherical roller bearings . . . . .	336
<b>3A: Architectural Acoustics Design Workshop 3</b>	<b>346</b>
The Philharmonie de Paris - Acoustic design and commissioning . . . . .	347
Acoustic Design of the Ukaria Cultural Centre Concert Hall . . . . .	362
New standards in Architectural Acoustics - a German view . . . . .	372
<b>3B: Instrumentation and Measurement</b>	<b>380</b>
Design and numerical analysis of a test-rig for the study of pipe-leak generated acoustic emissions . . . . .	381
An analysis of unmanned aerial vehicle-based acoustic atmospheric tomography . . . . .	390
Seeing (Ultra)sound in Real-Time through the Acousto-PiezoLuminescent Lens . . . . .	401
Development of a small-scale reverberation room . . . . .	409
Accurate sound speed estimation for Unmanned Aerial Vehicle-Based Acoustic Atmospheric Tomography . . . . .	419
<b>3C: Aeroacoustics 1</b>	<b>429</b>
Statistical estimation of trailing edge noise from finite wall-mounted airfoils . . . . .	430
Advanced open rotor noise . . . . .	440
Supersonic bullet trajectory estimation using ballistic shock wave arrivals at an acoustic sensor array . . . . .	455
Hybrid CFD-BEM and Time-Reversal techniques applied to localise flow-induced noise sources generated by a flat-plate . . . . .	465
<b>3D: Underwater Acoustics - Propagation 1</b>	<b>475</b>
Estimating received sound levels at the seabed beneath seismic survey sources . . . . .	476
Aspects of Modelling Coherent Acoustic Reflection from a Rough Seafloor . . . . .	484
Pulse spreading and correlation loss in shallow water environments with rough sea surfaces and bottoms . . . . .	493
Easy-to-use closed-form equations for modal cut-on frequencies of a surface duct with an exponential sound speed profile . . . . .	503

<b>3E: Occupational Health and Safety</b>	<b>512</b>
Occupational noise law in New Zealand Issues and future directions . . . . .	513
Methods of validation of occupational noise exposure measurement with multi aspect personal sound exposure meter . . . . .	521
Exposure to Ototoxic Agents and Noise in Workplace A Literature Review . . . . .	527
Developments in the Description and Assessment of High Intensity Impulse Noise Exposure . . . . .	537
The practicality of using a smart 'phone 'App' as an SLM and personal sound expo- sure meter (SoundLog) . . . . .	547
<b>4A: Design Standards Workshop</b>	<b>554</b>
Overview of Process for Australian Acoustics Standards . . . . .	555
A Comparison of Acoustic Criteria within Green Building Rating Tools Schemes and Standards . . . . .	560
New regulations on sound insulation in buildings in Germany . . . . .	570
Speech Privacy outcomes from Green star Design and As-Built v1.1 rating tool . . . . .	577
<b>4B: Sound Quality and Reproduction</b>	<b>586</b>
Perceiving changes in cathedral ceiling height in a multichannel virtual acoustic ren- dering for Gregorian chant . . . . .	587
Some secrets of good musicians: the physics controlling articulation and timbre in reed instruments . . . . .	596
University Facilities for Critical Listening Training and Education on Multichannel Sound Production and Reproduction . . . . .	605
Interaural Cross-correlation Affects Perceived Elevation of Auditory Images Presented via Height Channels in Multichannel Audio Reproduction Systems . . . . .	618
<b>4C: Environmental Noise - Resources and Industry</b>	<b>626</b>
Pipeline Blowdown Noise Levels . . . . .	627
How to maximise the operating fleet and still comply with the noise limits . . . . .	636
Are cumulative noise criteria relevant for the assessment of mining noise? . . . . .	642
Noise management in the NSW coal industry . . . . .	651
Assessing the Accuracy of Directional Real-Time Noise Monitoring Systems . . . . .	661
<b>4D: Marine Platforms 1</b>	<b>671</b>
Measurement of pressure fluctuations inside a model thrust bearing using PVDF sensors	672
Development of a large experimental acoustic transmission loss test bench suitable for large marine diesel exhaust system components . . . . .	680
Effects of the characteristics of a force-driven bulkhead on the structural acoustics of an elastic cylinder . . . . .	691
A review of noise and vibration in fluid-filled pipe systems . . . . .	701
The Effect of a Static Pressure Field on the Frequency Response of a Clamped Circular Plate . . . . .	711
<b>4E: Noise and Vibration Analysis</b>	<b>721</b>
Structural- acoustic coupling of circular membrane backed by cylinder cavity using mode coupling approach . . . . .	722
Sound transmission loss of a large-scale meta-panel with membrane acoustic meta- material . . . . .	729
Breathing response in a statically indeterminate cracked rotor . . . . .	735
On topology optimization of acoustic metamaterial lattices for locally resonant bandgaps of flexural waves . . . . .	744

The effect of elliptical-front crack shape on the breathing mechanism of a crack in a rotating shaft . . . . .	751
<b>5A: Wind Farm Workshop 1</b>	<b>761</b>
Wind Farm Consent Conditions After NZS6808:2010 . . . . .	762
<b>5B: Building Acoustics</b>	<b>776</b>
Building Acoustic Design of the Queensland University of Technology Creative Industries Precinct Phase 2 (CIP2) . . . . .	777
Noise and Vibration Design Aspects for an Indoor Theme Park . . . . .	787
A preliminary investigation on the sound field properties in the Sagrada Familia Basilica	797
<b>5C: Environmental Acoustics</b>	<b>807</b>
Monitoring ground borne and structure borne noise for management of construction impacts . . . . .	808
Strategic noise mapping of Adelaide CBD . . . . .	816
Regulatory Strategies for Managing Noise from Outdoor Music Concerts . . . . .	825
<b>5D: Underwater Acoustics - Propagation 2</b>	<b>835</b>
Probing the Underwater Acoustic Communication Channel off Rottnest Island WA . . . . .	836
Estimates of the Coherent Leakage of Sound from an Ocean Surface Duct . . . . .	846
Bubble cloud generation by an air gun . . . . .	856
<b>5E: Road Traffic Noise 1</b>	<b>866</b>
Measuring the environmental performance of Melbourne's road network . . . . .	867
Regional detailed transport noise modelling issues and outcomes . . . . .	877
A systematic review of evidence of the effect of transport noise interventions on human health . . . . .	887
<b>6A: Wind Farm Workshop 2</b>	<b>897</b>
A review of Australian wind turbine noise assessment procedures . . . . .	898
Improving the accuracy of noise compliance monitoring of wind farms . . . . .	908
<b>6B: Building Acoustics - Structure Borne</b>	<b>915</b>
Two recent sound insulation test results . . . . .	916
Characterisation of structure-borne sound sources . . . . .	919
Comparative impact performance of lightweight gym floors . . . . .	927
Investigation of Impact Isolation of Flooring Products and Resilient Underlays . . . . .	935
<b>6C: Environmental Noise Policy and Regulation</b>	<b>945</b>
Industrial Noise Policy in Brisbane . . . . .	946
Review of noise policies in Victoria . . . . .	953
A framework for the regulation of environmental noise . . . . .	960
<b>6D: Underwater Acoustics</b>	<b>972</b>
Standardization in Underwater Acoustics Current status and on-going actions . . . . .	973
Control of directivity of PVDF hydrophones using anisotropic substrates . . . . .	982
Using a single-board microcontroller and ADC to perform real-time sonar signal processing . . . . .	991

<b>6E: Road Traffic Noise 2</b>	<b>999</b>
Measurement of noise events in road traffic streams: Initial results from a simulation study . . . . .	1000
A Re-Examination of the Relationship Between the L10(18hour) Noise Level Parameter and Other Road Traffic Noise Level Parameters . . . . .	1010
Using OBSI measurements of road surface corrections to improve noise modelling predictions . . . . .	1016
<b>7A: Acoustics for Educational Spaces</b>	<b>1023</b>
Innovative Learning Environments - the good the bad and the ways to get them Working . . . . .	1024
Design targets for Child Care Facility in the vicinity of intermittent noise sources . .	1031
Soundfield technology in an innovative learning environment . . . . .	1039
Classroom acoustic conditions: Understanding what is suitable through a review of national and international standards recommendations and live classroom measurements . . . . .	1047
<b>7B: Transmission Loss</b>	<b>1057</b>
On the acoustic properties of a hole in a wall of finite thickness . . . . .	1058
An acoustically isolating timber-frame connection system . . . . .	1068
Average Sound Transmission Loss of Steel Stud Partitions . . . . .	1075
Effects of finite cavities within a finite double-leaf panel on sound transmission loss .	1081
Relationship between flanking sound over a common separating wall and plenum absorption . . . . .	1091
<b>7C: Regulation Workshop</b>	<b>1099</b>
<b>7D: Marine Platforms 2</b>	<b>1099</b>
Sound radiation from a submerged stiffened cylinder with acoustic excitation . . . .	1100
On the prediction of shell vibration and sound radiation by different thin-shell theories when a submerged empty cylindrical shell is driven by an axisymmetric force . .	1110
Mapping Noise and Efficiency for Marine Propeller Designs . . . . .	1120
Symmetry of wave propagation and attenuation in an infinite 1D periodic structure under the interchange of forward and backward scattering coefficients . . . . .	1128
The effect of boundary conditions and ribs on the total radiation efficiency of submerged plates . . . . .	1138
<b>7E: Aeroacoustics 2</b>	<b>1148</b>
Low Mach number flow induced noise prediction of wall mounted airfoil using a hybrid RANS-BEM technique . . . . .	1149
Aeroacoustic beamforming of a model wind-turbine in anechoic and reverberant environments . . . . .	1157
An experimental study of airfoil tip vortex formation noise . . . . .	1167
Aeroacoustic Assessment of Facades . . . . .	1177
Estimation of the frequency boundaries of the inertial range for wind noise spectra in anechoic wind tunnels . . . . .	1187
