

55th International Conference on Experimental Stress Analysis (EAN 2017)

Novy Smokovec, Slovakia
30 May – 1 June 2017

Editors:

**František Trebuňa
Jozef Bocko
Peter Frankovský**

**Róbert Huňady
Ján Kostka
Tomáš Kula**

ISBN: 978-1-5108-4224-3

Table of contents

SECTION 1: Development of experimental methods in mechanics and biomechanics

Calibration of model for laminated glass polymer interlayer based on rheometer data Schmidt J., Janda T., Šejnoha M.	1
The issue of recommended hole diameters in ASTM E837-13a Halabuk D., Návrat T., Vlk M.	8
Determination of Fracture Toughness of Human Enamel by Nanoindentation Based on Energy Release Method Hájková P., Jíra A.	15
Numerical Modelling of a 3D-Printed Titanium Trabecular Structure For Use in Dental Restorations Řehounek L., Jíra A., Denk F.	21
Drop Test of Foams used in Motorbike Protectors Šoltés L., Bońkowski T., Kottner R., Hynčík L.	27
The Proposal of Methodology for Finding of Proper Smoothing Parameters for Stress/Strain Analysis Performed by Digital Image Correlation Hagara M., Pástor M., Čarák P.	31
Sensing damage in CFRP composite beam by electrical resistance measurement Schmidová N., Růžička M., Dvořák M.	39
Comparison of Mechanical Responses of Dental Implants Manufactured by 3D Printing and Machining Jíra A., Denk F., Denk F.	45
Problematics of Twin-disc Wear Resistance Tests for Selected Wheel Rim Materials Šmach J., Šofer M., Čepová L., Halama R.	50
Identification of impact force on composite textile plate for impacts with various energies Bartošek J., Laš V., Mandys T., Zemčík R.	57
Motion Analyses of Human Body on a New Exercise Trainer: Pilot Study Nový Z., Urbánek M., Čapek L.	63
The optimization of the materials properties for the freight tyres in dependence on defect propagation Vavro J., Vavro jr. J., Kováčiková P., Híreš J.	69
Determination of group velocity of Lamb waves in unidirectional carbon-epoxy plate Lašová Z., Zemčík R.	75
Determining the damping for each mode of vibration system with four degrees of freedom with viscous damping Pavelka P., Huňady R.	81
Influence of Penetrated Roving Surface Treatment on the Crack Width Using Pull-out Test Vlach T., Laiblová L., Řepka J., Ženíšek M., Hájek P.	87
The reliability analyses of gear and centrifugal pumps at different rotational speeds Qazizada M. E., Pivarčiová E.	91

SECTION 2: New methods and applications of deformation and stress analysis in mechanical, civil and other structures

Modeling of Corrosion Fatigue Damage in Steel Alloy for Steam Turbines Černý M. J.	98
Use of FBG Sensors for Delamination Growth Measurement under Mode I loading Dvořák M., Schmidová N., Kadlec M., Růžička M.	102
Remark on repairs of broken pipelines Cézová E., Kanaval J., Starý F.	107
Grain Orientation Influence on Residual Stress Distribution of Ground Surface of Blade Roots made of Inconel 713LC Čapek J., Gancarczyk K., Pitrmuc Z., Kolařík K., Málek J., Beránek L., Ganey N., Trojan K.	115
The in Situ Application of a New Approach to Experimental Estimation of Tensile Forces in Prestressed Structural Elements by Method Based on the Magnetoelastic Principle Klier T., Míčka T., Polák M., Plachý T., Šimlér M., Smeták T.	122
Residual Stress Distribution in Spherical Storage Tank Butt Weld Mráz L., Hervoches Ch., Vrána M., Mikula P., Baxa P., Bošanský J.	133
Strain Gauge Measurement on Clinched Joints Specimens Malý P., Lopot F., Starý F., Sojka J.	139
Strain Response Determination in Notched Specimens under Multiaxial Cyclic Loading by DICM Paška Z., Halama R., Fojtík F., Gajdoš P.	143
Influence of the Body Wheel Shape on the Teeth Stiffness Medvecká-Beňová S., Trebuňa F., Frankovský P., Kottfěr D.	150
Diagnostics brushless DC motors Abramov I., Božek P., Abramov A., Sosnovich E., Nikitin Y.	156
The Thickness Influence of Fibre-reinforced Slabs on Extreme Load Resistance Lovichová R., Fornůšek J., Mára M., Kheml P.	165
Modal Analysis of Graphene Sheets Embedded in Elastic Medium Using Finite Element Method Lengvarský P., Bocko J.	170
Numerical Investigation of 3-D Strain Constraint in Lab Test Specimens Šedek J.	174
Finite element analysis of EPS foams used in bicycle helmets Čajka M., Bocko J., Šarloši J.	178
Some Important Experimental Details During Verification of Fatigue Durability of Railway Axles and Wheelsets Černý I., Kec J.	186
Analysis of Axially Compressed Cylindrical Shells Influenced by Geometrical Imperfections Using Finite Element Method Kula T., Bocko J., Kostka J., Frankovský P.	193
Bending of Symmetrical and Nonsymmetrical Composite Sandwich Beam with Visco-elastic Core Černý M. J., Šlapák P.	201

An Alternative Material Model for Finite Strain J2 Plasticity with Isotropic Hardening Écsi L., Élesztős P.	205
Mathematical Setting Equations of Linear Contact of the Spiral Rope – Phylum VARRINGTON Kalentev E., Tarasov V., Korshunov A.	216
<u>SECTION 3: Experiment as a tool for the verification of analytical and numerical methods</u>	
Experimental modal analysis of a free suspended composite plate by using high speed DIC method Huňady R., Pavelka P.	223
Evaluation of Glued laminated timber beams reinforced with carbon fiber fabric for use in FEM modelling Klapálek P., Melzerová L.	231
Rotary Table Machine Accuracy Verification Richter A., Klouček P.	235
Experimental Construction of Lamb Wave Dispersion Curves in Plates Šofer M., Ferfecki P., Šofer P.	242
Modal analysis of composite ram Tančín M., Limberg L.	249
Qualitative Analysis of Different Lamb Wave Excitation Methods Šofer P., Šofer M., Ferfecki P., Marek M.	256
Usage of 3D CAD Software for Verification and Representation of Real Machine Measurements and Results Braier Z., Šidlof P., Klouček P.	264
Tensile and Shear Tests of a Cork/Rubber Composite Kottner R., Kocáb J., Kochová P., Heczko J.	273
Influence of Distribution of Finger Joints and Timber Flaws on the Damage Evolution of Laminated Glued Timber Beams Melzerová L., Šejnoha M.	280
Automated tool for simulation of standardized tests of cohesive interfaces Hanzlik P., Kroupa T.	286
Effective Service Life Testing of the Cam Mechanisms Hejnova M.	295
Measurement of Cyclic Creep by Digital Image Correlation Method Halama R., Lipinová L., Páleník R.	300
Construction machinery life estimation - Machine load parameters monitoring Weigel K., Jeřábek I., Horký L.	306
Absorbing materials properties in experiment and simulation Drdlová M., Popovič M., Koutný O.	309
Study of bending properties of thin walled carbon and flax composite rods winded of prepreg fibers Kulhavý P., Lepšík P.	316
Experimental analysis of efficiency of profiled dimpled membranes in terms of wall moisture reduction Hájková E.	322

Experimental Verification of the Demountable Structure Prototype	
Polák A.	329
Validation of high speed impact numerical simulations on flat test panels for real structure analysis	
Doubrava R., Oberthor M., Bělský P.	334
The Vibrating Bowl Feeder Dynamic Model	
Sturm M., Pešík L.	342
Testing and numerical analysis of mechanical stress mobile flood barriers	
Petrů M., Srb P., Ševčík L., Lufinka A.	350
Failure Mechanism of Compressed Masonry Column	
Maroušková A.	354
Comparison of ESPI and DIC Strain Contours Measurements under Three Loading Cases	
Halama R., Horňáček L., Šmíraus J.	359
Modeling of friction stir welding of ferritic steels by considering phase transformations	
Kaločany D., Élesztős P., Écsi L., Jančo R.	365
Tuning material models for nonlinear dynamic simulations by considering the exact material properties	
Élesztős jr. P., Máčaj J., Élesztős P.	371
<u>SECTION 4: Experimental research and prediction of strength, life and operational reliability of structures and devices</u>	
Resistance Welding Simulation	
Dub M., Lopot F., Berka O., Sýkora M.	377
Influence of Temperature on Selected Mechanical Properties of Geopolymer Composites	
Krystek J., Laš V., Pompe V., Hájková P.	382
Usage of Illite-kaolinitic Clay for Rammed Earth Manufacturing and Its Drying Rate	
Otcovská T., Mužíková B., Padevět P.	388
Impact of the Heat Load of Concrete on the Propagation of Ultrasound Waves	
Pazdera L., Topolář L., Hoduláková M., Mikulášek K., Smutný J.	392
Water Absorption Properties of Rammed Earth Material with Montmorillonite Clay	
Mužíková B., Otcovská T., Padevět P.	398
The Analysis of Acoustic Emission Signals Generated in Cement-based Composites During the Cyclic Loading Test	
Topolář L., Kocáb D., Misák P., Pazdera L., Hoduláková M., Kucharczyková B.	402
Thermal FEM analysis of hybrid structure	
Limberg L., Tančín M.	408
Cyclic Tensile Tests of Epoxy Resin and the Experimentally Obtained Data Processing	
Srbová H., Kroupa T.	414
Runtime Testing of Casehardened Gears	
Petr K.	422

Determination of condition of concrete samples of different mixture degraded by high temperatures by acoustic non-destructive method Impact-echo Dvořák R., Hoduláková M., Topolář L.	426
Motorcycle Suits: Uniaxial and Biaxial Tensile Test of Leather Bońkowski T., Šoltés L., Kochová P., Kottner R., Hynčík L.	435
Assessment of serviceability criteria in Eurocodes Markova J., Holický M.	441
Inspection of Generator Shield Heat Treatment by Hole Drilling Method Weinberg O., Hájková P., Holý S., Janovec J., Václavík J.	447
Destructive Testing of Cement Paste with Micronized Waste Marble Powder as Partial Replacement for Cement – Long Time Development of Mechanical Properties Prošek Z., Topič J., Tesárek P.	451
Influence of Different Admixtures on Hydration Process and Mechanical Properties of Cement Paste Topič J., Prošek Z., Plachý T., Tesárek P.	455
Analysis of tensile strength in bending of plasterboard with use of optical correlation Zobal O., Litoš J., Antoš J.	459
Effects of Advanced Laser Processing on the Microstructure and Residual Stresses of H13 Tool Steel Trojan K., Ocelík V., Ganev N., Němeček S., Čapek J.	464
Creep of Unfired Clay Mortar Based on Illitic Clay Padevět P., Bittnar P.	472
Calculation of B-Basis Values from Composite Material Strength Parameters Obtained from Measurements of Non-identical Batches Bek L., Kottner R., Krystek J., Laš V.	477
Geometry influence on strength of thermal drilled threaded holes Kováčik M., Bělík R.	486
Experimental Verification of the Mechanical Properties of the Material of the Rotor Shaft of the Turbine Damage Pástor M., Trebuňa F., Šimčák F., Buršák M.	490
The Shrinkage of Fine Recycled Aggregate Concrete Šefflová M.	501
Fatigue Behaviour of Bolted Joints without Load Transfer Kadlec M., Mlch I., Růžek R.	505
Effect of Poly(vinyl-alcohol) Amount on Flexural Strength of Cement Mortars with Micronized Recycled Concrete Tesárek P., Prošek Z., Fládr J.	509
Experimental verification of thickness effect on fatigue crack growth in AA 7475 plate Růžek R., Homola P., Kakos M.	513
Residual stress analysis after laser welding Blatnická M., Šajgalík M., Sága M.	519
Contribution to multiaxial fatigue analysis of aluminium alloy EN AW 6063.T66 Sága M., Uhrčík M., Vaško M.	525

Determining the strength properties of castellated girders by experimental and numerical modeling Sivák P., Delyová I., Kaluja T.	534
Properties of Composites with Geopolymer Matrix Reinforced by Basalt Fabric Petříková I., Marvalová B., Hrouda A., Paur L.	543
Reliability Assessment of Saint Joseph Church in Prague Markova J., Sykora M., Simunek I.	549
Determination of the Cause of Failure Based on Fracture Marks on Parts of a Complicated Transmission Mechanism Izrael G., Élesztós P., Kaločany D.	555
Important Aspects of Testing Welds Brož P., Dobiáš D.	561
Based reliability Assessment Method to thr Model of Structural Element Kesl P., Plánička F.	567
Fabric Thickness Measurement under Tensile Forces Šimić Penava D., Penava Ž., Knezić Ž.	573
Interaction Enhancement between Recycled PET Macro-fiber Reinforcement and Cement Matrix via Plasma Treatment Trejbal J., Prošek Z., Tesárek P., Dejdar L.	577
 <u>SECTION 5: Monitoring of operational loadings and operational states of structures and devices</u>	
Experimental analysis of shearing power during chain production Berka O., Lopot F., Dub M., Hoštička V.	581
Modelling of the flow of streams of cohesionless and cohesive bulk materials in a conveyor discharge point of a flat conveyor belt Cyganiuk J., Kuryło P.	585
Comparison of Methods used for the residual Stress Analysis in a Pipe made from Polypropylene Fojtík F., Paška Z., Kolář P.	596
Experimental and Numerical Determination of Riffle Barrel Properties Doubrava K., Sháněl V., Fumfera J., Růžička M., Steinbauer P.	603
Comparison of Fans' Behavior and Grandstand Dynamic Response during Two Hockey Matches Between the Same Teams Verner M., Polák M., Plachý T.	607
Calibration of Material Parameters during Billet Straightening Fusek M., Halama R., Poruba Z.	611
Identification of the torque strut force load Lufinka A., Novák O., Petřů M.	616
Experimental analysis of welding tooling for ITk ATLAS Rachač M., Dub M., Janda M., Malý P., Kamenický J., Berka O., Dynybyl V., Kubový P., Lopot F.	620
Strain Gauge Measurement on the Oilseed Screw Press Malý P., Starý F., Dynybyl V., Hoidekr J.	625

Long-term cyclic test - analysis and monitoring	
Jeřábek I., Horký L., Weigel K.	629

Synergy Related Issues In Multi-Criterial Designing Of Technological Processes	
Kurylo P., Cyganiuk J.	632

Monitoring of damage of the composite leaf spring using methods of acoustic emission	
Papacz W., Frankovský P., Kostka J., Kottfer D.	648

SECTION 6: Modelling and design of mechatronic systems

HMI of teleoperated robots	
Jurišica L., Duchoň F., Szabová M., Mikulová Z.	658

Improvements of VFH* Method	
Babinec A., Klůčik M., Mikulová Z.	665

Virtual Instrumentation in the Diagnostic and Control Process for Industrial Applications	
Koniar D., Hrgaš L., Danko M., Taraba M., Uriča T., Simonová A., Hanko B.	672

Quality observation of micro electro mechanic systems with the use of virtual instrumentation	
Hrgaš L., Simonová A., Taraba M., Uriča T., Danko M., Koniar D.	680

Bond Graph Methodology for Modeling of Dynamical Systems and Derive the Equations of Motion	
Frankovský P., Gmitterko A., Hroncová D., Kelemen M., Ostertag O., Dominik L.	687

The problem of cooperation of flat belt with elements of mechatronic systems	
Domek G., Kołodziej A., Wilczyński M., Krawiec P.	706

Methodology for probabilistic model creation of lidar measurement	
Dekan M., Chovanec L., Szabová M., Babinec A.	712

Probabilistic Localization of Robot in Outdoor Environment Using GNSS	
Szabová M., Duchoň F., Dekan M., Chovanec L.	722

Optimization of Hexacopter Stability Control with Disturbances in its Stochastic State Space Dynamics Model	
Ibrahim I. N., Al Akkad M. A., Sosnovich E. B.	731

The proposal of estimation method of mating between pulleys and cogbelt	
Krawiec P., Domek G., Adamiec J., Waluś K., Warguła Ł.	740

The Usage of Geometric Mechanics Concept to Modeling of Ackerman Steered Car-like System	
Frankovský P., Gmitterko A., Dominik L., Hroncová D., Virgala I., Miková L.	748

3D Vision Methods for Enhanced Human-robot Interaction	
Tölggyessy M., Dekan M., Rodina J.	752
