# 10th IEEE International Conference on Software Testing, Verification and Validation

## ICST 2017

### Table of Contents

|                                      |      |
|--------------------------------------|------|
| Message from the General Chairs..... | xi   |
| Message from the Program Chairs..... | xiii |
| Conference Committees.....           | xv   |
| Conference Sponsors .....            | xx   |

---

### Research Track

#### Fault Localization and Injection

|                                                                                             |    |
|---------------------------------------------------------------------------------------------|----|
| Localizing Faults in SQL Predicates .....                                                   | 1  |
| <i>Yun Guo, Amihai Motro, and Nan Li</i>                                                    |    |
| Prevalence of Single-Fault Fixes and Its Impact on Fault Localization .....                 | 12 |
| <i>Alexandre Perez, Rui Abreu, and Marcelo D'Amorim</i>                                     |    |
| FIFA: A Kernel-Level Fault Injection Framework for ARM-Based Embedded<br>Linux System ..... | 23 |
| <i>Eunjin Jeong, Namgoo Lee, Jinhan Kim, Duseok Kang, and Soonhoi Ha</i>                    |    |

#### Debugging, Composite Faults, and Complexity Analysis

|                                                                                        |    |
|----------------------------------------------------------------------------------------|----|
| Using Delta Debugging to Minimize Stress Tests for Concurrent Data<br>Structures ..... | 35 |
| <i>Jing Xu, Yu Lei, and Richard Carver</i>                                             |    |
| The Theory of Composite Faults .....                                                   | 47 |
| <i>Rahul Gopinath, Carlos Jensen, and Alex Groce</i>                                   |    |
| Symbolic Complexity Analysis Using Context-Preserving Histories .....                  | 58 |
| <i>Kasper Luckow, Rody Kersten, and Corina Păsăreanu</i>                               |    |

## Security Testing

|                                                                          |    |
|--------------------------------------------------------------------------|----|
| Coveringcerts: Combinatorial Methods for X.509 Certificate Testing ..... | 69 |
| <i>Kristoffer Kleine and Dimitris E. Simos</i>                           |    |
| Recovering Semantic Traceability Links between APIs and Security         |    |
| Vulnerabilities: An Ontological Modeling Approach .....                  | 80 |
| <i>Sultan S. Alqahtani, Ellis E. Eghan, and Juergen Rilling</i>          |    |
| Mining Sandboxes for Linux Containers .....                              | 92 |
| <i>Zhiyuan Wan, David Lo, Xin Xia, Liang Cai, and Shanping Li</i>        |    |

## Regression Testing

|                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------|-----|
| Perphecy: Performance Regression Test Selection Made Simple but Effective .....                               | 103 |
| <i>Augusto Born De Oliveira, Sebastian Fischmeister, Amer Diwan, Matthias Hauswirth, and Peter F. Sweeney</i> |     |
| A Selection Method for Black Box Regression Testing with a Statistically Defined Quality Level .....          | 114 |
| <i>Ibrahim Alagöz, Thomas Herpel, and Reinhard German</i>                                                     |     |
| Private API Access and Functional Mocking in Automated Unit Test Generation .....                             | 126 |
| <i>Andrea Arcuri, Gordon Fraser, and René Just</i>                                                            |     |

## Web and Mobile Applications

|                                                                                                    |     |
|----------------------------------------------------------------------------------------------------|-----|
| Using Semantic Similarity in Crawling-Based Web Application Testing .....                          | 138 |
| <i>Jun-Wei Lin, Farn Wang, and Paul Chu</i>                                                        |     |
| Barista: A Technique for Recording, Encoding, and Running Platform Independent Android Tests ..... | 149 |
| <i>Mattia Fazzini, Eduardo Noronha De A. Freitas, Shaubvik Roy Choudhary, and Alessandro Orso</i>  |     |
| ATOM: Automatic Maintenance of GUI Test Scripts for Evolving Mobile Applications .....             | 161 |
| <i>Xiao Li, Nana Chang, Yan Wang, Haohua Huang, Yu Pei, Linzhang Wang, and Xuandong Li</i>         |     |

## Parallel Systems and Concurrency

|                                                                                                   |     |
|---------------------------------------------------------------------------------------------------|-----|
| Automated Testing of Definition-Use Data Flow for Multithreaded Programs .....                    | 172 |
| <i>Xiaodong Zhang, Zijiang Yang, Qinghua Zheng, Pei Liu, Jialiang Chang, Yu Hao, and Ting Liu</i> |     |

|                                                                                                                     |     |
|---------------------------------------------------------------------------------------------------------------------|-----|
| IPA: Error Propagation Analysis of Multi-Threaded Programs Using Likely Invariants .....                            | 184 |
| <i>Abraham Chan, Stefan Winter, Habib Saissi, Karthik Pattabiraman, and Neeraj Suri</i>                             |     |
| Verifying Concurrent Programs Using Contracts .....                                                                 | 196 |
| <i>Ricardo J. Dias, Carla Ferreira, Jan Fiedor, João M. Lourenço, Aleš Smrcka, Diogo G. Sousa, and Tomáš Vojnar</i> |     |

## Empirics on Testing

|                                                                                                   |     |
|---------------------------------------------------------------------------------------------------|-----|
| Are There Any Unit Tests? An Empirical Study on Unit Testing in Open Source Python Projects ..... | 207 |
| <i>Fabian Trautsch and Jens Grabowski</i>                                                         |     |
| Broadcast vs. Unicast Review Technology: Does It Matter? .....                                    | 219 |
| <i>Foundjem Armstrong, Foutse Khomh, and Bram Adams</i>                                           |     |
| JavaScript: The (Un)Covered Parts .....                                                           | 230 |
| <i>Amin Milani Fard and Ali Mesbah</i>                                                            |     |

## Model-Based Testing I

|                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------|-----|
| Non-Semantics-Preserving Transformations for Higher-Coverage Test Generation Using Symbolic Execution ..... | 241 |
| <i>Hayes Converse, Oswaldo Olivo, and Sarfraz Khurshid</i>                                                  |     |
| Uncertainty-Driven Black-Box Test Data Generation .....                                                     | 253 |
| <i>Neil Walkinshaw and Gordon Fraser</i>                                                                    |     |
| Automated Test Generation and Mutation Testing for Alloy .....                                              | 264 |
| <i>Allison Sullivan, Kaiyuan Wang, Razieh Nokhbeh Zaeem, and Sarfraz Khurshid</i>                           |     |

## Model-Based Testing II

|                                                                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Model-Based Testing IoT Communication via Active Automata Learning .....                                                                                 | 276 |
| <i>Martin Tappler, Bernhard K. Aichernig, and Roderick Bloem</i>                                                                                         |     |
| Model-Based API Testing of Apache ZooKeeper .....                                                                                                        | 288 |
| <i>Cyrille Artho, Quentin Gros, Guillaume Rousset, Kazuaki Banzai, Lei Ma, Takashi Kitamura, Masami Hagiya, Yoshinori Tanabe, and Mitsuharu Yamamoto</i> |     |
| System Testing of Timing Requirements Based on Use Cases and Timed Automata .....                                                                        | 299 |
| <i>Chunhui Wang, Fabrizio Pastore, and Lionel Briand</i>                                                                                                 |     |

## Automated and Run-Time Testing

|                                                                                    |     |
|------------------------------------------------------------------------------------|-----|
| Efficient Incrementalized Runtime Checking of Linear Measures on Lists .....       | 310 |
| <i>Alex Gyori, Pranav Garg, Edgar Pek, and P. Madhusudan</i>                       |     |
| Behavioral Execution Comparison: Are Tests Representative of Field Behavior? ..... | 321 |
| <i>Qianqian Wang, Yuriy Brun, and Alessandro Orso</i>                              |     |
| Automated Random Testing in Multiple Dispatch Languages .....                      | 333 |
| <i>Simon Poulding and Robert Feldt</i>                                             |     |

## Search-Based Testing

|                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------|-----|
| The Fitness Function for the Job: Search-Based Generation of Test Suites That Detect Real Faults .....                   | 345 |
| <i>Gregory Gay</i>                                                                                                       |     |
| A Search-Based Testing Approach for XML Injection Vulnerabilities in Web Applications .....                              | 356 |
| <i>Sadeeq Jan, Cu D. Nguyen, Andrea Arcuri, and Lionel Briand</i>                                                        |     |
| CBGA-ES: A Cluster-Based Genetic Algorithm with Elitist Selection for Supporting Multi-Objective Test Optimization ..... | 367 |
| <i>Dipesh Pradhan, Shuai Wang, Shaukat Ali, Tao Yue, and Marius Liaaen</i>                                               |     |

## Model Checking and Verification

|                                                                               |     |
|-------------------------------------------------------------------------------|-----|
| Incremental Deductive Verification for Relational Model Transformations ..... | 379 |
| <i>Zheng Cheng and Massimo Tisi</i>                                           |     |
| Statistical Model Checking Meets Property-Based Testing .....                 | 390 |
| <i>Bernhard K. Aichernig and Richard Schumi</i>                               |     |
| Timed k-Tail: Automatic Inference of Timed Automata .....                     | 401 |
| <i>Fabrizio Pastore, Daniela Micucci, and Leonardo Mariani</i>                |     |

## New Methods and Empirical Results (Short Papers)

|                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------|-----|
| A Comparative Study of Manual and Automated Testing for Industrial Control Software .....                       | 412 |
| <i>Eduard Enoiu, Daniel Sundmark, Adnan Čaušević, and Paul Pettersson</i>                                       |     |
| How Do Assertions Impact Coverage-Based Test-Suite Reduction? .....                                             | 418 |
| <i>Junjie Chen, Yanwei Bai, Dan Hao, Lingming Zhang, Lu Zhang, and Bing Xie</i>                                 |     |
| Automata Language Equivalence vs. Simulations for Model-Based Mutant Equivalence: An Empirical Evaluation ..... | 424 |
| <i>Xavier Devroey, Gilles Perrouin, Mike Papadakis, Axel Legay, Pierre-Yves Schobbens, and Patrick Heymans</i>  |     |

|                                                                            |     |
|----------------------------------------------------------------------------|-----|
| Assessing and Improving the Mutation Testing Practice of PIT .....         | 430 |
| <i>Thomas Laurent, Mike Papadakis, Marinos Kintis, Christopher Henard,</i> |     |
| <i>Yves Le Traon, and Anthony Ventresque</i>                               |     |

## **New Theories and Tools (Short Papers)**

|                                                                                |     |
|--------------------------------------------------------------------------------|-----|
| Generic and Effective Specification of Structural Test Objectives .....        | 436 |
| <i>Michaël Marcozzi, Mickaël Delahaye, Sébastien Bardin, Nikolai Kosmatov,</i> |     |
| <i>and Virgile Prevosto</i>                                                    |     |
| Ariadne: Hybridizing Directed Model Checking and Static Analysis .....         | 442 |
| <i>Reed Milewicz and Peter Pirkelbauer</i>                                     |     |
| A Toolkit for Testing Stochastic Simulations against Statistical Oracles ..... | 448 |
| <i>Matthew Patrick, Ruairi Donnelly, and Christopher A. Gilligan</i>           |     |
| O!Snap: Cost-Efficient Testing in the Cloud .....                              | 454 |
| <i>Alessio Gambi, Alessandra Gorla, and Andreas Zeller</i>                     |     |

## **Testing Tool Papers Track**

### **Model Checking and DSL-Based Testing**

|                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------|-----|
| Accelerating Test Automation through a Domain Specific Language .....                                  | 460 |
| <i>Anurag Dwarakanath, Dipin Era, Aditya Priyadarshi, Neville Dubash,</i>                              |     |
| <i>and Sanjay Podder</i>                                                                               |     |
| Efficient Safety Proofs for Industry-Scale Code Using Abstractions<br>and Bounded Model Checking ..... | 468 |
| <i>Priyanka Darke, Bharti Chimdyalwar, Avriti Chauhan, and R. Venkatesh</i>                            |     |
| NuSeen: A Tool Framework for the NuSMV Model Checker .....                                             | 476 |
