## *I. Keynote lectures*

1. Self-Consolidating concrete: now and future Pages: 3 - 15  
Author(s): S.P. Shah, R.P. Ferron, N.A. Tregger, L. Ferrara, M.W. Beacraft
2. Recent development of PC superplasticizers Pages: 16 - 25  
Author(s): C. Shi
3. Characterization of fresh SCC properties with electrical resistivity Pages: 26 - 34  
Author(s): Z. Li, L. Xiao, Y. Tian
4. Status of self consolidating concrete (SCC) in Asia Pacific Pages: 35 - 42  
Author(s): S.M.F. Asmus, B.J. Christensen
5. Evaluation of SCC formwork pressure Pages: 43 - 55  
Author(s): K.H. Khayat, A.F. Omran
6. Modeling formwork pressure of SCC Pages: 56 - 63  
Author(s): D.A. Lange, Y-S. Liu, J. Henschen
7. Relationships between rheological properties and pumping of fresh self-compacting concrete Pages: 64 - 73  
Author(s): D. Feyes, R. Verhoeven, G. De Schutter
8. Early-age shrinkage and cracking of self-compacting concrete: measurement techniques and mitigation strategies Pages: 74 - 84  
Author(s): C. Miao, Q. Tian, J. Liu

## *II. Raw materials and mix design for SCC*

9. Green design of reactive powder concrete by using Fuller's ideal curve Pages: 87 - 95  
Author(s): C.L. Hwang, S.L. Hsieh, C.H. Lee

10. Role of condensed silica fume in SCC-equivalent mortar Pages: 96 - 104  
Author(s): W.W.S. Fung, I.Y.T. Ng, P.L. Ng, A.K.H. Kwan
11. Optimizing mixing sequence and mixing time for SCC Pages: 105 - 113  
Author(s): I.Y.T. Ng, P.L. Ng, W.W.S. Fung, A.K.H. Kwan
12. Optimized design of aggregate particle size distribution for self-compacting concrete Pages: 114 - 125  
Author(s): B. Zhu, G. Ye, Z. Li, T. Tang, H. Xin
13. Development of carbon nanofiber self-consolidating concrete Pages: 126 - 134  
Author(s): D. Gao, M.S. Sturm, Y.L. Mo
14. A critical review of proportioning techniques for self-compacting concrete Pages: 135 - 144  
Author(s): L. Tang, B. Schouenborg
15. Discussion on mixture ratio design methods of self-compacting concrete Pages: 145 - 151  
Author(s): Z. Li, J. Rui, J. Zhuang
16. Self-compacting steel fiber reinforced concrete - A study about the influence of fibre content and concrete composition Pages: 152 - 161  
Author(s): K. Holschemacher, T. Mueller
17. Effect of adding micro-vegetable fiber in the mix design and resistance of self compacting concrete Pages: 162 - 173  
Author(s): M.A.S. Mohamed, G. Wardeh, E. Ghorbel
18. Investigation on SCC with two gradations of aggregates for hydraulic engineering Pages: 174 - 182  
Author(s): L. Ke-liang, L. Jian-ping, W. Yong
19. Optimization of powder fineness and water/powder ratio to improve segregation resistance of SCC Pages: 183 - 193  
Author(s): D. Lowke, T. Krankel, P. Schiebl
20. Admixtures for ultra-high strength (UHS) self consolidating concrete (SCC) Pages: 194 - 200  
Author(s): J. Kluegge, A. Ohta, S. Asmus

21. Effect of coarse aggregate on properties of self-compacting concrete Pages: 201 - 211  
Author(s): T. Krankel, D. Lowke, P. Schießl
22. An aggregate-space model for self-compacting concrete Pages: 212 - 218  
Author(s): G. Long, Y. Xie, Y. Liu, Z. Yu
23. A preliminary study of the properties of self-compacting concretes mixed with alkaline redox potential water Pages: 219 - 226  
Author(s): B. Sun, L. Wang, D. Liu
24. Super slump retaining PCE based admixtures for self consolidating concrete applications in the pre-cast concrete industry Pages: 227 - 235  
Author(s): N. Karl, J. Yang, S. Asmus, J. Kluegge
25. Slump flow model for evaluating of the rheological parameters of fresh FRSCC Pages: 236 - 245  
Author(s): S. Liu, Y. Ding
26. A new viscosity modifying agent (VMA) for low fines content self-consolidating concrete (SCC) Pages: 246 - 254  
Author(s): M. Corradi, J. Kluegge, N. Kar, B. Christensen, J. Yang
27. Mix proportion design in self-compacting high performance concrete and its application in dalian futures mansion Pages: 255 - 259  
Author(s): B.MN. Wang, L.Y. Zhao, J. Li
- III. Workability of SCC*
28. Experimental study on fine grain sand effect on mortar flow in high--performance concrete Pages: 262 - 269  
Author(s): A. Miyazawa, M. Ozawa, H. Morimoto
29. Study on the flow properties of cementitious materials with an amphoteric copolymer Pages: 270 - 276  
Author(s): W-H. Weng, K-C. Hsu
30. Significance of mortar film thickness to the workability of SCC Pages: 277 - 286  
Author(s): I.Y.T. Ng, W.W.S. Fung, P.L. Ng, A.K.H. Kwan

31. Influence of air content on the steady state rheological properties of fresh self-compacting concrete, without air entraining agents Pages: 287 - 295

Author(s): D. Feys, R. Nicolas, R. Verhoeven, G. De Schutter

32. Application study of viscosity reducing type superplasticizers for low water binder ratio concrete Pages: 296 - 302

Author(s): T. Sugiyama, T. Matsumoto, A. Ohta

33. A multi-scale investigation on the effect of viscosity modifying admixtures on the flowability and stability of self compacting concrete Pages: 303 - 311

Author(s): M. Shekarchi, N.A. Libre, R. Khoshnazar, S.D. Marvasty, R.R. Nia

34. Investigation on the scattering-filling stone self-consolidating concrete Pages: 312 - 322

Author(s): W. Shen, Z. Cai, T. Zhang, J. Hu, M. Zhou, W. Ma

#### *IV. Properties of Hardened SCC*

35. Time dependency of chloride migration coefficient in self-compacting concrete Pages: 325 - 334

Author(s): K. Audenaert, G. De Schutter

36. Effect of harsh environment on properties of self compacting concrete Pages: 335 - 342

Author(s): E. Vejmelkova, M. Jerman, P. Konvalinka, R. Cerny

37. Durability properties of self compacting concrete produced using blast furnace slag Pages: 343 - 350

Author(s): E. Vejmelkova, M. Jerman, P. Konvalinka, S. Grzeszczyk, R. Cerny

38. Flow and strength characteristics of SCC containing limestone and chalk powders Pages: 351 - 361

Author(s): B. Singh, R. Kumar, A. Singh Mukati

39. Comparison of creep of Brazilian self-compacting concretes with different prediction models Pages: 362 - 370

Author(s): A.C. Marques, L.T. Kataoka, M.A. da Silva Machado.

T.N. Bittencourt, M.P. Barbosa

40. Influence of temperature, cement and plasticizer type on the rheology of paste Pages: 371 - 380  
Author(s): H. Vicar
41. Strength properties and chloride permeability of self-compacting concrete Pages: 381 - 390  
Author(s): R. Siddique, P. Aggarwal, J. Khatib, Y. Aggarwal
42. Compressive strength modeling of SCC using linear regression and artificial neural network approach Pages: 391 - 398  
Author(s): R. Siddique, P. Aggarwal, Y. Aggarwal
43. Effect of surface applied corrosion inhibitors on the durability of chloride-contaminated self-compaction concrete Pages: 399 - 409  
Author(s): Z. Liu, C. Miao, J. Liu, W. Zhou
44. Cracking test and analysis of self-compacting concrete at early age Pages: 410 - 415  
Author(s): J. Wang, Y. Wang
45. Shear friction of reinforced concrete members in self-compacting concrete Pages: 416 - 425  
Author(s): P. Desnerck, L. Taerwe, G. De Schutter
46. Analysis on ITZ structure of self-compacting concrete Pages: 426 - 434  
Author(s): C. Yang, W. Chong, Y. Tao, Y. Wang, Z. Wang, Y. Jianxiong, Y. Lin
47. Influence of self-compacting concrete composition on sulphuric acid attack Pages: 435 - 443  
Author(s): D. Feyes, Z. Liu, G. Heirman, G. De Schutter, V. Boel, B. Desmet, J. Vantomme, O. Cizer, L. Vandewalle, D. Van Gemert
48. The properties of self-compacting lightweight aggregate concrete Pages: 444 - 451  
Author(s): H-J. Chen, K-C. Jane, J-L. Peng
49. Predicting the compressive strength of self-compacting concrete using artificial neural network Pages: 452 - 459  
Author(s): Z-R. Yu, A. Ming-zhe, Z. Ming-bo

50. Effect of freezing-thawing cycles on the physical and mechanical characteristics of concrete Pages: 460 - 472  
Author(s): M.A.S. Mohamed, G. Wardeh, E. Ghorbel
51. Increase of SCC robustness to varying aggregate moisture content using VMA Pages: 473 - 482  
Author(s): P. Billberg
52. Statistical properties of steam-cured-plant produced SCC for prestressed precast applications Pages: 483 - 494  
Author(s): L. Ferrara
53. Effect of cellulose fibre on properties of self-compacting concrete with high-volume mineral admixtures Pages: 495 - 505  
Author(s): Z. Jiang, N. Banthia, S. Delbar
54. Statistical models to predict mechanical and visco-elastic properties of SCC designated for precast/prestressed applications Pages: 506 - 525  
Author(s): J. Wu, K.H. Khayat
55. Evaluation of the cement paste thixotropy Pages: 526 - 533  
Author(s): B. Helnan-Moussa, J.Y. Petit, Y. Vanhove, E. Wirquin
56. Experimental study on fiber reinforced high performance SCC and its application in tubing segment Pages: 534 - 541  
Author(s): H. Liu, Y. Ding
57. The effects of expander admixture on strength and shrinkage cracking properties of self-compacting concrete by using artificial sand Pages: 542 - 550  
Author(s): Q. Vuong, L-H. Jiang, C-W. Miao, J-X. Hong, S-Z. Zhang
58. Long term behaviour of self-compacting fibre-reinforced concrete beams Pages: 551 - 561  
Author(s): N. Buratti, C. Mazzotti
59. The investigation of shear behaviour of R.C. beams of self-compacting concrete with high strength Pages: 562 - 576  
Author(s): H.R. Ebrahimi, M.H.A. Beygi

60. Research on impact properties of flexible fibre reinforced self-compacting concrete in middle-low intensity Pages: 577 - 585  
Author(s): X. He, Q. Yang
61. Study on performances of steel fiber reinforced C55 grade self-compacting concrete Pages: 586 - 595  
Author(s): B. Li, H. Gao, G. Cui, J. Zha
62. Properties of cement-based materials coated with shrinkage reducing agents Pages: 596 - 605  
Author(s): Z. Wang, D. Qiao, J. Qian, L. Shi, C. Shi
63. Effect of viscosity modifying agents on the rheology properties of cement paste with polycarboxylate superplasticizer Pages: 606 - 614  
Author(s): D. Wang, Z. Liu, Z. Wu, W. Xiong, Y. Zuo
64. Rock-filled concrete in China - Self compacting concrete for massive concrete Pages: 615 - 627  
Author(s): X. An, M. Huang, H. Zhou, F. Jin
65. Transient strain of self-compacting concrete exposed to high temperature Pages: 628 - 638  
Author(s): J. Tao, X. Liu, Y. Yuan, Luc Taerwe
66. Parameters determining the flow of concrete matrix Pages: 639 - 648  
Author(s): H. Vikan, H. Justnes
67. Carbonation of medium strength SCC Pages: 649 - 656  
Author(s): Y. Xie, K. Ma, G. Long
68. Drying shrinkage of medium strength Scc Pages: 657 - 663  
Author(s): K. Ma, Y. Xie, G. Long, Y. Luo
69. Effect of maximum aggregate size in air-entrained eco-SCC Pages: 664 - 673  
Author(s): F.V. Mueller, O.H. Wallevik

*V. Structural performance*

70. Arching action in steel reinforced self-compacting concrete slabs Pages: 676 - 686

Author(s): S.E. Taylor, M. Sonebi, D. Kidd, W. McCord

71. Anticorrosive behavior of self-consolidating reinforced concrete beams after cracked Pages: 687 - 696

Author(s): G. Chin-hsiang, H. Chao-lung

72. A self-compact concrete-steel composite structure for electrical transmission tower Pages: 697 - 702

Author(s): J. Chen, Y. Ye, X-H. Sheng, D-Y. Huang, W-L. Jin

73. Experimental study on factors influencing creep of self-compacting concrete Pages: 703 - 709

Author(s): J. Zheng, P. Chao, S. Luo

74. Effect of fly ash on the stress-strain behaviour of self-compacting concrete Pages: 710 - 716

Author(s): S. Luo, P. Chao

#### *VI. Constructability and Applications of SCC*

75. Taiwan experience and recommendation of using SCC Pages: 719 - 724

Author(s): C.L. Hwang, C.T. Chenb, T.J. Chen, W.C. Chend, C.Y. Tsaie

76. Minimum thickness of simply supported rectangular SCC slabs using tension stiffening model Pages: 725 - 733

Author(s): K.U. Muthu, H. Narendra, H. Mattarneh, M. Vijay Anand, S. Ganesh

77. Self-consolidating concrete for slip form construction: mix design method and application Pages: 734 - 744

Author(s): K. Wang, S. Shah, G. Lu, J. Grove

78. Underwater concreting using self-compacting grout with two stage concrete Pages: 745 - 754

Author(s): H.S. Abdelgader, A.S. El-Baden, A.M. Othman

79. The use of SCC for the containment of high level radioactive waste Pages: 755 - 765

Author(s): B. Craeye, G. De Schutter, H. Van Humbeeck

80. Developing practical SCC mixes for surface quality at a small precast concrete plant Pages: 766 - 775  
Author(s): W. Zhu, S. Black
81. Quantifying structural build-up through experimental measurements Pages: 776 - 786  
Author(s): R. Ferron, S.P. Shah
82. Performance analysis of self-compacting concrete in the construction of shanxi university lecture building Pages: 787 - 793  
Author(s): S-Y. Wu
83. Bonding between self-consolidating concrete and old existing concrete Pages: 794 - 800  
Author(s): B. Peng, W. Yi, C. Shi
84. Application of self-compacting concrete for bridge repair Pages: 801 - 807  
Author(s): X-F. Wang
85. Experiences with SCC to increase the productivity and applications of prefabricated elements in Mexico Pages: 808 - 816  
Author(s): R.E. Rodrigues Camacho, G.G. Martinez Corona, R. Uribe Afif, H.J. Montano Roman
86. Application of self-compacting concrete in Beijing Pages: 817 - 822  
Author(s): P. Yan, C. Yu
87. Status of self-consolidating concrete (SCC) in Asia Pacific Pages: 823 - 830  
Author(s): S.M.F. Asmus, B.J. Christensen
88. Self-compacting concrete, worldwide experience Pages: 831 - 840  
Author(s): S. Zhang, D. Hughes, A.A. Jeknavorian, T. Nishimura, K. Yang
89. Prediction of spacing and width of cracks for steel fibre reinforced self-compacting concrete flexural elements Pages: 841 - 850  
Author(s): N. Ganesan, P.V. Indira, P.T. Santhosh Kumar
90. Development of self-compacting concrete to produce precast cladding panels Pages: 851 - 859  
Author(s): C. Sui, M. Sonebi, A. Gupta, S. Taylor

91. Research and application of self-compacting concrete Pages: 860 - 870  
Author(s): Z. Yu, Y. Xie, X. Liu
92. The application of rheological method on the research of super-early-strength self-compacting concrete Pages: 871 - 877  
Author(s): R. Enping, Z. Shao, W. Qiang, Z. Xin, X. Zhong
93. Rheological properties of alkali activated cement for oil well lining Pages: 878 - 891  
Author(s): C. Ruiz-Santaquiteria, A. Fernandez-Jimenez, A. Palomo
