

# **5th International Symposium on the Science and Technology of Light Sources**

York, United Kingdom  
10 - 14 September 1989

## **Editors:**

**Robin Devonshire  
John Meads  
David O. Wharmby**

ISBN: 978-1-5108-4109-3

**Printed from e-media with permission by:**

Curran Associates, Inc.  
57 Morehouse Lane  
Red Hook, NY 12571

**Some format issues inherent in the e-media version may also appear in this print version.**

## **Session A**

Chairman: J Maya

- 1:I Developing lamps for lighting systems  
M Koedam

### **Low Pressure Discharges**

- 2:L Time-dependent modelling of the low-pressure Hg rare-gas discharge lamp taking into account the non-Maxwell distribution of electron energy  
Koichi Wani
- 3:P Rare-gas discharge fluorescent lamps suitable for industrial uses  
Yoshinori Anzai Takehiko Sakurai Takeo Saikatsu Takashi Osawa
- 4:P Compact fluorescent light sources on the base of non-traditional constructions and the principle of radiation excitation  
A S Fedorenko A A Prjtkov V F Dadonov V I Martjinov
- 5:P SPD predictions for blended fluorescent lamps  
L L Hope
- 6:P The 254nm radiation output in a Hg-Ar discharge between tubes in coaxial configuration  
E Kindel H Lange
- 7:P Radiation of Hg-Ar low pressure discharges  
J Kreher D Foerster W Meier
- 8:P Approximative method to describe the positive column of low-pressure discharges  
F Lantos
- 9:P Influence of noble gas atom excitation on low pressure Hg discharges  
G G Lister U Greb
- 10:P Nonequilibrium thermodynamical discussion of ionisation in breakdown and glow  
B Nyiri

- 11:P Deuterium lamp with improved life time  
W Schwarz P March
- 12:P Deuterium lamp for spectro-analytical devices with reduced noise level  
W Schwarz P March
- 13:P Calculations of fluorescent lamp parameters  
R Sonnenberg H Gundel
- 14:P Preliminary report on the novel technology of circular fluorescent lamp  
Mi Zhongliang
- 15:P On the experimental and theoretical determination of the electric field strength for the  
super-narrow tube diameter, low pressure Hg-Ar lamp  
G Zissis P Benetruy J J Damelincourt A Por
- 16:P Comments on reaction rate calculations in positive column of low pressure Hg-Ar discharges  
G Zissis A Alkaa M Yousfi J J Damelincourt
- 17:L Additional electrode heating during dimming of HF operated fluorescent lamps  
F A S Ligthart H ter Heyden L Kastelein
- 18:L Suspension flow-coating of fluorescent lamps: modelling of the drying step  
F W Altena M Westerhof A Boomkens M van Rijswick
- 19:I Review of compact fluorescent lamp R & D  
S Murayama

## Session B: Chemistry and Materials

Chairman: A G Jack

- 20:I Chemical and physical modelling of metal halide discharges - today and tomorrow  
E Fischer E Schnedler
- 21:P Experimental investigations of Na reactions in high pressure sodium (HPS) lamps  
R K Datta
- 22:P Thermodynamic considerations on transport properties of halogen-filled flood-light lamps  
G Dittmer U Niemann
- 23:P Fluid flow modelling of a modified transpiration experiment designed to investigate electrode corrosion  
M Duncan J Meads R Devonshire N W O'Brien S A Mucklejohn
- 24:P A technique for the study of interactions of metal halides with gaseous impurities  
M Fields S A Mucklejohn N W O'Brien
- 25:P Laser-Raman spectroscopy of metal halide vapours at high temperature  
M Fields R Devonshire H G M Edwards V Fawcett
- 26:P Thermochemical data of scandium halides evaluated from vapour pressure measurements and reactions with quartz  
E Fischer R Kaiser U Niemann
- 27:P Chemical vapour transport and complexation in the NaI-ScI<sub>3</sub> systems  
K Hilpert M Miller M Sai-Baba
- 28:P Immunization of quartz surface against crystallization and diffusion  
S Jonas A Kwatera W Ptak E Walasek B Lesiuk W Stanioch
- 29:P Measurements of sodium loss from fused silica metal halide arc tubes  
W M Keeffe V D Meyer
- 30:P Vapour pressure and thermochemical parameters of metal halides: InCl and TlBr  
S A Mucklejohn N W O'Brien T R Brumleve

- 31:P Impurities in high pressure mercury discharge lamps  
H-P Popp R Ascher
- 32:P Chemical analyses of sodium, mercury, aluminium and trace elements in high pressure sodium lamps  
G D A Solleveld
- 33:P New aspects in the chemistry of sodium and potassium high pressure lamps  
D Veza J Rukavina D Fijan G Pichler
- 34:L High temperature seal operation in a multicomponent high pressure metal vapor lamp  
R Snellgrove E Wyner
- 35:I Chemical and materials problems affecting lamps  
D B Shinn

**Session C: Electronics and Novel Devices**

Chairman: J F Waymouth

- 36:I Review of electrodeless discharges for lighting  
D O Wharmby
- 37:P Power supply for 2 kW halogen lamp with continuous power control and sinusoidal input current  
M Albach
- 38:P Impedance and emission properties of capacitatively coupled Hg-Ar low pressure discharges  
C Beneking
- 39:P Rg<sub>2</sub>\* and RgCl\* excimer emission from dielectric barrier discharges  
B Gellert B Eliasson U Kogelschatz
- 40:P A combined pulse controlled discharge with a positive V/I characteristic  
V A Godyak
- 41:P Radiation characteristic of flash- and arc-lamps for laser pumping  
P Greve
- 42:P Pulsed operation of high pressure sodium lamps  
K Guenther H G Kloss T Lehmann R Radtke F Serick
- 43:P Operation of low wattage electrodeless HID lamps  
D Hollister M Neiger S Berman
- 44:P High power microwave lamp for pumping a Nd-YAG laser  
G Lohmann H-P Popp M Neiger
- 45:P Novel circuits for high frequency operation of HID lamps  
E J P Mascarenhas A L G Edwards
- 46:P Efficient production of incoherent excimer radiation in dielectric barrier discharges  
H Muller M Neiger V Schorpp K Stockwald

- 47:P New high power arc lamps operating in the middle frequency range from 10-100kHz  
T Reichert K-J Dietz A Dohn U Kronert G Mayer M Neiger H-P Popp
- 48:P Circuitous model of gas discharge lamp  
Lian-cai Wang Li-xi Yang Ke-jing Qin Geng-xin Jia
- 49:P Electronic ballast for high pressure sodium gas discharge lamp  
A Wegener T Husgen
- 50:P Simplification of electronic ballast for self-ballasted fluorescent lamps  
N Yoshikawa T Imai
- 51:L UV radiation from Hg resonance lines by means of dielectric barrier discharges  
B Gellert B Eliasson U Kogelschatz
- 52:L Electromagnetic compatibility of lighting systems  
J R Bergervoet
- 53:I Progress in electronics for lamps and its forecast  
E Bolte

## **Session D: Coatings and Incandescent Lamps**

Chairman: S Berman

- 54:L An aluminium transport cycle observed by multiphoton LIF in operating halogen lamps  
J R Woodward
- 55:P FTIR diagnostics of tungsten-halogen lamps  
L Bigio
- 56:P The investigation of getter-gas interaction in gas-filled incandescent lamps  
E Biro J Adam S Reznik O Lojka
- 57:P Fluid flow modelling as an aid in the design of incandescent light sources  
D G Green R Devonshire S A Mucklejohn N W O'Brien
- 58:P Non contacting precision measurement of thin wires  
K Guenther H G Kloss W Luedge
- 59:P Interaction of heated tungsten with its radiation  
A S Ivantzev M I Obmajikina V I Konjashkina
- 60:P Temperature influence upon optical parameters of the infrared reflecting layers  
T Kanabus W Stanioch
- 61:P Electric bulb based radiation IR microfurnace for fast sintering and epitaxy  
A Szymanski
- 62:P Production technology, some electrical and light parameters of incandescent lamps with  
filament of composite material on carbon base  
N S Vdovin M I Rogajilin A V Mordjuk
- 63:P Molybdenum blackening in glass halogen lamps  
T H Yu J M Ranish
- 64:P Studies about halogen regenerate cycle agent in halogen lamp  
Wei-Zhong Zhou Shan-Chun Cao

65:L Compact quartz halogen lamps with infrared reflecting coatings  
R S Bergman

66:I Review of optical coatings for incandescent and other lamps  
Y Yuge

## Session E: Electrodes and Diagnostics

Chairwoman: L C Pitchford

- 67:L Dynamics of the neutral and ionized barium atoms in the vicinity of fluorescent lamp electrodes  
A K Bhattacharya A S Awadallah
- 68:P The vaporization behaviour of pure BaO and alkaline earth containing mixed oxides  
L Bencze A Popovic O Kaposi
- 69:P Simulation of the fluorescent lamp cathode  
A K Bhattacharya J H Ingold T F Soules
- 70:P Thallium pressure determination from the Tl-377.6 nm resonance line in high pressure mercury + thallium iodide discharges  
S Couris E Drakakis M Aubes
- 71:P Electrode temperature measurements in gas discharge lamps  
E H Curtis A G van der Kooi
- 72:P Evaporation rates from an oxide coated tungsten electrode in low pressure discharge devices  
R D Groves A K Bhattacharya
- 73:P Barium diagnostics in front of heated fluorescent lamp electrodes  
R Hilbig U Chittka
- 74:P Space and time dependent modelling of glow and thermionic cathode spots  
S Hollo B Nyiri
- 75:P Time modulation of sodium density in Na-Hgl AC arc  
D Karabourniotis A Palladas A Tsakonas
- 76:P Function and surface properties of emissive coatings and their influence on high pressure gas-discharge lamps  
J M Korochkov A M Kokinov
- 77:P Estimation of convective arc bending by equivalent field method  
F Markus B Nyiri K Gambar

- 78:P Arc temperature measurement of high-pressure discharges in scattering enclosures  
S A Mucklejohn A T Rowley
- 79:P Zero field thermionic emission in HF operated fluorescent lamps  
H J W Schenkelaars J J Heuvelmans A van der Kooi J Schlejen
- 80:P Experimental diagnostics and physical conditions in discharge plasma of metal-halogen lamps  
V G Vdovin V A Vdovina A A Pustoshkin
- 81:P Spectra and characteristics of high pressure sodium-cadmium lamp  
D Veza J Rukavina D Azinovic G Pichler
- 82:L Electrode diagnostics using plasma-enhanced photoemission  
D R Woodward M B Schulman
- 83:I Electrode phenomena  
F Nagel

## Session F: High Pressure Discharges

Chairman: E Schnedler

- 84:L Stabilisation of white light SON lamps  
R A J Keijser
- 85:L Instant light metal halide lamp  
R H Springer R L Hansler J M Davenport
- 86:P A study of three dimensional natural convection in horizontal high pressure mercury lamps  
P Y Chang W Shyy J T Dakin M E Duffy
- 87:P A computer model of a high pressure discharge lamp based on the FLUENT code  
L Cifuentes D A J Mottram S Vasquez
- 88:P Computer predictions of flow patterns and temperature contours in high pressure discharge lamps  
L Cifuentes
- 89:P Three dimensional computer predictions of a high pressure discharge lamp  
L Cifuentes D A J Mottram
- 90:P Influence of the two-temperature hypothesis on the electrical characteristics of high pressure mercury discharge plasma  
S Couris G Zissis J J Damelin court
- 91:P Determination of the total escape factor in high pressure mercury lamps  
J J Damelin court E Drakakis J Salon E Roaux
- 92:P A long life metal halide lamp with variable electrical power  
K -J Dietz A Schonlein
- 93:P A Hg high pressure lamp with improved UV-C output  
K -J Dietz A Schonlein W Schwarz
- 94:P Ionic demixing in metal halide lamps  
W M Keefe R W Liebermann H L Rothwell Jr

- 95:P A simplified radial temperature profile model for wall stabilized arc discharges and its application to the modelling of radiative spectra  
R W Liebermann
- 96:P Development and application of a 1-D model of a metal halide discharge lamp including detailed spectral predictions  
D A J Mottram L Cifuentes S A Mucklejohn
- 97:P A new metal halide lamp for color LCD projectors  
M Narita M Ohyama T Hiramoto
- 98:P Numerical simulation of rare gas high pressure short arc lamps  
A C Palacin M Neiger
- 99:P The future of metal-halide lamps for photochemical processes  
G A Sarytchev L B Prikupets G N Gavrilkina L A Smorodina
- 100:P Run-up characteristics and photometric aspects of a metal-halide lamp for a motorcar headlamp system  
D van Pijkeren
- 101:P Improvement of ultraviolet-related properties of MHN-T lamps  
J A J M van Vliet W Verbeek
- 102:P Numerical tests of a simple empirical model for radiation transport in optically thick plasmas  
P A Vicharelli D Karabourniotis
- 103:L Computational fluid dynamics of high intensity arcs  
P A Vicharelli T Fohl
- 104:I Predicting high-pressure discharge performance  
J T Dakin

**Session G: Closing Session**

Chairman: R Devonshire

- 105:L Mercury consumption in fluorescent lamps  
P W C Verhees
  
- 106:L Computerized tomography of high intensity arcs  
T Fohl P A Vicharelli
  
- 107:I Where will the next generation of lamps come from?  
J F Waymouth

## **Post-Deadline Papers**

- 108:P Characteristics of powers supplies for standard lamps  
E M Wareham
