

17th Annual Conference of the International Association for Mathematical Geosciences (IAMG 2015)

Freiberg, Germany
5-13 September 2015

Volume 1 of 2

Editors:

**Helmut Schaeben
Raimon Tolosana Delgado
K. Gerald van den Boogaart
Regina van den Boogaart**

ISBN: 978-1-5108-4929-7

Contents

F00. Plenary Invited Talks	17
F0001. Geoinformatics in the Semantic Web <i>Xiaogang (Marshall) Ma</i>	18
F0004. Hierarchical paths of migration of impurity trace elements in source rocks and resulted conjugate geochemical anomalies using mathematical modeling and computer simulation <i>Yongzhang Zhou</i>	27
F01. Commemorating William Smith (23 March 1769 – 28 August 1839): 200 years of Geomodelling	29
F0102. A Proposal for how to Build Large-Scale 3D Geological Models without Using Map Projections <i>Björn Zehner</i>	30
F0103. Bridging static and dynamic modeling: an application to high energy geothermal reservoir modeling <i>Simon Lopez, Gabriel Courrioux, Riad Sanchez, Konstantin Brenner, Roland Masson, Antonio Guillen, Bernard Bourguine, Christelle Loiselet, Philippe Calcagno, Cécile Allanic</i>	38
F0104. Building folded horizon surfaces from 3D points: a new method based on geomechanical restoration <i>Benjamin Chauvin, Guillaume Caumon</i>	39
F0105. Challenges with Applying Geological Modelling for Infrastructure Design <i>Alan Keith Turner, Holger Kessler</i>	49
F0106. Comparisons from multiple realizations of a geological model. Implication for uncertainty factors identification <i>Gabriel Courrioux, Cécile Allanic, Bernard Bourguine, Antonio Guillen, Thierry Baudin, Frédéric Lacquement, Sunsearé Gabalda, Florence Cagnard, Benjamin Le Bayon, Jean Besse, Didier Marquer, Pierre Trap, Philippe Hervé Leloup, Dimitri Schreiber</i>	59
F0108. Converting corrupted 3d geomodels into voxel mode <i>Björn Wiecezorek, Georg Semmler, Jan Gietzel, Helmut Schaeben</i>	67
F0109. Geologically structured tetrahedral meshes for numerical geoscientific modeling approaches <i>Wolfgang Gossel, Lars Schimpf</i>	76
F0110. Knowledge-driven Multiple Scale 3D Geological Modeling Method in Urban Geological Survey <i>Qiyu Chen, Gang Liu</i>	82

F0111. RINGMesh: A programming library for geological model meshes <i>Jeanne Pellerin, Arnaud Botella, Antoine Mazuyer, Bruno Lévy, Guillaume Caumon</i>	92
F0112. Splay faults and flower structures - a theoretical framework for 3D geomodelling. <i>Guillaume Caumon, Gautier Laurent, Charline Julio, Mary Ford, Gabriel Godofroy</i>	102
F0113. Three dimensional geological model of Geyer area, Erzgebirge, Germany <i>Lothar Ratschbacher, Sosina Haile, Richard Gloaguen, Dietmar Leonhardt</i> . .	112
F02. Communicating Digital Geomodels – Methodologies and Challenges	117
F0203. Brandenburg 3D -GIS goes underground, a geological 3D model for the public <i>Maik Schilling, Andreas Simon, Christoph Jahnke, Thomas Höding</i>	118
F0205. Data Management Strategy Based on Harmonised Data Models – An Example from Switzerland <i>Sabine H. Brodhag, Nils Oesterling, Roland Baumberger</i>	126
F0206. Generic Data Model Design and tools, for geoscience mapping projects implemented in ArcGIS. <i>Pierre Brouillette, Etienne Girard, Gabriel Huot-Vezina</i>	130
F0207. Geological Spatio-temporal Data Management Model Based on System Project Library <i>Gang Liu, Xiang Que, Shanjun Tian, Qiyu Chen</i>	136
F0209. Geology meets Arts - Presentation of 3D Geological Models <i>Lars Schimpf, Peter Wycisk</i>	144
F0210. Integrating commercially generated data into centralised geoscience data repositories for the benefit of urban environments <i>Carl J. Watson</i>	149
F0211. Integration and Sharing Service System of Three-Dimensional Geological Models Based on Geo3DML <i>Wang Xianghong, Qu Honggang, Wang Zhangang, Zhang Tingting</i>	156
F0212. Modeling the Dutch subsurface: From paper product towards dissemination of a 3D-digital model. <i>Maryke M. Den Dulk, Hans J.C. Doornenbal, Johan J.H. ten Veen</i>	158
F0214. The Role of Data modelling in a Modern Geological Survey <i>Martin L Nayembil, G Baker</i>	166
F04. Geometallurgy	177
F0401. A Self-Guiding Domain Tool For Long-Tailed Bi-Modal Data Sets <i>Steffen Brammer</i>	178
F0402. Downscaling and multiple imputation of metallurgical variables <i>Jared L. Deutsch, Thomas H. Etsell, Jozef Szymanski, Clayton V. Deutsch</i> . .	185
F0403. Inference of phase properties from sorting experiments and MLA data <i>Stephan Matos Camacho, Thomas Leißner, Kai Bachmann, K. Gerald van den Boogaart</i>	195

F0404. Monitoring gravitational and particle shape settling effects on MLA sampling preparation <i>Thomas Heinig, Kai Bachmann, Raimon Tolosana Delgado, K. Gerald van den Boogaart, Jens Gutzmer</i>	200
F0405. Optimizing a stepwise fractionation chain in mineral processing or metallurgy <i>Raimon Tolosana Delgado, K. Gerald van den Boogaart, Silke Konsulke, Anne Scholz, Stephan Matos Camacho, Christian S. Christesen, Martin Rudolph, Christiane Scharf</i>	207
F0406. The Effect of Problem Formulation on Adaptive Processing Decisions <i>K. Gerald van den Boogaart, Raimon Tolosana Delgado, Stephan Matos Camacho</i>	217
F0407. Use and analysis of MWD-data to increase selectivity in an industrial mineral operation <i>Steinar Ellefmo</i>	227
F0408. Workflows in geometallurgical prediction: challenges and outlook <i>Julián Ortiz, Willy Kracht, Brian Townley, Pia Lois, Efraín Cárdenas, Roberto Miranda, Matías Álvarez</i>	228
F05. Geostatistics and Operations Research in Stochastic Mine Planning	235
F0503. Data assimilation of sensor measurements to improve production forecasts in resource extraction <i>Tom Wambeke, Joerg Benndorf</i>	236
F0505. High-order, data-driven spatial simulation using Legendre-like orthogonal splines <i>Ilnur Minniakhmetov, Roussos Dimitrakopoulos</i>	246
F0506. Surface costs as a key profitability factor in optimisation of a greenfield electricity generation project of joint operation of a lignite surface mine and a mine-mouth power plant. <i>Michal Dudek, Witold Kawalec, Leszek Jurdziak</i>	258
F0507. Transition from Open pit to Underground – Using Mixed Integer Linear Programming Approach Under Stochastic Grade <i>Joyce Sze Yee Chung, Oktay Erten, Erkan Topal</i>	268
F0508. Uncertainty Analysis for Mineral Resource and Ore Reserve Estimation <i>Donghyeon Lee, Sungjae Lee, Yosoon Choi</i>	278
F06. GeoMap: Regional Geochemistry Mapping with Logratio Techniques	279
F0602. Compositional data-driven alternatives to single geochemical component maps <i>K. Gerald van den Boogaart, Jennifer McKinley, Patrice de Caritat, Peter Filzmoser, Eric Grunsky, Karel Hron, Clemens Reimann, Raimon Tolosana Delgado</i>	280
F0605. Geostatistical Fisher discriminant analysis <i>Raimon Tolosana Delgado, Jennifer McKinley, K. Gerald van den Boogaart</i> .	281
F0607. Multivariate log-ratio statistics and GIS: A combined approach to analyze geochemistry data of stream sediment samples within granite areas of the Bohemian Massif in Austria <i>Heinz Reitner, Peter Filzmoser, Herbert Pirkl</i>	290

F0608. Multivariate Spatial Analysis of Glacial Till Geochemical Data; Melville Peninsula, Nunavut, Canada <i>Ute Mueller, Eric Grunsky</i>	299
F0610. Weighted balances for compositional data and their application to geochemistry <i>Karel Hron, Peter Filzmoser, Patrice de Caritat</i>	301
F0611. What defines a geochemical map? Implications for environmental assessment <i>Jennifer McKinley, Raimon Tolosana-Delgado, Karel Hron, Patrice de Caritat, Eric Grunsky, Clemens Reimann, Peter Filzmoser, K. Gerald van den Boogaart</i>	302
F07. Mathematics of Oil Recovery	303
F0701. 3D controlled source electromagnetic parallel simulation using the adaptive finite element method <i>Yuxiang Zhang</i>	304
F0703. Discrete Fracture Network Modeling and Gel Injection Simulation in Fractured Carbonates <i>Ashkan Soltanieh, Serhat Akin</i>	N/A
F0704. Hydrocarbon Generation & Expulsion Model of Lower Silurian Longmaxi Shale in the Southern Sichuan Basin <i>Xiaoming Chen, Rili Gao, Jianzhong Li, Qiulin Guo, Hongbing Xie</i>	326
F0705. Identification and Characterization of Channeling With an Ensemble of Methodologies in Waterfloods <i>Junjian Li, Hanqiao Jiang, Qinghui Zhang, Ning Li, Lidong Mi, Xiang'an Lu</i>	331
F0706. Investigation of operational constrains on improving the recovery of WAG injection in an Iranian offshore field using simulated annealing <i>Hossein Roozszaz, Saeid Sadeghnejad, Mehrdad Manteghian</i>	341
F0708. Numerical Schemes for Anomalous Diffusion of Single-Phase Fluids In Porous Media <i>Abeeb Awotunde, Ryad A. Ghanam, Suliman S. Al-Homidan, Nasser-Eddine Tatar</i>	350
F0709. Positioning of an injection well by combining watercut matching and adjoint method <i>Jeongwoo Jin, Jonggeun Choe</i>	351
F0710. Sensitivity-based Upscaling for History Matching of Reservoir Models <i>Saad Mehmood, Abeeb Awotunde</i>	357
F08. Mathematical Modelling and Numerical Simulation of Multiphase Flow and Multicomponent Reactive Transport in Porous Media	367
F0801. Adaptive vertical discretization techniques for transport and mixing in estuaries <i>Balthasar Reuter, Vadym Aizinger</i>	368
F0804. Efficient uncertainty propagation of lognormal hydraulic conductivity in a three dimensional hydrogeological model of flow and transport on very large regular grids <i>Stelios Liodakis, Phaedon Kyriakidis, Petros Gaganis</i>	369

F0805. Finding a balance between accuracy and computational effort for modeling biomineralization <i>Johannes Hommel, Anozie Ebigbo, Robin Gerlach, Alfred B Cunningham, Rainer Helmig, Holger Class</i>	378
F0806. Numerical simulation of hydrothermal ore-forming systems with complex boundary conditions: An approach based on the lattice Boltzmann method <i>Wei Qiang, Hui Cao</i>	380
F0807. Rock mechanics and mass exchange processes <i>Maxim Khrumchenkov, Eduard Khrumchenkov</i>	390
F09. Medical Geology	399
F0901. A quantitative test for bi-normality <i>Peter Bossew</i>	N/A
F0903. Estimation of radon prone areas from the geogenic radon potential or proxy quantities, calibrated by indoor radon concentration. <i>Peter Bossew</i>	404
F0904. Probabilistic evaluation of indicator geostatistical map of exceeding a soil geochemical threshold <i>C Guardiola-Albert, Eulogio Pardo-Igúzquiza</i>	411
F10. Quantitative Models in Marine and Coastal Geosciences	421
F1001. A multivariate model of NW Mediterranean extreme events at present and future climate: hydrodynamics, energy and duration <i>Jue Lin-Ye, Manuel García-León, Vicente Gràcia, Agustín Sánchez-Arcilla</i>	422
F1002. Chaos recognition in palaeoclimatic systems <i>Sergey Kotov, Heiko Paelike, Mathieu Martinez, David De Vleeschouwer</i>	431
F1003. Coastline changes: Competition of geological processes, climate changes and anthropogenic activities – a modelling approach <i>Jan Harff, Junjie Deng, Andreas Groh, Wenyan Zhang</i>	435
F1006. Geomorphologic features of the marine environment in the Eastern Mediterranean using a modern processing approach <i>Eleni Kokinou</i>	436
F1009. Shoreline Changes investigation during the last 15 years in Kalpitiya Peninsula, Sri Lanka <i>Mathara Arachchige D. Samanmali</i>	446
F11. Quantitative Approaches in Provenance Analysis	451
F1103. Multivariate analyses of phenocryst compositional data refine the Bed I tephrostratigraphic framework of Olduvai Gorge, Tanzania <i>Joerg M. Habermann, Harald Stollhofen, Lindsay J. McHenry</i>	452
F1104. Provenance Analysis on Tea (<i>Camellia sinensis</i>) by means of Main and Trace Elements <i>Solveig Pospiech, Raimon Tolosana Delgado, Hans Ruppert</i>	453
F12. Quantification of Complex Rock Structures in 2D and 3D	455

F1202. 3D visualization and analysis of fracturING in the Precambrian bedrock characterized by complicated structures, two case studies from southern Finland <i>Eevaliisa Laine, Mira Markovaara-Koivisto</i>	456
F1203. A comparative study of the tensor and upscaling methods for evaluating permeability in fractured reservoirs <i>Ricardo Flório, José Almeida</i>	465
F1209. Towards stochastic modelling of folds in poly-deformed terranes using structural information <i>Lachlan Grose, Gautier Laurent, Laurent Aillères, Mark Jessell, Guillaume Caumon</i>	475
F13. Inverse Problems in the Geosciences	483
F1301. 2D Inversion of Marine Controlled-Source Electromagnetic Data <i>Ying Liu, Yuguo Li</i>	484
F1302. Advanced interactive 3D potential field modelling <i>Hans-Juergen Goetze, Sabine Schmidt, Michael Alvers, Christian Plonka, Liliana Barrio-Alvers, Bernd Lahmeyer</i>	492
F1303. Bayesian facies inversion, using spatial resampling and cosimulation with model response data <i>George Valakas, Konstantinos Modis</i>	495
F1304. Determination of Orthogonality- A new methodology for analysis of gravity and magnetic field data <i>N.L. Mohan, S. Barala, R.R. Mathur</i>	505
F1305. Distance Measure between sedimentary Successions and its Application in Inverse Stratigraphic Modeling <i>Taizhong Duan</i>	511
F1306. Inverting for earthquake kinematic source parameters with GPS and InSAR: Stepwise nonlinear and linear FEM-based inverse analyses <i>Sui Tung, Tim Masterlark, Theodore Donovan</i>	512
F1309. Stochastic inversion using parallelized Covariance Matrix Adaptation algorithm <i>Alexander Grayver, Alexey Kuвшinov</i>	513
F1310. Studying the Structural Features of the Geophysical Potential Fields with the Use of Parallel Algorithms <i>Petr S. Martyshko, Natalia Fedorova, Alexei Rublev</i>	517
F1311. The uniqueness of the inverse problem in thin-sheet electromagnetic modeling <i>Mikhail Kruglyakov, Vladimir Dmitriev</i>	527
F1312. The “native” wavelet transform for solving the inverse problem of gravimetry on a spherical manifold <i>Natalia Matveeva, Edward Utemov</i>	528
F1313. Volcano deformation source parameters estimated from FEM-based nonlinear inverse analyses of InSAR: Sensitivities to uncertainties in seismic tomography <i>Tim Masterlark, Theodore Donovan, Kurt Katzenstein, Sui Tung</i>	540
F14. Directional Statistics	551

F1402. Diminution of the sample size of individual orientation measurements approximately preserving the orientation density function <i>Florian Bachmann, Helmut Schaeben</i>	552
F1403. Estimating the number and locations of apices of distributive systems <i>Peter E Jupp, Amanda Owen, Dinara Sadykova</i>	561
F1404. Statistics of Ambiguous Rotations <i>Peter Jupp, Richard Arnold</i>	565
F1405. Statistics of Orthogonal Axial Frames <i>Richard Arnold, Peter Jupp</i>	569
F15. Machine Learning and Knowledge Discovery in the Geosciences	577
F1501. Applied Bayesian Multivariate Geostatistical Algorithm for Formation Permeability Modeling <i>Watheq Al-Mudhafar, Sarko Hakim</i>	578
F1502. Classification of hyperspectral imagery using Gaussian Process with automated identification of the importance of information conveyed by different wavelengths <i>Anna Chlingaryan, Arman Melkumyan, Richard J. Murphy</i>	588
F1503. Decision-Oriented Mapping Using Extreme Learning Machines <i>Michael Leuenberger, Mikhail Kanevski</i>	597
F1508. Multivariate Outlier Detection in Geochemical Data <i>Mehala Balamurali, A. Melkumyan</i>	602
F1509. Optimization Decision-making of Well Placement Using a Hierarchical Hybrid Optimization Approach With Global and Local Optimization for PUNQ-S3 Reservoir <i>Shuaiwei Ding, Hanqiao Jiang, Junjian Li, Guangwei Liu, Lin Zhao, Wenchao Fang</i>	611
F1510. Predicting Suspended Sediment load Using Artificial Neural Network: A Case Study in the Upper Reach of the Spree River, Germany <i>Mustafa Al.Mukhtar</i>	621
F1511. Prospectivity evaluation by seismic trace form classification <i>Vasily Demyanov, Vladimir Belozеров, Vitaly Baranov</i>	626
F1513. Simulations from spatially varying kriging model with compactly supported covariance <i>Konstantin Krivoruchko</i>	633
F1514. The evaluation of texture parameters used in geological images analysis <i>Magdalena Habrat, Mariusz Mlynarczuk</i>	640
G01. Methodological Advances in Numerical Modelling for the Geosciences	645
G0101. CIDRe – a new irregular and parameter constrained approach for the resampling of scattered data <i>Peter Menzel</i>	646
G0102. Meshfree Numerical Simulation in Soil Mechanics with the Finite Pointset Method (FPM) <i>Isabel Michel, Joerg Kuhnert</i>	652
G0103. Meshless RBF based pseudospectral solution for acoustic wave equation <i>Pankaj K Mishra, Sankar K Nath</i>	659

G0104. Numerical solution of the geodetic boundary value problem using the finite element method <i>David Mráz, Milan Bořík, Jaroslav Novotný</i>	665
G0105. The projective method approach in the electromagnetic integral equations solver <i>Mikhail Kruglyakov, Lidia Bloshanskaya</i>	673
G02. Numerical Modelling in Large Scale Geodynamics	683
G0201. Deformation and magmatic structures in the North-East Baltic Shield: mechanisms and dynamics of their formation <i>Valentina Filatova</i>	684
G0202. Numerical Modelling of double polarity subduction: application to the Western Mediterranean basin <i>Mireia Peral Millan, Sergio Zlotnik, Manel Fernández Ortiga, Ivone Jiménez-Munt</i>	692
G0203. Pilot Audio Magnetotelluric (AMT) Survey over Greenstone Schist Belt of Dhanjori Volcanics, Eastern India: Inferences on Metallogeny <i>Shailendra Singh, Shalivahan Srivastava, Ved Prakash Maurya, Anurag Tripathi, Ashish Kumar Bage</i>	698
G0204. Surrogate-based Modeling and Calibration of a Synthetic Geothermal Reservoir Model: Looking for efficient ways of calibration in highly non-convex problems <i>Ariel Vidal, Rosalind Archer</i>	708
G03. Numerical Modelling of Basins and Hydrocarbon Resources	719
G0301. 3D Basin Numerical Modeling And Its Application <i>Qiulin Guo, Hongbing Xie, Xiaoming Chen, Junwen Hu, Rili Gao, Min Zheng, Wei Yan</i>	720
G0304. Improved Arrington Method for Forecasting Reserve Growth Based on Discontinuous Reporting Reserves Data <i>Mi Shiyun, Qian Zhang, Xinchao Liu</i>	728
G0305. Nonlinear Partial Differential Equations and its application in petroleum <i>Rili Gao, Chen Xiaoming, Zhao Zhengwang, Wu Na, Ma Zhong, Yi Qing . . .</i>	734
G04. Integration of Stochastic and Numerical Models	739
G0401. A new data assimilation technique based on EnKF and Brownian bridges in the context of Richards' equation. <i>Marco Berardi, Andrea Andrisani, Luciano Lopez, Michele Vurro</i>	740
G0402. Conditioning geological facies to production and well data using the ensemble Kalman filter and the level set method: a study on ensemble size and localization. <i>David Leonardo Moreno Bedoya, Sigurd I. Aanonsen</i>	745
G0404. Space-time-dynamic integrated modelling of pollutant emissions from point sources for the determination of air-, surface-, subsurface- and groundwater pollution <i>Gunter Spöck, Juergen Pilz, Tanja Maier</i>	756
G0405. Stochastic reservoir characterization using Ensemble Smoother with distance-based covariance localization <i>Hyungsik Jung, Kyungbook Lee, Jonggeun Choe</i>	757

G05. Analysing Seismic and Remotely Sensed Data	765
G0501. Automatic detection of subsidences and uplifts from interferograms of satellite synthetic-aperture radar (SAR) images. <i>Michal Kniotek, Andrzej Lesniak</i>	766
G0506. Possibilities and challenges of remote sensing for exploration of carbonatite-hosted REE deposits <i>Robert Zimmermann, Melanie Brandmeier, Richard Gloaguen</i>	773
G0509. Study on Remote Sensing Images of De-Blurring Based on Dictionary Learning <i>Zhentao Qin, wunian Yang</i>	784
G06. Groundwater	789
G0601. Practical considerations for Monte Carlo simulations : From characterization of complex spatial uncertainty to prediction of groundwater flows <i>Zahra Lakdawala, F. J. Cornaton</i>	790
G0603. sensors4plumes - Optimise sensor networks for plume monitoring <i>Kristina Helle</i>	800
G0604. Steady-state groundwater flow into a rock tunnel based on the 2-D equivalent pipe network model <i>Jisu Han, Jeong-Gi Um, Sookyun Wang</i>	808
G0605. STRING 3: Full 3D Visualization of Groundwater Flow <i>Simon Schröder, Isabel Michel, Torsten Seidel, Christoph König</i>	813
G0606. Using large subsoil data repositories to model 3D hydrofacies distribution: a case study from Porto Marghera and the Lagoon of Venice (NE, Italy) <i>Fabrizio Felletti, Mattia Marini, Giovanni Pietro Beretta, Jacopo Terrenghi, Francesca Sapelli</i>	823
G07. Geotechnics and Landslide Hazard Assessment	833
G0701. A comprehensive approach for medium scale landslide risk assessment <i>Ali S. Keceli, Hakan A. Nefeslioglu, Ebru A. Sezer, Candan Gokceoglu</i>	834
G0702. Development of a new software to analyze displacement and predict failure time of unstable slope <i>Jeong-Gi Um, Young-Hwan Noh, Jisu Han</i>	844
G0703. Favourability modelling of landslide hazard with spatial uncertainty of class membership: a reapplication in central Slovenia. <i>Andrea G Fabbri, Marko Komac, Antonio Patera, Chung-Jo Chung</i>	848
G0705. Numerical and experimental stability analysis of earthen levees <i>Maciej Dwornik, Krzysztof Krawiec, Anna Pięta, Andrzej Lesniak</i>	857
G0706. Preliminary assessment of the factors controlling the geotechnical and hydrological proprieties in the hillslope deposits of Eastern Tuscany (Central Italy) <i>Gabriele Bicchocchi, Michele D'Ambrosio, Pietro Vannocci, Massimiliano Nocentini, Carlo Tacconi-Stefanelli, Elena Benedetta Masi, Stefano Carnicelli, Veronica Tofani, Filippo Catani</i>	865
G08. Computer Geomodels for Mineral and Hydrothermal Resources	875

G0802. Automated analysis and imaging of uncertainty in 3D geological models, Sandstone Greenstone Belt, Western Australia. <i>Ruth Murdie, Florian Wellmann, Miguel De La Varga, Mark Lindsay, Mark Jessell, Klaus Gessner</i>	876
G0803. Cross border 3D modelling - challenges and results of a transnational geothermal project <i>Sascha Görne, Ottmar Krentz</i>	883
G0804. Geological and mining model Sangerhäuser Mulde (Saxony-Anhalt, Germany) <i>Johannes Borchardt, Lars Schimpf, Tino Rosin, Wolfgang Gossel, Bodo-Carlo Ehling</i>	886
G0805. Integration of geo-electromagnetic model into a 3D common earth model for geothermal resource evaluation <i>Seong Kon Lee, Changwon Lee, Chan-Hee Park, Youngmin Lee, Seong-Jun Cho, In Hwa Park</i>	892
G0806. Mapping, structural analysis and geological 3D-modeling in the Hessian-Thuringian potash district <i>R. Braatz, A. Brosig, M. Buchwitz, J. Helm, P. Huttel, Volker Jungk, O. Jungmann, G. Metzloff, J. W. Schneider, F. Scholze, M. Zippel</i>	893
G0807. Optimizing the Resources Model of “Horse Shoe” Cu-Au Porphyritic Deposit Using Unfolding Geostatistical Methods <i>Mohamad Nur Heriawan, Indarto Matnur, Abdillah Baraas, Agus Haris Wi-dayat, Anton Perdana</i>	898
G09. General Geomathematics	907
G0901. An application of modeling of extremal dependence using copulas <i>M.I. Ortego, Juan Jose Egozcue</i>	908
G0904. Is it possible to select a unique best model in regression when the number of experimental data is small and the number of explicative variables large ? <i>Eulogio Pardo Igúzquiza, J. G. Heredia, J. Rodríguez-Arévalo</i>	910
G10. General Geostatistics	919
G1001. A greedy heuristic applied to optimal design of experiments for spatial data <i>Albrecht Gebhardt, Claudia Gebhardt</i>	920
G1002. A multi-scale iterative global-optimization-based multiple-point statistics algorithm <i>Liang Yang, Weisheng Hou</i>	922
G1003. A new family of spatio-temporal covariance functions with no dimple <i>Mohsen Mohammadzadeh, Mehdi Omid</i>	932
G1005. Artificial rough fracture generation using sequential Gaussian simulation (SGSIM): correlating spatial aperture characteristics to flow channeling behavior <i>Carla Kathryn D. Co, Roland N. Horne</i>	938
G1006. Comparison of Kriging methods for ICP and Portable XRF data Integration <i>Haksu Jung, Hyeongyu Lee, Yosoon Choi</i>	948

G1008. Determining the Spatial Scale that Multi-point Simulations should Consider using Spatial Association Analysis: using SNESIM as an Example <i>Hexiang Bai, Yong Ge</i>	949
G1009. Geodesic kriging in the Wasserstein space <i>Alfredo Lopez, Julián Ortiz, Raúl Gouet</i>	955
G1010. Geostatistical three-dimensional variogrammetry: Two analysis examples of structures and parameters <i>Hans-Martin Haupt, Michael Falkenhagen, Wolfgang Gossel, Lars Schimpf</i> . .	965
G1011. Multipoint statistics of azimuth angle classes: an application to the simulation of channel structures and the evaluation of porosity in siliciclastic reservoirs <i>Mariana Quininha, José Almeida, Paulo Legoinha</i>	971
G1012. On the statistical testing of the hypothesis of constant global mean in geostatistics <i>H. Wang, Eulogio Pardo Igúzquiza, P.A. Dowd</i>	981
G1013. Parallel Programming of Model-Based Geostatistics for Improved Reservoir Characterization <i>Watheq Al-Mudhafar, Sarko Hakim</i>	990
G1014. Stochastic simulation of spatial hydrofacies accounting for the uncertainty of facies proportions <i>P.A. Dowd, Eulogio Pardo Igúzquiza, S. Jorreto, A. Pulido</i>	1000
G11. Geostatistics for Mineral Resources	1011
G1101. Application of Direct Sampling multi-point statistic and Sequential Gaussian simulation algorithms for modelling uncertainty in gold deposits <i>Yelena Van Der Grijp</i>	1012
G1102. Breccia Pipe Prediction: a new approach using non-stationary covariances <i>Francky Fouedjio Kameni, Serge Antoine Séguret</i>	1024
G1103. Categorization of mineral resources based upon geostatistical estimation of the continuity of changes of resource parameters <i>Jacek Mucha, Monika Wasilewska-Błaszczuk, Justyna Auguścik</i>	1034
G1104. Geostatistical Evaluation of Rock Quality Designation and its link with linear Fracture Frequency <i>Serge Antoine Séguret, Cristian Guajardo</i>	1043
G1105. Geostatistical model of placer deposits of heavy minerals <i>Anna Bochneva, Aleksandr Lalomov</i>	1052
G1106. Practical Aspects of Resources Modeling in presence of Locally Varying Anisotropy <i>Oscar Peredo, Julián Ortiz</i>	1057
G1107. The simulation of W–Sn grades of the São Pedro das Águas skarn ore deposit (Tabuaço, northern Portugal) <i>Gonçalo Gomes, José Almeida, Martim Chichorro, Filipa Matias</i>	1065
G1108. The use of rock density for improving the morphological and metal grade models of the sulphide ore deposit of Zambujal (Neves–Corvo mine) <i>David Silva, José Almeida</i>	1075

G1109. Variability and indirect method of cobalt abundance estimation in the polymetallic nodules, the INTEROCEANMETAL exploration area, Pacific Ocean <i>Jacek Mucha, Monika Wasilewska-Błaszczuk, Justyna Auguścik</i>	1085
G12. Mineral Potential Assessment Methods	1093
G1203. Effect of indicator transform of predictor variables on potential modeling: A 3d case study <i>Yujie Jiao, Helmut Schaeben</i>	1094
G1206. Numerical analysis of mathematical methods for potential modeling with large datasets <i>Samuel Kost, Helmut Schaeben</i>	1104
G1207. Optimized sub-sampling for logistic regression with unbalanced large datasets <i>HaiYing Wang, Helmut Schaeben, Franziska Keidel</i>	1113
G13. Space-Time Statistical Models in Geophysics	1121
G1301. Multifractal Analysis of Geomagnetic Storms <i>Enamundram Chandrasekhar, D. Subhakar, Y. Vishnu Vardhan</i>	1122
G1302. Recursive filtration of magnetotelluric data <i>Andrzej Lesniak</i>	1128
G1303. The study of the fine structure of tidal gravity variations using wavelet transform <i>Ayrat Kharisov, Edward Utemov</i>	1136
G1304. Tomography of the ionosphere with geostatistical inversion <i>David Minkwitz, K. Gerald van den Boogaart, Tatjana Gerzen, Mainul Hoque</i>	1143
G14. Space and/or Time Models in Environmental Problems	1151
G1401. Analysis of temperature time series from high temperature geothermal springs, New Zealand <i>Juliet Newson, Robert McKibbin</i>	1152
G1403. Predictions of complex-valued random fields <i>Sandra De Iaco, Donato Posa, Monica Palma, Sabrina Maggio</i>	1162
G1404. Selecting space-time covariance functions for environmental data <i>Claudia Cappello, Sandra De Iaco, Donato Posa, Monica Palma</i>	1168
G1408. Wind model for offshore power simulation <i>Carme Hervada-Sala, Eusebi Jarauta-Bragulat, José Gibergans-Báguena, Pablo Buenestado-Caballero</i>	1176
G15. Analysing 1D Data	1185
G1501. Detecting gradational change in data from exploration drill holes <i>June Hill, Jesse Robertson, Yulia Uvarova</i>	1186
G1502. Completion and analysis of time series: Example of a groundwater hydrograph <i>Wolfgang Gossel</i>	1191
G1503. Improving Geological Logs of Drill-cores by Correlating with Fractal Models of Drill-hole Geochemical Data <i>Behnam Sadeghi, Emmanuel John M. Carranza</i>	1195

G1504. Integration of downhole geophysical and lithological data from coal exploration drillholes <i>Brett Larkin</i>	1204
G1507. Signal Transmission in Boreholes and its Processing in MATLAB <i>Mouhammed Jandal Berro, Matthias Reich</i>	1206
G16. Quantitative Models for Hydrocarbon Resources	1217
G1601. Application of Arps Decline Models in Tight Oil EUR Evaluation and its Influencing Factors Analysis <i>Xiaoming Chen, Jianzhong Li, Qiulin Guo, Hongbing Xie, Rili Gao</i>	1218
G1602. Case Study of tight oil of Quantou Formation in Sanzhao depression of Songliao Basin, China <i>Man Zheng, Shejiao Wang, Qiulin Guo, Hongbing Xie, Rui Wang, Shaoyong Wang, Xiaozhi Wu</i>	1226
G1603. Characterization of Gas Reservoirs with an Aquifer using Covariance Localization in Ensemble Kalman Filter <i>Choongho Lee, Sungil Kim, Kyungbook Lee, Kyungnam Jo, Mincheol Ryu, Jonggeun Choe</i>	1230
G1604. Methodologies for Predicting the Tight Oil Sweet Spots <i>Hongbing Xie, Qiulin Guo, Fuhua Gong, Yongbin Liu, Rili Gao, Junwen Hu, Xiaoming Chen, Zhong Ma, Qing Yi</i>	1239
G1605. Optimal Future's Primary Energy Consumption under a Carbon Dioxide Emissions Constraint <i>Wei Yan, Qiulin Guo</i>	1245
G1606. SVD-assisted Ensemble Sampling for Efficient Uncertainty Quantification <i>Byeongcheol Kang, Kyungbook Lee, Jonggeun Choe</i>	1252
G1607. Volcanic Reservoir Characteristics and Accumulation Process Analysis in Santanghu Basin <i>Man Zheng, Qiulin Guo, Hongbing Xie, Rili Gao, Xiaoming Chen, Ningsheng Chen, Junwen Hu</i>	1258
G17. General Applications of e-Geosciences	1263
G1701. A general tool to construct case library for industrial area redevelopment <i>Tong Wang, Joran Jessurun, Qi Han, Bauke de Vries</i>	1264
G1702. A method of data storage for case of deformations in mining area <i>Przemyslaw Lisowski, Artur Krawczyk, Andrzej Lesniak</i>	1273
G18. Statistics in Mineral Resource Estimation	1279
G1801. 3-D Modeling of Polycomponent Heavy Mineral Placer Deposit <i>Irina Chizhova, Elena N. Levchenko, Antonina V. Grigorieva, Konstantin V. Lobanov</i>	1280
G1803. An improved IDW method for ore-grade modeling <i>Zhanglin Li, Ping Wang</i>	1286
G1805. Comparative Analysis of Tin-Bearing and Barren Zones in the Khingano-Okhotsk Volcanogenic Belt, Russian Far East: Application of a Pattern Recognition Technique <i>Irina Chizhova, Nina Gorelikova, Inna M. Derbeko, Valery G. Gonevchuk, Yana V. Bychkova</i>	1293

G19. Approaches to the Analysis of Compositional Data	1301
G1901. An affine equivariant anamorphosis for compositional data <i>K. Gerald van den Boogaart, Raimon Tolosana Delgado, Ute Mueller</i>	1302
G1902. Compositional approach to mineral singularity assessment <i>Juan Jose Egozcue, Vera Pawlowsky-Glahn, Qiuming Cheng</i>	1312
G1903. Development of air quality indexes using compositional approach <i>Eusebi Jarauta-Bragulat, Juan Jose Egozcue, Carme Hervada-Sala, José Gibergans-Báguena</i>	1321
G1904. Geochemical signature of the Devonian/ Carboniferous boundary - a compositional approach <i>Kamila Facevicova, Ondrej Babek, Karel Hron</i>	1329
G1906. Method for constructing a mineralogical composition from a measured sample of single components <i>Silke Konsulke, Stefanie Hopfe, K. Gerald van den Boogaart, Raimon Tolosana-Delgado, Stephan Matos Camacho</i>	1330
G1907. Multivariate data analysis of hydrogeochemical data to detect origin of arsenic contamination in groundwater of Mecklenburg-Vorpommern (Germany) <i>Marie Wurl, Swenja Dirwelis, Maria-Theresia Schafmeister</i>	1337
G1908. Spatial clustering and prediction in Bayes spaces for density functions in composite systems <i>Alessandra Menafoglio, Piercesare Secchi, Alberto Guadagnini</i>	1347
G20. Visualization of 3d Geomodels in Computer Assisted Virtual Environment (CAVE)	1349
G2001. First step towards a virtual mine – generation of a 3D model of Reiche Zeche in Freiberg <i>Thomas Benkert, Anne Dietze, Paul Gabriel, Jan Gietzel, Ines Görz, H. Lehmann, G. Löwe, Helmut Mischo, Helmut Schaeben, Falk Schreiter, Klaus Stanek</i>	1350
