# 2017 4th Experiment@ International Conference (exp.at'17)

## Faro, Portugal
## 6 – 8 June 2017

**IEEE Catalog Number:** CFP17EXP-POD
**ISBN:** 978-1-5386-0811-1

# Table of Contents

| Title | Page range |
|---|---|
| A teacher training workshop to promote the use of the VISIR Remote Laboratory for electrical circuits teaching | 1-6 |
| The VISIR+ Project – Helping Contextualize Math in an Engineering Course | 7-12 |
| Science Education at High School: a VISIR Remote Lab Implementation | 13-17 |
| Starting the Study of Electronic Circuits with VISIR. Viewpoints of college students in a Pilot Test in Argentina | 18-23 |
| VISIR federation: Initial building steps - PILAR experience – work in progress | 24-27 |
| A Federation of VISIR remote laboratories through the PILAR Project | 28-32 |
| Using Cloud Web Services to Intermediate Communication in ISA / ELSA | 33-36 |
| Automatic Generation of Web Client Interfaces for Remote Execution of Matlab Simulations | 37-42 |
| Semantic Web Thing Architecture | 43-46 |
| Assisting Students in Online Experimentation | 47-51 |
| Web Physics Ontology | 52-57 |
| Collection and dissemination of data from environmental monitoring systems in estuaries | 61-64 |
| Improving the response to operational pollution in the South Iberian coast | 65-70 |
| Collection, analysis and on-line experimentation of ocean color remote sensing data | 71-76 |
| Collaborative BIM environment as a support in conflict analysis in building design | 77-82 |
| Virtual Reality for Real Estate - its evolution in Bluemind Software | 83-86 |
| Improving robot teleoperation experience via immersive interfaces | 87-92 |
| Online demonstration of a EEG-based drowsiness detection | 93-94 |
| An online collaborative environment for rehabilitation using instrumented devices | 95-96 |
| Analysis and pattern identification on smart sensors data | 97-98 |
| Online Identification of Unknown System in Adaptive Filtering Laboratory | 99-100 |
| The remote lab "Nexys 2 FPGA platform" aimed for learning design of digital circuits | 101-102 |
| Remote Control of Pneumatic Circular Manipulator Using CEyeClon Platform | 103-104 |
| Programming and Testing a PLC to control a Scalable Industrial Plant in Remote Way | 105-106 |
| Mixed Reality Voice Training for Lecturers | 107-108 |
| RoboBlock: A Remote Lab for Robotics and Visual Programming | 109-110 |
| Low cost air levitation remote lab | 111-112 |
| Design and instrumentation of a magnetic field micro-probe mapper | 113-114 |
| Affordable LTE Network Benchmarking Based on Transport Fleets | 115-116 |
| Action Learning-Based MOOC to Enhance Laboratory Learning Outcomes | 117-118 |
| Virtual Reality as a Training Tool For Human Interactions | 119-120 |
| Puzzle Time - VR Runner | 121-122 |
| Development of a FEM-Lab for the virtual experimentation in forming processes | 123-124 |
| Application of virtual reality techniques to a birth simulation | 125-126 |
| A web GIS-based platform to assist authorities in emergency response using VGI and sensor data | 127-128 |
| An IoT remote lab for seismic monitoring in a programming course | 129-130 |
| Web-based Platform for River Flood Monitoring | 131-132 |
| Device for hand rehabilitation in online collaborative environment | 133-134 |

| Title | Page range |
|---|---|
| Adding augmented reality to laboratory experimentation | 135-136 |
| An educational kit to teach and learn Operational Amplifiers | 137-138 |
| Blockly experiments for EjsS laboratories | 139-140 |
| Demonstration of Deep Drawing Experiments in a Remote Lab Environment | 141-142 |
| A New Open-Source and Smart-Device Accessible Remote Control Laboratory | 143-144 |
| Virtual Lab for Material Testing using Oculus Rift | 145-146 |
| Experiments on Optical Spectrometry in the VirtualRemoteLab | 147-148 |
| VENTI: experimental controller for inline duct fan | 149-150 |
| Exploring Avatar Interactions to Trigger Social Identity-Related Responses | 151-152 |
| Virtual transportation for immersive systems | 153-154 |
| A Simple Browser-based 3D-Sketching Framework for Novice and Infrequent Users | 155-156 |
| An immersive Virtual Reality interface for Civil Engineering dissemination amongst pre-university students | 157-158 |
| Using Marker based Augmented Reality and Natural User Interface for Interactive Remote Experiments | 159-164 |
| Potential for Utilising Head-Mounted Displays (HMDs) for Augmenting Laboratories | 165-170 |
| Offline and Online Deep Learning for Image Recognition | 171-175 |
| Educational games for children with special needs: preliminary design | 176-180 |
| Communication Model of Open Government Data Gamification Based on Ukrainian Websites | 181-186 |
| A Serious Game Concept to Enhance Students' Learning of Statistics | 187-190 |
| Application of remote experiments in a secondary school using MOOC approach | 191-195 |
| Remote Renewable Energy Laboratory - Green Electric Energy Park (GEEP) | 196-201 |
| Evaluation of on-line simulation tools to teach Chemical Processes | 202-207 |
| Cloud Ecosystem for Supporting Inquiry Learning with Online Labs: Creation, Personalization, and Exploitation | 208-213 |
| Integration of VGI and sensor data in a Web GIS-based platform to support emergency response | 214-219 |
| Geosensing-Based Platform for Supporting Operational River Flood Forecast | 220-225 |
| Temperature time series: pattern analysis and forecasting | 226-231 |
| Remote Control of Plasma Diagnostics System for Tokamak Facility | 232-235 |
| An Internet of Laboratory Things | 236-240 |
| Browser-Enabled Distributed Crowdsensing | 241-246 |
| Comparison of the effectiveness of Logisim software tool and remote experiments based on Nexys 2 FPGA platform in learning digital circuits design | 247-252 |
| Usefulness of remote experiments | 253-257 |
| Ball & Beam experiment control with current sensing | 258-263 |
| Simple Experiment Integration into Modular Online Laboratory Environment | 264-268 |
| Experimenting with Constrained Dead Time Compensators for FOTD Systems | 269-274 |
| Simulation Tool for Time Sub-Optimal Control of Time-Delayed Systems with Input Saturation | 275-279 |
| Ultrasonic indoor positioning for smart environments: a mobile application | 280-285 |
| Flood Management in Urban Drainage - Contributions for the Control of Water Drainage Systems using Underground Barriers | 286-291 |
| A demonstration circuit to support (e-)learning control systems engineering | 292-296 |
| Control System for a Self-Balancing Robot | 297-302 |
| WEB PLC Simulator for ST Programming | 303-308 |
| Creative developments in LabVIEW student training (Creativity Laboratory – LabVIEW Academy) | 309-312 |
| Analog computing with Pocket Labs | 313-317 |
| EEG-based drowsiness detection platform to compare different methodologies | 318-322 |
| Towards the use of commercial wrist wearables in education | 323-328 |
| Sensory System for the Sleep Disorders Detection in the Geriatric Population | 329-334 |
