## Table of Contents

<b>Page</b>	<b>Paper Title</b>	<b>Authors</b>
1	Investment analysis of unconventional hydrocarbon resources under uncertainty	Anca Costescu, Amanda Spisto
7	Price volatility across the Atlantic: the US and the European Natural Gas Markets	Daniele Costa, Rafael Garaffa, David Branco Castelo, Anthony Danko, António Fiúza
12	Transmission System Planning Considering Solar Distributed Generation Penetration	Phillipe Vilaça Gomes, João Saraiva
18	Analyzing the Influence of Climate Change in Brazilian Electricity Markets	Mário Domingos Pires Coelho, João T. Saraiva, Adelino Jorge Coelho Pereira
24	Optimization of Cascaded Hydro Units Modeled as Price Makers Using the linprog Function of MATLAB® and Considering the Tailwater Effect	João Tomé Saraiva, Mário Castro
30	Optimal storage dispatch in a consumer setting with local generation resources	Dennis Metz, João Tomé Saraiva
36	Spatial and temporal power shifting from flexibility sources. An economic and environmental assessment	Amanda Spisto, Silvia Vitiello
42	Empirical comparison of three models for determining market clearing prices in Turkish day-ahead electricity market	Nermin Elif Kurt, Gökhan Ceyhan, Hikmet Bahadır Sahin, Kürşad Derinkuyu
49	Flexibility-friendly support policies: A Nordic and Baltic perspective	Luis Boscán, Klaus Skytte, Emilie Roselund Soysal
56	Assessing the Upward Demand Response Potential for Mitigating the Wind Generation Curtailment: A Case Study	Mubbashir Ali, Jussi Ekström, Matti Lehtonen
62	Aggregated modelling approach of power and heat sector coupling technologies in power system models	Philipp Härtel, Fabian Sandau
68	Links between Production and Consumption of Electricity with Economic Performance in Mexico	Ricardo Massa, Juan Rosellón
74	Application of Priority Service Pricing for Mobilizing Residential Demand Response in Belgium	Yuting Mou, Anthony Papavasiliou, Philippe Chevalier
79	Design and Performance of European Balancing Power Auctions	Fabian Ocker
85	Segmentation of Low Voltage Consumers for Designing Individualized Pricing Policies	Maria Kotouza, Antonios Chrysopoulos, Pericles Mitkas
91	On the Efficiency of Local Electricity Markets	Hélène Le Cadre
97	Cost of Optimal Placement of a CHP Plant Within Existing UDN	Sreto Boljevic
103	Generation Expansion Planning under Uncertainty Considering Power-to-Gas Technology	Niklas van Bracht, Albert Moser
109	The Impact of Electrification on Power System in Northern Europe	Xiaomei Cheng, Magnus Korpås, Hossein Frarhmand
116	Addressing the Question of Regional Generation Adequacy in Capacity Expansion Planning	Philipp Baumanns, Niklas van Bracht, Andreas Maaz, Alexander Fehler, Albert Moser
122	Development of Adaptive Time Patterns for Multi-Dimensional Power System Simulations	Denis vom Stein, Niklas van Bracht, Andreas Maaz, Albert Moser
127	Which are the Energy Efficiency determinants in Portuguese innovative firms?	Margarita Robaina, Mara Madaleno, Marta Ferreira Dias
132	Impact of Capacity Market Design on Power System Decarbonization	Jeremy Lin, Behdad Vatani
138	Optimal Dispatch of Wind Farms Facing Market Prices	Gilles Bertrand, Anthony Papavasiliou
144	Interconnector Participation in Capacity Mechanisms: A New De-rating Approach	Vijay Venu Vadlamudi, Gerard Doorman
150	Generation/transmission investment planning integrated with market equilibrium models in electricity markets	Emre Çelebi
156	Operational hydropower scheduling with post-spot distribution of reserve obligations	Jiehong Kong, Hans Ivar Skjelbred

162	Operational use of marginal cost curves for hydropower plants as decision support in real-time balancing markets	Hans Ivar Skjelbred, Jiehong Kong, Tellef Juell Larsen, Fredd Kristiansen
168	Technical Integration of Virtual Power Plants into German System Operation	Andre Richter, Natalia Moskalenko, Ines Hauer, Tamara Schröter, Martin Wolter
174	Machine Learning Analysis for a Flexibility Energy Approach towards Renewable Energy Integration with Dynamic Forecasting of Electricity Balancing Power	Andreas Essl, Peter Hettegger, Reinhard Haas
180	Russian gas market: domestic market deregulation impact on electricity prices	Evgenia Vanadzina
186	Simulation of the Iberian Electricity Market Using an Agent Based Model and Considering Hydro Stations	João Saraiva, José Sousa
192	Prospects, Barriers and Possible Mitigation Measures of Integrating Renewable Energy into Kenyan Power System and Market	Ibrahim Olalekan Abdulganiyu, Samuli Honkapuro, Salla Annala
198	Sizing of a photovoltaic-storage system for power system frequency support	Antti Alahäivälä, Matti Lehtonen
204	Power-to-Hydrogen and Hydrogen-to-X pathways: opportunities for next generation energy systems	Robert Dickinson, Francesco Dolci, Alain Le Duigou, Paul Lucchese, Olfa Tlili, Nikolaos Lymperopoulos, Christine Mansilla, Sheila Samsatli, Nouri Samsatli, Denis Thomas, Marcel Weeda
210	Adequacy of power capacity during winter peaks in Finland	Jaakko Jääskeläinen, Behnam Zakeri, Sanna Syri
216	Power-to-Hydrogen and Hydrogen-to-X: Which markets? Which economic potential? Answers from the literature	Martin Robinius, Lara Welder, Severin Ryberg, Olfa Tlili, Christine Mansilla, Esther Albertin, Fabien Auprêtre, Mihai Balan, Robert Dickinson, Rupert Gammon, Hiroshi Ito, Martin Kirkengen, Noah Meeks, Bengt Ridell, Sheila Samsatli, Nouri John Semsatli, Jesus Simon, Denis Thomas, Solène Valentin, Anja Wehling, Eveline Weidner, Paul Lucchese, Alain Le Duigou
222	The Impact of Power Curve Estimation on Commercial Wind Power Forecasts - An Empirical Analysis	Gianni Goretti, Aidan Duffy, Tek Tjing Lie
226	Modelling reserve management strategies and assessing impacts on short term markets with the OPTIMATE prototype simulation platform	Marco Schudel, Jean-Yves Bourmaud
232	Hydropower operation in a changing environment	Moritz Schillinger, Hannes Weigt, René Schumann, Michael Barry
238	The changing landscape of world gas markets at the horizon 2020	Sina Heidari, Christoph Weber
244	Aquisition of a Balance Responsible Party Under Grid Restrictions in an Extended Scheduling System	Tobias Zimmermann, Stefan Klaiber, Peter Bretschneider, Steffi Naumann
250	How cost effective is EU climate policy? Evidence from Portugal using integrated modelling	Sara Proença, Patrícia Fortes
255	Generation Expansion Planning under Uncertainty: An Application of Stochastic Methods to the German Electricity System	Mario Kendzierski, Mona Setje-Eilers, Friedrich Kunz
262	The Role of Demand Side Management for the System Integration of Renewable Energies	Theresa Müller
268	Sensitivity of electricity prices in energy-only markets with large amounts of zero marginal cost generation	Niina Helistö, Juha Kiviluoma, Hannele Holttinen
274	Estimation of the Spanish Secondary Reserves Requirements	Jose Villar, Francisco Alberto Campos, Salvador Domenech, Cristian Díaz
279	Imbalances costs of small-scale renewable not dispatchable power plants in the Italian electricity market	Grazia Belli, Nicola Sorrentino, Daniele Menniti, Anna Pinnarelli, Giovanni Brusco, Alessandro Burgio
285	Dynamic Dimensioning of Balancing Reserve	Jens D. Sprey, Patrick Schultheis, Albert Moser
290	Endogenous Secondary Reserves Requirements in Long-Term Electricity Generation Models	Francisco Alberto Campos, Salvador Doménech, José Villar
295	Techno-Economic Analysis for Optimal Energy Storage Systems Placement Considering Stacked Grid Services	Dimitrios Karadimos, Alexandros Karafoulidis, Dimitrios Doukas, Paschalis Gkaidatzis, Dimitris Libridis, Antonis G. Marinopoulos
301	Determinants of Power Hedging Mechanisms in Liberalized Electricity Markets	Petr Spodniak, Valentin Bertsch
306	Modeling the impact of wind and solar power forecasting errors on intraday electricity prices	Florian Ziel
311	Impact of Generation Shift Key Determination on Flow Based Market Coupling	Constantin Dierstein
317	Waste incineration plants as the supportive element of a local energy network	Christoph Pieper, Simon Unz, Michael Beckmann

323	Managing Energy Risk – A Case Study Of Bulgaria With No Nuclear Power	Elena Dimitrova, Ndaona Chokani, Reza Abhari
328	Analysis of the Minimum Activation Period of Batteries in Frequency Containment Reserve	Raphael Hollinger, Agustín Motte Cortés, Thomas Erge, Bernd Engel
334	Assessing the Potential Benefit of Energy Storage in Emission constrained Power Markets using Equilibrium Modeling	Magnus Askeland, Stefan Jaehnert, Magnus Korpås
340	The Role of Energy Storage in Local Energy Markets	Esther Mengelkamp, Johannes Gärtner, Christof Weinhardt
346	Advanced Simulation Solutions to overcome Limitations to Forecasting Scenarios for Natural Gas Trading	Joel Enderlin, Benoit Dal Ferro, Beryl Loire, Serge Bredin, Romain Crestey, Alexandre Vallette
353	Optimizing capacity extensions in power systems: a case study of Bavaria and a comparison to Texas	Thomas Deetjen, Matthias Hüber, Joshua Rhodes, Michael Webber
359	Demand Side Response Aggregators: how they decide customer suitability	Mitchell Curtis
365	Effects of Implementing Decentralized Business Models at Neighborhood Energy System Level: A Model Based Cross-sectional Analysis	Fabian Scheller, David-Georg Reichelt, Steffen Dienst, Simon Johanning, Sören Reichardt, Thomas Bruckner
371	Transmission Grid Stabilization using Virtual Power Plants	Sören Graupner, Marika Behnert, Thomas Bruckner, David-Georg Reichelt, Stefan Kühne, Thomas Bruckner
377	Valuation of Combined Wind Power Plant and Hydrogen Storage: A Decision Tree Approach	Martin Schuster, Thomas Walther
383	Pumped-Storage Plants improving Brazilian Interconnected System operation when facing high solar and wind sources participation	Pedro Machado, Dorel Soares Ramos, Julian Hunt, Gustavo Tenaglia
389	Economics of energy storage in the German Electricity and Reserve Markets	Behnam Zakeri, Sanna Syri, Friedrich Wagner
395	The effect of hydro and wind generation on the mean and volatility of electricity prices in Spain	João Pedro Pereira, Paulo Rodrigues, Vasco Pesquita
403	Assessing Storage and Substitution as Power Flexibility enablers in Industrial Processes	Margarida Henriques, Rob Stikkelman, Elsa Henriques
409	Electricity markets overview – market participation possibilities for renewable and distributed energy resources	Ivan Pavić, Mateo Beus, Hrvoje Pandžić, Tomislav Capuder,
414	The application of a flow-based methodology for yearly network analysis according to market data	Benedetto Aluisio, Maria Dicorato, Giuseppe Forte, Michele Sallati, Alessio Sallati, Corrado Gadaleta, Chiara Vergine, Fabio Ciasca
420	Interdependencies of harmonised procurement of manually and automatically activated FRR in selected Central European Balancing Markets	Bettina Burgholzer
426	Intraday Market Asymmetries – a Nordic Example	Emilie Rosenlund Soysal, Klaus Skytte, Ole Jess Olsen, Jonas Sekamane
432	Price-based vs. load-smoothing pumped storage operation: Long-term impacts on generation adequacy	Christoph Fraunholz, Florian Zimmermann, Dogan Keles, Wolf Fichtner
438	Experiences with Auctions for Renewable Energy Support	Emilie Rosenlund Soysal, David Fernando Mora Alvarez, Lena Kitzing, Fabian Wigand, Sonja Förster, Ana Amazo, Silvana Tiedeman
444	Evaluation of the effects of time-of-use pricing for private households based on measured load data	Michael Hinterstocker, Paul Schott, Serafin von Roon
450	Multi-area electricity market equilibrium model and its application to the European case	Alberto Orgaz, Antonio Bello, Javier Reneses
456	Attractiveness of demand response in the Nordic electricity market – present state and future prospects	Antti Rautiainen, Olli Vilppo, Pertti Järventausta
462	Energy Indicators Framework and Climate Change Policy Implications	Fatima Lima, Manuel Nunes, Jorge Cuhna
468	Coupling of Electricity and Gas Market Models	Timo Kern, Benedikt Eberl, Felix Böing, Serafin von Roon
473	Electricity Capacity Expansion Using Real Options Under an Oligopoly	Stein-Erik Fleten, Helene Brøndbo, Trine Boomsma, Axel Storebø
479	Smart Demand Side Management: Storing energy or storing consumption – it is not the same!	Joachim Geske, Richard Green, Qixin Chen, Yi Wang
486	Development options for distribution tariff structures in Finland	Samuli Honkapuro, Jouni Haapaniemi, Juha Haakana, Jukka Lassila, Nadezda Belonogova, Jarmo Partanen, Antti Rautiainen, Kimmo Lummi, Antti Supponen, Sami Repo Pertti Järventausta,
492	Rethinking Short-Term Electricity Market Design: Options for Market Segment Integration	Susanne Rieß, Christoph Neumann, Samuel Glismann, Michael Schoepf, Gilbert Fridgen
498	Understanding consumers' renewable energy behaviour beyond "homo economicus": An exploratory survey in four European countries	Kirsi Kotilainen, Jussi Valta, Saku J. Mäkinen, Pertti Järventausta

504	Cross-Impact Balance as an Approach for the Development of Consistent Storylines for the European Energy Market	Paul Kunz, Stefan Vögele
509	Balancing needs and measures in the future West Central European power system with large shares of wind and solar resources	Ingeborg Graabak, Magnus Korpås
515	Effects of major tariff changes by distribution system operators on profitability of photovoltaic systems	Jouni Haapaniemi, Arun Narayanan, Ville Tikka, Juha Haakana, Samuli Honkapuro, Jukka Lassila, Tero Kaipia, Jarmo Partanen
521	Capabilities of transformation from carbon-based into a sustainable and low-emission energy mix: Case study for Poland.	Jakub Przybylski, Wojciech Lyzwa, Michal Wierzbowski
526	Aspects of Advancement of Distribution Tariffs for Small Consumers in Finland	Kimmo Lummi, Antti Rautiainen, Pertti Järventausta, Kaisa Huhta, Kim Talus, Matti Kojo
532	Trading on local energy markets: A comparison of market designs and bidding strategies	Esther Mengelkamp, Philipp Staudt, Johannes Gärttner, Christof Weinhardt
538	How to improve Standard Load Profiles: Updating, Regionalization and Smart Meter Data	Daniel Scholz, Felix Müsgens
544	Design of Grid Tariffs in Electricity Systems with Variable Renewable Energy and Power to Heat	Klaus Skytte, Emilie Rosenlund Soysal, Ole Jess Olsen, Claire Bergaentzle
551	Integration of wind power – challenges and options for near term market integration and its impact on future cross sectorial use	Philip Tafarte, Patrick Buck
556	Resilience in the German natural gas network - Modelling Approach for a High-Resolution Natural Gas System	Philipp Hauser, Hannes Hobbie, Dominik Möst
562	Willingness to pay for green energy: an agent-based model in NetLogo platform	Anna Kowalska-Pyzalska
568	An Analysis of Market Mechanism and Bidding Strategy for Power Balancing Market Mixed by Conventional and Renewable Energy	Bo Jie, Takao Tsuji, Kenko Uchida
573	Impacts of offshore grid developments in the North Sea region on market values by 2050: How will offshore wind farms and transmission lines pay?	Thure Traber, Hardi Koduvere
579	Short-term forecasting of electricity prices with a computationally efficient hybrid approach	Rodrigo Marcos, Antonio Bello, Javier Reneses
585	Volatility spillovers in the Iberian electricity market	João Vicente, Ana Martins, João Lagarto, Jorge Sousa
590	Regulatory barriers for activating flexibility in the Nordic-Baltic electricity market	Claire Bergaentzle, Boscán Luis, Emilie Rosenlund Soysal, Klaus Skytte, Daniel Møller Sneum, Ole Jess Olsen
596	The role of public investment & development banks in enabling or constraining new power generation technologies	Bjarne Steffen, Tobias Schmidt
602	Economic Potential of Water Electrolysis within Future Electricity Markets	Lara Lück, Patrick Larschied, Andreas Maaz, Albert Moser
608	Towards a simplified approach for modeling policymaker's decisions in the power sector	Salvador Doménech, Martínez José Villar, Alberto Campos, Michel Rivier
613	The Operational Difficulty of Standardizing Frequency Restoration Products	Marc Scherer, Michael Pfister, Gabriela Hug
619	The end of long-term contracts? Gas price and market dynamics in Central and Eastern Europe	Jakob Wachsmuth, Barbara Breitschopf, Vija Pakalkaite
625	Hybrid-Heating-Systems in Lokal Virtual Power Plants	Liya Ma, Jens Werner, Tobias Heß, Peter Schegner
630	Power market impacts of increased use of electricity in the heating sector	Torjus Folsland Bolkesjo, Jon Gustav Kirkerud, Erik Trømborg
636	Electricity and telecommunication markets: A discussion of market designs	Philipp Staudt, Johannes Gärttner, Christof Weinhardt
642	Short-Term Load Forecasting of Multiregion Systems Using Mixed Effects Models	Miguel Lopez, Sergio Valero, Antonio Gabaldon, Carolina Senabre
647	Energy markets impact on the risk of cascading failures in power systems	Bing Li, Giovanni Sansavini
653	Analysis of redispatch and transmission capacity pricing in a local electricity market setup	Philipp Staudt, Johannes Gärttner, Franziska Wegner, Christof Weinhardt
659	Value Assessment of Aggregated Energy Flexibility when traded on Multiple Markets	Pamela MacDougall, Bob Ran, Michiel Klever, Geert Deconinck
665	Reduced Transmission Grid Representation using the St. Clair Curve applied to the Electric Reliability Council of Texas	Henry Martin, Thomas Deetjen, Thomas Hamacher, Michael Webber
670	Energy Flexibility in Retail Buildings: from a Business Ecosystem Perspective	Zheng Ma, Joy Dalmacio Billanes, Mikkel Baun Kjærgaard, Bo Nørregaard Jørgensen
676	Forecasting Volatility in the EPEX market	Aitor Ciarreta, Peru Muniain Ainhua Zarraga
681	Allocation of nodal costs in heterogeneous highly renewable European electricity networks	Mirko Schäfer, Leon Schwenk-Nebbe, Jonas Hörsch, Bo Tranberg, Martin Greiner
687	Ancillary services – between need for a market and decentral business cases	Judith Litzenburger
692	Transparency versus efficiency in the MIBEL market	Nuno Fidalgo, Paulo Rocha

698	Defining a day-ahead spot market for unbundled time-specific renewable energy certificates	Christian Will, Patrick Jochem, Wolf Fichtner
704	Social Welfare of Balancing Markets	Pavel Zolotarev
710	Heterogeneity of Intermittent Energy Sources and Cost-effective Renewable Policies	Clemens Streitberger, Jan Abrell, Sebastian Rausch
716	Carbon Leakage and Competitiveness: Socio-economic Impacts of Greenhouse Gas Emissions Decrease on the European Area Until 2050	Roland Cunha Montenegro, Ulrich Fahl
721	Market integration VS Temporal granularity: how to provide needed flexibility resources?	Olivier Borne, Yannick Perez, Marc Petit
728	Future Electricity Market Structure to Ensure Large Volume of RES	Artjoms Obushevs, Irina Oleinikova, Mazheruddin Syed, Ammar Zaher, Graeme Burt
734	The Value of Energy Storages under Uncertain CO <sub>2</sub> -Prices and Renewable Shares	Christoph Zöphel, Dominik Möst
739	Minimization of Distribution System Losses By Exploiting Storage and Anticipating Market-Driven Behavior of Wind Power Producers	Mana Farrokhsesht, Nikolaos G. Paterakis, Madeleine Gibescu, J.G. Han Slootweg
745	Improving gradient constraint of complex energy orders on power exchanges	Anna Mogyorósi, Daniel Divenyi
750	Nuclear and Coal Moratoria Effects on the European Electricity System	Jonas Savelsberg, Carla Mendes, Hannes Weigt
756	Network Pricing for Smart Grids considering Customers' Diversified Contribution to System	Xinhe Yang, Xiaohu Yan, Chenghong Gu, Furong Li
761	Google Searches and Gasoline Prices	Peter Molnár, Milan Bašta
766	Policies for an EU smarter grid environment: A Delphi study on DSOs	Guillermo Ivan Pereira, Patricia Pereira da Silva, Deborah Soule
772	Valuation of Contract Between Power supplier and Electric Vehicle Owner	Josip Vasilj, Sebastien Gros, Ivan Krasic, Anders Grauers
778	Structural breaks in emission allowance prices	Peter Molnár, Sven Thies
783	Economic evaluation in using storage to reduce imbalance costs of renewable power plants sources	Daniele Menniti, Pasquale Vizza, Anna Pinnarelli, Nicola Sorrentino, Alessandro Burgio, Gianni Brusco
789	Comparison of techno-economic characteristics of different flexibility options in the European energy system	Julia Michaelis, Theresa Müller, Ulrich Reiter, Francesca Fermi, Artur Wyrwa, Yi-kuang Chen, Christoph Zöphel, Nicolas Kronthaler, Rainer Elsland
794	Considering power plants mothballing in long term simulation models for liberalized power markets	Ahmed Ousman Abani, Vincent Rious, Marcelo Saguan, Nicolas Hary
800	Modelling of Demand Response for Utility's Load Forecasting	Smita Lokhande, Yogesh Kumar Bichpuriya, Vishnu P. Menon
806	The Accuracy of Wind Energy Forecasts and Prospects for Improvement	Kevin Forbes, Ernest Zampelli
812	The effects of harmonized European climate policy targets in comparison to national targets utilizing a European electricity market model	Lukas Nacken, Thomas Möbius
817	Electricity Market Equilibria and Intermittent Renewables – A Stochastic Approach	Thomas Möbius, Felix Müsgens
822	Value of multi-market trading for a hydropower producer	Marte Fodstad, Mats Mathisen Aarlott, Kjetil Midthun
828	Cross Border Commercial Flow of Electricity for Germany: What does market data tell us?	Samarth Kumar, Dominik Möst
834	Capacity sharing – economic analysis of home battery systems	Rafal Dzikowski, Blazej Olek
839	Assessing the Flexibility Potential of the Residential Load in Smart Electricity Grids – A Data-Driven Approach	Delaram Azari, Shahab Shariat Torbaghan, Hans Cappon, Madeleine Gibescu, Karel Keesman, Huub Rijnaarts
845	Where are the electricity load hotspots in 2035? A load curve analysis considering demographic and technological changes	Anna-Lena Klingler, Rainer Elsland, Tobias Boßmann
851	Climate policy beyond the European Emissions Trading System: Spotlight on the Transport Sector in Germany	Heidi Ursula Heinrichs, Jochen Linssen, Bastian Gillesen
857	Combined power market and power grid modeling – First results of the project "SystemKontext"	Denis Mende, Diana Böttger, Lothar Löwer, Irina Ganai, Stefan Bofinger
863	Procurement of network loss - system operators as traders?	Dániel Divényi, Péter Márk Sörös, Dávid Raisz
869	Market-based business model for flexible energy aggregators in distribution networks	Jernej Zupančič, Tomi Medved, Blaz Prislan, Edin Lakić, Andrej Gubina
875	A review of business models for small prosumers in a post-RES subsidy and post-priority dispatch world	Tomi Medved, Jernej Zupančič, Edin Lakić, Andrej Gubina

881	Modelling the potential impacts of locational versus system-wide strike prices in contracts for difference for low carbon generation	Shona Pennock, Simon Gill, Keith Bell
887	Estimation of electricity value for households participating in demand response programs	Jerzy Andruszkiewicz, Jozef Lorenc, Piotr Piasecki
893	Short Term Clearing of Capacity Markets: An Alternative Approach to Capacity Pricing	Ariobarzan Sadeghi, Shahab Shariat Torbaghan, Madeleine Gibescu
899	Power parks for maximization of renewable energy consumption	Mateusz Andrychowicz, Blazej Olek
904	Modeling the impact of energy efficiency in the electricity consumption of the Brazilian tertiary sector	Bruno Quaresma Bastos, Giacomo Catenazzi, Rodrigo Flora Calili, Reinaldo Castro Souza, Fernando Luiz Cyrino Oliveira
910	Energy storing vs. generation curtailment – the measures for controlling renewable generation	Mateusz Andrychowicz, Blazej Olek
915	Assessment of nodal pricing applied to imbalance settlement: approaches and issues for implementation in zonal markets	Alessandro Zani, Dario Siface, Maria Vittoria Cazzol, Stefano Rossi
921	Using electric vehicles as flexible resource in power systems: case study in the Netherlands	Sylvain Quoilin, Agnese Beltramo, Christian Thiel
927	Assessing the Adaption of Stochastic Clearing Procedure to a Hydro-penetrated Market	Nilufar Neyestani, Filipe Joel Soares, Rui Alves, Francisco S. Reis, Ricardo Pastor
933	A framework for ancillary services design	Samuel Glismann, Frank Nobel
939	How to handle generation at the lowest grid levels in network charges	Christine Brandstätt
943	The review of market power detection tools in organised electricity markets	Edin Lakić, Tomi Medved, Jernej Zupančič, Andrej Gubina
949	Impacts of Different European Renewable Expansion Strategies on the Future Demand for Flexibility Options Like Storage and Transmission Grid	Mathis Buddeke, Frank Merten, Kamail Rodzynko
955	Real time data analytics platform for power grid smart applications	Manolis Vavalis, Nihla Akram, Magda Foti, Miyuru Dayarathna, Sanjaya De Silva, Malith Jayasinghe
961	Regional Effects of Hydrogen Production in Congested Transmission Grids with Wind and Hydro Power	Espen Flo Bødal, Magnus Korpås
967	Integrating Balancing Reserves and Congestion Management to Re-balance the German System	Carla Mendes, Jonas Hörsch
973	New market roles changing the electricity market model	Beáta Polgári, Péter Sörös, Dániel Divényi, Ádám Sleisz
979	Agent-based Model of the German Heating Market: Simulations concerning the Use of Wood Pellets and the Sustainability of the Market	Beatriz Beyer, Jutta Geldermann, Lars-Peter Lauen
985	Scenarios for Decarbonizing the European Electricity Sector	Clemens Gerbaulet, Christian von Hirschhausen, Claudia Kemfert, Casimir Lorenz, Pao-Yu Oei
991	Direct current market coupling: Sweden – Poland – Lithuania – Sweden	Waldemar Niewiadomski, Michal Wierzbowski
996	Market coupling and the impact of cross border flows on the balancing of power demand	Aleksandra Baczynska, Michal Wierzbowski
1001	Balancing Reserves within a Decarbonized European Electricity System in 2050 - From Market Developments to Model Insights	Casimir Lorenz, Clemens Gerbaulet
1009	PV-Battery Community Energy Systems: Economic, Energy Independence and Network Deferral Analysis	Han Wang, Nicholas Good, Pierluigi Mancarella, Kerry Lintern
1014	Designing retail tariffs to decarbonise the electricity system	Lisa Ryan, Sarah La Monaca, Linda Mastrandrea
1020	Cost of Deficit Function: Conceptual and Methodological Aspects with an Evaluation of Impacts on the Operation and Expansion of the Brazilian Electricity Sector	Clarissa Petrachini Goncalves, Dorel Soares Ramos, Marcos Basile Saviano de Paula
1025	The role of spatial scale in joint optimisations of generation and transmission for European highly renewable scenarios	Jonas Hörsch, Tom Brown, Stefan Schramm
1032	What is the impact of the EU Energy Union on electricity prices? Results for selected member states	Barbara Breitschopf, Jakob Wachsmuth
1038	The Division of the Common German-Austrian Electricity Market from a Legal Perspective	Hans Kristoferitsch, Florian Stangl
1044	Solar Energy for Decentralized Energy Supply: a real option approach	Gheisa Roberta Telles Esteves, Igor Michel Santos Leite

<b>1050</b>	POTEnCIA: A new EU-wide energy sector model	Leonidas Mantzos, Nicoleta Anca Matei, Máté Rózsai, Peter Russ, Antonio Soria Ramirez
<b>1055</b>	Capacity market in Poland – evalutaion of the proposed solution	Izabela Filipiak, Michał Wierzbowski
<b>1060</b>	Modeling of Wind Speed Spatio-Temporal Series by Multivariate-GARCH and Copula/GARCH models	Carlo Lucheroni, Constantino Ragno
<b>1066</b>	Macro environmental analysis of the electric vehicle battery second use market	Robert Reinhardt, Santiago Gassó Domingo, Beatriz Amante García, Ioannis Christodoulou
<b>1072</b>	Exceptional Events Classification in the Portuguese Quality of Electricity Supply Regulation	Jorge Esteves, Sergio Faias, Hugo Pousiho, Susana Dias, Neuza Costa, Alexandre Santos
<b>1078</b>	Robust Transmission Planning – An Application to the Case of Germany in 2050	Alexander Weber, Clemens Gerbaulet, Christian von Hirschhausen, Jens Weibezahn
<b>1084</b>	Cluster-based regime-switching AR for the EEM 2017 Wind Power Forecasting Competition	Jethro Browell, Ciaran Gilbert
<b>1090</b>	EEM 2017 Forecast Competition: Wind power generation prediction using autoregressive models	Ilias Dimoulkas, Peyman Mazidi, Lars Herre
