# TABLE OF CONTENTS

Preface ................................................................................................................. 1

Development of a New and an Explicit Analytical Equation that Estimates the Vertical Dynamic Impact Loads of a Moving Train ................................................................................................................................. 2

Niyazi Özgür Bezgin

Structural Response of Existing Metro Tunnels to Adjacent Large-section Pipe Jacking Construction .......................................................................................................................... 11

Bo Liu, Dingwen Zhang, Lei Fang

The Uplift Behavior of a Subway Station During Different Degree of Soil Liquefaction ................................................................. 18

Ji-Lei Ha, Hua-Bei Liu

Polymers for Stabilization of Soft Clay Soils ......................................................... 25

M. Mirzababaev, A. Arulrajah, M. Ounton

Evaluation of Engineering Characteristics of Lian-Yan Railway Soft Soil Based on CPTU Data-A Case Study ......................... 33

Wei Duan, Songyu Liu, Guojun Cai

Apparatus for Strengthening Soft Water-Saturated Soils by Freezing under Engineering Objects and Structures in Cold Regions .................................................................................................................. 40

V. I. Mosiev, N. K. Vasiliev, T. A. Komarova, O. A. Komarova

Measurement of Surface Vibration Accelerations Propagated in the Environment .................................................................................................................. 45

Krzysztof Robert Czech, Wojciech Gosk

The Specificities of Landslides Danger Assessment Accepted in Eurocode ....................................................................................... 51

D. D. Shubina, I. K. Pomenko, D. N. Gorobtsov

The Use of Oil-contaminated Crushed Stone Screenings in Construction Ceramics ......................................................................................... 59

L. L. Maslennikova, M. S. Abu-Khasan, N. A. Babak

Geotechnical Analysis of Structural Behaviour Under Complex Geological Engineering Conditions ............................................ 65

Andrey V. Benin, Elena V. Gorodnova

Engineering and Geological Audit in Design and Construction of Linear Transport Facilities ...................................................... 70

M. E. Nikulina, D. N. Gorobtsov, V. V. Pendi, M. E. Nikulina, D. N. Gorobtsov

Experimental Study of Stoneblowing Track Surfacing Technique ........................................................................................................ 75

Alexander Abrashkoff, Artem Semak

Crushing of Non-cohesive Soil Grains Under Dynamic Loading ........................................................................................................ 80

Marek A. Patakiwicz, Katarzyna Zahiebska-Adamska

Non-invasive Portable Geophysical Tool to Monitor Water Content in Earthen Long Linear Infrastructures .................................... 86

S. Utri, R. Castellanze, A. Galli, P. Sentenac

Use of Waste From Aluminothermic Welding of Railroad Tracks in Structural Materials Science ........................................... 94

Andrey V. Benin, Elena V. Gorodnova

Finite Element Modelling of Unpaved Road Reinforced with Geosynthetics .............................................................................................. 99

Lidia Sarah Calvarano, Giovanni Leonardi, Rocco Palamara

Determination of Sandy Subsoil Stiffness on the Basis of Surface Vibration Measurement ................................................................. 105

Wojciech Gosk, Krzysztof Robert Czech

Integration of Pavement Layer Evaluation Using LWD for Road Safety Control ............................................................................. 111

Poranic Jitareekul, Auckpath Sawangsuriya, Prueenthong Singhotairat

Transportation and Environmental Geotechnics .......................................................................................................................... 118

Ivan Vaneček, Daniel Jirásko, Martin Vaniček

Usage of the «BRNL-FT» Program for Foundation Calculation Using the Method of the Predefined Equaled Soil Settlements ............................................................................................................. 126

S. I. Holksev, S. O. Kondrat'Ev

Modeling the Dynamic Behavior of the Upper Structure of the Railway Track .......................................................................................... 133

Alexey A. Loktev, Vadim F. Korolev, Irina V. Shishkina, Dmitrii A. Basovskiy

Unified Multimodal Transport Center – A Tool for the Development of the Environmental Geology of Transport ........................................ 138

Menahatova Tatiana Anatol'evna, Egorov Sergey Viktorovich

Structural Health and Geotechnical Monitoring During Transport Objects Construction and Maintenance (Saint-Petersburg Example) ......................................................................................................... 145

Andrei Bel'yi, Eduard Karapetov, Yuri Efimenko

Dynamic Soil Models for Backcalculation of Material Properties from Falling Weight Deflectometer Deflection Data ............................................................................................................................. 152

Song-Yu Liu, Guang-Hua Cai, Yan-Jun Du, Heng Zhu, Ping Wang

Engineering Properties of Carbonated Reactive Magnesia-stabilized Silt Under Different Activity Index ........................................................................................................................ 158

An Attempt of the Synthesis of Recent Knowledge About Mechanisms Involved in Stabilization Function of Geogrids in Infrastructure Constructions .................................................. 166

Zikmund Rakowski

Mechanical Stabilization of Intermediate Granular Layers in Pavement Structures – Laboratory Study .................................................. 174

Lezi Horiček, Zikmund Rakowski

Control Over Transverse Shifts of Rail Sleeper Lattice Which Impact on Deformation of Ballast Layer ................................................................................................................ 181

G. L. Akkerman, M. A. Skutina
High Speed Trains Geotechnics: What is a Tolerable Bump? ................................................................. 186
Jaan-Louis Briaud, Somayech R. Tafte
Vibration Attenuation at Rail Joints Through Under Sleeper Pads .......................................................... 193
Sakdirat Kaewunruen, Akira Aikawa, Alex M. Remennikov
Climate Change Adaptation for GeoRisks Mitigation of Railway Turnout Systems ................................. 199
Serdar Dindar, Sakdirat Kaewunruen, Joseph M. Sussman
Improved Performance of Ballasted Rail Tracks Using Plastics and Rubber Inclusions ....................... 207
Buddhima Indraratna, Ngoc Trang Ngo, Cholachat Rajjitakhamporn
Wear Degree Assessment of Low-pressure Earth Dams Within Urban Landscape ............................... 215
Maria J. Salewchuk, Grzegorz Bartnik
Application of the Light Falling Weight Deflectometer (LFWD) to Test Aggregate Layers on Geosynthetic Base ........................................... 221
Tatiana V. Ivanov, Vladimir N. Kavkazskiy, Mikhail I. Shidakov
Geomechanical Tasks Solving in Modelling of Temporary Support Parameters in Sochi Tunnels .......... 227
Y. V. Trofimenko, G. I. Evgeniev, E. V. Shashkina
Geological-Engineering and Geotechnical Issues Concerning the Function of the Railway Bridge Across the Angun’ River Operated by the Far Eastern Railway ............................................................... 232
Timla Titova, Rasul Akhtyamov, Elina Nasyrova
Expanded Polystyrene (EPS) Geofoam: Preliminary Characteristic Evaluation ........................................ 239
Y. Z. Beju, J. N. Mandal
The Performance of Geotextile Materials Used for Filtration and Separation in Different Structures as an Important Part of Geotextiles Requirements ........................................................................................................... 247
V. I. Shikhov, L. S. Blazhko, A. B. Ponomarev
Assessment of Varve Clays Sensitivity to Natural Structure Disturbance ............................................. 252
P. I. Klementyatsionok, S. S. Kolmogorov, S. G. Kolmogorov
Functional Loss Risks of highways in Permafrost Areas Due to Climate Change .................................... 258
Y. V. Trofimenko, G. I. Evgeniev, E. V. Shashkina
Dynamic Stress Responses of Rough Pavement Resting on Layered Poroeletic Half-Space under Moving Traffic Load ............................................................................................................................. 265
Qian Gao, Jiange Qian, Xiaqioutang Gu
Analysis of Bridge Foundation Damage in Albania ......................................................................................... 275
Tatyana Gogia, Luljeta Boza
Dynamic Shakedown Analysis of Flexible Pavements under Rolling and Sliding Contact Considering Moving Speed ......................................................................................................................... 283
Yu-Chen Dai, Jian-Gu Qian, Yong-Gang Wang, Mao-Song Huang
Geotechnical Parameters of Soil, Considering the Effect of Additional Compaction of Embankment .... 291
Lukasz Aleksander Kumor, Maciej Kordian Kumor, Monika Kophal
Functions and Applications of Geosynthetics In Roadways ..................................................................... 298
Jorge G. Zornberg
Evaluation of Load Transfer in Geogrids for Base Stabilization Using Transparent Soil ....................... 307
Xin Peng, Jorge G. Zornberg
Minimization of Negative Impact from Solid Waste Landfills with Use of Mineral Geoantidotes .......... 315
M. V. Shershneva, E. I. Makarova, N. N. Efimova
Oil Products Absorbing Properties of Foam Concretes ............................................................................. 320
M. V. Shershneva, E. I. Makarova, M. Yu. Savelyeva
Seismic and Geomechanical Monitoring of Transport Infrastructure on Undermined Territories .... 325
A. A. Baryakh, I. A. Sanfirov, A. G. Yaroslavtsev
Experimental Estimation of Permeability of Freeze-thawed Soils in Artificial Ground Freezing .......... 332
Go Hirose, Yuzuru Ito
Design Characteristics of Road Structure Reinforced with Cell Geosynthetic Materials with Account of Dynamic Load Impact .................................................................................................................. 338
P. V. Ivanov, N. N. Belyaev, A. V. Petryaev
Remediation of Contaminated Fine-grained Soil by Freezing and Ion Exchange Effect ..................... 346
Tomila Titova, Rasul Akhtyamov, Elina Nasyrova
Reduction of Vibroacoustic Effect of High-speed Trains ................................................................. 352
M. Butorina, N. Minina, P. Ivanov, A. Petryaev
On Vibrodynamic Impact on the Roadbed ................................................................................................. 360
Ivan S. Kozlov, Svetlana A. Bertontseva, Mikhail I. Shmelievich
Design Method of Bridge Approach Improved by Deep Mixing Methods in Highway Engineering .... 365
Deng Yongfeng, Jing Fei, Feng Qi
Numerical Simulation of Station Tracks on Soft Soils ............................................................................... 372
Ye. V. Fedorenko, T. S. Vavryukh, D. Ye. Yerchenko, A. I. Kovalsky
The Service Life of Ballastless Track ........................................................................................................... 379
A. V. Savin
Geodetic Monitoring of Deformation of Building Surrounding an Underground Construction ............ 386
M. J. Bryn, D. A. Afonin, N. N. Bogomolova
Application of Laser Scanning Technology in Geotechnical Works on Reconstruction of Draw Spans of the Palace Bridge in Saint Petersburg .................................................................................. 383
N. V. Kanashin, A. A. Nikitchesh, E. S. Swistov
Soling, Aerating and Phosphating for Soil Strengthening and Detoxication ........................................ 398
Larisa Svatovskaya, Alexander Kabanov, Maxim Sychev
Ensuring Environmental Safety During the Construction and Operation of Tunnels in Residential Areas
L. V. Ryzhova, T. S. Titova, S. G. Genders
S. K. Khirwar, J. N. Mandal

404

Finite Element Analysis of Flexible Pavement with Geogrids
S. K. Khirwar

411

Monitoring of Transport Tunnel Deformation at the Construction Stage
M. Y. Bryn, D. A. Afomin, N. N. Bogomolova, A. A. Nikitchin

417

The Construction of Transport Infrastructure on Permafrost Soils
Vladimir M. Utizky, Elena V. Gorodnova

421

Full - Scale Study of Stress-strain State of Ballastless Upper Structure Construction of Rail Way in Terms of Train Dynamic Load
A. F. Kolos, T. M. Petrova, A. O. Makhonina

429

Laboratory Investigations on Reclaimed Asphalt Pavement (RAP) for using it as Base Course of Flexible Pavement
Dulal Chandra Saha, J. N. Mandal

434

Geocoprotective Properties of Binders for Transport Systems
S. T. Djabbarov

440

Effect of Reinforcement on Multi-tiered Fly Ash Wall
Ankia Kumar, J. N. Mandal

446

Geocoprotective Technology of Transport Construction using Silica Sol Absorption Method
Larisa Svatovskaya, Oleg Urov, Alexander Kabanov

454

Problems and Technologies of Offshore Permafrost Investigation
Andrei S. Lokiev, Mikhail Y. Tokarev, Eugeny M. Chuslin

459

Experimental Research of Spatial Variation of Compaction Effect on Vibratory Probe Compaction Method for Ground Improvement
Yuan Cheng, Hehua Zhu, Fei Jing, Guangxin Du, Chao Yan, Zhibin Liu

466

Calculations of Thermal Stabilization of Transport Embankments and their Bases
Vladimir N. Paramonov, Igor I. Sukharov

472

The Impact of Work of Hydraulic Compactor Type V8 from MTS on the Level of Vibrations Propagated to the Environment
Krzysztof Robert Czech, Wojciech Gank

478

Selected Laboratory Research on Geogrid Impact on Stabilization of Unbound Aggregate Layer
Marcin Grygierek, Jacek Kwasile

484

Influence Evaluation of Buildings Constructed in Protected Zone on St.Petersburg Subway Underground Structures Stress-strain State
A. P. Lediaev, A. N. Konkov, A. L. Novikov, D. A. Soloviev

492

The Influence of Hazardous Geological Processes on the Transport Infrastructure within the River Valley of Aurgasa (Bashkortostan, Russia)
I. V. Averin

500

Innovative Technology for Repair of Culverts in Conditions of Constant Intense Water Flow
A. N. Perminov, I. P. Safonov, N. A. Perminov

505

Pipe Foundations of Mega Projects: New Railway Station and LRT in Problematical Soil Ground of Astana
Askar Zhasupbekov, Abdulla Omarov, Gyuilnara Zhakenova, Gulzhanat Tanyrbergenova

511

Study of Phosphates use in Electrochemical Treatment of Water-saturated Argillaceous Soils
Vitaliy Ganchits, Viktoriia A. Cherniaeva

519

Effect of a Stiff Thin Foundation Soil Layer's Depth on Dynamic Response of an Embankment Dam
Talal Anwad, Modar Donia, Lina Anwad

525

A Case Study of a Cut Slope Failure Influenced by Snowmelt and Rainfall
Akira Mori, Srikrishtna Siva Subramaniam, Tatsuya Ishikawa, Masahiro Komatsu

532

The Problem of High-Speed Railway Noise Prediction and Reduction
N. I. Ivanov, I. S. Boiko, A. E. Shashurin

539

Frost Heaving in Ballast Railway Tracks
S. T. Djabbarov

547

The Impact on People and Facilities of Air Flow Caused by High-speed Train Traffic
P. L. Ng, T. N. D. R. Barrett, G. Roux, S. Polycarpe, M. Gonzalez

554

Development of Tunnel Dismantling Machine (TDM) in an Underground Railway Project
Antonina Sakhrova, Marina Baidarashvili, Andrei Petriaev

560

Transportation Structures And Constructions With Geocoprotective Properties
Antonina Sakhrova, Marina Baidarashvili, Andrei Petriaev

569

The Modern Structure for Storm Sewage Purification of Roads
Marina Baidarashvili, Antonina Sakhrova, Andrei Petriaev

576

Soil Reinforcement and Detoxication by Means of Mineral Binder Systems
Kristina Malchevskaya, Antonina Sakhrova, Alexander Kabanov

582

Solution of the Problem of Providing Railway Track Stability in Joint Sections Between Railroad Facilities and Subgrade
G. M. Stoyanovich, V. V. Papatenko, D. Y. Maleev, K. V. Zmeev

587

Creation of Favourable Water – Physical Properties of Drill Cuttings with the use of Coagulants
L. N. Skrip, V. S. Petuhova, E. A. Romanenko

593

Forecast for Terms of Culvert Inspection and Repair
M. G. Ryzhmin, E. S. Shestopiko

598
Geoeconomic Technologies of Storage of used Wooden Sleepers .......................................................... 605
The Soil Effect to Efforts in Rails of Continuous Welded Rail Track on Bridges .................................................. 610
V. N. Smirnov, A. O. Dyachenko, L. K. Dyachenko, L. A. Andreeva
Criteria of Geoeconomic Protection in Construction ............................................................................. 616
Marina Baydarashvili
Construction of Deep Foundation Ditch under a Reconstructed Multi-storey Building on the Main Avenue of
St.Petersburg .................................................................................................................................................. 622
B. Mantschev, A. Osokin
Detection Method of Pollution with Heavy Metals Ions of the Soil ............................................................... 630
M. Baydarashvili, N. Shrednik, A. Spasovskaia
Account of Irregularity in the Stress Distribution along Wood and Concrete Sleepers from a Perspective of
Granular Media Mechanics ........................................................................................................................... 637
A. V. Moshenshul
Lithological Profiling of Rocky Slopes using GeoReader Software Based on the Results of Ground Penetrating
Radar Method .................................................................................................................................................. 643
T. I. Boykova, V. Y. Solovyova, D. V. Solovyov
Effective Repair and Refurbishment Compound for the Strengthening of a Road Concrete Pavements .......... 650
Anastasiya Sychova, Maxim Sychev, Evgeniy Blazhko
The Increase of the Durability and Geoprotective Properties of the Railway Subgrade ................................ 654
Anastasiya Sychova, Andrey Solomahin, Anatoly Hitrov
Evaluation of Effectiveness of Separating Layers in Railroad Track Structure Using Life Cycle Cost Analysis 695
Vladimir Belyutikov, Eugeny Shehtman, Oleg Malitov
Main Geotechnical Problems of Railways and Roads in Kriolitozone and Their Solutions ............................. 702
Valentin G. Kundraite
Enhancement of Subgrade’s Bearing Capacity in Low Water Permeable (Clay) Soils ........................................ 710
Ludmila S. Blazhko, Valerii I. Shnykov, Eugeny V. Chernyshov
Transport Interchanges Design Features in Seismically Dangerous and Densely Built-Up Areas ................. 716
D. V. Serebryakov, V. G. Lebedeva, V. V. Govorov
Evaluation of the Geosynthetic Reinforcement on Railroad Subgrade .......................................................... 721
Erol Guler, Samad Kazem Khorosowskia
Monitoring of Deformation Processes in Buildings and Structures in Metropolises .................................... 729
A. V. Mastaftin, V. A. Valkov, A. I. Kuznetsov
Monitoring of Quarry Slope Deformations with the Use of Satellite Positioning Technology and Unmanned Aerial
Vehicles ......................................................................................................................................................... 737
D. V. Beregovoi, J. A. Younges, M. G. Mastaftin
Prediction of Natural and Technogenic Negative Processes Based on the Analysis of Relief and Geological
Structure ....................................................................................................................................................... 744
A. A. Kuzin, E. N. Grishchenkova, M. G. Mastaftin
The Impact of Engineering-Geologic Conditions on the Development of Railway Subgrade Design Solutions 752
V. A. Alpysova, N. S. Bushuev, S. V. Shkarnikov, D. O. Shulman
Geotechnical Aspects of Security for Long-operated Underground Collectors in Conditions of Weak Soils and
Increasing Technogenic Influences ............................................................................................................... 759
A. N. Perminov, N. A. Perminov
The Behavior Estimation of the Soil Constructions at Transport Infrastructure with Its Reinforcement by Man-
made Materials with Using of Physical Modelling and Testing ................................................................. 767
V. V. Vinogradov, A. A. Zaytsev, V. K. Frolovsky
Embankment on Permafrost Eastern Polygon of Baikal-Amur Mainline ..................................................... 774
Sergey A. Kudryavtsev, A. V. Alexei V. Kach, T. E. S. Zhivov, Zhanna I. Kostens, Daniil O. Grigoriev
Different Approaches to the Reconstruction of Vostianya Square in St. Petersburg ..................................... 783
Yuri A. Nikitin, Antonina I. Ishakova
Deformation Properties of Decomposed Peat Under Vibration and Dynamic Load Impact .......................... 792
Concrete for Road Pavements ..................................................................................................................... 800
Tatiana Boka, Dmitry Solovyov, Valentina Solovyova
Compaction of the Railway Embankments During the New Highspeed Lines Construction .......................... 805
Anatoly I. Kistunov
Appraisal of Highway Tunnels Construction on the Active Railroad Tunnel Operational Reliability in the City of Sochi ........................................................................................................................................................................811
Y. S. Frolov, A. N. Konkov, E. S. Svintsov

Oscillation of Combined Strut-Framed Systems of Buildings and Structures in Conditions of Vibration Subgrade .................................................................................................................................................................818
V. V. Egorov, A. N. Sudakov

The Development of a High Performance Material for a Ballast Layer of a Railway Track ........................................................................................................................................................................................................823
Valery Kondratov, Valentina Solonyova, Irina Stepanova

Methods of Noise and Vibration Protection on Urban Rail Transport ..................................................................................................................................................................................................................829
E. P. Dudkin, L. A. Andreeva, N. N. Sultanov

Application of Fiber-reinforced Concrete in Tram Track Foundation ..................................................................................................................................................................................................................836
V. V. Garbaruk, E. P. Dudkin, V. A. Veliev

Development of the Fastening Design of the Underground Structure Immersed in Water-saturated Soils of St. Petersburg, from Floating up .........................................................................................................................................................................................................841
Andrei A. Ananev

Justification and Expansion of Spheres of Application of the Tram ..................................................................................................................................................................................................................848
E. P. Dudkin, K. A. Smirnov, S. A. Doronicheva

Method of Tram Track Structures Feasibility Study ..................................................................................................................................................................................................................854
E. P. Dudkin, E. N. Zaitsev, S. V. Kolankov

Integrated Approach to Using Technology of Reclaimed Asphalt Pavement (RAP) ........................................................................................................................................................................................................860
M. A. Lynbarshkaya, V. S. Merkusheva, P. A. Osian, A. A. Ilin, E. S. Svintsov

Transport Construction Negative Impact on the Environment ..................................................................................................................................................................................................................867
N. A. Babak

Subgrade Strengthening on the Sections for Cars Interchanging with Axle Load of 25 T and More .........................................................................................................................................................................................................874
E. S. Ashpiz, A. V. Zamukhovskiy

Protection of the Transport Infrastructure from Influence of Landslides by Suspension Grouting .........................................................................................................................................................................................................880
A. A. Ponomarev, O. V. Zerkal, E. N. Samarin

The Application of Anisotropy of Soil Properties in the Probabilistic Analysis of Landslides Activity .........................................................................................................................................................................................................886
I. K. Fomenko, O. V. Zerkal

The Study of Subgrade Operating Conditions at Bridge Abutment Approach ...............................................................................................................................................................................................................893
Dmitry Serebryakov, Anastasia Konon, Evgeniy Zaitsev

Geosynthetic-Reinforced Slopes in Cohesive Soils Subject to Seismic Action ...............................................................................................................................................................................................................898
Akram H. Abd, Stefano Utili

Change of Ballast Strength Properties During Particles Abrasive Wear ...............................................................................................................................................................................................................908
Alexey Kolos, Anastasia Konon, Pavel Chistyakov

Mathematical Model for Forecasting of Rail Track Ballast Bearing Capacity ...............................................................................................................................................................................................................916
Alexey Kolos, Irina Darienko, Anastasia Konon

Rail Trackbed and Performance Testing of Stabilised Sub-ballast in Normal and High-speed Environments .........................................................................................................................................................................................................924
M. Horton, D. P. Connolly, Z. Yu

Influence of Chemical Additives on Shrinkage and Swelling Characteristics of Bentonite Clay ...............................................................................................................................................................................................................932
M. V. Shah, H. J. Pandya, A. D. Shukla

Author Index
