Contents

Cover.....	1
Committees.....	2
Sponsors.....	6
Program.....	7
Contents.....	8
Authors.....	9
1. Power factor metering system using Arduino.....	12
2. Analysis of Harmonic Distortion Generated by PWM Motor Drives.....	18
3. Power Quality Analysis of a 6 kW Photovoltaic System Interconnected with the Distribution Grid of a Laboratories Building.....	24
4. Implicit PV Cell Parameters Estimation used in Approximated Closed-Form Model for Inverter Power Control.....	30
5. Li- Ion Battery management system based in Fuzzy Logic for improving Electric Vehicle Autonomy.....	36
6. A Procedure for Power Electronic Converters Design with Controllability Verification Based on the Nonlinear Dynamical Model.....	42
7. IEC61850-based Protection System for MV/LV Substations.....	48
8. Very Short Term Forecasting in Global Solar Irradiance using Linear and Nonlinear Models.....	53
9. Shunt active power filter application to reduce the harmonics of current with photovoltaic generation grid-tied.....	58
10. Comparison of losses of a transformer for a 12 pulse rectifier using cosimulation and the procedure established in IEEE 57.110 standard....	64
11. A Robust Multi-Loop Linear Controller for Transformer-Based Single-Phase PWM Inverter.....	71
12. Doubly Fed Induction Generator Model for Power Quality Studies.....	79
13. A Low-cost Adjustable Speed Drive for Three Phase Induction Motor.....	85
14. Customizing Controls for DER Interconnection Analysis Using Open Source Simulation Tools.....	89
15. OpenDSS and OpenDSS-PM Open Source Libraries for NI LabVIEW.....	95
16. Multi-rate Control Mode for Maintaining Fidelity in Quasi-Static-Time-Simulations.....	100
17. Frequency Domain Modeling of Nonlinear Loads, considering Harmonic Interaction.....	105
18. Wind Turbine Electronic Emulator Using Park Transform for Power Control.....	111
19. Adaptive model for a variable load in a distribution network using a neuro-fuzzy system.....	117
20. Robust Control QFT Position for Brushed DC Motor.....	124
21. Optimal Placement of Edge-of-Grid Low-voltage SVCs in Real-world Distribution Circuits.....	130
22. Function Test by HIL for DC-DC converters type: Buck, Boost and Buck-Boost.....	136
23. Efficiency-THD ratio in three-phase cascaded multilevel power converters of single DC source.....	142
24. Aging of Distribution Transformers due to Voltage Harmonics.....	147
25. Mitigation of CM Conducted EMI in SMPS.....	152
26. Waveform Characteristics Assessment by the Operation of Protective Devices.....	158
27. Modeling of a Centralized Microgrid Protection Scheme.....	164
28. Application of Complexity Theory to Hydro-Turbine Maintenance.....	170
29. Control of Grid-tied Photovoltaic Systems with Neutral Point Clamped Inverters.....	176
30. Modeling and Control of a Grid Tied Differential Cuk Inverter.....	182
31. Prototype for the Characterization of Photovoltaic Panels based on a SEPIC Converter.....	191
32. Impact analysis of wind turbine and battery energy storage connection in power systems.....	197
33. Co-simulation strategy of PV hosting capacity applying a stochastic analysis.....	203
34. Simulation interface to reproduce signals with harmonic distortion of distribution systems in real-time.....	209
35. Adaptive Control of a PFC Batteries Charger.....	214
36. Analysis and Design of the Power Conditioning Unit of a Nanosatellite.....	220
37. Design and Implementation of Proportional-Resonant Controller for 3-Phase Current Source Inverter In Dspace DS1104.....	226
38. Particle Swarm Optimization applied to Economic Dispatchs.....	232
39. Reliability Improvement in an Isolated Microgrid Considering Demand Side Management.....	237
40. Experimental evaluation of the voltage unbalance in the efficiency of induction motors.....	243
41. Limitations of buck converter control implementation using the natural switching surfaces.....	249
42. Evaluation of maximum power point tracking algorithms for small satellites.....	255
43. Assessment of Multi-level Inverters for Low and Medium Voltage Applications.....	260
44. Self-balancing Control Strategy for a Battery Based H-Bridge Multilevel Inverter.....	266
45. Module for Recording Voltage Sags in Low Voltage Systems.....	273
46. Optimization of two operation strategies for batteries in the low voltage grid.....	279
47. Impact of Different DG Location on Chargeability and Voltage Level of Distribution Networks.....	285
48. Demand Flexibility Assessment for Residential Customers.....	291
49. Control techniques for interleaved DC/DC converters with magnetic coupling.....	296
50. Performance and Economical Comparison between Micro-Inverter and String Inverter in a 5,1 kWp.....	302
51. Harmonic Distortion Assessment and Visualization for Power Transmission Systems.....	307
52. Design of an Embedded Hardware for Motor Control of a High Performance Electric Vehicle.....	313
53. Evaluation of MPPT Methods Using Fuzzy Logic Applied to a Low Power Wind Turbine.....	318
54. Simulation of Supraharmonics: A Compact Fluorescent Lamp (CFL) in single operation.....	324
55. Bidirectional Multiport Microinverter and Grid Multimode-Operation Control for a Non-linear Load	330
56. A modular power electronics/control systems laboratory as educational tool for electrical engineering courses.....	336
57. Analysis of Voltage Sags Propagation in Distribution Grids Using a SI Epidemic Model.....	341
58. Behavior of Phase Voltages due to Faults in Radial Power Systems: An Educational Tool.....	347
59. Development of a platform for analysis and characterization of power quality disturbances.....	353
60. Detailed modelling and simulation of photovoltaic systems.....	359
