## **ICDCSW 2017**

### **Table of Contents**

|                                                                     |         |
|---------------------------------------------------------------------|---------|
| Message from the General Chairs and Program Chair .....             | xi      |
| Organizing Committee .....                                          | xiii    |
| Message from the Workshops Chairs .....                             | xiv     |
| Message from the ADSN 2017 Workshop Organizers .....                | xv      |
| ADSN 2017 Workshop Organizers .....                                 | xvii    |
| ADSN 2017 Keynote .....                                             | xix     |
| Message from the CCN-CPS 2017 Workshop Organizers .....             | xxi     |
| CCN-CPS 2017 Workshop Organizers .....                              | xxii    |
| Message from the HotPOST 2017 Workshop Organizers .....             | xxiv    |
| HotPOST 2017 Workshop Organizers .....                              | xxv     |
| HotPOST 2017 Keynote .....                                          | xxvii   |
| Message from the IoTCA 2017 Workshop Organizers .....               | xxix    |
| IoTCA 2017 Workshop Organizers .....                                | xxx     |
| IoTCA 2017 Keynote .....                                            | xxxi    |
| Message from the JCC 2017 Workshop Organizers .....                 | xxxii   |
| JCC 2017 Workshop Organizers .....                                  | xxxiii  |
| Message from the PED 2017 and BGP 2017 Workshop<br>Organizers ..... | xxxiv   |
| PED 2017 Workshop Organizers .....                                  | xxxv    |
| BGP 2017 Workshop Organizers .....                                  | xxxvi   |
| PED-BGP 2017 Keynote .....                                          | xxxvii  |
| Message from the PSBD 2017 Workshop Organizers .....                | xxxviii |
| PSBD 2017 Workshop Organizers .....                                 | xxxix   |
| PSBD 2017 Keynote .....                                             | xl      |
| Message from the WoSC 2017 Workshop Organizers .....                | xlii    |
| WoSC 2017 Workshop Organizers .....                                 | xliv    |
| WoSC 2017 Keynote .....                                             | xlvi    |
| Message from the NSF-JST 2017 Workshop Organizers .....             | xlvi    |

## **The 16th International Workshop on Assurance in Distributed Systems and Networks (ADSN 2017)**

|                                                                                                                                        |    |
|----------------------------------------------------------------------------------------------------------------------------------------|----|
| Understanding and Improving Temporal Fairness on An Electronic Trading Venue .....                                                     | 1  |
| <i>Hayden Melton</i>                                                                                                                   |    |
| CertificateLess Cryptography-Based Rule Management Protocol for Advanced Mission Delivery Networks .....                               | 7  |
| <i>Jongho Won, Ankush Singla, and Elisa Bertino</i>                                                                                    |    |
| Faulty Sensor Data Detection in Wireless Sensor Networks Using Logistical Regression .....                                             | 13 |
| <i>Tianyu Zhang, Qian Zhao, and Yukikazu Nakamoto</i>                                                                                  |    |
| An Adaptability-Enhanced Routing Method for Multiple Gateway-Based Wireless Sensor Networks Using Secure Dispersed Data Transfer ..... | 19 |
| <i>Ryuma Tani, Kento Aoi, Eitaro Kohno, and Yoshiaki Kakuda</i>                                                                        |    |
| A Progressive Download Method Based on Timer-Driven Requesting Schemes Using Multiple TCP Flows on Multiple Paths .....                | 26 |
| <i>Hiroaki Horiba, Tokumasa Hiraoka, and Junichi Funasaka</i>                                                                          |    |

## **The 2nd International Workshop on Communication, Computing, and Networking in Cyber Physical Systems (CCN-CPS 2017)**

|                                                                                                                                                                       |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Policies Guiding Cohesive Interactions Among Internet of Things with Communication Clouds and Social Networks .....                                                   | 32 |
| <i>Henry Hexmoor and Bidyut Gupta</i>                                                                                                                                 |    |
| Enhanced Security of Building Automation Systems Through Microkernel-Based Controller Platforms .....                                                                 | 37 |
| <i>Xiaolong Wang, Richard Habeeb, Xinming Ou, Siddharth Amaravadi, John Hatcliff, Masaaki Mizuno, Mitchell Neilsen, S. Raj Rajagopalan, and Srivatsan Varadarajan</i> |    |
| High Level Design of a Home Autonomous System Based on Cyber Physical System Modeling .....                                                                           | 45 |
| <i>Basman M. Hasan Alhafidh and William H. Allen</i>                                                                                                                  |    |
| A Cyber Physical Buses-and-Drones Mobile Edge Infrastructure for Large Scale Disaster Emergency Communications .....                                                  | 53 |
| <i>Mamta Narang, William Liu, Jairo Gutierrez, and Luca Chiaraviglio</i>                                                                                              |    |
| A Performance Comparison of Containers and Virtual Machines in Workload Migration Context .....                                                                       | 61 |
| <i>Y.C. Tay, Kumar Gaurav, and Pavan Karkun</i>                                                                                                                       |    |
| Towards Service-Oriented Middleware for Fog and Cloud Integrated Cyber Physical Systems .....                                                                         | 67 |
| <i>Nader Mohamed, Sanja Lazarova-Molnar, Imad Jawhar, and Jameela Al-Jaroodi</i>                                                                                      |    |
| Networking and Communication in Cyber Physical Systems .....                                                                                                          | 75 |
| <i>Imad Jawhar, Jameela Al-Jaroodi, Hassan Noura, and Nader Mohamed</i>                                                                                               |    |

|                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------|-----|
| Optimal Deployment of Charging Stations for Electric Vehicles: A Formal Approach .....                  | 83  |
| <i>Amarjit Datta, Brian K Ledbetter, and M. Ashiqur Rahman</i>                                          |     |
| Formal Verification of Control Strategies for a Cyber Physical System .....                             | 91  |
| <i>Amjad Gawanmeh, Ali Alwadi, and Sazia Parvin</i>                                                     |     |
| Lightweight Detection and Isolation of Black Hole Attacks in Connected Vehicles .....                   | 97  |
| <i>Sami S. Albouq and Erik M. Fredericks</i>                                                            |     |
| A New Threat Assessment Method for Integrating an IoT Infrastructure in<br>an Information System .....  | 105 |
| <i>Bruno Dorsemayne, Jean-Philippe Gaulier, Jean-Philippe Wary, Nizar Kheir,<br/>and Pascal Urien</i>   |     |
| A Security Framework for SDN-Enabled Smart Power Grids .....                                            | 113 |
| <i>Uttam Ghosh, Pushpita Chatterjee, and Sachin Shetty</i>                                              |     |
| Real-Time Monitoring of Steam-Based Electrical Generators Using a Multi-sensing<br>Imaging System ..... | 119 |
| <i>Mahmoud Meribout, Imran Saied, and Esra Al Hosani</i>                                                |     |
| Securing Big Data Efficiently through Microaggregation Technique .....                                  | 125 |
| <i>Shakila Mahjabin Tonni, Mohammad Zahidur Rahman, Sazia Parvin, and Amjad Gawanmeh</i>                |     |
| Model Based Energy Consumption Analysis of Wireless Cyber Physical Systems .....                        | N/A |
| <i>Jing Liu, Ping Wang, Jinlong Lin, and Chao-Hsien Chu</i>                                             |     |

## **The 9th International Workshop on Hot Topics in Planet-Scale Mobile Computing and Online Social Networking (HotPOST'17)**

|                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------|-----|
| A Markov Game Theoretic Approach for Power Grid Security .....                                         | 139 |
| <i>Gael Kamdem, Charles Kamhoua, Yue Lu, Sachin Shetty, and Laurent Njilla</i>                         |     |
| Router-Based Brokering for Surrogate Discovery in Edge Computing .....                                 | 145 |
| <i>Julien Gedeon, Christian Meurisch, Disha Bhat, Michael Stein, Lin Wang,<br/>and Max Mühlhäuser</i>  |     |
| Modeling the Spread of Influence for Independent Cascade Diffusion Process in Social<br>Networks ..... | 151 |
| <i>Zesheng Chen and Kurtis Taylor</i>                                                                  |     |
| Thank You For Being A Friend: An Attacker View on Online-Social-Network-Based<br>Sybil Defenses .....  | 157 |
| <i>David Koll, Martin Schwarzmaier, Jun Li, Xiang-Yang Li, and Xiaoming Fu</i>                         |     |
| Efficient Dynamic Service Function Chain Combination of Network Function<br>Virtualization .....       | 163 |
| <i>Wenke Yan, Konglin Zhu, Lin Zhang, and Sixi Su</i>                                                  |     |
| When Augmented Reality meets Big Data .....                                                            | 169 |
| <i>Carlos Bermejo, Zhanpeng Huang, Tristan Braud, and Pan Hui</i>                                      |     |
| Sampling Based Efficient Algorithm to Estimate the Spectral Radius of Large Graphs .....               | 175 |
| <i>Samar Abbas, Juvaria Tariq, Arif Zaman, and Imdadullah Khan</i>                                     |     |
| Extemporaneous Micro-Mobile Service Execution Without Code Sharing .....                               | 181 |
| <i>Zheng Song, Minh Le, Young-Woo Kwon, and Eli Tilevich</i>                                           |     |

|                                                                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Preventing Colluding Identity Clone Attacks in Online Social Networks .....                                                                              | 187 |
| <i>Georges A. Kamhoua, Niki Pissinou, S.S. Iyengar, Jonathan Beltran, Charles Kamhoua, Brandon L. Hernandez, Laurent Njilla, and Alex Pissinou Makki</i> |     |

## **International Workshop on the Internet of Things Computing and Applications (IoTCA 2017)**

|                                                                                                                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Towards Privacy-Aware Smart Buildings: Capturing, Communicating, and Enforcing Privacy Policies and Preferences .....                                                                                                             | 193 |
| <i>Primal Pappachan, Martin Degeling, Roberto Yus, Anupam Das, Sruti Bhagavatula, William Melicher, Pardis Emami Naeini, Shikun Zhang, Lujo Bauer, Alfred Kobsa, Sharad Mehrotra, Norman Sadeh, and Nalini Venkatasubramanian</i> |     |
| Deploying Data-Driven Security Solutions on Resource-Constrained Wearable IoT Systems .....                                                                                                                                       | 199 |
| <i>Hang Cai, Tianlong Yun, Josiah Hester, and Krishna K. Venkatasubramanian</i>                                                                                                                                                   |     |
| A Motif Based IoT Framework for Data Efficiency .....                                                                                                                                                                             | N/A |
| <i>Akash Sahoo and Rabi Mahapatra</i>                                                                                                                                                                                             |     |

## **The International Workshop on Privacy and Security in Big Data EcoSystem (PSBD 2017)**

|                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------|-----|
| A Novel Game-Theoretic Model for Content-Adaptive Image Steganography .....                                                    | 232 |
| <i>Qi Li, Xin Liao, Guoyong Chen, and Liping Ding</i>                                                                          |     |
| A Fine-Grained Access Control Scheme for Big Data Based on Classification Attributes .....                                     | 238 |
| <i>Tengfei Yang, Peisong Shen, Xue Tian, and Chi Chen</i>                                                                      |     |
| Social-Aware Decentralization for Secure and Scalable Multi-party Computations .....                                           | 246 |
| <i>Yuzhe Tang and Sucheta Soundarajan</i>                                                                                      |     |
| Statistical Anomaly Detection on Metadata Streams via Commodity Software to Protect Company Infrastructure: A Case Study ..... | 252 |
| <i>Christine Chen and James Gurganus</i>                                                                                       |     |
| Computational Improvements in Parallelized K-Anonymous Microaggregation of Large Databases .....                               | 258 |
| <i>Ahmad Mohamad Mezher, Alejandro García Álvarez, David Rebollo-Monedero, and Jordi Forné</i>                                 |     |

## The 8th International Workshop on Joint Cloud Computing (JCC 2017)

|                                                                                                     |     |
|-----------------------------------------------------------------------------------------------------|-----|
| Heterogeneous Malware Spread Process in Star Network .....                                          | 265 |
| <i>Libo Jiao, Hao Yin, Dongchao Guo, and Yongqiang Lyu</i>                                          |     |
| Cost Reduction in Hybrid Clouds for Enterprise Computing .....                                      | 270 |
| <i>Biyu Zhou, Fa Zhang, Jie Wu, and Zhiyong Liu</i>                                                 |     |
| DC-RSF: A Dynamic and Customized Reputation System Framework for Joint Cloud Computing .....        | 275 |
| <i>Fanghua Ye, Zibin Zheng, Chuan Chen, and Yuren Zhou</i>                                          |     |
| Web Service Appliance Based on Unikernel .....                                                      | 280 |
| <i>Kai Yu, Chengfei Zhang, and Yunxiang Zhao</i>                                                    |     |
| Analysis and Evaluation of the GAS Model for Distributed Graph Computation .....                    | 283 |
| <i>Jinyan Wang and Chengfei Zhang</i>                                                               |     |
| Traffic Signs Detection Based on Faster R-CNN .....                                                 | 286 |
| <i>Zhongrong Zuo, Kai Yu, Qiao Zhou, Xu Wang, and Ting Li</i>                                       |     |
| JCLedger: A Blockchain Based Distributed Ledger for JointCloud Computing .....                      | 289 |
| <i>Fu Xiang, Wang Huaimin, Shi Peichang, Fu Yingwei, and Wang Yijie</i>                             |     |
| Corporation Architecture for Multiple Cloud Service Providers in JointCloud Computing .....         | 294 |
| <i>Peichang Shi, Huaimin Wang, Xikun Yue, Shilan Yang, Shangzhi Yang, Xiang Fu, and Yuxing Peng</i> |     |
| Protecting Outsourced Data in Semi-Trustworthy Cloud: A Hierarchical System .....                   | 300 |
| <i>Yuzhao Wu, Yongqiang Lyu, Qian Fang, Geng Zheng, Hao Yin, and Yuanchun Shi</i>                   |     |
| A Reliability Benchmark for Big Data Systems on JointCloud .....                                    | 306 |
| <i>Yingying Zheng, Lijie Xu, Wei Wang, Wei Zhou, and Ying Ding</i>                                  |     |
| UCPR: User Classification and Influence Analysis in Social Network .....                            | 311 |
| <i>Cong Zha, Yongqiang Lyu, Hao Yin, and Dongchao Guo</i>                                           |     |
| Adaptive Routing Algorithm for Joint Cloud Video Delivery .....                                     | 316 |
| <i>Zexun Jiang and Hao Yin</i>                                                                      |     |
| Towards Efficient Resource Management in Virtual Clouds .....                                       | 320 |
| <i>Bo An, Junming Ma, Donggang Cao, and Gang Huang</i>                                              |     |
| Monitoring and Billing of A Lightweight Cloud System Based on Linux Container .....                 | 325 |
| <i>Yujian Zhu, Junming Ma, Bo An, and Donggang Cao</i>                                              |     |
| Building Emulation Framework for Non-volatile Memory .....                                          | 330 |
| <i>Guoliang Zhu, Kai Lu, Xiaoping Wang, and Yong Dong</i>                                           |     |
| Seflow: Efcient Flow Scheduling for Data-Parallel Jobs .....                                        | 334 |
| <i>Qiao Zhou, Ziyang Li, Ping Zhong, Tian tian, and Yuxing Peng</i>                                 |     |
| Online Encoding for Erasure-Coded Distributed Storage Systems .....                                 | 338 |
| <i>Fangliang Xu, Yijie Wang, and Xingkong Ma</i>                                                    |     |

## **NSF-JST 2017 Workshop**

|                                                                                                                                                                                              |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Accelerating Big Data Infrastructure and Applications (Ongoing Collaboration) .....                                                                                                          | 343 |
| <i>Kevin Brown, Tianqi Xu, Keita Iwabuchi, Kento Sato, Adam Moody, Kathryn Mohror,<br/>Nikhil Jain, Abhinav Bhatele, Martin Schulz, Roger Pearce, Maya Gokhale,<br/>and Satoshi Matsuoka</i> |     |
| Disaster Network Evolution Using Dynamic Clustering of Twitter Data .....                                                                                                                    | 348 |
| <i>Yilang Wu, Krishna Kant, Shanshan Zhang, Amitangshu Pal, and Junbo Wang</i>                                                                                                               |     |
| Single-Epoch Supernova Classification with Deep Convolutional Neural Networks .....                                                                                                          | 354 |
| <i>Akisato Kimura, Ichiro Takahashi, Masaomi Tanaka, Naoki Yasuda, Naonori Ueda,<br/>and Naoki Yoshida</i>                                                                                   |     |
| Enabling Large Scale Deliberation Using Ideation and Negotiation Support Agents .....                                                                                                        | 360 |
| <i>Katsuhide Fujita, Takayuki Ito, and Mark Klein</i>                                                                                                                                        |     |

## **The 1st International Workshop on Integrating Process-Oriented, Event-Based and Data-driven Systems (PED) and International Workshop on Big Graph Processing (BGP 2017)**

|                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------|-----|
| WED-SQL: A Relational Framework for Design and Implementation of Process-Aware<br>Information Systems ..... | 364 |
| <i>Bruno Padilha, André Luis Schwerz, and Rafael Liberato Roberto</i>                                       |     |
| Querying Workflow Logs .....                                                                                | 370 |
| <i>Yan Tang and Jianwen Su</i>                                                                              |     |
| On the Integration of Event-Based and Transaction-Based Architectures for Supply<br>Chains .....            | 376 |
| <i>Zhijie Li, Haoyan Wu, Brian King, Zina Ben Miled, John Wassick, and Jeffrey Tazelaar</i>                 |     |
| CacheDOCS: A Dynamic Key-Value Object Caching Service .....                                                 | 383 |
| <i>Julien Gascon-Samson, Michael Coppinger, Fan Jin, Jörg Kienzle, and Bettina Kemme</i>                    |     |

## **The 1st International Workshop on Serverless Computing (WoSC 2017)**

|                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------|-----|
| Ripple: Home Automation for Research Data Management .....                                                           | 389 |
| <i>Ryan Chard, Kyle Chard, Jason Alt, Dilworth Y. Parkinson, Steve Tuecke, and Ian Foster</i>                        |     |
| Pipsqueak: Lean Lambdas with Large Libraries .....                                                                   | 395 |
| <i>Edward Oakes, Leon Yang, Kevin Houck, Tyler Harter, Andrea C. Arpaci-Dusseau,<br/>and Remzi H. Arpaci-Dusseau</i> |     |
| Leveraging the Serverless Architecture for Securing Linux Containers .....                                           | 401 |
| <i>Nilton Bila, Paolo Dettori, Ali Kanso, Yuji Watanabe, and Alaa Youssef</i>                                        |     |
| Serverless Computing: Design, Implementation, and Performance .....                                                  | 405 |
| <i>Garrett McGrath and Paul R. Brenner</i>                                                                           |     |
| <b>Author Index</b> .....                                                                                            | 411 |
