

Poromechanics VI

Proceedings of the Sixth Biot
Conference on Poromechanics

Paris, France
9 – 13 July 2017

Volume 1 of 3

Editors:

Matthieu Vandamme
Patrick Dangla

Jean-Michel Pereira
Siavash Ghabezloo

ISBN: 978-1-5108-4458-2

Contents

Plenary Lectures

Three-Phase Cracked Porous Medium: Shale Fracking and ASR Damage.....	1
Zdeněk P. Bažant, Viet T. Chau, and Saeed Rahimi-Aghdam	
On the Anisotropy, Thermoplasticity, and Multiscale Poromechanics of Shale.....	9
Ronaldo I. Borja, Jinhyun Choo, and Shabnam J. Semnani	
Poroelastic Theory Applied to the Adsorption-Induced Deformation of Amorphous Silica.....	14
Coralie Weigel, Alain Polian, Mathieu Kint, Jerome Rouquette, Julien Haines, Marie Foret, René Vacher, Benoît Rufflé, and Benoit Coasne	
Dispersion and Attenuation in Saturated Sandstone and Limestone	20
Jérôme Fortin, Lucas Pimienta, Jan V. M. Borgomano, and Yves Guéguen	
Poro-Micromechanics of Materials with Complex Morphologies—A Review, and Recent Results for Concrete, Bone, and Paper.....	28
Christian Hellmich, Viktoria Vass, Markus Königsberger, Mehran Shahidi, Pedro Godinho, Claire Morin, and Bernhard Pichler	
Contribution of Poromechanics to the Development of Cementitious Materials in an Industrial Context.....	36
Remi Barbarulo, Fabienne Begaud, Florent Dalas, Arnaud Delaplace, Matthieu Horgnies, Bruno Huet, Samuel Meulenyzer, Gabriel Pham, David Rinaldi, Pipat Termkhajornkit, and Quoc-huy Vu	
Multiscale Porous Material: Interplay between Structure, Adsorption, and Diffusion Processes.....	46
Pierre Levitz	
Reconciliation of Gibbs Excess Adsorption Thermodynamics and Poromechanics of Nanoporous Materials.....	56
Alexander V. Neimark	
Electromagnetic Couplings of Electrokinetic Nature Associated with Hydromechanical Disturbances in Poroelastic Media	64
André Revil	

Mixed Fluid Conditions: Capillary Phenomena70
 J. C. Santamarina and Z. Sun

**Certain Canonical Analytical Solutions in Poro-Hyperelasticity:
 One-Dimensional Compression and Pure Shear90**
 A. P. S. Selvadurai and A. P. Suvorov

Hydromechanical Couplings in Saturated Materials

**A New Sequential Computational Method for Upscaling Flow and
 Geomechanics in Nonlinear Elastic Jointed Rocks.....99**
 Josué dos S. Barroso, Tuane Vanessa Lopes, Márcio A. Murad,
 Flávia de O. L. Falcão, and Claude Boutin

**The Combined Effect of Buoyancy and Excess Pore Pressure in
 Facilitating Soil Liquefaction.....107**
 S. Ben Zeev, L. Goren, S. Perez, R. Toussaint, C. Clément, and E. Aharonov

Pore Pressure Diffusion in Some Rock Mechanics Experiments117
 Philipp Braun, Siavash Ghabezloo, Pierre Delage, Jean Sulem,
 and Nathalie Conil

**On Two-Scale Convergence of Fluid-Structure Interaction Problems with
 Applications to Poroelasticity125**
 Jack Fellerman, Donald L. Brown, and Maria Vasilyeva

**Step-Like and Chaotic Behavior of Pore Pressures in Clay during
 Loading133**
 Michael J. Burlingame

Modeling Deformation-Diffusion in Polymeric Gels141
 Nikola S. Bosnjak, Shuolun Wang, and Shawn A. Chester

**Behavior of Horizontal Borehole in Anisotropic Poro-Elastic Media with
 Transient Fluid Flow: A Closed Form Solution Based on the Complex
 Potential Approach149**
 Duc-Phi Do, Nam-Hung Tran, and Dashnor Hoxha

Do Fluids Modify the Stick-Slip Behavior of Sheared Granular Media?158
 Omid Dorostkar, Paul Johnson, Robert Guyer, Chris Marone,
 and Jan Carmeliet

**Hydro-Mechanical Triaxial Behaviour of Compacted Earth at
 Different Temperatures.....164**
 Longfei Xu, Florian Champiré, Antonin Fabbri, Henry Wong,
 and Denis Branque

An Accuracy Condition for the Finite Element Discretization of Biot’s Equations on Triangular Meshes172
 Marco Favino, Jürg Hunziker, Klaus Holliger, and Rolf Krause

A Coupled Mixed Finite Element Biot Model for Land Subsidence Prediction in the Beijing Area182
 Massimiliano Ferronato, Laura Gazzola, Nicola Castelletto, Pietro Teatini, and Lin Zhu

An Efficient Meshfree Method for Consolidation Analysis of Elastoplastic Porous Media190
 Omid Ghaffaripour and Arman Khoshghalb

The Coupled Dynamics of Meltwater Percolation and Granular Deformation in the Sediment Layer Underlying Parts of the Big Ice Sheets.....198
 A. Damsgaard, A. Cabrales-Vargas, J. Suckale, and L. Goren

Tunnel Excavation in Low-Permeability Anisotropic Ground: Effect of Anisotropy and Hydro-Mechanical Couplings on Pore Pressure Evolution.....207
 L.-M. Guayacán-Carrillo, S. Ghabezloo, J. Sulem, D.-M. Seyedi, and G. Armand

Explicit High-Order ADE Solutions for Fluid Flow in the Coupled Biot Equations215
 Simon Heru Prasetyo and Marte Gutierrez

Pore Pressure Coupling with Stress Inducing Rock Failure: An Experimental Investigation.....223
 Cong Hu and Frédéric Skoczylas

Wave-Induced Response of Seabed around a Buried Pipeline in Silty Soil230
 Ivan Depina

Using DEM-LBM for Micro-Scale Modeling of Coupled Hydro-Mechanical Processes in Geomechanics238
 Daniel H. Johnson, Farshid Vahedifard, Bohumir Jelinek, and John F. Peters

Modelling Mobilization of Interstitial Fluid and Residual Deformations in Lymphedematous Tissues246
 Mariusz K. Kaczmarek, Joanna Nowak, and Waldemar L. Olszewski

Upper and Lower Bounds on Numerical Solutions to Biot Consolidation.....254
 K. Krabbenhoft

Multiple-Porosity and Multiple-Permeability Poroelasticity: Theory and Benchmark Analytical Solution.....262
 Amin Mehrabian and Younane N. Abousleiman

On Elastic Potential Energy for Deformable Porous Media272
 Tobias M. Müller and Pratap N. Sahay

Elastic and Filtration Properties of Coal by Adsorption Test Data Based on Inverse Problem Solution278
 Leonid A. Nazarov, Larisa A. Nazarova, Matthieu Vandamme, Jean-Michel Pereira, and Iliass Tahiri

Evolution of Hydrodynamical and Stress Fields in Near-Well Zone in Fractured Porous Media287
 Larisa A. Nazarova and Leonid A. Nazarov

Coupling Flow and Deformation in Evolving Salt Basins.....295
 Maria A. Nikolinakou, Mahdi Heidari, Peter B. Flemings, and Michael R. Hudec

Isogeometric Analysis of Hydro-Mechanical Problems in Saturated Soils with Second Gradient Regularization.....304
 C. Plúa, C. Tamagnini, and P. Bésuelle

Perfusion and Absorption in a Porous Matrix.....312
 A. DiCarlo, S. Naili, P. Podio-Guidugli, and V. Sansalone

Stress and Pore-Pressure Influence on Elasticity of Arbitrarily Symmetric Porous and Fractured Rocks321
 Serge A. Shapiro

Grain-Scale Modelling of Swelling Granular Materials Using the Discrete Element Method and the Multi-Sphere Approximation329
 T. Sweijen, S. M. Hassanizadeh, H. Aslannejad, and S. Leszczynski

A Continuum Based Approach to Modelling Tensile Cracks in Soils337
 Hieu T. Tran, Ha H. Bui, Giang D. Nguyen, J. Kodikara, and M. Sanchez

Simulation of Lateral Spreading and Evaluation of Lateral Displacement of Gently Sloping Liquefied Ground.....345
 Ali Noorzad and Iman Vaezi

A Finite Element Modeling of the Impact of Internal Erosion on the Stability of a Dike.....354
 Jie Yang, Zhen-Yu Yin, Pierre-Yves Hicher, and Farid Laouafa

A Full 3D Mixed Hybrid Finite Element Model of Superabsorbent Polymers362
 C. Yu, K. Malakpoor, S. Leszczynski, and J. M. Huyghe

Performance of a Soil Liquefaction Model.....370
 Mourad Zeghal, Nithyagopal Goswami, Majid Manzari, and Bruce Kutter

Partially Saturated Porous Materials, Surface Effects, and Adsorption

Elastic Shrinkage-Swelling Modeling in Porous Microstructures: A Combined Finite Elements-Lattice Boltzmann-Numerical Approach378
 Jean-Luc D. Adia, Julien Yvonnet, Qi-Chang He, Nhu-Cuong Tran, and Julien Sanahuja

Dynamic Bending of an Oak Board Due to a Moisture Content Gradient386
 T. Arends, L. Pel, H. P. Huinink, H. L. Schellen, and D. M. J. Smeulders

The Use of Nanoporous Materials for Mechanical Energy Dissipation395
 Isabelle Beurroies, Damien Presle, Julien Rodriguez, and Renaud Denoyel

Multi-Scale Investigation of the Hygromechanical Behavior of Wood by X-Ray Microtomography and Digital Volume Correlation.....403
 Marie Bonnet, Sabine Caré, Michel Bornert, Patrick Aïmedieu, and Andrew King

Iterative Methods for Coupled Flow and Geomechanics in Unsaturated Porous Media411
 Jakub W. Both, Kundan Kumar, Jan M. Nordbotten, and Florin A. Radu

Micromechanical Insights into the Effective Stresses419
 B. Chareyre, E. Nikoöee, C. Chalak, and C. Yuan

Analysis of Sorption and Mechanical Hysteresis of Nano-Porous Materials: Upscaling Molecular Simulations with the Dependent Domain Theory427
 Mingyang Chen, Benoit Coasne, Robert Guyer, Dominique Derome, and Jan Carmeliet

Understanding Hygromechanically-Coupled Behavior, Using Atomistic Simulations of Biopolymeric Nano-Composite Material435
 Dominique Derome, Chi Zhang, Mingyang Chen, Karol Kulasinski, Sinan Keten, and Jan Carmeliet

Partially Saturated Granular Materials: Insights from Micro-Mechanical Modelling441
 Jérôme Duriez, Richard Wan, and Mehdi Pouragha

A Three-Scale Description of Partially-Saturated Swelling Clays Based on Micro-Poro-Elasticity449
 Mahdad Eghbalian and Richard G. Wan

A Grain-Scale Model for Soil-Water Retention Hysteresis457
 Zhang Shi and Yixiang Gan

Bulk Modulus of Not-So-Bulk Fluid465
 Gennady Y. Gor

Study of the Drying Behavior of Resorcinol Formaldehyde Hydrogels: Experimental Investigation and Numerical Framework473
 J. Hubert, E. Plougonven, A. Leonard, and F. Collin

Improving Constitutive Relationships in Multiscale Modeling by the Concept of Sufficiency—Illustrated by Saturation, Interfacial Areas, and Capillary Rise.....481
 P. Kurzeja

Mechanical Properties of Cork: Effect of Hydration489
 A. Lagorce-Tachon, T. Karbowski, D. Champion, R. D. Gougeon, and J.-P. Bellat

Multiscale Model of Poromechanics and Transport Problems in Coalbed-Methane Including Adsorption Gas Effects497
 T. D. Le, C. Moyne, M. A. Murad, and I. Panfilova

A Multi-Scale Approach to Analyze the Role of the Disjoining Pressure in the Overall Stiffness of Expansive Clays507
 Julia Mainka and Christian Moyne

Mechanical Weakening of Massive Quartz Due to In-Pore Water Tension517
 Claudie Hulin, Lionel Mercury, Patrick Simon, and Kirill I. Shmulovich

Adsorption on Porous Anodized Alumina.....526
 G. Mistura, L. Bruschi, and W. Lee

General Non-Equilibrium Matrix Imbibition Equation for Kondaurov’s Double Porosity Model531
 Leonid Pankratov, Andrey Konyukhov, and Anton Voloshin

Swelling Due to Adsorption in Porous Media Presenting Different and Distinct Porosities: Model and Experimental Validation539
 L. Perrier, F. Plantier, G. Pijaudier-Cabot, and D. Grégoire

Adsorption-Induced Deformation in Nanopores: Unexpected Results Obtained by Molecular Simulations547
 J. Puibasset

Anisotropic Poroelasticity of Mesoporous Silicon555
 Etienne Rolley and Annie Grosman

Modeling Gravity-Driven Segregation in Porous Media by a Phase Field Approach to Unsaturated Poromechanics.....563
 F. Casini, G. Sciarra, and J. Vaunat

Data-Driven Discrete-Continuum Method for Partially Saturated Micro-Polar Porous Media571
 Kun Wang and WaiChing Sun

Prediction of Drying Shrinkage of Cement-Based Mortars with Poroelastic Approaches—A Critical Review.....579
 Mateusz Wyrzykowski, Carmelo Di Bella, and Pietro Lura

On the Adsorption-Induced Swelling Effects to the Petrophysical and Poromechanical Properties of CO_x Argillite587
 Haifeng Yuan, Franck Agostini, and Frédéric Skoczylas

A Micromechanical Model for Unsaturated Soils Based on Thermodynamics594
 Chaofa Zhao, Younes Salami, Zhen-Yu Yin, and Pierre-Yves Hicher

Multiphysical Couplings

Thermoporoelastic Analysis of a Single-Well Closed-Loop Geothermal System602
 Milad Ahmadi and Arash Dahi Taleghani

Thermomechanical Coupling in Bituminous Mixtures Considered as Bonded Granular Media610
 Lucas F. de A. L. Babadopulos, Cédric Sauzéat, and Hervé Di Benedetto

Modelling CO₂-Trapping Mechanisms for Geological Carbon Capture and Storage: Description of Constitutive Relations618
 N. Böttcher, J. Maßmann, and T. Nagel

A Possible Nano-Scale Origin of the Surprising Thermal Expansion of Clays.....626
 L. Brochard, T. Honorio, M. Vandamme, I. Stefanou, S. Ghabezloo, and M. Bornert

Influence of Mineral Salts Content on Bituminous Waste Products Water Uptake.....634
 J. B. Champenois, R. Blinder, A. Guillermo, M. Bardet, and A. Poulesquen

Hygro-Thermal Behavior of Cement Mortar and Polystyrene Concrete640
 A. Chikhi, A. Belhamri, and P. Glouannec

Swelling Driven Cracking in Large Deformation in Porous Media.....648
 Jingqian Ding, Joris J. C. Remmers, Kamyar Malakpoor, and Jacques M. Huyghe

Hydration/Dehydration Processes in Stabilized CaCl₂656
 P. A. J. Donkers, O. C. G. Adan, and D. M. J. Smeulders

Poromechanics of Compacted Earth for Building Applications664
 A. Fabbri, F. Champiré, L. Soudani, F. McGregor, and H. Wong

Integration of a Microstructural Model in a Coupled Reactive Transport Simulation of Carbonation and Drying672
 Fabien Georget and Jean H. Prévost

Poroelastic Effects in an Enhanced Geothermal Reservoir, Horstberg, Germany681
 A. Hassanzadegan, W. Rùhaak, T. Tischner, Stephan Steuer, and E. Meneses Rioseco

Stability of Hydrated Clay Layers from Molecular Simulations688
 Tulio Honorio, Laurent Brochard, Matthieu Vandamme, Ioannis Stefanou, Siavash Ghabezloo, and Michel Bornert

Fully Coupled Hydro-Thermal-Mechanical Modeling of Brine Migration in Salt for Heat-Generating Nuclear Waste.....696
 Mengsu Hu and Jonny Rutqvist

The Effect on Compaction Rates by Divalent Anion and Cations on Outcrop Chalk Tested at Reservoir Temperature and Effective Stress Conditions.....706
 Reidar I. Korsnes and Merete V. Madland

Numerical Simulation for Foundations Energy Efficiency in Cold Region	715
Pooneh Maghoul	
Modeling and Computer Design of Piezoceramic Materials with Stochastic Microporous Structure and Local Alloying Pore Surfaces.....	724
Andrey V. Nasedkin, Anna A. Nasedkina, and Andrey N. Rybyanets	
Effects of Particle Dissolution on the Constitutive Response of Granular Materials	732
P. Viswanath and Arghya Das	
The Frequency-Dependent Electrokinetic Coupling Coefficient of Capillaries with Arbitrary Radii	740
Peng Shi, Wei Guan, and Hengshan Hu	
Microporomechanical Modeling of Thermal Expansion of Cement Pastes.....	746
Hui Wang, Herbert. A. Mang, Yong Yuan, and Bernhard Pichler	
On the Thermo-Hydro-Mechanical Pressurization in Callovo-Oxfordian Claystone under Thermal Loading	754
Darius Seyedi, Gilles Armand, Nathalie Conil, Manon Vitel, and Minh-Ngoc Vu	
Micromechanics Analysis of Void Growth in Polymer Gel-Based Structures	762
Larbi Siad, Marie Dubus, Halima Kerdjoudj, Franck J. Vernerey, Meriem Elkolli-Merbah, Dominique Laurent-Maquin, and Sophie C. Gangloff	
Long-Term Load Bearing Capacity of Reinforced Concrete Coupled with Poromechanical Model for Alkali Silica Reaction	770
Ryo Taguchi, Yuya Takahashi, and Koichi Maekawa	
Effect of Preceding Cracks on ASR Expansion of Concrete and Its Poro-Mechanical Modeling.....	778
Shimpei Ogawa, Yuichiro Tanaka, Yuya Takahashi, and Koichi Maekawa	
Stochastic Analysis of a Thermal Uncoupled Thermal-Hydraulic-Mechanical Model.....	787
Shih-Jung Wang and Kuo-Chin Hsu	
On the Mechanisms of Stress-Triggered Seismic Events during Fluid Injection	795
Viktoriya M. Yarushina, Yuri Y. Podladchikov, Alexander Minakov, and Ludovic Räss	

Determination of Electroosmotic Pressure by Two Pressure Transducers801
 Chenggang Yin, Hengshan Hu, and Jun Wang

Coupled Hygro-Thermo-Mechanical Behavior of Amorphous Biopolymers: Molecular Dynamic Study of Softwood Lignin809
 Chi Zhang, Karol Kulasinski, Dominique Derome, and Jan Carmeliet

Characterization of Materials and Properties

Macroscopic Deformation Moduli of Porous Rocks: Insights from Digital Image Pore-Scale Simulations.....815
 Shakil Ahmed, Tobias M. Müller, Jiabin Liang, Genyang Tang, and Mahyar Madadi

Induration and Biot’s Coefficient of Palaeogene Limestone822
 K. A. Andreassen

Poroelastic Investigation of the Callovo-Oxfordian Claystone830
 M. Belmokhtar, P. Delage, S. Ghabezloo, and N. Conil

Thermal Behaviour and Creep of the Callovo-Oxfordian Claystone839
 Malik Belmokhtar, Pierre Delage, Siavash Ghabezloo, and Nathalie Conil

Measurement of Water Content in a Wood Sample by Terahertz Imaging847
 M. Bensalem, J. C. Mindeguia, A. Sommer, J. C. Batsale, and C. Pradere

Assessing a Nondestructive Method to Determine the Young’s Modulus of Rammed Earth Material.....855
 Q.-B. Bui, R. El-Nabouch, P. Perrotin, and O. Plé

Experimental and Numerical Studies on Cohesion and Friction Angle of Rammed Earth Material.....864
 R. El-Nabouch, Q.-B. Bui, P. Perrotin, and O. Plé

Poroelastic Indentation of Mechanically Confined Hydrogel Layers.....873
 J. Delavoipière, Y. Tran, E. Verneuil, and A. Chateauminois

Evaluation of Cancer Tumors in 3D Porous Bone Mimetic Scaffolds.....881
 Kalpana S. Katti, Dinesh R. Katti, Md. Shahjahan Molla, and Sumanta Kar

Influence of Inclusions on the Drying Cracking of Cement-Based Composites.....889
 Ling Li, Thomas Rougelot, Yun Jia, and Nicolas Burlion

On the Unjacketed Moduli of Sedimentary Rock.....897
 Roman Y. Makhnenko, Ali Tarokh, and Yuri Y. Podladchikov

Characterization, Mix Design, Mechanical Testing of Earth Materials, Stabilized and Unstabilized, for Building Construction905
 Claudiane Ouellet-Plamondon, Nahouo Soro, and Marie-José Nollet

Characterization of Small-Strain Shear Modulus of Sands Subjected to Anisotropic States of Stress.....913
 Meghdad Payan, Kostas Senetakis, Arman Khoshghalb, and Nasser Khalili

A New Method to Measure Compressibility and Poroelasticity Coefficients in Porous and Permeable Rocks: Low Amplitude and Low Frequency Pressure Oscillations.....921
 Lucas Pimienta, Jérôme Fortin, and Yves Guéguen

Synthesis of Geopolymer Foam for the Decontamination of Liquid Nuclear Waste.....929
 Svetlana Petlitchkaia, Antoine Marchal, and Arnaud Poulesquen

Three Dimensional Characterization of the Dentin Porous Network Using Confocal Laser Scanning Microscopy (CLSM)937
 E. Vennat, W. Wang, R. Genthial, B. David, E. Dursun, and A. Gourrier

A Comparative Study of Indentation Deformation Fields in Porous Ductile and Brittle Solids945
 Shwetabh Yadav, Dinakar Sagapuram, and Tejas G. Murthy

Reservoir Geomechanical Properties Characterization of 3D Printed Sandstone952
 J. S. Gomez, N. Ardila, R. J. Chalaturnyk, and G. Zambrano-Narvaez

Creep and Plasticity

On a Poromechanical Approach to Long-Term Autogenous Shrinkage961
 A. Aili, M. Vandamme, J.-M. Torrenti, and B. Masson

Steady Planar Ideal Plastic Flows for the Double Slip and Rotation Model.....967
 Sergei Alexandrov

A 3D Bounding Surface Plasticity Model for Soils972
 Golnaz Alipour Esgandani, Hamed Moghaddasi, Babak Shahbodagh-Khan, Arman Khoshghalb, and Nasser Khalili

Analysis of Microstructure, Deformation, and Permeability of Salt/Sand Mixtures during Creep.....980
 X. Shen, C. Zhu, and C. Arson

A Framework for Modelling the Time-Dependent Behaviour of Unsaturated Rocks Based on Irreversible Thermodynamics.....988
 T. A. Bui, H. Wong, and F. Deleruyelle

Numerical Simulation of 12 Years Long Biaxial Creep Tests: Efficiency of Assuming a Constant Poisson’s Ratio.....997
 L. Charpin, T. O. Sow, X. D’Estève de Pradel, F. Hamon, and J.-P. Mathieu

Constitutive Model for Long-Term Behavior of Saturated Frozen Soil.....1005
 S. A. Ghoreishian Amiri and G. Grimstad

Elastic and Visco-Elastic Behavior of Cementitious Materials at Early Ages.....1013
 Zhangli Hu, Adrien Hilaire, Mateusz Wyrzykowski, Karen Scrivener, and Pietro Lura

Double Scale Model of the Aging Creep of Low Density Hydrates of Cement Paste.....1021
 Shun Huang, Julien Sanahuja, Luc Dormieux, Benoit Bary, Eric Lemarchand, and Myriam Hervé

Porous Materials Undergoing Time-Dependent Phase Transformations: Effective Ageing Viscoelasticity1029
 J. Sanahuja, S. Huang, L. Dormieux, B. Bary, E. Lemarchand, and M. Hervé

Triaxial Creep Induced Gas Permeability Change and Elastic Modulus Variation in Callovo-Oxfordian Argillite1037
 Zaobao Liu, Jianfu Shao, Shouyi Xie, and Nathalie Conil

A Bounding Surface Viscoplastic Constitutive Model for Unsaturated Soils1045
 Thi Ngoc Mac, Babak Shahbodagh, and Nasser Khalili

Modelling Isotropic and Kinematic Hardening of Granular Materials with a Thermodynamical Approach.....1053
 L. F. Miranda Pino, Piaras A. Kelly, and Beatrice A. Baudet

A Bounding Surface Plasticity Model for Unsaturated Soils Accounting for the Void Ratio Dependency of the Water Retention Curve1061
 H. Moghaddasi, G. Alipour Esgandani, A. Khoshghalb, B. Shahbodagh-Khan, and N. Khalili

Cylindrical Cavity Expansion in Anisotropic Fine-Grained Geomaterials: Theoretical Solution.....1069
 Nallathamby Sivasithamparam and Jorge Castro

Insight into Rotational Hardening Rules: A New Proposition1077
 Andrés Nieto-Leal, Meysam Mashayekhi, and Victor N. Kaliakin

Modeling Nonlinear Creep of Steel Fiber Reinforced Concrete by Means of Hydro-Mechanical Coupling.....1083
 Tho Duc Pham, Luca Sorelli, Mario Fafard, and Peter Grassl

From X-Ray Tomography Images to a Numerical Homogenized Formulation of Snow Viscoplasticity1091
 Antoine Wautier, Christian Geindreau, and Frédéric Flin

Simulation of Porosity Effect on Mechanical and Creep Properties of Cement Paste at Microscale.....1099
 Ya Wei, Siming Liang, and Xiang Gao

Transport

Hydro-Mechanical Feed-Back Coupling in a Fluid-Filled Fractured Rock: Stress-Dependent Macro-Scale Permeability and Porosity1108
 Rachid Ababou, Israel Cañamón, Manuel Marcoux, Alain Millard, and Tawfik Rajeh

Effective Gas Permeability Measurements at Different Water Saturations in Tight Sandstones—Differentiation between Slip Flow and Capillary Controlled Flow Regimes1117
 Alexandra Amann-Hildenbrand, Gabriel Hoder, Tilman Scheele, Thomas Hiller, Norbert Klitzsch, Norbert Schleifer, and Bernhard M. Krooss

Microcirculation of Blood and Interstitial Fluid in a Poroelastic Model of the Liver1126
 Maryam Argungu and Jennifer H. Tweedy

Experimental Study of Impact of Dewatering Induced Coal Fines on Coal Permeability1135
 Tianhang Bai, Zhongwei Chen, Saïied M. Aminossadati, and Thomas Rufford

Investigation of the Intrinsic Permeability of MX-80 Bentonite through a 4-Scale Analysis of Its Fabric.....1145
 Etienne Cassini and Lyesse Laloui

The KG²B Project: A World-Wide Benchmark of Low Permeability Measurement.....1153
 Christian David, Jérôme Wassermann, and the KG²B Team

Mesoscale Assessment of the 3D Pore Network of a High Performance Concrete: Towards the Understanding of Fluid Transport1162
 Y. Song, C. A. Davy, D. Troadec, M. Marinova, A. M. Blanchenet, and X. Bourbon

Numerical Simulation of Gas Migration in Water-Saturated Argillite.....1170
 X. Zhang, G. Duveau, and J. B. Colliat

A New Model for Estimating Fluid Transfer Properties of Cementitious Materials1176
 Lionel Ecay, David Grégoire, Fadi Khaddour, and Gilles Pijaudier-Cabot

Transport Processes across Multiphase Interfaces1184
 Ekkehard Holzbecher

Sustainability of Fractured Rock Permeability under Varying Pressure1192
 C. Kluge, G. Blöcher, H. Milsch, H. Hofmann, A. Nicolas, Z. Li, and J. Fortin

Computational Analysis of the Fracture-Permeability Behavior of Shale1200
 Weixin Li, Faysal Bousikhane, J. William Carey, and Gianluca Cusatis

Permeability Estimation in Chalk Using NMR and a Modified Kozeny Equation.....1208
 Leonardo T. P. Meireles, M. Monzurul Alam, and Ida L. Fabricius

On Permeability Estimation by Electroacoustic Logging with Account for Joule Heating1216
 Boris D. Plyushchenkov and Anatoly A. Nikitin

On Permeability Estimation from Borehole Acoustic and Electromagnetic Flexural Waves.....1224
 Anatoly A. Nikitin and Boris D. Plyushchenkov

Coupled Large Strain Deformation and Solute Transport in Saturated Multi-Layer Porous Media1232
 Hefu Pu, Jinwei Qiu, and Rongjun Zhang

Modeling Creeping Flow through a Closed Crack with a Self-Affine Geometry and an Extension to Permeability of Cracked Media1241
 Vladislav A. Yastrebov, Guillaume Anciaux, Andrei G. Shvarts, Jean-François Molinari, and Georges Cailletaud

Relation between Microstructure and Properties

Microstructure Characterization and Micromechanical Modelling of Cement Pastes Hydrated at Different Temperatures.....1249
 Sara Bahafid, Siavash Ghabezloo, Myriam Duc, Paméla Faure, and Jean Sulem

Transverse Thermal Conductivity Estimation of Vegetable Fibers from Inverse Identification.....1258
 Naima Belayachi, Duc-Phi Do, and Dashnor Hoxha

Variational Estimates of the Poroelastic Coefficients1266
 Sébastien Brisard and Siavash Ghabezloo

Coupled Hydro-Mechanical Upscaling for a Deformable Fractured Porous Medium: The Biot Coefficients and Moduli Related to the Matrix-Cracks System.....1274
 Israel Cañamón, Rachid Ababou, and Adrien Poutrel

Geometric and Elastic Characterization of Clay-Rocks1282
 Philippe Cosenza, Dimitri Prêt, Albert Giraud, and Stephen Hedan

Idealised Discrete Pore-Scale Model of Poro-Elasticity via Closed-Form Analytical Expressions1291
 Gary D. Couples

Elasticity and Density of Paleozoic Shales from Bornholm1299
 Ida L. Fabricius, Christian Haugwitz, Pernille B. Larsen, and Niels H. Schovsbo

Micromechanical Modeling of Elastoplastic Behavior of a Shale Gas Reservoir.....1307
 F. Farhat, J. F. Shao, and W. Shen

Effective Poroelastic Properties of Materials Containing Pores of Superspherical or Superspheroidal Shapes.....1315
 F. Chen, I. Sevostianov, A. Giraud, and D. Grgic

Multiscale Estimation of the Fluctuations of Mechanical Fields in Poroelasticity: Application to Cement-Based Composites.....1323
 Tulio Honorio and Laurent Brochard

Effect of Straw Fiber Reinforcement on the Mechanical Properties of Adobe Bricks1331
 Rogiros Illampas, Vasilios G. Loizou, and Ioannis Ioannou

Homogenization of Dentin Elastic Properties Based on Microstructure Characterization, Statistical Back-Analysis, and FEM Simulation1339
 R. Jeanneret, C. Arson, and E. Vennat

Numerical Modeling of Disordered Foam in 3D: Effective Properties by Homogenization1347
 C. Lusso and X. Chateau

An Efficient Numerical Method for the Solution of the Problem of Elasticity and Poroelasticity for 3D-Homogeneous Elastic Medium with Cracks and Inclusions1355
 A. Markov and S. Kanaun

Discrete Poroelasticity of Heterogeneous Media1363
 S. Monfared, H. Laubie, F. Radjai, R. Pellenq, and F.-J. Ulm

Numerical Study of Particle Size Distribution Effect on the Failure of Asphalt Mixtures Using Discrete Element Method1371
 Nhu H. T. Nguyen, Ha H. Bui, Giang D. Nguyen, S. Arooran, and J. Kodikara

Discrete Element Modelling of the Mechanical Behaviour of a Highly Porous Foamed Concrete1380
 Thang T. Nguyen, Ha H. Bui, Tuan D. Ngo, and Giang D. Nguyen

The Effect of Stress Level on Soil Porous Structure: Insights from Fractal Analysis1388
 E. Nikoee

Thermal Conductivity of Sedimentary Rocks as Function of Biot’s Coefficient.....1396
 T. Orlander, L. Pasquinelli, J. J. Asmussen, A. A. Marczyński, E. Adamopoulou, H. Milsch, and I. L. Fabricius

A Systematic Link between Microstructure and Acoustic Properties of Foams: A Detailed Study on the Effect of Membranes1405
 Van Hai Trinh, Minh Tan Hoang, Camille Perrot, Vincent Langlois, Yacine Khidas, and Olivier Pitois

Effects on Air Permeability of the Initial Fabric in Compacted Clay1413
 Viet Nguyen, Jubert Pineda, and Daichao Sheng

**Numerical Investigation of the Effective Skempton Coefficient in
 Porous Rock Containing Fluid-Filled Fracture Networks.....1420**
 N. Pollmann, R. Jänicke, J. Renner, and H. Steeb

**Modeling the Effects of Change in Mineralogy and Texture on Seismic
 Velocities1428**
 Nishank Saxena, Ronny Hofmann, and Seán Dolan

Direct Modeling of Granular Materials1436
 Pejman Tahmasebi, Muhammad Sahimi, and Jose Andrade

**A Poromechanical Framework to Model Soil Fabric Evolution and Its
 Effect on Material Hydromechanical Response.....1443**
 Jean Vaunat and Francesca Casini

**Deriving Spinal Cord Permeability and Porosity Using
 Diffusion-Weighted MRI Data1451**
 J. Venton, S. Bouyagoub, P. J. Harris, and G. Phillips

**Microscopic Investigation of the Deformation Mechanisms of
 Argillaceous Rock1458**
 Linlin Wang, Michel Bornert, and Serge Chancole

Tensile and Compressive Contributions of Fibres in Peat.....1466
 L. Zhang, B. C. O’Kelly, and T. Nagel

Multiscale Approach to Mechanical Characterization of Shale.....1474
 Dongxiao Zhang, Junliang Zhao, Tianhao Wu, Haoyu Tang,
 Qihan Xuan, and Zheng Jiang

Dynamic Phenomena

**Unconventional Mass Transfer and Sound Propagation in
 Permeo-Elastic Porous Materials1482**
 Claude Boutin and Rodolfo Venegas

**A Nodal Discontinuous Galerkin Solver for Modeling Seismic Wave
 Propagation in Porous Media1490**
 Marc S. Boxberg, Janis Heuel, and Wolfgang Friederich

Attenuation in Fluid-Saturated Fractured Porous Media—Quasi-Static Numerical Upscaling and Wave Propagation Modeling1499
 Mikhail Novikov, Eva Caspari, Vadim Lisitsa, Beatriz Quintal, J. Germán Rubino, and Klaus Holliger

Response of Tunnel in Saturated Soil to an Underwater Explosion1507
 Anirban De and Thomas F. Zimmie

Effect of Turbulent Flow in Pores on Elastic Wave Dispersion and Attenuation in Porous Media.....1516
 Yunda Duan and Hengshan Hu

Guided and Leaky Waves in Poroelastic Structures1524
 S. I. Fomenko, E. V. Glushkov, and N. V. Glushkova

Discontinuous Galerkin Method in Modeling Materials with Micro-Cracks1532
 Quriaky Gomez, Ioan R. Ionescu, and Oana Ciobanu

Finite-Difference Modeling of the Seismoelectric Logging in Fluid-Saturated Porous Formations1540
 Wei Guan, Yufeng Yang, Zexin Yao, and Hengshan Hu

Effects of Finite Fracture Thicknaess on Seismic Dispersion and Attenuation in Saturated Rocks with Aligned Penny-Shaped Cracks: Theory versus Numerical Simulation1548
 Junxin Guo, J. Germán Rubino, Boris Gurevich, and Stanislav Glubokovskikh

Experimental Evidence of Biot’s Dynamic Compatibility Using Seismoelectric Measurements under Varying Saturation1556
 J. Holzhauser, D. Brito, and C. Bordes

Seismic Attenuation in Realistic Fracture Networks1565
 Jürg Hunziker, Marco Favino, Eva Caspari, Beatriz Quintal, J. Germán Rubino, Rolf Krause and Klaus Holliger

Computational Homogenization of Seismic Attenuation in Fractured Rock1573
 R. Jänicke, F. Larsson, and K. Runesson

Observation of Biot’s Compressional Waves in Air-Filled Granular Materials.....1581
 Jérôme Laurent and Xiaoping Jia

Impact of T. J. Plona’s Observation and Quantification of the Biot Fast and Slow Waves1587
 David Linton Johnson

Spatial Localisation of Nonlinear Waves in a Liquid Saturated Porous Medium with Cavities.....1604
 Sergey M. Aizikovich, Vladimir I. Erofejev, and Anna V. Leonteva

Propagation of Elastic Waves in a Gas-Filled Poroelastic Medium in the Slip-Flow Regime1612
 Mikhail Markov and Anatoly Markov

Global Sensitivity Analysis of Poroelastic Soil Parameters1621
 A. Mesgouez, S. Buis, and G. Lefeuvre-Mesgouez

A Simple Model to Analytically Assess the SH Seismoelectric Response of the Vadose Zone.....1629
 L. B. Monachesi, F. I. Zyserman, and L. Jouniaux

Slow P-Wave Attenuation Due to Conversion Scattering into Slow S-Wave in the Biot High-Frequency Range1637
 Pratap N. Sahay and Tobias M. Müller

Numerical Analysis of Laboratory Attenuation Measurements1642
 Beatriz Quintal, Samuel Chapman, Nicola Tisato, and Josef Paffenholz

Homogenization-Based Modelling of Wave Propagation in the Biot Medium with Large Contrasts in the Permeability and Poroelastic Coefficients1650
 E. Rohan, V.-H. Nguyen, and S. Naili

On the Two-Rocks Boundary Perturbation on the Propagation of Nonlinear Thermoelastic Waves in Porous Rocks.....1658
 E. Salusti, R. Droghei, and R. Garra

Pressure and Temperature Non-Linear Fronts in Porous Rocks during Extensional Earthquakes, with Application to the L’Aquila 2009 Earthquake.....1667
 Ettore Salusti, Eugenio Carminati, and Carlo Doglioni

Slow Waves in a Poroelastic Solid Saturated by Multiphase Fluids.....1674
 Juan E. Santos, Gabriela B. Savioli, and Robiel Martínez Corredor

Analysis of Fracture Induced Anisotropy in a Biot Medium as Function of Effective Pressure.....1682
 Juan E. Santos and Robiel Martínez Corredor

Closed-Form and Finite Element Solutions of Wave Propagation in Strain Gradient Poroelastic Medium with Micro Inertia1690
 I. Scala, G. Rosi, V.-H. Nguyen, and S. Naili

Fast Multipole Accelerated Boundary Element Method for Poroelastodynamics1698
 M. Schanz

Rayleigh Surface Wave in a Porothermoelastic Solid Half-Space1706
 Baljeet Singh

How Pore Filling Shale Affects Elastic Wave Velocities in Fully and Partially Saturated Sandstone: Characterization, Measurement, and Modelling1714
 Morten Kanne Sørensen and Ida Lykke Fabricius

Solutions for Effective Shear Properties in a Three-Phase Poroelastic Sphere Model1722
 Hengshan Hu and Yongjia Song

Seismic Effects of Viscoelastic Pore Fill on Double-Porosity Rocks1731
 Stanislav Glubokovskikh, Maxim Lebedev, Vassily Mikhaltsevitch, and Boris Gurevich

Dynamic Permeability: Experimental Investigations and Numerical Analysis in the Low and High Frequency Regime.....1739
 H. Steeb

Scattering of Waves in a Layered Structure of Porous Piezoelectric Materials1747
 Anil Kumar Vashisth and Ashok Dahiya

Influence of Diffusion and Sorption on Sound Propagation in Multiscale Porous Materials1756
 Rodolfo Venegas, Claude Boutin, and Olga Umnova

A Double Double-Porosity Theoretical Model for Patchy-Saturation and Structure Heterogeneity in Muddy Siltstone1764
 Jing Ba and Wenhao Xu

A Dynamic Explicit Algorithm for Saturated Porous Media1771
 Yan Zou and Huabei Liu

Instabilities and Strain Localization

The Brittle-Ductile Transition in Porous Limestone Imaged by X-Ray Computed Tomography and Digital Image Correlation1782
 Patrick Baud, Stephen Hall, Yuntao Ji, Teng-Fong Wong, and Michael J. Heap

Failure Modeling of Quasi-Brittle Materials by Low-Order Finite Elements and Stress-Based Gradient Damage Model1789
 Tinh Q. Bui, Tuan H. A. Nguyen, and Sohichi Hirose

An Investigation on Stick-Slip Behaviour of Dry Spherical Glass Beads.....1797
 A. Ozbay and A. F. Cabalar

Investigating the Dynamic Instabilities of Model Granular Materials in Isotropic Consolidation and Triaxial Drained Compression.....1805
 T. T. T. Nguyễn, T. Doanh, A. Le Bot, and D. Dalmas

About the Instability of Viscoplastic Medium with Internal Friction1813
 Igor A. Garagash

Processes Responsible for Localized Deformation within Porous Rocks: Insights from Laboratory Experiments and Numerical Modeling1819
 A. B. Jacquey, M. Cacace, G. Blöcher, H. Milsch, F. Deon, and M. Scheck-Wenderoth

Investigation of Mesh Independency of Micro Polar Constitutive Model by Modelling Saturated Porous Media in Biaxial Tests.....1827
 Jiangxin Liu and Jie Yang

On Suitability of Element Tests to Represent Constitutive Response of Liquefiable Soils.....1836
 Majid T. Manzari and Karma Yonten

Stability Analysis of Radial Jet Drilling in Chalk Reservoirs1842
 M. K. Medetbekova, S. Salimzadeh, H. F. Christensen, and H. M. Nick

Effect of Velocity Profiles on the Thermo-Poro-Elastic Behavior within the Shear Zone of Landslides.....1850
 Wei Liu, Siming He, Frederic L. Pellet, and Xiaoqin Lei

Effect of Thermo-Poro-Mechanical Properties on the Stability of Faults.....1858
 Hadrien Rattetz, Ioannis Stefanou, and Jean Sulem

Modelling Multiphase Geomaterials at High Temperatures in Dynamics with Application to Strain Localization and Rapid Catastrophic Landslides.....1866
 Lorenzo Sanavia and Toan D. Cao

SPH Simulation of Strain Localisation in Geomaterials Using a Visco-Plastic Constitutive Model.....1876
 Shaohan Zhao, Ha H. Bui, Vincent Lemiale, and Giang D. Nguyen

Fracture Propagation and Petroleum Engineering

Integrated Characterization Workflow to Assess Diagenesis Impact on the Petrophysical and Petroacoustic Properties of Carbonate Reservoirs1884
 Elisabeth Bemer, Youri Hamon, and Mathilde Adelinet

Permeability Behavior and the Effective Stress Law for a Partially Fractured Eagle Ford Shale Sample1892
 Athma R. Bhandari, Peter B. Flemings, and Peter J. Polito

Comparative Experimental Study of Rock Cutting under High Confining Pressure and Atmospheric Conditions Using PDC Cutter1900
 Kian Sheikhezadei and Arash Dahi Taleghani

Self-Similar Propagation of a Hydraulic Fracture in a Poroelastic Medium1909
 Emmanuel Detournay, Yera Hakobyan, and Robin Eve

Depletion-Induced Permeability Changes in Naturally-Fractured Gas-Sorbing Formations: A Double-Porosity Fluid Flow and Poromechanical Model.....1915
 Igor Shovkun and D. Nicolas Espinoza

Shale Acid Fracturing: Geomechanical Effects and Fracture Propagation1924
 Igor Shovkun and D. Nicolas Espinoza

Apparent Permeability of Gas Shales—Separation of Fluid-Dynamic and Poro-Elastic Effects1930
 Reinhard Fink, Garri Gaus, Bernhard M. Krooss, Yves Gensterblum, and Alexandra Amann-Hildenbrand

Poroelastic Effects in the Hydraulic Fracturing1938
 Sergey V. Golovin, Alexey N. Baykin, and Alexander V. Valov

Effective Stress Law for Microporous Media—Comparative Case Study on San Juan Coal and Barnett Shale1943
 Suman Saurabh and Satya Harpalani

Self-Similar Propagation of a Plastic Zone Due to Fluid Injection in a Porous Medium1952
 Alexandre Huynen and Emmanuel Detournay

Numerical Investigation of the Stationary Pore Pressure Field Influence on the Hydraulic Fracture Path1960
 Oleg Y. Izvekov and Alexander N. Galybin

Modeling the Nanoscale Kerogen Inclusions in Green River Oil Shale1968
 Dinesh R. Katti, Kalpana S. Katti, Keshab Thapa, and H. M. Nasrullah Faisal

Phase-Field Modeling of Fracture in Poroelastic Solids for Thermal Energy Storage1976
 Xing-Yuan Miao, Olaf Kolditz, and Thomas Nagel

Modeling of Compositional Gas Transport in Shale as a Deformable Porous Medium1984
 O. M. Olorode, I. Y. Akkutlu, and Y. Efendiev

Intersecting Faults Simulation for Three-Dimensional Reservoir-Geomechanical Models1992
 Jean H. Prevost, Allan M. Rubin, and N. Sukumar

Fault Reactivation and Seismicity Associated with Shale-Gas Fracturing and Geologic Carbon Storage—A Comparison from Recent Modeling Studies2000
 Jonny Rutqvist, Antonio P. Rinaldi, and Frederic Cappa

Effect of Poroelasticity on Hydraulic Fracture Interactions2008
 Tomoya Usui, Saeed Salimzadeh, Adriana Paluszny, and Robert W. Zimmerman

Contribution of Osmotic Transport on Oil Recovery from Rock Matrix in Unconventional Reservoirs2016
 Binh T. Bui and Azra N. Tutuncu

An X-FEM Implementation of Hydro-Fracture Growth in Naturally Fractured Saturated Porous Media2027
 Mohammad Vahab, Amir R. Khoei, and Nasser Khalili

Hydraulic Fracturing in Anisotropic and Heterogeneous Rocks.....2035
 Valliappan Valliappan, Joris Remmers, Auke Barnhoorn,
 and David Smeulders

**A Mesh-Free Continuum Based Computational Approach to Modelling
 Rock Fracture2041**
 Yingnan Wang, Ha H. Bui, Giang D. Nguyen, and P. G. Ranjith

**Thermal Data Analysis to Investigate Mass and Heat Transport during
 Methane Hydrate Dissociation Processes2049**
 Koji Yamamoto, Yoshihiro Konno, Xiaoxing Wang, Xiaowei Wang,
 and Takayuki Kanno
