# 2017 IEEE International Conference on Autonomic Computing

## ICAC 2017

### Table of Contents

|                                                        |      |
|--------------------------------------------------------|------|
| Welcome Message from the General Chair.....            | ix   |
| Welcome Message from the Technical Program Chairs..... | xi   |
| Committees.....                                        | xii  |
| Program Committee .....                                | xiii |
| Steering Committee.....                                | xv   |
| Keynotes.....                                          | xvi  |

---

#### Session 1: Self-Managing Platforms for Data Processing

|                                                                                             |    |
|---------------------------------------------------------------------------------------------|----|
| Social Fusion: Integrating Twitter and Instagram for Event Monitoring .....                 | 1  |
| <i>Prasanna Giridhar, Shiguang Wang, Tarek Abdelzaher, Tanvir Al Amin, and Lance Kaplan</i> |    |
| Self-Corrective Dynamic Networks via Decentralized Reverse Computations .....               | 11 |
| <i>Evangelos Pournaras and Jovan Nikolić</i>                                                |    |
| Self-Tuning Resource Demand Estimation .....                                                | 21 |
| <i>Johannes Grohmann, Nikolas Herbst, Simon Spinner, and Samuel Kounev</i>                  |    |
| ExpREsS: EneRgy Efficient Scheduling of Mixed Stream and Batch Processing Workloads .....   | 27 |
| <i>Stathis Maroulis, Nikos Zacheilas, and Vana Kalogeraki</i>                               |    |
| Wide-Area Spark Streaming: Automated Routing and Batch Sizing .....                         | 33 |
| <i>Wenxin Li, Di Niu, Yinan Liu, Shuhao Liu, and Baochun Li</i>                             |    |

#### Session 2: Candidates for the Karsten Schwan Best Paper Award

|                                                                                                        |    |
|--------------------------------------------------------------------------------------------------------|----|
| AccStream: Accuracy-Aware Overload Management for Stream Processing Systems .....                      | 39 |
| <i>Haiyang Sun, Robert Birke, Walter Binder, Mathias Björkqvist, and Lydia Y. Chen</i>                 |    |
| Hierarchical Self-Tuning of Concurrency and Resource Units in Data-Analytics Frameworks .....          | 49 |
| <i>Gil Jae Lee and José A. B. Fortes</i>                                                               |    |
| Efficient Utility-Driven Self-Healing Employing Adaptation Rules for Large Dynamic Architectures ..... | 59 |
| <i>Sona Ghahremani, Holger Giese, and Thomas Vogel</i>                                                 |    |

## Session 3: Overview of Co-Located Workshops

### Poster Session

|                                                                                       |    |
|---------------------------------------------------------------------------------------|----|
| Selective Checkpointing for Minimizing Recovery Efforts of Smartphone Apps .....      | 69 |
| <i>Li Li, Yunhao Bai, Xiaorui Wang, Mai Zheng, and Feng Qin</i>                       |    |
| Cache-Friendly Bitmap Compression on Symmetric Multiprocessors .....                  | 71 |
| <i>Alexia Ingerson, David Chiu, and Jason Sawin</i>                                   |    |
| Elastic Nodes for the Internet of Things: A Middleware-Based Approach .....           | 73 |
| <i>Alwyn Burger, Christopher Cichowskyj, and Gregor Schiele</i>                       |    |
| Exploring Fast Artistic Style Merging on Heterogenous Architecture .....              | 75 |
| <i>Peian Wang, Jinyun Gu, and Zichen Xu</i>                                           |    |
| Towards Autonomous Depth Perception for Surveillance in Real World Environments ..... | 77 |
| <i>Gayatri M. Behara and Vamsy P. Chodavarapu</i>                                     |    |
| Management of QoS-oriented Adaptation in Automobile Cruise Control Systems .....      | 79 |
| <i>Arun Adiththan, Kaliappa Ravindran, and S. Ramesh</i>                              |    |
| Switching ZooKeeper's Consensus Protocol at Runtime .....                             | 81 |
| <i>Alexander Frömmgen, Stefan Haas, Martin Pfannemüller, and Boris Kohldehofs</i>     |    |

## Session 4: Autonomic Computing for Autonomous Systems

|                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------|-----|
| Deep Learning with Edge Computing for Localization of Epileptogenicity Using Multimodal<br>rs-fMRI and EEG Big Data ..... | 83  |
| <i>Mohammad-Parsa Hosseini, Tuyen X. Tran, Dario Pompili, Kost Elisevich,<br/>and Hamid Soltanian-Zadeh</i>               |     |
| Smartphone Radio Interface Management for Longer Battery Lifetime .....                                                   | 93  |
| <i>Marco Brocanelli and Xiaorui Wang</i>                                                                                  |     |
| A Reinforcement Learning-Based Framework for the Generation and Evolution of Adaptation<br>Rules .....                    | 103 |
| <i>Tianqi Zhao, Wei Zhang, Haiyan Zhao, and Zhi Jin</i>                                                                   |     |
| Coverage Optimization with Connectivity Preservation for UAV Swarms Applying Chaotic<br>Dynamics .....                    | 113 |
| <i>Martin Rosalie, Matthias R. Brust, Grégoire Danoy, Serge Chaumette, and Pascal Bouvry</i>                              |     |
| Self-Aware Context in Smart Home Pervasive Platforms .....                                                                | 119 |
| <i>Philippe Lalanda, Eva Gerber-Gaillard, and Stéphanie Chollet</i>                                                       |     |

## Session 5: Self-Driving Clouds

|                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------|-----|
| ESP: A Machine Learning Approach to Predicting Application Interference .....                               | 125 |
| <i>Nikita Mishra, John D. Lafferty, and Henry Hoffmann</i>                                                  |     |
| DIAL: Reducing Tail Latencies for Cloud Applications via Dynamic Interference-aware Load<br>Balancing ..... | 135 |
| <i>Seyyed Ahmad Javadi and Anshul Gandhi</i>                                                                |     |

|                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------|-----|
| GOVERNOR: Smoother Stream Processing Through Smarter Backpressure .....                               | 145 |
| <i>Xin Chen, Ymir Vigfusson, Douglas M. Blough, Fang Zheng, Kun-Lung Wu, and Liting Hu</i>            |     |
| Network-Adaptive Scheduling of Data-Intensive Parallel Jobs with Dependencies in Clusters .....       | 155 |
| <i>Shaoqi Wang, Xiaobo Zhou, Liqiang Zhang, and Changjun Jiang</i>                                    |     |
| Reducing Power Use and Enabling Oversubscription in Multi-tenant Data Centers Using Local Price ..... | 161 |
| <i>Sulav Malla and Ken Christensen</i>                                                                |     |

## **Session 6: Infrastructure Building Blocks of Autonomic Computing**

|                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------|-----|
| CoSmart: Coordinating Smartphone with Desktop Computer for Joint Energy Savings .....                   | 167 |
| <i>Kuangyu Zheng, Bruce Beitman, and Xiaorui Wang</i>                                                   |     |
| Multiverse: Easy Conversion of Runtime Systems into OS Kernels via Automatic Hybridization .....        | 177 |
| <i>Kyle C. Hale, Conor Hetland, and Peter Dinda</i>                                                     |     |
| MONAD: Self-Adaptive Micro-Service Infrastructure for Heterogeneous Scientific Workflows .....          | 187 |
| <i>Phuong Nguyen and Klara Nahrstedt</i>                                                                |     |
| Addressing Memory Pressure in Data-intensive Parallel Programs via Container Based Virtualization ..... | 197 |
| <i>Wei Chen, Jia Rao, and Xiaobo Zhou</i>                                                               |     |

## **Session 7: Autonomic Computing in the Wild**

|                                                                                                                                          |     |
|------------------------------------------------------------------------------------------------------------------------------------------|-----|
| DARE: A Distributed Adaptation and Failure Recovery Framework for Software Systems .....                                                 | 203 |
| <i>Emad Albassam, Jason Porter, Hassan Goma, and Daniel A. Menascé</i>                                                                   |     |
| Adding Self-Improvement to an Autonomic Traffic Management System .....                                                                  | 209 |
| <i>Christian Krupitzer, Julian Otto, Felix Maximilian Roth, Alexander Frömmgen, and Christian Becker</i>                                 |     |
| Vulnerabilities in Lagrange-Based DMPC in the Context of Cyber-Security .....                                                            | 215 |
| <i>Pablo Velarde, José M. Maestre, Hideaki Ishii, and Rudy R. Negenborn</i>                                                              |     |
| Understanding the Computational Requirements of Virtualized Baseband Units Using a Programmable Cloud Radio Access Network Testbed ..... | 221 |
| <i>Tuyen X. Tran, Ayman Younis, and Dario Pompili</i>                                                                                    |     |
| Ananke: A Q-Learning-Based Portfolio Scheduler for Complex Industrial Workflows .....                                                    | 227 |
| <i>Shenjun Ma, Alexey Ilyushkin, Alexander Stegehuis, and Alexandru Iosup</i>                                                            |     |

## **Workshop Papers**

### **The 2nd International Workshop on Models@run.time for Self-aware Computing Systems**

|                                                                                      |     |
|--------------------------------------------------------------------------------------|-----|
| Soft-Goal Approximation Context Awareness of Goal-Driven Self-Adaptive Systems ..... | 233 |
| <i>Aurélien Vialon, Kenji Tei, and Samir Aknine</i>                                  |     |
| Mitigating the Inevitable Failure of Knowledge Representation .....                  | 239 |
| <i>Christopher Landauer</i>                                                          |     |

|                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------|-----|
| A Dynamic Software Product Line Approach for Adaptation Planning in Autonomic Computing Systems ..... | 247 |
| <i>Martin Pfannemueller, Christian Krupitzer, Markus Weckesser, and Christian Becker</i>              |     |
| <b>2017 Workshop on Self-Aware Computing (SeAC 2017)</b>                                              |     |
| An Architecture for Self-Awareness Experiments .....                                                  | 255 |
| <i>Christopher Landauer and Kirstie L. Bellman</i>                                                    |     |
| Learning Knowledge of Agency .....                                                                    | 263 |
| <i>Justin Brody, Samuel Levin, and Samuel Shapiro</i>                                                 |     |
| Language Support for Modular Autonomic Managers in Reconfigurable Software Components .....           | 271 |
| <i>Frederico Alvares, Gwenaël Delaval, Eric Rutten, and Lionel Seinturier</i>                         |     |
| <b>Self Organizing Self Managing Clouds Workshop (SOSseMC 2017)</b>                                   |     |
| Compression for Time Series Databases Using Independent and Principal Component Analysis .....        | 279 |
| <i>Arnak V. Poghosyan, Ashot N. Harutyunyan, and Naira M. Grigoryan</i>                               |     |
| Scalability Analysis of Cloud Software Services .....                                                 | 285 |
| <i>Gunnar Brataas, Nikolas Herbst, Simon Ivansek, and Jure Polutnik</i>                               |     |
| The Role of Models@run.time in Autonomic Systems: Keynote.....                                        | 293 |
| <i>Nelly Bencomo</i>                                                                                  |     |
| <b>Author Index</b> .....                                                                             | 295 |
