## Section I. Semiconductor Physics and Technology. Photovoltaics

Section Chair: **Viktor A. Gridchin**

|    |                                                                                                                                                                                                                                                                                             |    |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 1. | <b>Effect of Ultrasonic Treatment on the X-band Microwave Absorption of Multiwalled Carbon Nanocomposite</b><br><i>Olga A. Dotsenko, Anastasia O. Kachusova</i>                                                                                                                             | 3  |
| 2. | <b>Investigation of the Cyclotron Resonance in a Semiconductor Film Having Cubic Structure</b><br><i>Aleksey G. Moiseev, Yakov S. Greenberg, Nurgali Z. Altynbekov, Yan Z. Ososkov</i>                                                                                                      | 7  |
| 3. | <b>Determination's Principles of Critical Concentration of Mobile Charges in the Oxide and Geometrical Configuration of Heterogeneous Surface Transfer Transistor Gate Matrix of Photodetector</b><br><i>Anna M. Nogovitsyna, Gennady V. Perov</i>                                          | 12 |
| 4. | <b>Features of Photoconductivity of PbSnTe:In Films Under the Variable Illumination</b><br><i>Aleksey N. Akimov, Denis V. Ishchenko, Alexander E. Klimov, Nikolai S. Paschin, Artem N. Papantonopulo, Valentina N. Sherstyakova</i>                                                         | 18 |
| 5. | <b>Influence of A<sup>III</sup>B<sup>V</sup> Substrate Morphology on Congruent Temperature under Langmuir Evaporation Conditions</b><br><i>Anna A. Spirina, Alla G. Nastovjak, Nataliya L. Shwartz</i>                                                                                      | 22 |
| 6. | <b>The Conductivity Switch Effect in PbSnTe:In Thin Films</b><br><i>Aleksey N. Akimov, Vladimir S. Epov, Alexander E. Klimov</i>                                                                                                                                                            | 27 |
| 7. | <b>Planar Barrier Structures Based on Thin Films of Pb<sub>1-x</sub>Sn<sub>x</sub>Te:In for the Far IR Photodetector: Preparation and Properties</b><br><i>Aleksey N. Akimov, Denis V. Ishchenko, Alexander E. Klimov, Nikolai S. Paschin, Andrey S. Tarasov, Valentina N. Sherstyakova</i> | 30 |
| 8. | <b>Numerical Simulation of the Complementary Bipolar Pair of Transistors in the Hydrodynamic Approximation</b><br><i>Mikhail O. Hrapov, Victor A. Gridchin, Sergey V. Kalinin</i>                                                                                                           | 34 |
| 9. | <b>Analytical Model of Photoelectric Pressure Sensor</b><br><i>Artyom S. Chernov, Victor A. Gridchin</i>                                                                                                                                                                                    | 37 |

## Section II. Radio- and Microwave Technology.

## Computer Science and Telecommunications

Section Chair: **Svetlana V. Vorobiova**

|    |                                                                                                                                                                                                         |    |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 1. | <b>Architecture of Multithreaded Network Scanner</b><br><i>Anton V. Arzhakov, Dmitry S. Silnov</i>                                                                                                      | 43 |
| 2. | <b>Experimental Confirmation of the Modal Filtration in Four- and Five-conductor Microstrip Lines</b><br><i>Anton O. Belousov, Alexander M. Zabolotsky, Timur T. Gazizov</i>                            | 46 |
| 3. | <b>Research of a Possibility of Resonator Diagnostics of Thin Filamentary Objects in a Low Part of the Terahertz Frequency Band</b><br><i>Vitaly V. Bessonov, Kirill V. Dorozhkin, Igor O. Dorofeev</i> | 50 |
| 4. | <b>Quasistatic and Electromagnetic Simulation of Interconnects of Printed Circuit Boards with Modal Reservation</b><br><i>Pavel E. Orlov, Evgeniy N. Buichkin</i>                                       | 54 |
| 5. | <b>Some Aspects of Layout Design of Quadrature Mixers</b><br><i>Anatoly V. Kosykh, Sergey A. Zavyalov, Ruslan A. Wolf, Rodion R. Fakhrutdinov, Konstantin V. Murasov</i>                                | 59 |

|     |                                                                                                                                                                                                                                                                  |     |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 6.  | <b>Software Implementation of the Method of Synthesis of Broadband Matching Devices with Linear Phase</b><br><i>Dmitry I. Volkhin, Gennady N. Devyatkov</i>                                                                                                      | 64  |
| 7.  | <b>Influence of Ultrashort Pulse Duration on Its Peak Values Localization in PCB of Spacecraft Autonomous Navigation System</b><br><i>Ruslan R. Gazizov, Alexander M. Zabolotsky, Timur T. Gazizov, Anton O. Belousov</i>                                        | 69  |
| 8.  | <b>Study of the Intentional Influence Ultrashort Electromagnetic Pulses on Electronic Equipment Aircraft</b><br><i>Rustam R. Gaynutdinov, Sergey F. Chermoshentsev</i>                                                                                           | 75  |
| 9.  | <b>HTS Microwave Power Limiter Based on Microstrip Quarter-Wave Resonators</b><br><i>Ilya V. Govorun, Aleksandr A. Leksikov</i>                                                                                                                                  | 80  |
| 10. | <b>Investigation of Gibbs Fields Modeling Procedures Convergence</b><br><i>Anna Yu. Zaitseva, Irina A. Denisenko</i>                                                                                                                                             | 83  |
| 11. | <b>Checking Software Security Using EFSMs</b><br><i>Anton D. Ermakov, Svetlana A. Prokopenko, Nina V. Yevtushenko</i>                                                                                                                                            | 87  |
| 12. | <b>Possibilities of a Two-Point Model, Radiating Correlated Signals</b><br><i>Aleksey V. Kiselev, Timur I. Sabitov, Maxim A. Stepanov</i>                                                                                                                        | 91  |
| 13. | <b>The Capacity Estimation of Real Selective Chains under the Influence of PSK-n-signals</b><br><i>Ilya M. Lerner, German I. Il'in, Sergey M. Chernyavskii</i>                                                                                                   | 94  |
| 14. | <b>Miniature Branch-Line Coupler Structure Analysis</b><br><i>Denis A. Letavin</i>                                                                                                                                                                               | 99  |
| 15. | <b>Study of the Compact Structure of Quadrature Phase Inverter</b><br><i>Denis A. Letavin</i>                                                                                                                                                                    | 102 |
| 16. | <b>Compact Bandpass Filter with Microstrip Resonators</b><br><i>Denis A. Letavin</i>                                                                                                                                                                             | 105 |
| 17. | <b>High-Pass Filters with Round Spiral Resonators and Interdigitated Capacitors</b><br><i>Denis A. Letavin</i>                                                                                                                                                   | 108 |
| 18. | <b>Study and Implementation of Authentication Mechanism by RADIUS-server in Switches and Routers Using NETCONF Protocol</b><br><i>Aleksandr E. Maslov, Sergei L. Katuntsev, Aleksandr A. Maliavko</i>                                                            | 111 |
| 19. | <b>The Algorithm for Calculating Reflecting Signal Power Characteristics Based on Terrain Digital Map</b><br><i>Aleksey V. Kiselev, Andrey V. Nikulin, Vadim V. Artyushenko</i>                                                                                  | 115 |
| 20. | <b>Delay Line Protecting against Ultrashort Pulses with Increased Duration</b><br><i>Alexander V. Nosov, Roman S. Surovtsev, Timur T. Gazizov</i>                                                                                                                | 119 |
| 21. | <b>The Method for Increasing the Accuracy of Time Shift Estimation for OFDM Signals</b><br><i>Eugeny V. Rogozhnikov</i>                                                                                                                                          | 123 |
| 22. | <b>Application of a CPU Streaming Technology to Work of the Computer with Data Coming from the Network on the Example of a Heating Station</b><br><i>Dina A. Rybakova, Indira K. Sygynganova, Saule K. Kumargazhanova, Aleksandr E. Baklanov, Olga Y. Shvets</i> | 128 |
| 23. | <b>Two-Point Model Composed of Radiators of Correlated Signals</b><br><i>Aleksey V. Kiselev, Timur I. Sabitov, Maxim A. Stepanov</i>                                                                                                                             | 131 |
| 24. | <b>The Microwave Attenuator</b><br><i>Mikhail G. Rubanovich, Vladimir P. Razinkin, Vladimir A. Khrustalev, Alexey A. Stolyarenko, Pavel G. Bogomolov, Yuri V. Vostryakov</i>                                                                                     | 134 |
| 25. | <b>Unstable Object Parameters Estimation with One Input and Two Outputs in Automatic Control System</b><br><i>Galina V. Troshina, Alexander A. Voevoda, Kurbonmurod Bobobekov</i>                                                                                | 138 |
| 26. | <b>Integrated Low Noise Amplifiers for Cryogenic Applications</b><br><i>Anton A. Cherepanov, Vladislav Yu. Vasilyev</i>                                                                                                                                          | 142 |
| 27. | <b>Study Electromagnetic Disturbance in the Coupling Path of Aircraft at Interaction Microsecond Electromagnetic Pulses</b><br><i>Rustam R. Gaynutdinov, Sergey F. Chermoshentsev</i>                                                                            | 147 |
| 28. | <b>Using Models of Finite Transition Systems for Checking Web-Service Security</b><br><i>Anton V. Kolomeets, Natalia V. Shabaldina, Ekaterina V. Darusenkova, Nina V. Yevtushenko</i>                                                                            | 151 |

|     |                                                                                                                                                                                                                                                                                                       |     |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 29. | <b>Electrodynamic Characteristics of Periodic Nonlinear Composite Structures Based on Opal Matrices and Carbon Nanostructures with Ferromagnetic Inclusions</b><br><i>Dmitry A. Bezuglov, Marina Yu. Zvezdina, Gennady P. Sinyavsky, Larissa V. Cherkesova, George N. Shalamov, Yuliya A. Shokova</i> | 155 |
| 30. | <b>Terahertz Electronics of XXI–st Century on the Base of Ultraharmonic Resonance Circuits on the Magneto-optical Nanostructures</b><br><i>Pavel A. Churilov, Boris A. Akishin, Vitaly M. Porsheyev, Larissa V. Cherkesova, Irina S. Trubchik, George N. Shalamov</i>                                 | 163 |
| 31. | <b>Cross-Platform Software and Hardware Solutions for the Problems of Analysis and Multi-Objective Optimization of the UL Throughput in LTE Networks</b><br><i>Ruslan V. Akhpashev, Vera G. Drozdova, Andrey V. Andreev, Gregory G. Patrushev</i>                                                     | 174 |
| 32. | <b>An Optimal Algorithm for the Discrimination of Multi-Element Information Signals in non-Gaussian CDMA Channels</b><br><i>Vladislav V. Kadushkin, Rashid R. Faizullin, Ilya M. Lerner</i>                                                                                                           | 177 |
