CONTENTS

Does One Size Fit All? Or Do Different Warship Designs Require Different Ship Design Methods? 1

D Andrews, FREng, PhD, FRINA, RCNC (Vice President), University College London, London, UK

From Performance Requirements to Viable Technical Solutions – Naval Architect's Reality Check in the Conceptual Design Phase 21

K Partiala, Surma Ltd, Finland

R Kotiranta, Surma Ltd, Finland

Why is Naval Design Decision-Making So Difficult? 27

A A Kana, Delft University of Technology, the Netherlands

C P F Shields and D J Singer, University of Michigan, USA

Initial Lessons from Application of Virtual Reality to Warship Design 35

N Bradbeer, University College London, UK

Combat Safety and Survivability: Using Survivability Techniques to Assess Crew Safety During Combat 43

D Manley FRINA, RCNC, UK Ministry of Defence, UK

Harness: Development of a Multifunctional Protective Ship Bulkhead 51

R van der Wal, TNO Defence Research, The Netherlands

R J C van Meurs, Ministry of Defence, The Netherlands

Study of Dynamic Flow Effects Due to Ship Air Wake and Rotor Downwash Interaction on Warship Helo-Decks 55

IS Makkar, SN Singh and SS Sinha, Department of Applied Mechanics, Indian Institute of Technology Delhi, India

R Vijayakumar, Department of Ocean Engineering, Indian Institute of Technology Madras, India

Effect of Gas Turbine Intake Location on the Smoke Ingress Problem in Naval Ships

R Vijayakumar, Indian Institute of Technology Madras, India

S N Singh, and V Seshadri, Indian Institute of Technology Delhi, India

Paper not formally presented at this conference

An Initial Investigation of Submarine Torpedo Evasion With Top Speed 73

G Hartle, Ministry of Defence, UK

N Bradbeer, University College London, UK

Life Cycle Management Matrix – Optimising Life Cycle Maintenance of Naval Ships 81

A Thaikoottam Kunjumon, Abu Dhabi Ship Building, UAE

A New Approach to Managing the Acoustic Signature Risk in Warship Design 89

K G Hamson, Frazer-Nash Consultancy Limited, UK

The Might of the Lesser-Thought-of Watertight, Weathertight and Gas-Tight NBCW Seals in Warfare: Why their Improved Maintenance Today, and Introducing Continuous Monitoring in the Future, Can Improve Safety on Warships 99

J. Globisz, C.M.E. Hunter, C.S.P. Hunter, G.H.C. Hunter, C. Kay, F. Milner, M. B. Radhakrishna, A. Saw, S. Watson, Coltraco Ultrasonics, UK

The Potential Use of Energy Saving Technologies in Future Patrol Combatants 107

R J Pawling, S Suárez de la Fuente, D J Andrews, Marine Research Group, UCL, London, UK

A Systematic Comparison Of The Influence Of The Hull Vane®, Inter-Ceptors, Trim Wedges, and Ballasting on the Performance of the 50m AMECRC Series #13 Patrol Vessel 123

K Uithof, N Hagemester, B Bouckaert, P G van Oossanen, and N Moerke, Hull Vane B.V., van Oossanen Naval Architecture, and van Oossanen Fluid Dynamics, Netherlands

Alternative Energy Systems for Naval Vessels 131

U Vogler and J Lampe, DNV GL, Germany

Progress in Quiescent Period Prediction 139

M Belmont and J Christmas, University of Exeter, UK

B Ferrier, Hoffman Engineering Corp, USA

JM Duncan and J Duncan, DE&S Maritime Combat Systems, UK

Helicopter – Ship Motion Interface Prediction Using Simulation Technology Developments and Trial Results from a Dedicated Royal Navy Sea Trial 147

Dr. B Ferrier, Hoffman Engineering Corporation, Dynamic Interface Laboratory, USA

Dr. J Duncan, Defence Equipment & Support, MOD, UK

Dr. M. R. Belmont, Exeter University, UK

Mr. A Curnow, Defence Equipment & Support, MOD, UK

Mr. J. Duncan, Defence Equipment & Support, MOD, UK
