## Frontmatter

---

|                                           |     |
|-------------------------------------------|-----|
| Message from the General Chairs . . . . . | iii |
| Message from the Program Chairs . . . . . | v   |
| Committees . . . . .                      | vii |

## Keynotes

---

|                                                                                   |   |
|-----------------------------------------------------------------------------------|---|
| <b>Notes on Virtual and Augmented Reality (Keynote)</b>                           |   |
| Tobias Höllerer — <i>University of California at Santa Barbara, USA</i> . . . . . | 1 |
| <b>A Perspective from the Long View: 35 Years in VR (Keynote)</b>                 |   |
| David A. Smith — <i>Wearality, USA</i> . . . . .                                  | 2 |

## Conference Papers

---

### Plausibility, Emotions, and Ethics

#### Emotional Qualities of VR Space

|                                                                                                                                      |   |
|--------------------------------------------------------------------------------------------------------------------------------------|---|
| Asma Naz, Regis Kopper, Ryan P. McMahan, and Mihai Nadin — <i>University of Texas at Dallas, USA; Duke University, USA</i> . . . . . | 3 |
|--------------------------------------------------------------------------------------------------------------------------------------|---|

#### Asking Ethical Questions in Research using Immersive Virtual and Augmented Reality Technologies with Children and Youth

|                                                                                                         |    |
|---------------------------------------------------------------------------------------------------------|----|
| Erica Southgate, Shamus P. Smith, and Jill Scevak — <i>University of Newcastle, Australia</i> . . . . . | 12 |
|---------------------------------------------------------------------------------------------------------|----|

### Travel and Navigation

#### Guided Head Rotation and Amplified Head Rotation: Evaluating Semi-natural Travel and Viewing Techniques in Virtual Reality

|                                                                                                                                    |    |
|------------------------------------------------------------------------------------------------------------------------------------|----|
| Shyam Prathish Sargunam, Kasra Rahimi Moghadam, Mohamed Suhail, and Eric D. Ragan — <i>Texas A&amp;M University, USA</i> . . . . . | 19 |
|------------------------------------------------------------------------------------------------------------------------------------|----|

#### Automatic Speed and Direction Control along Constrained Navigation Paths

|                                                                                                                                             |    |
|---------------------------------------------------------------------------------------------------------------------------------------------|----|
| Seyedkoosha Mirhosseini, Ievgeniia Gutenko, Sushant Ojal, Joseph Marino, and Arie E. Kaufman — <i>Stony Brook University, USA</i> . . . . . | 29 |
|---------------------------------------------------------------------------------------------------------------------------------------------|----|

### 360° Video Cinematic Experience

#### 6-DOF VR Videos with a Single 360-Camera

|                                                                                                                          |    |
|--------------------------------------------------------------------------------------------------------------------------|----|
| Jingwei Huang, Zhili Chen, Duygu Ceylan, and Hailin Jin — <i>Stanford University, USA; Adobe Research, USA</i> . . . . . | 37 |
|--------------------------------------------------------------------------------------------------------------------------|----|

#### Cinematic Virtual Reality: Evaluating the Effect of Display Type on the Viewing Experience for Panoramic Video

|                                                                                      |    |
|--------------------------------------------------------------------------------------|----|
| Andrew MacQuarrie and Anthony Steed — <i>University College London, UK</i> . . . . . | 45 |
|--------------------------------------------------------------------------------------|----|

### Extraordinary Environments and Abnormal Objects

#### A Study on the Use of an Immersive Virtual Reality Store to Investigate Consumer Perceptions and Purchase Behavior toward Non-standard Fruits and Vegetables

|                                                                                                                                                                |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Adrien Verhulst, Jean-Marie Normand, Cindy Lombart, and Guillaume Moreau — <i>Ecole Centrale de Nantes, France; Audienca Business School, France</i> . . . . . | 55 |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|----|

## Haptics

|                                                                                                                                        |    |
|----------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Evaluation of a Penalty and a Constraint-Based Haptic Rendering Algorithm with Different Haptic Interfaces and Stiffness Values</b> |    |
| Mikel Sagardia and Thomas Hulin — <i>German Aerospace Center, Germany</i> . . . . .                                                    | 64 |
| <b>VRRobot: Robot Actuated Props in an Infinite Virtual Environment</b>                                                                |    |
| Emanuel Vonach, Clemens Gatterer, and Hannes Kaufmann — <i>Vienna University of Technology, Austria</i> . . . . .                      | 74 |
| <b>Inducing Self-Motion Sensations in Driving Simulators using Force-Feedback and Haptic Motion</b>                                    |    |
| Guillaume Bouyer, Amine Chellali, and Anatole Lécuyer — <i>University of Évry Val d'Essonne, France; Inria, France</i> . . . . .       | 84 |

## Walking Alone and Together

|                                                                                                                      |    |
|----------------------------------------------------------------------------------------------------------------------|----|
| <b>An Evaluation of Strategies for Two-User Redirected Walking in Shared Physical Spaces</b>                         |    |
| Mahdi Azmandian, Timofey Grechkin, and Evan Suma Rosenberg — <i>University of Southern California, USA</i> . . . . . | 91 |

## Touch and Vibrotactile Feedback

|                                                                                                                               |     |
|-------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Wearable Tactile Device using Mechanical and Electrical Stimulation for Fingertip Interaction with Virtual World</b>       |     |
| Vibol Yem and Hiroyuki Kajimoto — <i>University of Electro-Communications, Japan</i> . . . . .                                | 99  |
| <b>Exploring the Effect of Vibrotactile Feedback through the Floor on Social Presence in an Immersive Virtual Environment</b> |     |
| Myungho Lee, Gerd Bruder, and Gregory F. Welch — <i>University of Central Florida, USA</i> . . . . .                          | 105 |

## Acoustics and Auditory Displays

|                                                                                                                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Acoustic VR in the Mouth: A Real-Time Speech-Driven Visual Tongue System</b>                                                                                                                                          |     |
| Ran Luo, Qiang Fang, Jianguo Wei, Wenhuan Lu, Weiwei Xu, and Yin Yang — <i>University of New Mexico, USA; Chinese Academy of Social Sciences, China; Tianjin University, China; Zhejiang University, China</i> . . . . . | 112 |
| <b>Efficient Construction of the Spatial Room Impulse Response</b>                                                                                                                                                       |     |
| Carl Schissler, Peter Stirling, and Ravish Mehra — <i>Oculus, USA</i> . . . . .                                                                                                                                          | 122 |

## Avatars and Virtual Humans

|                                                                                                                                                                                                                                                |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Rapid One-Shot Acquisition of Dynamic VR Avatars</b>                                                                                                                                                                                        |     |
| Charles Malleson, Maggie Kosek, Martin Klaudiny, Ivan Huerta, Jean-Charles Bazin, Alexander Sorkine-Hornung, Mark Mine, and Kenny Mitchell — <i>Disney Research, UK; Disney Research, Switzerland; Walt Disney Imagineering, USA</i> . . . . . | 131 |
| <b>Prism Aftereffects for Throwing with a Self-Avatar in an Immersive Virtual Environment</b>                                                                                                                                                  |     |
| Bobby Bodenheimer, Sarah Creem-Regehr, Jeanine Stefanucci, Elena Shemetova, and William B. Thompson — <i>Vanderbilt University, USA; University of Utah, USA</i> . . . . .                                                                     | 141 |
| <b>Repeat after Me: Using Mixed Reality Humans to Influence Best Communication Practices</b>                                                                                                                                                   |     |
| Andrew Cordar, Adam Wendling, Casey White, Samsun Lampotang, and Benjamin Lok — <i>University of Florida, USA; University of Virginia, USA</i> . . . . .                                                                                       | 148 |

## Motion Tracking and Capturing

|                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Optimizing Placement of Commodity Depth Cameras for Known 3D Dynamic Scene Capture</b>                                                               |     |
| Rohan Chabra, Adrian Ilie, Nicholas Rewkowski, Young-Woon Cha, and Henry Fuchs — <i>University of North Carolina at Chapel Hill, USA</i> . . . . .      | 157 |
| <b>Sweeping-Based Volumetric Calibration and Registration of Multiple RGBD-Sensors for 3D Capturing Systems</b>                                         |     |
| Stephan Beck and Bernd Froehlich — <i>Bauhaus-Universität Weimar, Germany</i> . . . . .                                                                 | 167 |
| <b>Recognition and Mapping of Facial Expressions to Avatar by Embedded Photo Reflective Sensors in Head Mounted Display</b>                             |     |
| Katsuhiro Suzuki, Fumihiko Nakamura, Jiu Otsuka, Katsutoshi Masai, Yuta Itoh, Yuta Sugiura, and Maki Sugimoto — <i>Keio University, Japan</i> . . . . . | 177 |

## Systems and Applications

### Enhancements to VTK Enabling Scientific Visualization in Immersive Environments

Patrick O’Leary, Sankhesh Jhaveri, Aashish Chaudhary, William Sherman, Ken Martin, David Lonie, Eric Whiting, James Money, and Sandy McKenzie — *Kitware, USA; Indiana University, USA; Idaho National Laboratory, USA* . . . 186

### MagicToon: A 2D-to-3D Creative Cartoon Modeling System with Mobile AR

Lele Feng, Xubo Yang, and Shuangjiu Xiao — *Shanghai Jiao Tong University, China* . . . . . 195

## Posters

---

### Poster Session A

#### Attention Guidance for Immersive Video Content in Head-Mounted Displays

Fabien Danieau, Antoine Guillo, and Renaud Doré — *Technicolor R&I, France; ENSAM, France* . . . . . 205

#### A System for Creating Virtual Reality Content from Make-Believe Games

Adela Barbulescu, Maxime Garcia, Antoine Begault, Laurence Boissieux, Marie-Paule Cani, Maxime Portaz, Alexis Viand, Romain Dulery, Pierre Heinisch, Remi Ronfard, and Dominique Vaufreydaz — *Inria, France; University of Grenoble, France; Grenoble INP, France* . . . . . 207

#### High-Definition Wireless Personal Area Tracking using AC Magnetic Field for Virtual Reality

Mohit Singh and Byunghoo Jung — *Purdue University, USA* . . . . . 209

#### HySAR: Hybrid Material Rendering by an Optical See-Through Head-Mounted Display with Spatial Augmented Reality Projection

Yuichi Hiroi, Yuta Itoh, Takumi Hamasaki, Daisuke Iwai, and Maki Sugimoto — *Keio University, Japan; Osaka University, Japan* . . . . . 211

#### Monocular Focus Estimation Method for a Freely-Orienting Eye using Purkinje-Sanson Images

Yuta Itoh, Jason Orlosky, Kiyoshi Kiyokawa, Toshiyuki Amano, and Maki Sugimoto — *Keio University, Japan; Osaka University, Japan; Wakayama University, Japan* . . . . . 213

#### Lean into It: Exploring Leaning-Based Motion Cueing Interfaces for Virtual Reality Movement

Alexandra Kitson, Abraham M. Hashemian, Ekaterina R. Stepanova, Ernst Kruijff, and Bernhard E. Riecke — *Simon Fraser University, Canada; Bonn-Rhein-Sieg University of Applied Sciences, Germany* . . . . . 215

#### Biomechanical Analysis of (Non-)Isometric Virtual Walking of Older Adults

Omar Janeh, Eike Langbehn, Frank Steinicke, Gerd Bruder, Alessandro Gulberti, and Monika Poetter-Nerger — *University of Hamburg, Germany; University of Central Florida, USA; University Medical Center Hamburg-Eppendorf, Germany* 217

#### Robust Optical See-Through Head-Mounted Display Calibration: Taking Anisotropic Nature of User Interaction Errors into Account

Ehsan Azimi, Long Qian, Peter Kazanzides, and Nassir Navab — *Johns Hopkins University, USA; Johns Hopkins University, Germany* . . . . . 219

#### 6 Degrees-of-Freedom Manipulation with a Transparent, Tangible Object in World-Fixed Virtual Reality Displays

David J. Zielinski, Derek Nankivil, and Regis Kopper — *Duke University, USA* . . . . . 221

#### Proposal of a Spectral Random Dots Marker using Local Feature for Posture Estimation

Norimasa Kobori, Daisuke Deguchi, Ichiro Ide, and Hiroshi Murase — *Toyota, Japan; Nagoya University, Japan* . . 223

#### All Are Welcome: Using VR Ethnography to Explore Harassment Behavior in Immersive Social Virtual Reality

Ketaki Shriram and Raz Schwartz — *Stanford University, USA; Oculus, USA* . . . . . 225

#### Study of Interaction Fidelity for Two Viewpoint Changing Techniques in a Virtual Biopsy Trainer

Aylen Ricca, Amine Chellali, and Samir Otmane — *University of Évry Val d’Essonne, France* . . . . . 227

#### Conditions Influencing Perception of Wind Direction by the Head

Takuya Nakano and Yasuyuki Yanagida — *Meijo University, Japan* . . . . . 229

#### The AR-Rift 2 Prototype

Anthony Steed, Yonathan Widya Adipradana, and Sebastian Friston — *University College London, UK* . . . . . 231

|                                                                                                                                                                                                                                  |     |

## **Towards Usable Underwater Virtual Reality Systems**

Raphael Costa, Rongkai Guo, and John Quarles — *University of Texas at San Antonio, USA; Kennesaw State University, USA* . . . . . 271

## **Development and Evaluation of a Hands-Free Motion Cueing Interface for Ground-Based Navigation**

Jacob Freiberg, Alexandra Kitson, and Bernhard E. Riecke — *Simon Fraser University, Canada* . . . . . 273

## **Preliminary Exploration: Perceived Egocentric Distance Measures in Room-Scale Spaces using Consumer-Grade Head Mounted Displays**

Alex Peer and Kevin Ponto — *University of Wisconsin-Madison, USA* . . . . . 275

## **Diminished Reality for Acceleration Stimulus: Motion Sickness Reduction with Vection for Autonomous Driving**

Taishi Sawabe, Masayuki Kanbara, and Norihiro Hagita — *NAIST, Japan* . . . . . 277

## **Interaction with WebVR 360° Video Player: Comparing Three Interaction Paradigms**

Toni Pakkanen, Jaakko Hakulinen, Tero Jokela, Ismo Rakkolainen, Jari Kangas, Petri Piippo, Roope Raisamo, and Marja Salmimaa — *University of Tampere, Finland; Nokia, Finland* . . . . . 279

## **Comparing VR and Non-VR Driving Simulations: An Experimental User Study**

Florian Weidner, Anne Hoesch, Sandra Poeschl, and Wolfgang Broll — *TU Ilmenau, Germany* . . . . . 281

## **Evaluation of Airflow Effect on a VR Walk**

Masato Kurosawa, Ken Ito, Yasushi Ikei, Koichi Hirota, and Michiteru Kitazaki — *Tokyo Metropolitan University, Japan; University of Electro-Communications, Japan; Toyohashi University of Technology, Japan* . . . . . 283

## **The Impact of Transitions on User Experience in Virtual Reality**

Liang Men, Nick Bryan-Kinns, Amelia Shivani Hassard, and Zixiang Ma — *Queen Mary University of London, UK* . . . . . 285

## **Coherence Changes Gaze Behavior in Virtual Human Interactions**

Richard Skarbez, Gregory F. Welch, Frederick P. Brooks Jr., and Mary C. Whitton — *University of North Carolina at Chapel Hill, USA; University of Central Florida, USA* . . . . . 287

## **Asymetric Telecollaboration in Virtual Reality**

Thibault Porssut and Jean-Rémy Chardonnet — *EPFL, Switzerland; LE2I, France* . . . . . 289

## **An Immersive Approach to Visualizing Perceptual Disturbances**

Grace M. Rodriguez, Marvis Cruz, Andrew Solis, and Brian C. McCann — *University of Puerto Rico, Puerto Rico; University of Florida, USA; University of Texas at Austin, USA* . . . . . 291

## **Corrective Feedback for Depth Perception in CAVE-Like Systems**

Adrian K. T. Ng, Leith K. Y. Chan, and Henry Y. K. Lau — *University of Hong Kong, China* . . . . . 293

## **Measurement of 3D-Velocity by High-Frame-Rate Optical Mouse Sensors to Extrapolate 3D Position Captured by a Low-Frame-Rate Stereo Camera**

Itsuo Kumazawa, Toshihiro Kai, Yoshikazu Onuki, and Shunsuke Ono — *Tokyo Institute of Technology, Japan* . . . . . 295

## **Using Augmented Reality to Improve Dismounted Operators' Situation Awareness**

William Losina Brandão and Márcio Sarroglia Pinho — *PUCRS, Brazil* . . . . . 297

## **Gauntlet: Travel Technique for Immersive Environments using Non-dominant Hand**

Mathew Tomberlin, Liudmila Tahai, and Krzysztof Pietroszek — *California State University at Monterey Bay, USA; University of Waterloo, Canada* . . . . . 299

## **Peers at Work: Economic Real-Effort Experiments in the Presence of Virtual Co-workers**

Andrea Bönsch, Jonathan Wendt, Heiko Overath, Özgür Gülerk, Christine Harbring, Christian Grund, Thomas Kittsteiner, and Torsten W. Kuhlen — *RWTH Aachen University, Germany* . . . . . 301

## **Efficient Sound Synthesis for Natural Scenes**

Kai Wang, Haonan Cheng, and Shiguang Liu — *Tianjin University, China* . . . . . 303

## **Poster Session B**

### **A Diminished Reality Simulation for Driver-Car Interaction with Transparent Cockpits**

Patrick Lindemann and Gerhard Rigoll — *TU Munich, Germany* . . . . . 305

### **Immersive and Collaborative Taichi Motion Learning in Various VR Environments**

Tianyu He, Xiaoming Chen, Zhibo Chen, Ye Li, Sen Liu, Junhui Hou, and Ying He — *University of Science and Technology of China, China; City University of Hong Kong, China; Nanyang Technological University, Singapore* . . . . . 307

## Tutorials

---

### Augmented Reality: Principles and Practice

Dieter Schmalstieg and Tobias Höllerer — *Graz University of Technology, Austria; University of California at Santa Barbara, USA* . . . . . 425

### Hypertextual Reality: VR on the Web

Diego González-Zúñiga, Peter O'Shaughnessy, and Michael Blix — *Samsung Research, UK; Samsung Research, USA* 427

### Diving into the Multiplicity: Liberating Your Design Process from a Convention-Centered Approach

Rebecca Rouse, Benjamin Chang, and Silvia Ruzanka — *Rensselaer Polytechnic Institute, USA* . . . . . 429

### Human-Centered Design for Immersive Interactions

Jason Jerald — *NextGen Interactions, USA* . . . . . 431

### Navigation Interfaces for Virtual Reality and Gaming: Theory and Practice

Ernst Kruijff and Bernhard E. Riecke — *Bonn-Rhein-Sieg University of Applied Sciences, Germany; Simon Fraser University, Canada* . . . . . 433

## Videos

---

### The Pull

Quba Michalski, Brendan J. Hogan, and Jamie Hunsdale — *QubaVR, USA; Impossible Acoustic, USA* . . . . . 435

### Virtual Reality to Save Endangered Animals: Many Eyes on the Wild

June Kim and Tomasz Bednarz — *UNSW, Australia; Queensland University of Technology, Australia* . . . . . 436

### Defying the Nazis VR

Dylan Southard, Elijah Allan-Blitz, Jordan Halsey, Christina Heller, and Artemis Joukowsky — *VR Playhouse, USA; A-B Productions, USA; Farm Pond Pictures, USA* . . . . . 437

### Singapore Inside Out London 2015 in VR

Lionel Chok — *iMMERSiVELY, Singapore* . . . . . 438

### Genome Gazing: A 360° Stereoscopic Animation for Google Cardboard

Kate Patterson — *Garvan Institute of Medical Research, Australia* . . . . . 439

### Smoke Water Fire (2016)

Mark J. Stock . . . . . 440

## Research Demos

---

### FACETEQ Interface Demo for Emotion Expression in VR

Ifigenia Mavridou, James T. McGhee, Mahyar Hamed, Mohsen Fatoorechi, Andrew Cleal, Emili Ballaguer-Balester, Ellen Seiss, Graeme Cox, and Charles Nduka — *Bournemouth University, UK; Sussex Innovation Centre, UK* . . . . . 441

### Diminished Hand: A Diminished Reality-Based Work Area Visualization

Shohei Mori, Momoko Maezawa, Naoto Ienaga, and Hideo Saito — *Keio University, Japan* . . . . . 443

### Jogging with a Virtual Runner using a See-Through HMD

Takeo Hamada, Michio Okada, and Michiteru Kitazaki — *Toyohashi University of Technology, Japan* . . . . . 445

### Demonstration: Rapid One-Shot Acquisition of Dynamic VR Avatars

Charles Malleon, Maggie Kosek, Martin Klaudiny, Ivan Huerta, Jean-Charles Bazin, Alexander Sorkine-Hornung, Mark Mine, and Kenny Mitchell — *Disney Research, UK; Disney Research, Switzerland; Walt Disney Imagineering, USA* . 447

### Application of Redirected Walking in Room-Scale VR

Eike Langbehn, Paul Lubos, Gerd Bruder, and Frank Steinicke — *University of Hamburg, Germany; University of Central Florida, USA* . . . . . 449

### Immersive Virtual Training for Substation Electricians

Eduardo H. Tanaka, Juliana A. Paludo, Rafael Bacchetti, Edgar V. Gadbem, Leonardo R. Domingues, Carlúcio S. Cordeiro, Olavo Giraldo Jr., Guilherme Alcarde Gallo, Adam Mendes da Silva, and Marcos H. Cascone — *Eldorado Research Institute, Brazil* . . . . . 451
