Contents

Preface	v
LS:10 Committees	vi
Organizers and Sponsors	vii
Edward G. Zubler	ix
Invited Papers	
I001 LEDs a challenge for lighting <i>M. G. Craford</i>	3
I002 Low-pressure mercury-free plasma light sources: theoretical and experimental perspectives <i>D. Uhrlandt, R. Bussiahn, S. Gortchakov, H. Lange and D. Loffhagen</i>	15
I003 Some aspects of the interface between fluorescent lamps and electronic gears <i>M. Myojo and O. Fukumasa</i>	25
I004 Acoustic resonance in HID lamps <i>S. Bhosle, M. Aubès and M. Cristea</i>	35
I005 High performance optical spectroscopy: applications and opportunities in lamp diagnostics <i>R. Devonshire</i>	41
I006 Ceramic metal halide lamps; a world of lighting <i>T. G. M. M. Kappen</i>	43
I007 New concepts for roadway lighting <i>B. Preston</i>	53
I008 Stabilized short arc metal halide lamps <i>D. E. Brabham</i>	55
I009 Colour stabilisation in quartz metal halide lamps <i>R. Geens, L. Derhaeg, M. Van den Broeck and G. Vandepoel</i>	65
I010 Molecular discharges as light sources <i>R. Hilbig, A. Koerber, J. Baier and R. Scholl</i>	75
I011 Light sources excited by microwave high intensity discharges <i>J. J. Kim</i>	85
I012 Getters for lighting applications <i>C. Boffito and A. Corazza</i>	95

I013	Radiation resistance of quartz glass for VUV discharge lamps <i>A. Schreiber, B. Kühn, E. Arnold, F.-J. Schilling and H.-D. Witzke</i>	105
I014	Improved arc tubes for ceramic metal halide lamps <i>S. Jiingst, D. Lang and M. Galvez</i>	115
I015	Carbon nanotube field-emitter for displays and light-sources <i>S. Uemura, J. Yotani, T. Nagasako, H. Kurachi, H. Yamada, T. Ezaki, T. Maesoba, T. Nakao, M. Ito, Y. Saito, Y. Ando, X. Zhao and M. Yumura</i>	125
I016	OLEDs: a new technology for lighting and displays <i>P. Destruel, J. Farenc, P. Jolinat, I. Ségué, S. Archambeau, M. Mabiala and G. Ablart</i>	135

Landmark Papers

L001	Mercury-less xenon pulsed discharge fluorescent lamps using multi pairs of electrodes <i>M. Jimno, K. Toryu, T. Murakami, H. Motomura, K. Loo and M. Aono</i>	145
L002	Improvement of fluorescent lamp cold start <i>A. Hilscher, R. Garner and G. Lieder</i>	147
L003	Different modes of arc attachment to HID lamp electrodes in the cathodic phase of AC operation <i>O. Langenscheidt, L. Dabringhausen, M. Redwitz, J. Mentel and P. Awakowicz</i>	149
L004	Time-dependent simulation of plasma and electrodes in mercury-free high-intensity discharge lamps <i>H. Strobel and M. Neiger</i>	151
L005	Scaling of low aspect-ratio HID lamps <i>T. Dreeben</i>	153
L006	Multiple species spatial distributions in operating halogen lamps; an experimental and modelling study <i>R. Bruckshaw, R. Jeans, J. C. Camacho Arriaga, A. Keer-Rendon, G. Wilson and R. Devonshire</i>	155
L007	High watt ceramic metal halide lamps <i>R. Ramaiah</i>	157
L008	New forming method of seamless discharge vessel for ceramic metal halide lamp <i>S. Miyazawa, F. Takeya, S. Hirose and K. Watanabe</i>	159
L009	Spectroscopic technique for cathode fall diagnostics in fluorescent lamps <i>R. Nachtrieb, F. Khan and J. F. Waymouth</i>	161
L010	Lamp life of T5 fluorescent lamps in dimming use <i>E. Tetri</i>	163

L011	Elaboration of phosphor particles with spherical shape and micronic size <i>N. Joffin, J. Dexpert-Ghys, A. Garcia, M. Verelst, S. Schamm, B. Caillier and G. Baret</i>	165
L012	Rare earth phosphors for white LEDs <i>W. Zhuang, X. Huang, S. Zhang, Y. Fang, Y. Hu and H. He</i>	167
L013	Transparent ceramic lamp envelope materials <i>G. C. Wei</i>	169
L014	Controlled electrodes in UHP lamps <i>H. Moench, C. Deppe, U. Hechtfisher, G. Heusler and P. Pekarski</i>	171
L015	High power (100 – 200 W) ferrite-free electrodeless fluorescent lamp <i>O. A. Popov, R. Chandler and J. Maya</i>	173
L016	Improved emission intensity of rare gas flow excimer lamps <i>S. Matsuzawa, T. Sumitomo, M. Yoshioka, N. Hishinuma, H. Matsuno and T. Hiramoto</i>	175
L017	Modified thermal emission from tungsten photonic crystals <i>J. G. Fleming and S.-Y. Lin</i>	177
L018	Mercury-free automotive discharge lamps <i>M. Born, M. Strösser, H. Giese, U. Niemann, W. Peitz, M. Baeva, S. Meier, D. Reiter, H. Schubert, M. Weiss, T. Bauer, M. Neiger, H. Strobel, K. Hilpert, A. Löhken and T. Markus</i>	179
L019	The high power LED unit for lighting <i>H. Kimura, M. Sugimoto, S. Ishizaki and E. Shiohama</i>	181
L020	Organic light emitting diodes (OLED) for lighting applications – recent advances and perspectives of commercialisation <i>F. Voges, K. Bonrad, T. K. Däubler, T. Frank, J. Pommerehne, C. Ottermann and R. Sprengard</i>	183

Posters

P001	Experimental study on capacitive discharge excimer lamps application <i>E. A. Sosnin and V. F. Tarasenko</i>	187
P002	Narrow-band incoherent sources of intense UV and VUV radiation <i>V. F. Tarasenko</i>	189
P003	Spontaneous coherence and its conductivity in three unconventional modifications of hollow cathode discharge <i>D. Zhechev and E. Dimova</i>	191
P004	Modelling of the dynamic Stark effect and calculation of the transition probabilities for Ar atom <i>E. V. Koryukina</i>	193

P005	Calculation of the dynamic Stark effect and transition probabilities for Ne atom <i>E. V. Koryukina</i>	195
P006	A nonlocal Boltzmann/radiation transport model for low pressure Hg-Ar discharges <i>G. M. Petrov and J. L. Giuliani</i>	197
P007	Continuum radiation in high-pressure mercury lamps <i>A. Koerber, U. Weichmann and J. E. Lawler</i>	199
P008	Radial distributions of densities of charged particles, electric field strength and potential in a positive column of the Hg-Ar discharge <i>M. A. Malkov and V. A. Terekhin</i>	201
P009	Calculation of a nearwall sheath of space charge in Hg-Ar low-pressure discharge <i>M. A. Malkov and V. A. Terekhin</i>	203
P010	Calculation of drift velocity of ions of mercury in a nonuniform electric field in a Hg-Ar low pressure discharge <i>M. A. Malkov and V. A. Terekhin</i>	205
P011	Resolution of Navier-Stokes equations in an acoustic resonance condition of a high-pressure mercury lamp <i>Z. Araoud, S. Kaziz, M. Ben Haj Rhouma, K. Charrada, G. Zissis and M. Sassi</i>	207
P012	Surface analysis of fluorescent lamp electrodes in high-frequency cold igniting applications <i>L. Waumans, Y. Dietzenbacher, P. Stobbelaar and C. van der Marel</i>	209
P013	Studies of barium density in cathode region of fluorescent lamp by emission spectroscopy <i>S. Zhu and S. Zhang</i>	211
P014	Spectroscopic investigations on high pressure discharge lamps <i>M. Baeva, M. Born, P. Börner, S. Meier, D. Reiter, M. Strösser, H. Schubert, M. Weiss and S. Wiesen</i>	213
P015	LEDs in automotive applications <i>K. Eichhorn and B. Wördenweber</i>	215
P016	The role of the old Tl^+ -like ion sensitizer for a new, efficient, green VUV phosphor <i>S. Tanimizu and M. Yasuda</i>	217
P017	Hg free ceramic automotive headlight lamps <i>K. Guenther, T. Hartmann and H. Sarroukh</i>	219
P018	Numerical and experimental investigation of high-frequency electrodeless lamp in argon-mercury mixture <i>N. Denisova, A. Skudra, G. Revalde and G. Zissis</i>	221
P019	The characteristics of the sealed parts in super high pressure mercury discharge lamps under internal pressure <i>M. Kase, T. Sawa and Y. Iwama</i>	223

P020	Thermal desorption analysis of Ba and Sr amalgams <i>C. J. M. Denissen and C. R. Ronda</i>	225
P021	High temperature getter for compact HID lamps <i>B. J. de Maagt and A. Corazza</i>	227
P022	Dynamic road marking module using chip-on-board phosphor-converted white LEDs with application-specific primary optics <i>E. Lenderink and A. H. M. Raaijmakers</i>	229
P023	De-excitation of ^3He (2^1S) and ^3He (2^1P) excited states with different atoms and molecules <i>E. Dimova and G. Petrov and K. Blagoev</i>	231
P024	Electron energy distribution function in rare gas micro hollow cathode discharges <i>G. M. Petrov, E. Dimova and D. Zhechev</i>	233
P025	Cathode heating rate and life prediction in fluorescent lamps <i>D. O. Wharmby</i>	235
P026	Optical and electrical characterization of breakdown processes in straight compact fluorescent lamps <i>M. F. Gendre, M. D. Bowden, H. C. M. van den Nieuwenhuizen, M. Haverlag, J. W. A. M. Gielen and G. M. W. Kroesen</i>	237
P027	Group IV-VI compounds as molecular radiators in HID plasmas <i>J. Baier, A. Koerber, R. Scholl and R. Hilbig</i>	239
P028	Spectral properties of high-pressure lamps with plasmas ionized to a high degree <i>T. Hiramoto</i>	241
P029	Near infrared radiation characteristics of Sc-Na metal halide lamps <i>T. Ishigami</i>	243
P030	3-D HID lamp model including radiative transfer <i>H. Giese</i>	245
P031	Effects and mechanism of sodium loss in quartz metal halide lamps <i>W. van Erk, J. Tu and J. Suijker</i>	247
P032	Thomson scattering measurements on high pressure Hg lamps <i>X. Zhu, N. de Vries and J. J. A. M. van der Mullen</i>	249
P033	X-ray absorption measurements to determine the gas temperature in HID lamps <i>X.-Y. Zhu, A. V. Bronnikov, J. J. A. M. van der Mullen and M. Haverlag</i>	251
P034	The driving characteristic of induction coil and electromagnetic dissipation on inductively coupled RF plasma <i>K. S. Kim, Y. S. Choi and D. H. Park</i>	253
P035	Electrical characteristics of inductively coupled plasma using single Langmuir probe <i>Y. S. Choi, Y. H. Lee, C. S. Park, M. K. Hwang and D. H. Park</i>	255

P036	Electromagnetic simulation of electrodeless fluorescent lamps and its electrical and optical characteristics <i>Y. S. Choi, J. U. Jo, Y. K. Kim, C. S. Park, M. K. Hwang and D. H. Park</i>	257
P037	Electrical conductivity model for HID lamps <i>J. C. Alvarez, C. Blanco, J. Viera, N. Bordel, A. Martín and G. Zissis</i>	259
P038	Photoluminescent materials for VUV excitation based on Eu^{2+} doped alkaline earth aluminates <i>D. Nötzold, L. Kantz, S. Jilg and L. Schwarz</i>	261
P039	Emission and kinetics of a moly-oxide-argon discharge bulb <i>J. L. Giuliani and G. M. Petrov</i>	263
P040	Influence of power level on a new type of high pressure discharge lamp <i>R. Ruscassié and C. Glaize</i>	265
P041	Structural investigation of the caesium-lanthanide(III) iodide melts using Raman spectroscopy <i>A. Chrissanthopoulos, G. D. Zissi and G. N. Papatheodorou</i>	267
P042	UV/Vis spectroscopic investigation of the vapor species above HoI_3 and $\text{CsI}\cdot\text{HoI}_4$ <i>A. Chrissanthopoulos, G. D. Zissi and G. N. Papatheodorou</i>	269
P043	Numerical model for dielectric barrier discharge <i>Y. Watanabe, H. Kurimoto and N. Takizawa</i>	271
P044	Selective spectral lines excitation trough power supply in metal-halide lamps <i>M. Cristea, B. Lafitte and G. Zissis</i>	273
P045	In situ measurement of ferrite temperature and B_{sat} in induction-coupled electrodeless fluorescent lamps <i>V. D. Roberts</i>	275
P046	Temperature variation in a HgTII discharge lamp <i>L. Troudi, R. Ben Ahmed, Z. Araoud, K. Charrada and G. Zissis</i>	277
P047	Study on temperature distribution around bulb envelope and cavity of high power PLS <i>J. Y. Lee, Y. S. Jeon, J. S. Choi and J. G. Ryu</i>	279
P048	Development of capillary Z-pinch discharge light source for EUV lithography <i>I. H. Song, M. Okamoto, K. Kitade, M. Masnavi, Y. Hayashi, M. Watanabe, A. Okino, K. Yasuoka, K. Horioka and E. Hotta</i>	281
P049	Time resolved characteristics of high frequency Ar-Hg plasmas <i>B. M. Alexandrovich, V. A. Godyak and G. G. Lister</i>	283
P050	Improved method for making capacitive measurements of cathode fall in fluorescent lamps <i>R. Nachtrieb, F. Khan and J. F. Waymouth</i>	285
P051	Net emission coefficient in plasma existing in high pressure metal halide lamps <i>J. B. Rouffet and G. Zissis</i>	287

P052	High-frequency electrodeless lamps for application in atomic absorption analysis <i>Z. Gavare, G. Revalde, A. Skudra, A. Ganeev and S. Sholupov</i>	289
P053	The investigation on the starting process inside a small wattage metal halide lamps and its influence on extra high frequency ballast circuit design <i>W. Yan and S. Y. R. Hui</i>	291
P054	Dynamic sensing of white HPS lamps <i>R. Keijser, B. Simpelaar and D. Couwenberg</i>	293
P055	2D-model for HID lamps using PLASIMO <i>M. L. Beks, B. Hartgers, J. J. A. M. van der Mullen, M. Haverlag and D. A. Benoy</i>	295
P056	Photoacoustic emissions from pulse operated high-pressure discharge lamps <i>W. Kaiser, A. F. Correa and R. P. Marques</i>	297
P057	Evaluation of tungsten cluster radiation dependent on metal halides <i>A. Sato, H. Kubo, S. Sekine and M. Ohkawa</i>	299
P058	UHP lamps with dichroic coating <i>A. Ritz and H. Moench</i>	301
P059	Heat-transfer network analyses of self-ballasted compact fluorescent lamps <i>T. Yasuda, M. Toda and M. Kando</i>	303
P060	Microwave lighting system using a microwave cut-off cavity <i>H. Noguchi, A. Inouye, N. Horii and K. Maegawa</i>	305
P061	Optimization of the light intensity distribution by street lighting luminaires <i>C. Castellana, J-J. Embrechts and F. Duthoit</i>	307
P062	Spectroscopic studies of the sulfur lamps space <i>L. Qi and C. Dahua</i>	309
P063	Particle density distribution in metal halide lamps with low convection rate <i>J. J. F. Geijtenbeek</i>	311
P064	Backdiffusion of electrons in nitrogen <i>M. Radmilović-Radjenić, Z. Lj. Petrović and A. Stojković</i>	313
P065	Diagnostics of the spectral properties of HF electrodeless mercury and rare gas lamps for different applications <i>I. Bersons, Z. Gavare, G. Revalde, A. Skudra and N. Denisova</i>	315
P066	High-power solid-state lighting facility for greenhouse vegetable cultivation <i>G. Tamulaitis, P. Duchovskis, Z. Bliznikas, K. Breivė, R. Ulinskaitė, A. Brazaitytė, A. Novičkovas and A. Žukauskas</i>	317
P067	Modelling low pressure mercury free lamps: influence of the discharge parameters on the pure neon discharge radiation <i>T. Bezanahary and G. Zisis</i>	319
P068	Deexcitation of $\text{Ne}(^3\text{P}_1)$ in collisions with O_2 , CO_2 and CH_4 <i>D. B. Khadka, N. Kouchi and Y. Hatano</i>	321

P069	Electromagnetic induction lamp(electrodeless lamp) with the dimming technology <i>W. Li</i>	323
P070	Electrode construction of the HPS lamp and its life performances <i>N. Saito</i>	325
P071	Light source with short wavelength III-V LEDs <i>Y. Suehiro, T. Uemura, T. Yasukawa and S. Shimonishi</i>	327
P072	Spectroscopic data for Hg I and Hg II from beam-foil spectroscopy <i>R. Hutton, S. Huldt, G. M. Wahlgren, R. Irvine, M. Brown and L. J. Curtis</i>	329
P073	Hg-free ceramic metal halide lamp systems with enhanced red rendering and good dimming characteristics <i>K. Stockwald</i>	331
P074	Bench-top x-ray absorption imaging of Hg in ceramic metal-halide lamps <i>B. Lafitte and J. J. Curry</i>	333
P075	Engineering limits for inductively coupled fluorescent electrodeless lamps <i>E. Statnic</i>	335
P076	Computer simulation and measurement on the operating pressure of tungsten halogen lamps <i>L. Makai, G. Hárs, G. Varga, G. Fülöp and P. Deák</i>	337
P077	Measurements of electric fields in PDP-like discharge <i>T. Jiang, M. D. Bowden, E. Wagenaars and G. M. W. Kroesen</i>	339
P078	Sol-gel based YAG:Tb ³⁺ , Ce ³⁺ , Eu ³⁺ phosphors for application in lighting sources <i>A. Potdevin, G. Chadeyron-Bertrand, D. Boyer and R. Mahiou</i>	341
P079	Content profile and yield characteristics of STHGS/SC, a Hg dispenser for the production of cold cathode fluorescent lamps <i>P. Gallina and G. Santella</i>	343
P080	Spectral change of medium pressure mercury arc lamps with age <i>M. Sasges and G. Fang</i>	345
P081	Time-resolved column densities of excited metal atoms in metal-halide arc lamps using high-resolution absorption spectroscopy <i>E. Drakakis and D. Karabourniotis</i>	347
P082	The dielectric barrier microhollow cathode structure and its upper pD limitation in alternative current driving for flat panel light source <i>T. I. Lee, K. W. Park, H. G. Baik and M. G. Whang</i>	349
P083	Temporal stability and reproducibility of radiometric properties of high power light emitting diode (LED) arrays and halogen light polymerization of oral biomaterial <i>M. M. Pérez, F. Pérez-Ocón, A. Yebra, C. Lucena-Martín and R. Pulgar</i>	351
P084	Magic light source based on 3-D stratified glow discharge <i>V. A. Maltsev, O. A. Nerushev, S. A. Novopashin, V. V. Radchenko and A. A. Sandanov</i>	353

P085	The cascaded arc – a novel bright light source for sensitive broadband absorption spectroscopy <i>R. A. B. Zijlmans, J. H. van Helden, D. C. Schram and R. Engeln</i>	355
P086	Study of the influence of the current waveform and of the power supply frequency on the ultra violet radiation of a low pressure mercury discharge <i>B. Mrabet, H. Elloumi, A. Chammam, M. Stambouli and J. J. Damelincourt</i>	357
P087	The influence of the spectrum of helium gas discharge lamps on the shape of magnetic resonance lines in helium <i>V. A. Kartoshkin</i>	359
P088	Modelling of D2 automotive HID lamps including plasma and electrodes <i>P. Flesch and M. Neiger</i>	361
P089	Investigating the impact of external laser heating of electrodes in HID lamps <i>P. Flesch and M. Neiger</i>	363
P090	Inorganic electroluminescent light sources with an organic protecting layer <i>K. Kolentsov, L. Yourukova, E. Radeva, D. Zhechev and E. Dimova</i>	365
P091	Electron beam pumped ultraviolet light sources <i>A. Ulrich, A. Morozov, R. Krücken, A. Görtler, J. Wieser, G. Kornfeld, A. Peters, R. Steinhübl, F. Mühlberger and R. Zimmermann</i>	367
P092	E to H-mode transition in cylindrical tube ICP discharge for light sources <i>A. Nazri, S. Inui, H. Motomura, M. Jinno and M. Aono</i>	369
P093	Influence of buffer gases on the radiation properties of HID-lamps <i>H. Schoepp, St. Franke, R. Methling, H. Schneidenbach and H. Hess</i>	371
P094	Comparison of three different methods for the obtention of the electron density radial distribution in a discharge with axial symmetry <i>R. Álvarez, M. C. Quintero and A. Rodero</i>	373
P095	Controlling the colour temperature of a LED-luminaire <i>O. Moisis, P. Pinho, E. Tetri and L. Halonen</i>	375
P096	Dimming of ceramic metal halide lamps <i>H. Zhu, S. Lambrechts and J. Maya</i>	377
P097	Metal halide lamps containing electrodes doped with $\text{La}_2\text{O}_3\text{-Y}_2\text{O}_3\text{-ZrO}_2$ and CeO_2 <i>C. V. Varanasi and T. R. Brumleve</i>	379
P098	Time modulation of electron and atom density in high-pressure Na-Cd and Na-Hg AC-driven discharges <i>D. Veza, T. Bizjak and Z. Miokovic</i>	381
P099	Modelling of radiative transfer in mercury-argon HID DC lamp <i>A. Erraki, A. Gleizes, F. Dawson, J. J. Gonzalez, K. C. Paul, T. Takemura, T. Hiramoto, G. Zissis and D. Lavers</i>	383

P100	Field strength and electrode sheath voltage of a high-pressure arc discharge in neon <i>H. Schoepp, O. Langenscheidt, H. Schneidenbach, St. Franke and H. Hess</i>	385
P101	Measurements of deuterium lamp noise and implications for UV instrumentation <i>J. Britton, S. Hoath, N. Lang, H. Lange and A. Page</i>	387
P102	Formation of molybdenum bromide nanowire deposits in halogen lamps <i>M. van Rijswijk, R. Jeans, E. Bakkers and R. Devonshire</i>	389
P103	Novel, compact radio frequency excited ultraviolet curing lamp system <i>J. Barry, M. Cekic, P. Lezcano, V. Mohyla, B. Turner and C. Wood</i>	391
P104	Computer simulated He I Stark broadened line profiles for plasma diagnostics <i>M. A. Gigosos and M. Á. González</i>	393
P105	On the characteristics of the resonance radiation of pulsed low-pressure discharges in He-Xe mixtures <i>R. Bussiahn, S. Gortchakov, H. Lange, D. Loffhagen and D. Uhrlandt</i>	395
P106	A new technique for controlling the cold spot temperature of low frequency driven electrodeless compact fluorescent lamps <i>K. Hashimoto-dani, A. Hochi, T. Arakawa, M. Kawasaki, K. Seki and K. Katase</i>	397
P107	Stability of the quadrichromatic solid-state lamp <i>F. Ivanauskas, R. Vaicekauskas, A. Žukauskas, R. Gaska and M. S. Shur</i>	399
P108	High pressure mercury lamps with improved life time for rear projection TV sets <i>M. Horiuchi, M. Kai, T. Seki and T. Ichibakase</i>	401
P109	Investigation of electron emission properties of tungsten cathodes <i>I. Beck, K. J. Vargáné, J. Sneider, Z. Tóth and P. Deák</i>	403
P110	Iodine high-pressure discharges <i>M. Käning, B. Schalk, G. Hartel and L. Hitzschke</i>	405
P111	Adaptation of a nuclear fusion radiation transport Monte Carlo code for HID lamp modelling <i>P. Börner, D. Reiter, M. Born, H. Giese, S. Wiesen and M. Baeva</i>	407
P112	Characteristics of ultra-high pressure Hg lamp for video projection <i>K. Sugahara, I. Iwai, S. Hashiguchi, M. Kubo and K. Tachibana</i>	409
P113	Luminous flux measurements at the BNM-INM / CNAM <i>J. Bastie</i>	411
P114	Buffer gas pressure effects on metal halide lamp performance <i>A. Naruka, A. Lamouri and J. Sulcs</i>	413
P115	Performance comparison of metal halide lamps with pure tungsten electrodes on electronic versus magnetic ballasts <i>A. Lamouri, A. Naruka and J. Sulcs</i>	415
P116	Low frequency electrodeless compact fluorescent lamp <i>O. A. Popov, R. T. Chandler and J. Maya</i>	417

P117	Surface discharge based large-area submicrosecond source of intense VUV and UV radiation <i>V. Tcheremiskine, M. Sentis, O. Uteza and L. Mikheev</i>	419
P118	Photoluminescence in silica glass induced by 350ps, 30ps and 100fs pulse laser <i>S. Nasu, S. Nishikawa, T. Inayoshi, K. Deki, F. Matsuoka and T. Arisawa</i>	421
P119	Multi-filament simulation in Xe dielectric barrier discharge excimer lamp using two dimensional fluid model <i>H. Akashi, A. Oda and Y. Sakai</i>	423
P120	A study of radial cataphoresis and ion densities in high power density Hg-Ar discharges <i>Y. Aiura and J. E. Lawler</i>	425
P121	Electrical behavior of a filamentary xenon dielectric barrier discharge <i>N. Merbahi, N. Sewraj, F. Marchal and G. Ledru</i>	427
P122	Comparison of 1D anode calculations and measurements in model lamp <i>A. Lenef, L. Dabringhausen and M. Redwitz</i>	429
P123	High-intensity light sources using high-pressure molecular radiators discharged by circularly polarized microwaves <i>J. J. Kim, J. T. Ko and D. H. Won</i>	431
P124	Electron transport phenomena in mercury <i>S. Suzuki, K. Kuzuma and H. Itoh</i>	433
P125	Errors in the measurement of ultraviolet-lamp output <i>J. Robinson and M. Sasges</i>	435
P126	Infrared analyses of impurities adsorbed on coating materials in manufacturing process of fluorescent lamps <i>K. Nishimura</i>	437
P127	Method for measuring ripple generated by an HID ballast <i>W. P. Moskowitz and J. Olsen</i>	439
P128	Effect of induction coil factor on efficacy of ~100kHz electrodeless fluorescent lamps <i>H. Kakehashi, K. Hiramatsu, S. Hizuma, O. Popov, R. Chandler and J. Maya</i>	441
P129	The characteristics of electrode-less lamp's plasma <i>T. Uetsuki and S. Nimata</i>	443
P130	Use of dopant-free tungsten electrodes in metal halide lamps <i>C. V. Varanasi, T. R. Brumleve, A. Lamouri and A. Naruka</i>	445
P131	Beneficial effects of using getters during cold cathode lamp production <i>A. Corazza and V. Massaro</i>	447
P132	Resonance broadening of Hg lines as a density diagnostic in high intensity discharge lamps <i>J. E. Lawler</i>	449

P133	Improvement of the extraction efficiency of organic light emitting diodes <i>Y. Jinde, S. Tanaka, Y. Kawakami, M. Horii, N. Sone and Y. Naito</i>	451
P134	Science and technology of processing quartz-based high pressure discharge lamps <i>A. V. Hariharan and J. Ravi</i>	453
P135	Radial profiles of the Hg excited states densities in a narrow electrodeless mercury–argon discharge <i>S. Starostin, E. Kindel and M. Stieber</i>	455
P136	Behaviour of mercury in ZnHg pellets dosed in fluorescent lamps <i>H. Yagi and T. Atagi</i>	457
P137	3-dimensional LTE modelling of HID lamps with electrode-plasma interaction <i>M. Galvez</i>	459
P138	Thermochemical investigations of the system NaI-TII-InI and its relevance for high pressure metal halide lamps <i>M. Ohnesorge, U. Niemann, T. Markus and K. Hilpert</i>	461
P139	Improved color stability in highly loaded metal halide lamps <i>W. P. Lapatovich and S. L. Callahan</i>	463
P140	New ballast concepts for dielectric barrier discharge systems <i>R. Lecheler, O. Schallmoser and W. Sowa</i>	465
P141	Effects of convection and magnetic fields in horizontal burning HID lamps <i>Y.-M. Li</i>	467
P142	A novel way of high frequency operation of small wattage HID lamps <i>K. Mita</i>	469
P143	Investigation of electric fields in organic light-emitting devices using electroabsorption spectroscopy <i>M. Mabilia, P. Jolinat, I. Séguy, S. Archambeau, P. Destruel and G. Ablart</i>	471
P144	Arc discharge model as a two terminal electronic device <i>J. L. Tapia, J. Pacheco, M. Pacheco, G. Zissis and J. J. Gonzalez</i>	473
P145	Mercury-free InI-Xe short-arc lamps <i>M. Muto and S. Omori</i>	475
P146	Inhibited breakdown in mercury-free HID lamps <i>A. Bowman Budinger and W. P. Lapatovich</i>	477
P147	Physical basic properties of a high pressure Na lamp at several voltages and frequencies <i>A. Martín, N. Bordel, J. C. Alvarez, C. Blanco, J. Viera and G. Zissis</i>	479
P148	Mass spectrometric determination of formation enthalpies of gaseous negative ions LnCl_4^- and Ln_2Cl_7^- <i>L. S. Kudin, D. E. Vorob'ev and V. B. Motalov</i>	481

P149	Electron cross sections for rare gases used for discharge light sources modelling <i>M. C. Bordage and J. Perrin</i>	483
P150	Pulsed excitation of mercury free luminous signs <i>E. Robert, C. Cachoncinlle, R. Viladrosa, M. Dudemaine and J. M. Pouvesle</i>	485
P151	A study on optic characteristics of LEDs lamp <i>M. K. Hwang, C. H. Lee, C. S. Huh and C. S. Park</i>	487
P152	A computational model for simulating volume-emitters in arc lamps <i>M. Gyukics, P. Maák, L. Jakab, P. Richter, T. Torma and Á. Böröczki</i>	489
P153	Numerical modelling of a DC current HID lamp for design purposes <i>K. C. Paul, A. Erraki, T. Takemura, T. Hiramoto, F. Dawson, J. B. Rouffet, J. J. Gonzalez, A. Gleizes and D. Lavers</i>	491
P154	HiPerVision reflex lamp: a new member of the HiPerVision family <i>J. F. Lavaud, J. Pelsma and L. Haenen</i>	493
P155	Experimental investigation of hollow cathodes in He-Xe low pressure discharges <i>W. Lehmann and U. Wichmann</i>	495
P156	Radiation transport and spatial profiles of excited atom densities in a low-pressure xenon column plasma for lighting purpose <i>D. Uhrlandt, S. Gortchakov, H. Lange and Yu. B. Golubovskii</i>	497
P157	Thermodynamic modelling of fluorescent lamp electrodes <i>D. Buso and J. J. Damelincourt</i>	499
P158	Salt-frit reactions in ceramic metal halide lamps <i>N. Brates, D. Goodman, J. Maya, Y. Nishiura and N. Takeuchi</i>	501
P159	Oxidation protection of Mo sealing foils using fused silica coatings <i>T. Emilsson, C. V. Varanasi and T. R. Brumleve</i>	503
P160	3-dimensional radiation transport for LTE plasmas <i>M. Galvez</i>	505
P161	Spectroscopic study of a low-pressure argon QL-lamp produced by 2.45 GHz microwave power <i>M. J. Fernández, O. Carabaño, M. J. van de Sande, J. Jonkers, J. J. A. M. van der Mullen, A. Sola and A. Gamero</i>	507
P162	Novel Hg-free, flat and large excimer lamps operated by an adaptive pulse gear <i>K. E. Trampert, H. P. Daub, M. Neiger and W. Heering</i>	509
P163	The simplest way to reconstruct plasma emission using two-views tomography: needed properties and limitations <i>X. Franceries, P. Freton, M. Masquere, F. Lago and J.-J. Gonzalez</i>	511
P164	The application of mesopic vision models to street lighting <i>G. I. Crabb and M. H. Burtwell</i>	513

P165	Reflectance measurements on three pavement surfaces using CMH and HPS lamps <i>G. I. Crabb, M. H. Burtwell and R. J. Beaumont</i>	515
P166	UV light emission from electron beam excited Ar-H ₂ O gas mixtures <i>A. Morozov, J. Wieser, R. Krücken and A. Ulrich</i>	517
P167	A model study of breakdown in fluorescent lamps <i>W. J. M. Brok, M. D. Bowden, J. van Dijk, J. J. A. M. van der Mullen and G. M. W. Kroesen</i>	519
P168	Processing opaque fluids using water-coupled excimer light sources <i>J. J. Coogan</i>	521
P169	Deviations from equilibrium of thallium level populations in a metal halide arc lamp <i>D. Karabourniotis, J. J. Curry, E. Drakakis and E. Benck</i>	523
P170	Lighting and environmental purifying <i>L. Zhi-Guo, G. Zisis, L. Xiao-Wei and L. Hong-Li</i>	525
P171	Emission characteristics of a plasma display panel cell <i>J.-C. Jung, D. C. Jeong and K.-W. Whang</i>	527
P172	Work function measurement of an electrode in a low pressure Hg discharge by photoelectric method <i>S. Gotoh, T. Kasuya and M. Wada</i>	529
P173	The temperature character of CFLs with amalgam <i>L. Zhi-Guo, H. Bao-Zhong, L. Di-Lai and H. Ito</i>	531
P174	An evaluation of mercury-free HID for automobile - from the headlight performance point of view <i>S. Kojima and T. Sekiguchi</i>	533
P175	Planar UV excimer lamp excited by surface barrier discharge <i>N. N. Guivan, J. Janca, A. Brablec, P. St'ahel, P. Slavicek and L. L. Shimon</i>	535
P176	Modelling interaction of metal halide plasmas with a thermionic cathode <i>M. S. Benilov, M. D. Cunha and G. V. Naidis</i>	537
P177	Calculations of rare gas-iodine mixtures barrier discharges parameters <i>G. Zvereva</i>	539
P178	Pulsed power supply for high pressure discharge lamps <i>A. Chammam, H. Elloumi, K. Charrada, B. Mrabet, M. Stambouli and J. J. Damelin-court</i>	541
P179	Compact electrodeless discharge lamp driven by low-power microwave <i>M. Shido, Y. Onoda, T. Serita and M. Kando</i>	543
P180	LEDs optical modelling and simulation for lighting application <i>J. P. Rami, G. Lorge and P. Tarroux</i>	545

- P181 Production and shaping of high performance phosphors for lighting by using sol-gel process
G. Bertrand-Chadeyron, D. Boyer, P. Boutinaud, A. C. Franville, J. M. Nedelec, D. Zambon and R. Mahiou 547
- P182 Experimental characterization of phosphors under xenon excitation
B. Caillier, Ph. Guillot, J. Galy, R. Mauricot, J. Dexpert-Ghys and N. Joffin 549
- P183 Discrete ordinate method (DOM) in the analysis of the radiative transfer in high pressure mercury discharge
M. Bouaoun, H. Elloumi and K. Charrada 551
- P184 Non-monotonic radial distribution of light emission in argon positive column at medium pressures
E. A. Bogdanov, A. A. Kudryavtsev, R. R. Arslanbekov and V. I. Kolobov 553
- P185 Conductance model of discharge lamps, parameter verification and identification for modelling of electric circuits in light-nets
A. Richter and J. Koprnický 555
- P186 Systematic observations of 150 W metal-halide arc lamps containing a progression of additive chemistries
J. J. Curry and C. J. Sansonetti 557
- P187 Dielectric barrier discharge generated by a piezoelectric transformer in rare gases
K. Teranishi, S. Suzuki and H. Itoh 559
- P188 VUV emission from CO gas discharge
A. Hatta 561
- P189 Optimising the efficiency of low-pressure discharges for lighting
S. Kitsinelis, R. Devonshire, D. A. Stone and R. C. Tozer 563
- P190 Medium pressure mercury discharge for use as an intense white light source
S. Kitsinelis, R. Devonshire, D. A. Stone and R. C. Tozer 565
- P191 Colour variable lamp using inductively coupled plasma
M. Jinno, R. Miki, H. Motomura and M. Aono 567
- P192 Bremsstrahlung coefficients for electron-Hg atom collisions from the corrected phase shift approximation
J. E. Lawler 569
- P193 Enhancement of near-UV and visible emissions using pulsed low-pressure Hg-Ar discharge
K. H. Loo, G. J. Moss, D. A. Stone, R. C. Tozer, M. Jinno and R. Devonshire 571
- P194 Fundamental study of the positive column contraction in xenon discharge at intermediate pressures
K. H. Loo, M. Jinno, H. Motomura and M. Aono 573
- P195 Parametric study of the emission characteristics of pulsed xenon dielectric barrier discharge at intermediate to high pressures
K. H. Loo, Y. Ikeda, M. Jinno, H. Motomura and M. Aono 575

P196	The low-pressure mercury discharge under different modes of operation <i>S. Kitsinelis, K. Loo, H. Motomura, M. Jinno and M. Aono</i>	577
P197	Temporal behavior of radial distribution of xenon metastable atoms in xenon low pressure lamps <i>H. Motomura, R. Wada, M. Jinno, K. H. Loo and M. Aono</i>	579
P198	Emission characteristics of molecular - rare gas discharge fluorescent lamps <i>S. Takubo, Y. Muguruma, H. Motomura, M. Jinno and M. Aono</i>	581
P199	Radial variations in the properties of a DC Hg-Ar discharge <i>S. Taniguchi, K. H. Loo, M. Jinno, H. Motomura, M. Aono and R. Devonshire</i>	583
P200	Extension of ceramic metal halide technology to lower wattages <i>J. Tambini and E. C. Guest</i>	585
P201	Improved halogen lighting performance using a combination of high luminous flux sources and a lens material approach <i>B. P. Terburg, P. Schottland and D. Bryce</i>	587
P202	The sulfur lamp – LTE modelling and experiments <i>C. W. Johnston, B. Hartgers, H. van der Heijden, K. Garloff, G. M. Janssen, B. Broks, J. van Dijk and J. J. A. M. van der Mullen</i>	589
P203	Dissociation of thorium oxide on the surface of free surface tungsten <i>A. Böröczki, I. Gaál, S. Gurbán, M. Menyhárd, L. Petrás and L. Balázs</i>	591
P204	Gas analytical and optical measurements in inductively coupled electrodeless RF discharge lamps <i>I. Maros, G. Hárs and L. Reich</i>	593
P205	Analysis of the first continuum of a xenon dielectric barrier discharge <i>N. Merbahi, N. Sewraj, F. Marchal and G. Ledru</i>	595
P206	Assessing HID lamps for use in mesopic lighting applications <i>M. H. Girach, Z. Koltai, S. A. Mucklejohn and B. Preston</i>	597
P207	Development of novel separation technique of phosphors used in fluorescent lamps: preliminary studies <i>Z. Németh, A. Deák and Z. Hórvölgyi</i>	599
P208	Residual stress anisotropy in high pressure sodium lamp seals <i>Z. Tóth, Z. Koltai, G. Steinbach, A. Juhász and K. Váradi</i>	601
P209	Kinetic processes in CH ₄ -H ₂ O mixture initiated by UV-radiation of Xe-excilamp <i>A. Suslov</i>	603
P210	Electrode diagnostics and modelling for ceramic metal halide lamps <i>G. M. J. F. Luijks, S. Nijdam and H. v. Esveld</i>	605
P211	The bio-influence of trichromatic white LEDs light source: bioresonance phenomenon <i>S. Matei</i>	607

P212	Different modes of cathodic arc attachment to HID lamp electrodes: modelling and simulation <i>S. Lichtenberg, L. Dabringhausen, J. Mentel and P. Awakowicz</i>	609
P213	Different modes of cathodic arc attachment to HID lamp electrodes: comparison between simulation and measurements <i>L. Dabringhausen, M. Redwitz, S. Lichtenberg, J. Mentel and P. Awakowicz</i>	611
P214	Spectroscopic investigation of the plasma boundary layers in front of HID lamp electrodes <i>M. Redwitz, O. Langenscheidt, L. Dabringhausen, J. Mentel and P. Awakowicz</i>	613
P215	Contraction of gas discharge luminosity at low pressures and low currents <i>A. V. Blagushina, Yu. B. Golubovskii and N. A. Timofeev</i>	615
P216	Light sources for heritage monument illumination <i>S. A. P. Joshi</i>	617
P217	Screening test of quartz glass for 172nm excimer lamps <i>B. Kühn, A. Schreiber, E. Arnold, H.-D. Witzke and F.-J. Schilling</i>	619
P218	On the filling gas of CFL with higher wattage <i>D. Fang and F. Li</i>	621
P219	Current oscillations in lighting systems with discharge lamps <i>J. Václavík and M. Novák</i>	623
P220	Broadening of spectral lines in high pressure mercury-free short arc lamps <i>M. Kettlitz, O. Krylova, M. Wendt and H. Schneidenbach</i>	625
P221	Investigation of tungsten erosion in fluorescent lamps during cold start by laser-induced fluorescence <i>St. Hadrath, J. Ehlbeck, G. Lieder and F. Sigeneger</i>	627
P222	Polychromatic solid-state lamp versus standard D ₆₅ illuminant: colour changes of Munsell samples <i>V. Viliūnas, R. Stanikūnas, A. Švėgžda, H. Vaitkevičius, Z. Bliznikas, K. Breivė, R. Vaicekauskas, A. Noviškova, G. Kurilčik, A. Žukauskas, R. Gaska and M. S. Shur</i>	629
P223	Numerical validation of a self absorption model for optically thick plasmas <i>D. Karabourniotis and J. van der Mullen</i>	631
P224	Reflector design for efficient lighting and energy conservation <i>P. Tarroux</i>	633
P225	Modulating method in the application of optical measurement <i>Z. Ying, Y. Yongcai and H. Ming</i>	635
P226	Radial profiles of vibrational temperatures in deuterium lamps analysing the dissociation continuum <i>N. Lang and H. Lange</i>	637
P227	Raman spectroscopy of binary metal halide mixtures <i>R. J. Jeans, R. Devonshire, R. J. Forrest, C. V. Varanasi and T. R. Brumleve</i>	639

P228	3-D modelling of time-dependent, low-pressure discharges using commercial CFD software <i>A. Palov, A. Keer-Rendon, J. C. Camacho Arriaga and R. Devonshire</i>	641
P229	Impurity diagnostics in low pressure discharge lamps using atomic and molecular emission spectroscopy <i>F. Kennedy, R. Bruckshaw, R. Devonshire, E. Arnold and G. Desinger</i>	643
P230	Infra-red spectroscopic diagnostics of high pressure Hg discharge lamps <i>R. Devonshire and M. Jinno</i>	645
P231	Sapphire: a new spectroscopy analysis and visualisation tool <i>G. J. Moss, R. J. Forrest, D. S. Payne and G. J. Wilson</i>	647
P232	Characteristics of discharge spectra with low-pressure sulfur vapor <i>W. B. Jung and H. Y. Chang</i>	649
P233	Double discharges in bi-polar pulsed dielectric barrier discharge lamps in xenon and their influence on the VUV ($\lambda=172\text{nm}$) production efficiency <i>R. J. Carman, B. K. Ward, R. P. Mildren and D. M. Kane</i>	651
P234	Characterisation on LEDs especially white SMD-LEDs <i>A. Mahlkow and P. Rotsch</i>	653
P235	Enhanced IR hollow cathode laser in ^3He -Ne gas mixture <i>P. M. Pramatarov, M. S. Stefanova and A. V. Karelin</i>	655
