## Table of Contents

|                                                              |        |
|--------------------------------------------------------------|--------|
| Message from Chairs .....                                    | x      |
| Message from New Ideas Track Chairs .....                    | xii    |
| Message from Student Research Competition Track Chairs ..... | xiii   |
| Message from Tool Demos and Mobile Apps Track Chairs .....   | xiv    |
| Organizing Committee .....                                   | xv     |
| New Ideas Track Program Committee .....                      | xvii   |
| Student Research Competition Track Program Committee .....   | xviii  |
| Tool Demos and Mobile Apps Track Program Committee .....     | xix    |
| Technical Papers Track Program Committee .....               | xx     |
| Steering Committee .....                                     | xxii   |
| Reviewers .....                                              | xxiii  |
| Keynotes .....                                               | xxiv   |
| Sponsors .....                                               | xxviii |

### Keynotes: Future of Mobile SE

|                                                                                    |    |
|------------------------------------------------------------------------------------|----|
| Future of Mobile Software for Smartphones and Drones: Energy and Performance ..... | 1  |
| <i>Abhijeet Banerjee and Abhik Roychoudhury</i>                                    |    |
| — National University of Singapore                                                 |    |
| The Soot-Based Toolchain for Analyzing Android Apps .....                          | 13 |
| <i>Steven Arzt, Siegfried Rasthofer, and Eric Bodden</i>                           |    |
| — Fraunhofer SIT; Paderborn University & Fraunhofer IEM                            |    |

### Technical Papers: Energy

|                                                                                                   |    |
|---------------------------------------------------------------------------------------------------|----|
| Cloud-Guided QoS and Energy Management for Mobile Interactive Web Applications .....              | 25 |
| <i>Wooseok Lee, Dam Sunwoo, Andreas Gerstlauer, and Lizy K. John</i>                              |    |
| — University of Texas at Austin; ARM Research Ltd.                                                |    |
| Investigating Decreasing Energy Usage in Mobile Apps via Indistinguishable<br>Color Changes ..... | 30 |
| <i>Tedis Agolli, Lori Pollock, and James Clause</i>                                               |    |
| — University of Delaware                                                                          |    |

|                                                                                                  |    |
|--------------------------------------------------------------------------------------------------|----|
| Assessing the Impact of Service Workers on the Energy Efficiency<br>of Progressive Web Apps..... | 35 |
| <i>Ivano Malavolta, Giuseppe Procaccianti, Paul Noorland,<br/>and Petar Vukmirovic</i>           |    |
| — <i>Vrije Universiteit Amsterdam</i>                                                            |    |

|                                                                             |    |
|-----------------------------------------------------------------------------|----|
| Performance-Based Guidelines for Energy Efficient Mobile Applications ..... | 46 |
| <i>Luis Cruz and Rui Abreu</i>                                              |    |
| — <i>University of Porto; University of Lisbon</i>                          |    |

## Technical Papers: Architecture

|                                                                           |    |
|---------------------------------------------------------------------------|----|
| Towards Architectural Styles for Android App Software Product Lines ..... | 58 |
| <i>Tobias Dürschmid, Matthias Trapp, and Jürgen Döllner</i>               |    |
| — <i>University of Potsdam</i>                                            |    |

|                                                                                |    |
|--------------------------------------------------------------------------------|----|
| Rethinking the Mobile Code Offloading Paradigm: From Concept to Practice ..... | 63 |
| <i>Jose I. Benedetto, Andres Neyem, Jaime Navon, and Guillermo Valenzuela</i>  |    |
| — <i>Pontificia Universidad Católica de Chile</i>                              |    |

|                                                                         |    |
|-------------------------------------------------------------------------|----|
| Generating Predicate Callback Summaries for the Android Framework ..... | 68 |
| <i>Danilo Dominguez Perez and Wei Le</i>                                |    |
| — <i>Iowa State University</i>                                          |    |

|                                                           |    |
|-----------------------------------------------------------|----|
| Same App, Different App Stores: A Comparative Study.....  | 79 |
| <i>Mohamed Ali, Mona Erfani Joorabchi, and Ali Mesbah</i> |    |
| — <i>University of British Columbia</i>                   |    |

|                                                                                                              |    |
|--------------------------------------------------------------------------------------------------------------|----|
| An Approach to Modeling Call Response Behavior on Mobile Phones Based<br>on Multi-Dimensional Contexts ..... | 91 |
| <i>Iqbal H. Sarker, Muhammad Ashad Kabir, Alan Colman, and Jun Han</i>                                       |    |
| — <i>Swinburne University of Technology; Charles Sturt University</i>                                        |    |

|                                                                                             |    |
|---------------------------------------------------------------------------------------------|----|
| Examining User Complaints of Wearable Apps: A Case Study on Android Wear.....               | 96 |
| <i>Suhaib Mujahid, Giancarlo Sierra, Rabe Abdalkareem, Emad Shihab,<br/>and Weiyi Shang</i> |    |
| — <i>Concordia University</i>                                                               |    |

|                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------|-----|
| Roaming Nairobi Roads: Instrumenting Roads under Resource Constraints .....                                                    | 100 |
| <i>John Wamburu, David Kaguma, Michiaki Tatsubori, Aisha Walcott-Bryant,<br/>Reginald E. Bryant, and Komminist Weldemariam</i> |     |
| — <i>IBM Research Africa; IBM Research Japan</i>                                                                               |     |

## Technical Papers: Development

|                                                                                                      |     |
|------------------------------------------------------------------------------------------------------|-----|
| Code Smells in iOS Apps: How Do They Compare to Android? .....                                       | 110 |
| <i>Sarra Habchi, Geoffrey Hecht, Romain Rouvoy, and Naouel Moha</i>                                  |     |
| — <i>Inria/University of Lille; Université du Québec à Montréal;<br/>French University Institute</i> |     |

|                                                                          |     |
|--------------------------------------------------------------------------|-----|
| Detecting Android Smells Using Multi-Objective Genetic Programming ..... | 122 |
| <i>Marouane Kessentini and Ali Ouni</i>                                  |     |
| — <i>University of Michigan; United Arab Emirates University</i>         |     |

|                                                                                                     |     |
|-----------------------------------------------------------------------------------------------------|-----|
| Mobile App Development and Management: Results from a Qualitative Investigation .....               | 133 |
| <i>Rita Francese, Carmine Gravino, Michele Risi, Giuseppe Scanniello,<br/>and Genoveffa Tortora</i> |     |
| — <i>University of Salerno; University of Basilicata</i>                                            |     |

## Technical Papers: Security

|                                                                                                                       |     |
|-----------------------------------------------------------------------------------------------------------------------|-----|
| ACCUSE: Helping Users to Minimize Android App Privacy Concerns .....                                                  | 144 |
| <i>Majda Moussa, Massimiliano Di Penta, Giuliano Antoniol,<br/>and Giovanni Beltrame</i>                              |     |
| — <i>Ecole Polytechnique de Montréal; University of Sannio</i>                                                        |     |
| Predicting Android Application Security and Privacy Risk with Static Code Metrics .....                               | 149 |
| <i>Akond Rahman, Priysha Pradhan, Asif Partho, and Laurie Williams</i>                                                |     |
| — <i>North Carolina State University; Nested Apps</i>                                                                 |     |
| Who Changed You? Obfuscator Identification for Android .....                                                          | 154 |
| <i>Yan Wang and Atanas Rountev</i>                                                                                    |     |
| — <i>Ohio State University</i>                                                                                        |     |
| Who Added That Permission to My App? An Analysis of Developer Permission<br>Changes in Open Source Android Apps ..... | 165 |
| <i>Daniel E. Krutz, Nuthan Munaiah, Anthony Peruma, and Mohamed Wiem Mkaouer</i>                                      |     |
| — <i>Rochester Institute of Technology</i>                                                                            |     |
| Automatically Locating Malicious Packages in Piggybacked Android Apps .....                                           | 170 |
| <i>Li Li, Daoyuan Li, Tegawendé F. Bissyandé, Jacques Klein, Haipeng Cai,<br/>David Lo, and Yves Le Traon</i>         |     |
| — <i>University of Luxembourg; Washington State University;<br/>Singapore Management University</i>                   |     |

## Technical Papers: Poster

|                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------|-----|
| CheckDroid: A Tool for Automated Detection of Bad Practices in Android Applications<br>Using Taint Analysis ..... | 175 |
| <i>Sergio Yovine and Gonzalo Winniczuk</i>                                                                        |     |
| — <i>CONICET-Universidad de Buenos Aires; Universidad de Buenos Aires</i>                                         |     |
| Authentication in Selected Mobile Data Collection Systems: Current State,<br>Challenges, Solutions and Gaps ..... | 177 |
| <i>Marriette Katarahweire, Engineer Bainomugisha, and Khalid A. Mughal</i>                                        |     |
| — <i>Makerere University; University of Bergen</i>                                                                |     |
| A Framework for Regression Testing of Outdoor Mobile Applications .....                                           | 179 |
| <i>Carlo Bernaschina, Roman Fedorov, Darian Frajberg, and Piero Fraternali</i>                                    |     |
| — <i>Politecnico di Milano</i>                                                                                    |     |
| Dynamic Encryption Key Security Scheme (DEKSS) for Mobile and Cloud Systems .....                                 | 182 |
| <i>Stephen Rodriguez and Paolina Centonze</i>                                                                     |     |
| — <i>IONA College</i>                                                                                             |     |

## **New Ideas**

- Towards the Quality Improvement of Cross-Platform Mobile Applications..... 184  
*Matias Martinez and Sylvain Lecomte*  
— *University of Valenciennes*
- Towards Mobile Twin Peaks for App Development..... 189  
*Giovanna Avellis, Julian Harty, and Yijun Yu*  
— *InnovaPuglia SpA; Commerctest Ltd.; The Open University*
- A Set of Metrics for the Effort Estimation of Mobile Apps ..... 194  
*Gemma Catolino, Pasquale Salza, Carmine Gravino, and Filomena Ferrucci*  
— *University of Salerno*

## **Student Research Competition**

- Using Parsing Agents as a Service for Data Privacy..... 199  
*Stephen Rodriguez*  
— *IONA College*
- Just-In-Time Bug Prediction in Mobile Applications: The Domain Matters!..... 201  
*Gemma Catolino*  
— *University of Salerno*
- Toward Client-Centric Approaches for Latency Minimization in Mobile Applications..... 203  
*Yixue Zhao*  
— *University of Southern California*

## **Tool Demo and Mobile Apps: Energy**

- Leafactor: Improving Energy Efficiency of Android Apps via Automatic Refactoring ..... 205  
*Luis Cruz, Rui Abreu, and Jean-Noël Rouvignac*  
— *University of Porto; University of Lisbon; ForgeRock*

## **Tool Demo and Mobile Apps: Development**

- IFMLEdit.org: Model Driven Rapid Prototyping of Mobile Apps..... 207  
*Carlo Bernaschina, Sara Comai, and Piero Fraternali*  
— *Politecnico di Milano*
- Configuration Service for Mobile Apps..... 209  
*Nili Guy-Ifergan, Dmitri Pikus, Idan Ben-Harrush, and Vadim Eisenberg*  
— *IBM Research-Haifa*
- Authoring Tool for Location-Based Learning Experiences ..... 211  
*Agustina M. Zimbello, Federico M. Alconada Verzini, Cecilia Challiol, Alejandra B. Llitas, and Silvia E. Gordillo*  
— *Universidad Nacional de La Plata; CONICET; CICIPBA*
- CATE: Concolic Android Testing Using Java PathFinder for Android Applications..... 213  
*Patrick McAfee, Mohamed Wiem Mkaouer, and Daniel E. Krutz*  
— *Rochester Institute of Technology*
