

# **36th Air Infiltration and Ventilation Centre Conference (AIVC 2015), 5th TightVent Conference and 3rd Venticool Conference 2015**

Effective Ventilation in High  
Performance Buildings

Madrid, Spain  
23 – 24 September 2015

Volume 1 of 2

ISBN: 978-1-5108-3764-5

## **Table of Contents**

Indoor Air Quality regulations. The Spanish case. ....	1
Energy efficient ventilation for NZEB in Mediterranean countries. ....	3
Is ventilation necessary and sufficient for acceptable indoor air quality? .....	5
Ventilation projects within the International Energy Agency: objectives, approaches and expected results .....	12
BIM, Information on sustainable building and performances.....	14
Analysis of results from ATTMA lodgement – what are the realistic air permeability characteristics of UK housing.....	19
Building airtightness in Germany - what are the driving forces? .....	21
6 years of envelope airtightness measurements performed by French certified operators: analyses of about 65,000 tests .....	22
Airtightness Data and Characteristics of 752 Residential Units of Reinforced Concrete Buildings in Korea .....	33
Airtightness and indoor air quality in subsidised housing in Spain .....	43
Evaluation tool of climate potential for ventilative cooling .....	53
Night time cooling by ventilation or night sky radiation combined with in-room radiant cooling panels including Phase Change Materials.....	67
Stack driven ventilative cooling for schools in mild climates: analysis of two case studies .....	78
Ventilative Cooling and Energy Use in Supermarkets .....	89
Effect of building and installation design on PM <sub>2.5</sub> .....	101
Experimental characterization of the efficiency and energy consumption of various central ventilation air cleaning systems .....	107
CO <sub>2</sub> and volatile organic compounds as indicators of IAQ.....	118
Impact of ventilation and recirculation rates on exposure to and intake of ozone and its initiated chemistry products: Mass balance model evaluation .....	128
Assessment of ventilation systems efficiency in office buildings, related to indoor volatile organic compound concentrations.....	139
Influence of moving objects on ventilation plan for smoking room .....	149
Model Home 2020 – full-year measurements of daylight, energy and indoor climate in five single-family houses occupied by typical families: what has been learned.....	158
Optimization of indoor air quality through controlled cross ventilation in the retrofitting of residential buildings.....	167
Wind-induced pressure coefficients on buildings dedicated to air change rate assessment with CFD tool in complex urban areas .....	179
Field application of enhanced displacement ventilation system in an office of a Zero Energy Building in the Tropics.....	188
Ecodesign Directive for Ventilation Units.....	194

Primary energy used in centralized and decentralized ventilation systems measured in field tests in residential buildings .....	197
Spread in energy use in buildings dependent on choice of heating and ventilation system .....	204
Development of a compact single room ventilation unit with heat recovery dedicated to tertiary building .....	213
IEA EBC Annex 68 – Indoor Air Quality Design and Control in Low Energy Residential Buildings .....	223
IEA EBC Annex 68 – Subtask 1: Defining the metrics .....	226
IEA EBC Annex 68 – Subtask 2, Pollutant Loads in Buildings .....	229
IEA EBC Annex 68 – Subtask 3, Modelling .....	232
IEA EBC ANNEX 68 – SUBTASK 4, strategies for design and control of buildings .....	235
IEA EBC ANNEX 68 – SUBTASK 5, field measurements and case studies .....	237
rCloud - Capturing the moment, a new era in automated testing .....	239
Uncertainty in airflow rate estimation of daytime ventilation associated with atmospheric stability .....	241
Airtightness Quality Management Approaches in France: end and birth of a scheme. Previous and new schemes overview and analysis .....	250
Thermal envelope quality versus nZEB parameters and long-term economics: the Eco-Silver House case in Ljubljana .....	261
The zero pressure paradox .....	272
Optimization of the airtightness and the flow rate of air in nearly zero energy buildings .....	280
Airtight duct systems [a simple way of improving a building's energy efficiency without increased investment] .....	293
Estimating the average Air Change Rate for the heating season .....	300
Experimental Analysis of Microscale Trigeration Systems to Achieve Thermal Comfort in Smart Buildings .....	309
Impact of natural ventilation in energy demand and thermal comfort of residential buildings in Catalonia .....	320
Thermal comfort assessment in a sustainable designed office building .....	331
Improvement of comfort and energy efficiency in existing buildings using ADAPTIVE Thermal Comfort Algorithm .....	342
Electrothermal actuators with PWM control .....	352
Assessment of spatial and temporal distribution of thermal comfort and IAQ in low energy houses .....	358
Model Predictive Control (MPC) of hybrid ventilation systems in office buildings with dynamic glass facades .....	369
Thermal performance analysis of a solar chimney, based on the experimental study of the main driving variables in a physical prototype .....	385

Control Strategies of the Natural Ventilation for Passive Cooling for an Existing Residential Building in Mediterranean Climate .....	396
Evaporative Cooling and Ventilation Control Strategies for a Kindergarten in Mediterranean Climate .....	406
A modular, open system for testing ventilation and cooling strategies in extremely low energy lecture rooms.....	416
Cold storage in the thermal mass of buildings using night ventilation. Experimental analysis ....	426
How safe is it to neglect thermal radiation in indoor environment modeling with high ventilation rates?.....	436
3D Fluid dynamic analyses of open joint ventilated facades applying experimental Stereo-PIV techniques. ....	441
A Study on the Reduction Effect of Ventilation and Heating Load by Installing Air-based Solar System in the Detached Houses.....	450
Implementation of multi-zone ventilation methodology in the spanish energy performance certification tool .....	460
Ventilation and health – a review .....	474
Evaluation of Ventilation and IAQ Parameters Measured in Social Housing in Madrid .....	482
Influence of air quality performance requirements on the demand of energy .....	495
Radon concentration control by ventilation, and energy efficiency improvement .....	508
How the filtration of the incoming air decreases the particle concentration within a school equipped with a balanced ventilation system .....	518
Energy performance of active polarization filters vs. conventional filters in HVAC systems .....	527
The effect of CO <sub>2</sub> on the nocturnal restlessness of an Alzheimer patient.....	534
Air change rate measurements using indoor/outdoor ratio of PM <sub>2.5</sub> .....	540
Mitigating Occupant Exposure to PM <sub>2.5s</sub> Emitted by Cooking in High Occupancy Dwellings Using Natural Ventilation Strategies .....	549
Ventilation effectiveness comparison between extract ventilation and balanced ventilation in a scale model .....	559
Numerical evaluation of the impact of hemp lime concrete moisture-buffering capacity on the behaviour of relative humidity sensitive ventilation system .....	566
Optimal window opening based on natural ventilation measurements .....	575
Evaluation of the refurbishment potential of mediterranean schools towards nzeb.....	584
How to construct a domestic pitched roof with high thermal quality?.....	593
Detailed numerical modelling of moist air flow through a complex airtightness defect .....	601
Characterization of sealants and expanding foams.....	612
Laboratory investigation on the durability of taped joints in exterior air barrier applications.....	615
Energy use consequences of ventilative cooling in a zeb residential building.....	624
Ventilative cooling strategies to reduce cooling and ventilation needs in shopping centres.....	633

Overheating Assessment of a Passive House Case Study in Spain .....	645
Automatic natural ventilation in large spaces: a passive ventilation technology for passive buildings. ....	656
Theoretical and real ventilation heat losses and energy performance in low energy buildings.....	666
Energy and IAQ friendly variable ventilation rates, according with the proposed indoor air quality regulations included in the Spanish Building Code. ....	677
Energy saving as a consequence of the proposed change in Spanish regulations relating to indoor air quality .....	687
Impact on the formation of mold in the period of summer, that indicates change in existing housing a.ch. Climate zone d1.....	695
Ventilation tool for improving the usability of ventilation levels related to Spanish regulations ...	702
Impact of the new rite 2013 (regulation on thermal installation) on indoor air quality .....	709
Infiltration and Ventilation in a Very Tight, High Performance Home .....	719
Impact of air infiltration rates on moisture buffering effect of wooden surfaces .....	727
Numerical evaluation of the airtightness impact on airflow pattern in mechanically ventilated dwellings in France.....	738
Concrete in ventilated facades for natural cooling of buildings. SINHOR project .....	750
Materials to fight Urban Climate Change.....	752
How cool roofs interact with PCMs: investigating thermal-energy behavior of a cool roof membrane with paraffin based PCM inclusion .....	753
Are women feeling colder than men in air-conditioning buildings? .....	756
Field trialling of a new airtightness tester in a range of UK homes .....	759
Calibrating measurement gauges – expense and findings.....	768
Multivariant measurements of airtightness of multi-family building .....	778
Status of the development of the cen and iso standards on energy performance of buildings assesment procedures.....	789
Analysis of indoor air quality & thermal comfort parameters in building regulations in 8 member states.....	799
Indoor Carbon Dioxide Concentrations in Ventilation and Indoor Air Quality Standards .....	810
Demand controlled ventilation in practice: Case study.....	820
Residential demand controlled extract ventilation combined with heat recovery via a heat pump.....	830
Simplified Methods for Combining Natural and Mechanical Ventilation .....	840
Development of a Seasonal Smart Ventilation Controller to Reduce Indoor Humidity in Hot-Humid Climate Homes .....	851
Thermodynamic analysis of buildings with natural ventilation and indoor air quality .....	862
Performances of a simple exhaust mechanical ventilation coupled to a mini heat pump: modeling and experimental investigations .....	872

Ventilation performance and indoor air pollutants diagnosis in 21 French low energy homes ....	885
REVIEWing legal framework and PERFORMANCE assessment tools for residential ventilation systems .....	895
Effects of Carbon Dioxide With and Without Bioeffluents on humans .....	904
Capture efficiency of air curtain assisted residential range hoods .....	913
Impact of staff posture on airborne particle distribution in an operating theatre equipped with ultraclean-zoned ventilation .....	919
Mechanical ventilation performance assessment in several office buildings by means of Big Data techniques .....	926
Recommendable supply air rates for residential housing – A simulation study considering CO <sub>2</sub> concentration, relative humidity, TVOC emissions and mould risk .....	937
Ventilation, indoor air quality and learning in schools.....	949
Evaluation of ventilation solutions for retrofitting of schools.....	959
Minimal Invasive Ventilation Systems with Heat Recovery for School Buildings .....	968
Indoor climate assessment of a classroom with mechanical ventilation and operable windows .	980
Ventilation strategies for the deep energy retrofit of a kindergarten.....	991
PCMs as a tool for increasing thermal inertia in Buildings .....	1002
Shifting the ieq paradigm from Comfort silos to holistic health and performance .....	1006
