### Table of Contents – 70<sup>th</sup> Annual Conference for Protective Relay Engineers

- 1. A Current Story When Primary Met Secondary.....1
- 2. A Novel Method for Turn to Turn Fault Detection in Shunt Reactors.....19
- 3. A Practical Guide of Troubleshooting IEC 61850 GOOSE Communication.....28
- 4. Adaptive Autoreclosure to Increase System Stability and Reduce Stress to Circuit Breakers.....36
- 5. Advanced Generator Protection and Monitoring Using Transducer Measurements.....44
- 6. Apply a Wireless Line Sensor System to Enhance Distribution Protection Schemes.....59
- Beyond the Nameplate Selecting Transformer Compensation Settings for Secure Differential Protection.....70
- 8. Breaking Paradigms in Control Building Design.....92
- 9. Bus Protection Application Challenges.....114
- 10. Case Study Protective Relaying over IP/MPLS Myth to Facts.....121
- 11. Case Study/Overview of Applying an IEC 61850 Parallel Redundant Protocol Communications Network on a University Campus Power Micro Grid Distribution and Generating System.....133
- 12. Catastrophic Relay Misoperations and Successful Relay Operation.....143
- 13. Choose Simplicity for a Better Digital Substation Design.....164
- 14. Commission Testing Methods for Protection Systems.....173
- 15. Commissioning Process and Acceptance Test of a Sub-harmonic Protection Relay.....182
- 16. Considerations in Choosing Directional Polarizing Methods for Ground Overcurrent Elements in Line Protection Applications.....195
- 17. Cyber Security Security strategy for distribution management system and security architecture considerations.....262
- 18. Enhanced Fault Location Method for Shunt Capacitor Banks.....268
- 19. Entergy's Record Flooding Across our Grid.....279
- 20. Evaluating the Impact of Increasing System Fault Currents on Protection.....283
- 21. Fault Coverage of Memory Polarized Mho Elements with Time Delays.....303
- 22. Generator Motoring Protection Are You Protected?.....309
- 23. Hard to Find Maintenance Tips for Electromechanical Relays.....320
- 24. High-Speed Reclosing, Switching Surges, and Bus Differential Protection Security A Case Study.....326
- 25. If You Cannot Test It, You Cannot Use It IEC 61850 GOOSE System Designed With Testing in Mind.....339
- 26. Implementation and Field Experience of Redundant 100% Generator Stator Ground Fault Protection.....348
- 27. Implementing a Microgrid Using Standard Utility Control Equipment.....355
- 28. Implementing a Modern, Secure Relay Integration Solution with Existing IEDs.....364
- 29. Injected Waveforms and Their Effect on Protection Element Response.....367
- 30. Integrating Synchrophasors and Oscillography for Wide-Area Power System Analysis.....373
- 31. Lessons Learned from NERC CIP Applied to the Industrial World.....383
- 32. Lessons Learned in Static Var Compensator Protection.....389
- 33. Life Cycle Considerations for Microprocessor Relays.....397
- 34. Methods and Benefits to the Application of Ultra-High-Speed Transformer Protection.....411
- 35. Micro Processor Based Advanced Bus Protection Scheme Using IEC 61850 Process Bus (9-2) Sampled Values.....417

- 36. Negative-Sequence Overcurrent Considerations for Induction Motor Loads.....436
- 37. New Smart Multi-Ended Differential Solution for Power Networks.....444
- 38. NOVEL APPROACH TO RELAY SETTING DEVELOPMENT.....452
- Open Phase Detection For Power Transformers Using VT Triggered Optical CTS and IEC 61850-9.2LE Compliant Relays.....462
- 40. Performance Comparison Between Mho Elements and Incremental Quantity-Based Distance Elements.....467
- 41. Predicting the prospective fault level on distribution grids and its impact on protective relaying.....486
- 42. Protection Challenges for North America's First Combined CableOverhead Double-Circuit 500 kV Transmission Line With Mutual Coupling.....490
- 43. Protection Issues Related to Pumped Storage Hydro (PSH) Units.....505
- 44. Real-Time Circuit Breaker Health Diagnostics.....518
- 45. Securing IEDs against Cyber Threats in Critical Substation Automation and Industrial Control Systems.....524
- 46. Summary Paper for C37.243 IEEE Guide for Application of Digital Line Current Differential Relays Using Digital Communication.....544
- 47. Teleprotection solutions with guaranteed performance using packet switched wide area communication networks.....552
- 48. The Advantages Of Continuous Monitoring Of Power Line Carrier (PLC) Channels Applied To Protection Systems.....558
- 49. The Necessity and Challenges of Modeling and Coordinating Microprocessor Based Thermal Overload Functions for Device Protection.....582
- 50. Thermal Imaging: Just A Note, Not The Whole Tune.....604
- 51. Transformer Tank Rupture A Protection Engineer's Challenge.....612
- 52. Transmission Interconnection: Lessons learned from a recent event at an acquired Generating Plant.....641
- 53. Ukraine Cyber-Induced Power Outage Analysis and Practical Mitigation Strategies.....650
- 54. Understanding Design, Installation, and Testing Methods That Promote Substation IED Resiliency for High-Altitude Electromagnetic Pulse Events.....658
- 55. Unrestrained Low-Impedance Bus Differential Should I Use It.....676
- 56. Using Superimposed Principles (DELTA) In Protection Techniques In An Increasingly Challenging Power Network.....693
- 57. Utility Implements Communications-Assisted Special Protection and Control Schemes for Distribution Substations.....705
