Table of Contents

MONDAY, SEPTEMBER 11

Concurrent Session One: Failure and Consequences

Reclamation's Consequence Estimating Methodology – Using a Two Dimensional Hydraulic Model to Increase Confidence in Fatality Rate Selection 1

Bruce D. Feinberg, P.E., Hydraulic Engineer, Bureau of Reclamation, Geographic Applications and Analysis Group

Levee Breach Consequence Model Validated by Case Study in Joso, Japan 22

Paul B. Risher, P.E., Hydraulic Engineer; Cameron T. Ackerman, P.E., D.WRE, Senior Hydraulic Engineer; Jesse Morrill-Winter, Regional Economist; Woodrow Fields, Hydraulic Engineer; and Jason T. Needham, P.E., Senior Consequence Specialist, US Army Corps of Engineers

Concurrent Session Two: Levee Risk Assessment and Management

Risk Evaluation of Smaller Levee Systems: A Prototype 35

Kayla J. Ranney, CFM, Water Resources EIT; Daniel W. Osmun, P.E., MBA, National Technical Advisor for Dam Safety and Risk; Elena Sossenkina, P.E., National Practice Leader-Levees; and Brinton P. Swift, P.E., CFM, Project Manager, HDR; and Mark E. Baker, P.E., Dam and Levee Safety Officer, National Park Service

Concurrent Session Three: RCC and Soil Cement Applications

Chicago Sanitary and Ship Canal at Lockport Rehabilitation Case Study 49

Andrew Goodall, P.E., Civil Engineer; and Thomas Mack, Design Branch Chief, US Army Corps of Engineers

Waiting to Fail: 100 Years of Deferred Attention 78

Fares Abdo, P.E., Technical Manager, Morgan Corporation; Randall P. Bass, P.E., Principal, Schnabel Engineering; and Ray Martin, P.E., Ph.D, D.GE, Consulting Geotechnical Engineer

C. W. "Bill" Young Regional Reservoir Rehabilitation: 5 Miles of Embankment Dam Repair 89

Elizabeth K. Landowski, P.E., Senior Geotechnical Engineer; and Trent L. Dreese, P.E., Vice President, Gannett Fleming; John A. Wilkes, P.E., President; and Bobby E. Blankinship, P.E., Engineer, Carpi USA, Inc.

Concurrent Session Four: Emergency Response: What the Public Doesn't Know

What Happens If the Dam Breaks? An Owner's Successful EAP Program in Light of the SC Floods 102

Meghan Caldwell, Staff Engineer; and Hope Walker, P.E., Lead Engineer, Black & Veatch Corporation; and Mitch Turner, Director of Property and Risk Management, SJWD Water District

Emergency Stabilization of Bryan Lake Dam 116

Janis C. Murphy, P.E., Project Manager, Freese and Nichols, Inc.; Wes Williams, Division Manager – Power Generation; and David P. McIntyre, Manager – Production Operations, Bryan Texas Utilities

TUESDAY, SEPTEMBER 12

General Session: An Evolving Perspective -Dam Safety and the Impacts of the 1977 Kelly Barnes Dam Failure

The Impact of Dam Failures on the Development of Dam Safety Legislation and Policy in the 1970s 124

Nathaniel Gee, Dam Safety Manager, Lower Colorado Region, Bureau of Reclamation

Corps of Engineers Field Investigations, Evaluation, and Assessment – Kelly Barnes Dam Failure, November 6, 1977 139

Joseph H. Rogers, P.E., US Army Corps of Engineers (Retired)

Concurrent Session Five: Internal Erosion

Melding Pathways and Mechanisms for Internal Erosion Failure Modes 161

John W. France, P.E., D.GE, D.WRE; and Jennifer L. Williams, P.E., Geotechnical Project Manager, AECOM

Concurrent Session Six: Design Reviews

Independent Review Panels – Are They Right for Your Project? Experiences and Lessons Learned - Part III “Is It Us Against Them?” Series 172

Speakers and Panelists: Greg S. Paxson, P.E., Schnabel Engineering; Michele Lemieux, P.E., Dam Safety Section Supervisor, MT Department of Natural Resources and Conservation; Debora J. Miller, Ph.D., P.E., Miller Geotechnical Consultants; Jeremy J. Franz, P.E., Dam Safety Engineer, CO Division of Water Resources; Douglas L. Johnson, P.E., Regional Engineer, Federal Energy Regulatory Commission; Roger Raeburn, P.E., PacifiCorp Electric Operations, and Donald J. Montgomery, P.E., Principal Engineer, MWH, now part of Stantec

Concurrent Session Seven: A Different Look

Dam Safety Improvements – What’s the Purpose? 188

Jason Boomer, P.E., Lead Civil Engineer; Nathan Walker, P.E., Project Manager; and Greg Glunz, P.E., Senior Civil Engineer, AECOM

Effect of Microbial Induced Calcium Carbonate Precipitation on the Performance of Poned Coal Ash 201

Shahin Safavizadeh, M.ASCE, Graduate Research Student; Brina M. Montoya, Assistant Professor; and Mohammed A. Gabr, Professor, North Carolina State University

Concurrent Session Eight: Re-Thinking Spillways

What Happens Downstream Stays Downstream, or Does It? Potential Failure Modes from Spillway Exit Flows 211

Gregory Richards, P.E., CFM.; Benjamin Israel, P.E., CFM, Senior Hydraulic and Hydrologic Engineer; and Paul Schweiger, P.E., CFM, Vice President, Gannett Fleming, Inc.

Do Yesterday's Earth-Cut Spillway Designs Meet Today's Standards? The Ins and Outs of Earth Spillway Design and Integrity Analysis 221

Wesley Hollenbach, EIT, Hydrologic and Hydraulic Designer; and Paul Schweiger, P.E., CFM, Vice President, Gannett Fleming, Inc.; Kent R. Finemore, P.E., Assistant Chief Engineer, NH Department of Environmental Services; Tim Ridley, P.E., Hydraulic Engineer; Jeff McClure, State Geologist; and Andy Deichert, P.E., State Conservation Engineer, USDA-NRCS

Concurrent Session Nine: Inspections Grab-N-Go

Outlet Inspection Sleds – Slip Sliding Away 240

Chadrick D. Hill, Civil Engineering Specialist, MT Department of Natural Resources & Conservation; and Jason Ward, Ph.D., P.E., Dam Safety Engineer, CO Division of Water Resources

Condition Surveys of Inaccessible Areas of Concrete Dams 25

Evan Kopelson, Partner, Vertical Access LLC; and Michael Likavec, P.E., Structural Engineer, Puget Sound Energy

Advances in Monitoring of Underwater Infrastructure: Dam Condition Assessment Using Remote Technologies 269

Robert O. Clarke, P. Eng., PMP, Manager, Remote Services, AS Group, Ltd.

Concurrent Session Ten: PMP Soapbox

Extreme Precipitation Estimates for State Dam Safety Regulators – Past, Present and Future 281

Bill McCormick, P.E., P.G., CO Division of Water Resources; Charles Thompson, P.E., Chief, Dam Safety Bureau, NM Office of the State Engineer; Bill Kappel, President, Applied Weather Associates; Tye Parzybok, President, Metstat; and Jessica Williams, Project Manager, Acclivity Associates

Concurrent Session Eleven: Advancements in Overtopping Design

Moderated by Steven H. Snider, P.E., O'Brien and Gere

Technical Summary of Protections 2016 283

Thomas E. Hepler, P.E., Senior Consultant; and Brian Crookston, Ph.D., P.E., Senior Engineer, Schnabel Engineering; William Fiedler, P.E., Civil Engineer, Bureau of Reclamation (Retired); and Miguel A. Toledo, Ph.D., Professor, Technical University of Madrid, Spain

Stilling Basin Design for Stepped Chutes: More than one type to consider 295

Sherry L. Hunt, Ph.D., Research Leader; and Kem C. Kadavy, P.E., USDA - ARS

Concurrent Session Twelve: Filters and Foul Play

Filter Diaphragm Performance in New Dam and Dam Rehabilitation Projects 297

Benjamin C. Doerge, P.E., G.E., Geotechnical Engineer, USDA-NRCS

Filter Media Clogging of Small-Slot Drainage Pipes 326

Marc T. Miller, P.E., Associate; and Grady Hillhouse, P.E., Civil Engineer, Freese and Nichols, Inc.

Reducing Relief Well Clogging and Pore-Water Pressures Using Natural Groundwater Pressures and a Packer-Purge System 335

Bruce A. Fowler C.G., Principal; and Laura Devaudreuil, Sevee and Maher Engineers; Stephen J. Rabasca, P.E., Soil Metrics LLC; and Colin O'Connor, Brookfield Renewable

Concurrent Session Thirteen: Hydraulic Modeling

Evaluating the Spillway Capacity of the Morning Glory Spillway at Harriman Dam 347

Damian M. Gomez, P.E., CFM, Water Resources Engineer, Gomez and Sullivan Engineers, DPC; Dan Gessler, Ph.D., P.E., D.WRE, Vice President, Alden Research Laboratory, Inc.; and Justin (Jud) Donaghy, P.E., Chief Dam Safety Engineer, Great River Hydro, LLC

Reducing Project Risk Associated with the Use of CFD 363

Dan Gessler, P.E., Ph.D., D.WRE, Vice President; Kimbal Hall, P.E., CFD Engineer; Ben Mater, Ph.D., P.E., CFD Engineer; and Zach Taylor, P.E., CFD Engineer, Alden Research Laboratory, Inc.

Concurrent Session Fourteen: Levee Systems

Steel Wire Mesh Reinforced Geomat for Embankment Damage Protection from Rodents and Burrowing Animals 370

Sachin Mandavkar, P.E., Technical Manager, Maccaferri Inc.; and Paolo Di Pietro, Technical Director, Officine Maccaferri S.P.A., Italy

Levee Safety Practices in the Keystone State 380

Andrew J. Orlovsky, P.E., Civil Engineer Manager, PA Department of Environmental Protection

Risk Assessment of the New Orleans Hurricane Storm Damage Risk Reduction System Complex Closure Structures 390

David S. Bowles, Ph.D., P.E., P.H, D.WRE, F. ASCE, Principal; and Sanjay S. Chauhan, Principal, RAC Engineers & Economists; Robert Turner, P.E., Executive Director, Southeast Louisiana Flood Protection Authority - East; and David Moore, P.E., Program Manager, Tetra Tech

Concurrent Session Fifteen: Seepage

Assessing Hydraulic Interconnection between the Reservoir and Downstream Seeps at Hardy Dam 412

Bethany Kelly, P.E., Geotechnical Engineer; and Iván Contreras, Ph.D., P.E., Senior Geotechnical Engineer, Barr Engineering Co.; Adam Monroe, Dam Safety Engineer; and Marianne Walter, Project Engineer, Consumers Energy Company

Assessing Watauga Dam for Internal Erosion 425

Alan F. Rauch, Ph.D., P.E., Principal; R. Eric Pease, Ph.D., P.E.; Rachel Adams, EIT; and April Welshans, P.E., Stantec; S. Caleb Douglas, Ph.D., P.E.; and Jim Bryant, P.E., Tennessee Valley Authority

Concurrent Session Sixteen: Case Histories – Due Diligence Investigations

History Being Re-made: Stabilization of a 146 year-old Gatehouse in a High Hazard Class Dam 438

John J. Gregoire, Program Manager, Reservoir Operations, Massachusetts Water Resources Authority; and Jonathan D. Andrews, P.E., Associate Principal, GZA GeoEnvironmental, Inc.

Stabilization of Landslide above Lower Cabin Creek Dam and Reservoir 452

Greg J. Monley, P.E., Principal, Kumar & Associates, Inc.; and James A. Ferentchak, P.E., Vice President/Principal, W. W. Wheeler & Associates, Inc.

Discovery and Remediation of Deteriorating Timber Trestles within an Embankment 465

Bill Kussmann, P.E., Sr. Geotechnical Engineer; and Brian Tri, P.E., Sr. Civil/Structural Engineer, Barr Engineering Co.; and Dean Steines, P.E., Principal Plant Engineer, Xcel Energy

WEDNESDAY, SEPTEMBER 13

Concurrent Session Seventeen: Spillway Treatments

Putting the STOP in Waterstops 480

Joseph Kudritz, P.E., Civil Engineer; and Chad Davis, P.E., Vice President, Michael Baker International, Inc.; and Roger Adams, P.E., Chief, Division of Dam Safety, Pennsylvania Department of Environmental Protection

Fort Peck Dam Spillway Modifications – Rock Anchors in Bearpaw Shale 489

Elliott E. Drumright, Ph.D., P.E., Associate Geotechnical Engineer; and Douglas M. Yadon, P.E., G.E., P.G., C.E.G., Senior Engineering Geologist, AECOM

Concurrent Session Eighteen: Honoring the Legacy of Bruce Tschantz - Public Safety at Dams

Don't Go with the Flow! Identifying and Mitigating Hydraulic Hazards at Dams 498

Paul Schweiger, P.E., CFM, Vice President; William Foss, C.P.P, P.S.P, Senior Director of Security and Safety Services Practice; and Gregory Richards, P.E., CFM, Project Manager, Gannett Fleming; and Steve Barfuss, P.E., Professor, Utah State University

Concurrent Session Nineteen: Seismic Hazard Estimation and Stability Evaluation

Comparing Seismic Hazard Estimates for Dams in the U.S. and Their Implications to Risk 516

Ivan Wong, Principal Seismologist; and Patricia Thomas, Senior Earthquake Engineer, Lettis Consultants International

B.F. Sisk Dam – Core Considerations for Dynamic Deformation Analyses 528

Rajendram Arulnathan, Ph.D., P.E., G.E., Earthquake Engineering Group Manager; Tiffany Adams, Ph.D.,

P.E., Geotechnical Engineer; Erik Newman, Ph.D., P.E., Project Manager; and Sathish Murugaiah, P.E., G.E., Project Manager, AECOM; Randy Kuzniakowski, P.E., Civil Engineer; and David Gillette, Ph.D., P.E., Technical Specialist, Bureau of Reclamation

Seismic Stability Analysis and Risk Assessment of Lake Elmer Thomas Dam 539

Amanda Lopez, P.E., Structural Engineer; Scott L. Jones, P.E., Ph.D., Senior Structural Engineer; and John France, P.E., D.GE, D.WRE, Dams and Hydropower Technical Practice Network National Leader, AECOM; Audrey Coy, P.E., SEED Program Manager; and Brad Iarossi, P.E., Chief of Dam Safety, U.S. Fish & Wildlife Service

Concurrent Session Twenty: Dam Safety Programs: Portfolio Management

The Potential Failure Mode Analysis Does Fit All Sizes – The Foundation for a Successful Dam Safety Management Program 553

Frank L. Blackett, P.E., Regional Engineer; and Douglas D. Boyer, P.E., CEG, Chief, Risk-Informed Decision-Making Branch, Federal Energy Regulatory Commission

Benefits of Risk-Informed Decision Making Methods for State-Regulated Dams 569

M. Jonathan Harris, P.E., National Practice Leader for Dam Safety and Risk; Thomas E. Hepler, Principal Engineer; and Thomas J. Fitzgerald, P.E., Senior Consultant, Schnabel Engineering; and Steve Drew, Director of Water Resources, City of Greensboro, North Carolina

Development of F-N Curves for Public Safety Risks Associated with Dam Failures in the U.S. 583

Martin W. McCann, Jr., Ph.D., Director; and Bo André Lundqvist, Graduate Student, National Performance of Dams Program, Stanford University

Concurrent Session Twenty-Two: Failure Investigations and Emergency Response

Responses and Lessons Learned from Flooding and Dam Breaches in North Carolina During Hurricane Matthew 2016 598

William E. Toby Vinson, Jr., P.E., CPESC, CPM, Chief of Program Operations, NC Department of Environmental & Natural Resources; and Katy Goolsby-Brown, P.E., CFM, Civil Engineer, Federal Emergency Management Agency

3 floods/365 days: How Emergency Planning Saved the Day 605

Rita Anderson, ES IV, Freese and Nichols, Inc.

Concurrent Session Twenty-Three: 3D Modeling and Visualization

Effective Application of Three-Dimensional Numerical Modeling for the Design and Analysis of Dams 611

Brian Mark Crookston Ph.D., P.E., Senior Engineer; Loring W. Crowley, P.E., Project Engineer; and Charles M. Johnson, P.E., S.E., Senior Engineer, Schnabel Engineering; and Daniel B. Bung, Ph.D., Professor, Aachen University of Applied Sciences, Germany

Leveraging 3D Modeling to Enhance Dam Design and Construction Management 629

Chad Davis, P.E., Vice President; Joseph Kudritz, P.E., Civil Engineer; Jared Deible, P.E., Technical Manager; and Jacob Bench, E.I., Civil Associate, Michael Baker International, Inc.

Concurrent Session Twenty-Four: Case Histories

The Black Knight of New England Dams – Mendums: Monitoring its Deficiencies, the Ensuing Drawdown and Reconstruction 638

Charles S. Krautmann, P.E., P.G., Dam Safety Engineer; Grace E. Levergood, P.E., Dam Design Engineer; and Corey Clark, P.E., Dam Safety Engineer, NH Department of Environmental Services, Dam Bureau

Levee Rehabilitation, Lower Wood River – East Alton II. - Deep Cutoff Wall 653

Matteo Bertoni, Project Engineer; and Wesley Schmutzler, Project Manager, TREVIICOS; and Gene Bryant, Project Manager, Barr Engineering

Collaboration and Partnering Reduce Risks at Willow Creek Dam 663

Stephen L. Jamieson, P.E., President; and Don Lopez, P.E., Project Engineer, W. W. Wheeler & Associates, Inc.; John Clark, P.E., Dam Safety Manager, and Nicole Young, P.E., Dam Safety Engineer, Colorado Parks and Wildlife

Concurrent Session Twenty-Five: Tailings Dams

Lessons Learned from Implementation of an Integrated Data Management System for Tailings Impoundment Dams 675

Kurt J. Schimpke, P.E., Geotechnical Engineer; and Jason W. Harvey, P.E., Geotechnical Engineer, Barr Engineering Co.

Geotechnical Evaluations of a Tailings Dam for Use by a Molybdenum and Copper Mine Project in Southern Idaho 684

Thomas Robbins, BSCE, Graduate Student; and Bhaskar C.S. Chittoori, Ph.D., P.E., Assistant Professor, Boise State University

Considerations for Precedent-Setting Filtered Tailings Facilities in the Future N/A

Kate Patterson, P.E., P.Eng., Associate; Jim Casey, P.E., P.Eng., Tailings Engineer; Lindsay Robertson, M.Sc., P.Geo., Associate; Harvey McLeod, P.Eng., P.Geo., Principal; and Leonard Murray, P.Eng., President, Klohn Crippen Berger

Concurrent Session Twenty-Seven: Improving Dam Safety Programs Grab-N-Go

Fredonia Flood Retarding Structure: Is It a Dam or Levee? 697

Robert A. Eichinger, P.E., Senior Associate, Stantec

Dam Rehabilitation and the National Flood Insurance Program – What Designers, Regulators and Dam Owners Need to Know 706

Amanda J. Hess, P.E., CFM, H&H Group Manager, Gannett Fleming, Inc.; and Ryan Knarr, P.E., Civil Engineer Consultant, PA Department of Environmental Protection

Best Practices in a Tainter Gate Rehabilitation Program 709

Mathew Moses, P.E., Structural Engineer; and Layne Bukhair, P.E., Structural Engineer, Freese and Nichols, Inc.

A Heightened Focus on Public Safety at Dams Does Not Happen by Accident 723

Timothy W. Johnston, P.E., Project Manager; Eric E. Fromherz, E.I.T., Project Specialist; Paul G. Schweiger, P.E., Project Principal; and William F. Foos, C.P.P., P.S.P., Senior Director of Security and Safety Services Practice, Gannett Fleming, Inc.; and Alton C. Echols, P.E., Manager of O&M Programs, Loudoun Water

Concurrent Session Twenty-Eight: Around the World in Ninety Minutes

Construction of Dam 1E for the Panama Canal Pacific Access Channel 748

Lelio Mejia, Ph.D., P.E., G.E., Senior Principal, Geosyntec; James Toose, Principal Engineer, AECOM; and Jorge Fernandez, Project Manager, Panama Canal Authority

Lessons learnt from embankment dam failures by static slope instability 762

Jean-Robert Courivaud, Dam Engineer; and Thomas Charvin, Electricité de France; and Alexius Vogel, Risk Assessment International

Concurrent Session Twenty-Nine: Hydrology and Rainfall

Leveraging Multi-Sensor Hydrologic Data for Model Validation 784

Kevin J. Ruswick, P.E., CFM, Senior Associate; and Gregory J. Daviero, Ph.D, P.E., Principal, Schnabel Engineering; and Jonathon Ruff, P.E., Environmental Manager, City of Plattsburgh, NY

Enhanced Real-Time Rainfall and Flood Forecasting – Understanding the Storm and Implications for Dam Safety 801

Joseph Bellini, P.E., P.H., D.WRE, CFM, Vice President, Aterra Solutions, LLC; Bill Kappel, President/Chief Meteorologist; and Doug Hultstrand, Applied Weather Associates

Advances in Flood Hydrology for Modeling High Elevation Mountain Basins in Colorado with Applications to the Gross Dam Enlargement Study 820

Mark A. Perry, P.E., Dam Safety Engineer; and Jeremy Franz, P.E., Dam Safety Engineer, CO Division of Water Resources; Casey Dick, P.E., Dam Safety Engineer, Denver Water; and Bill Kappel, Applied Weather Associates

Concurrent Session Thirty: Breach Analysis, Mapping Tools and Emergency Preparedness

Game Changer: Development of Web-Based, Geospatial, Interactive Dam Breach Inundation Maps for Great River Hydro's Dams 831

Christine Stonier, P.E., Assistant Project Manager; Daniel J. Boudreau, Jr. GISP, Geospatial Systems Lead; Christine Suhonen, P.E., Project Engineer; and Peter H. Baril, P.E., Vice President, GZA GeoEnvironmental, Inc.; and Jeffrey Blaney, P.E., Senior Dam Safety Engineer, Great River Hydro, LLC

A Fast and Cost-Effective Dam Breach Inundation Mapping Tool for Use in Emergency Response Preparedness or in Re-Assessing Hazard Classifications on a State-Wide Scale 835

Trevor S. Grout, P.E., Water Resources Engineer; Drew M. Moffitt, GISP, GIS Specialist; and Marc C. Johnson, P.E., CFM, Principal Water Resources Engineer, FTN Associates, Ltd.

Utilizing CEM Planner for Pennsylvania Dam Safety EAPs 838

Shane Woodmancy, Emergency Management Specialist, Pennsylvania Emergency Management Agency; and Thomas E. Bold, Jr., Chief, Preparedness and Enforcement Section, Pennsylvania DEP Division of Dam Safety

Concurrent Session Thirty-One: Grouting

Errors, Misunderstandings and Mistakes in Remedial Grouting Projects for Dams 840

Donald A. Bruce, Ph.D., D.GE, C.Eng., P.G. L.G., L.E.G., President, Geosystems, L.P.; Trent L. Dreese, P.E., Vice President; and Chris Hallahan, Gannett Fleming Inc.

Innovative Grout Repair at Folsom Dam Auxiliary Spillway Control Structure 851

Jeffrey Wisniewski, P.E., Senior Project Manager; Cheuk Wan, P.E., Structural Engineer; and John Hess, P.E., D.GE, Senior Technical Advisor, HDR; and Cecily Nolan, P.E., Senior Structural Engineer, US Army Corps of Engineers

Concurrent Session Thirty-Two: Labyrinth Spillways and Piano Key Weirs

Size Scale Effects and Labyrinth Weir Hydraulics 863

Nathan L. Young, E.I.T., Senior Staff; and Blake Tullis, Ph.D., Professor, Utah State University

Designing Labyrinth Spillways for Less than Ideal Conditions – Real World Application of Laboratory Design Methods 864

Gregory Richards, P.E., CFM, Hydraulic & Hydrologic Engineer, Gannett Fleming, Inc.; Blake Tullis, Ph.D., Professor, UWRL Associate Director, Utah State University; and Tony Nokovich, P.E., Senior Engineer, Pennsylvania American Water

CFD Modeling of Piano Key Weirs: Validation and Numerical Parameter Space Analysis 873

John Wendelbo, M. Eng., MSc, Senior CFD Engineer; and Brian Fox, MSc, Senior Applications Engineer, Flow Science

Concurrent Session Thirty-Three: Regulation of Tailings Dams – Panel Discussion

Policies, Perspectives, and Priorities on Mine Tailings Dam Regulation in the U.S. 884

Charles F. Cobb, P.E., State Dam Safety Engineer, AK Department of Natural Resources; Art Sengupta, P.E., P.G., PMP, State Dam Safety Officer, FL Department of Environmental Protection; Jim Pawloski, P.E., Dam Safety Engineer, MI Department of Environmental Quality; Luke Opperman, P.E., Dam Safety Engineer, NV Division of Water Resources; and John Falk, P.E., Dam Safety Program Manager, ID Department of Water Resources

POSTER PAPERS

The Use of Specific Studies to Help Engineers to Better Estimate the Mechanical and Dynamic Properties of Embankment Soils. Case Study In South-Eastern France. 885

Benjamin Girard, Civil Work Engineer, Electricité de France; D.H. Doan, Senior Geotechnical Engineer; Nicolai Droniuc, Senior Technical Consultant; and Cyril Guilleman, Director of Geomonitoring, Fugro GeoConsulting SAS; Ferdinand Stoelben, Managing Director; and Sébastien Cappy, Geologist, GmbH

An Overview of the Hurricane Matthew in North Carolina Dam Risk Management Report 901

Katy Goolsby-Brown, P.E., CFM, Civil Engineer; and John G. (Bud) Plisich, Civil Engineer, Federal Emergency Management Agency

Geotechnical Design Criteria for Large, Dry, Flood Control Earth Dams 917

Christopher Jones, P.E., Senior Project Engineer; and Dan Back, P.E., S.E., Principal, Stantec Consulting Services

Underwater Acoustic Remote Sensing for Predictive Maintenance Modeling of Dams 923

Kenneth J LaBry, C. H. Fenstermaker & Associates, LLC

Fort Hood Dam Safety Program Development 930

Dustin Mortensen, P.E., Engineer; and Mark Ickert, P.E., Engineer, Freese and Nichols; Curtis Eickenloff, Directorate of Public Works; and Lynn Schaub, Directorate of Public Works, Fort Hood, Texas, US Army Corps of Engineers

Using Soil-cement to Construct an Overtopping Gravity Dam 938

Pete Nix, P.E., Senior Program Manager; and Steven Riedy, P.E., Geotechnical Engineer, Tetra Tech

Considerations for Precedent-Setting Filtered Tailings Facilities in the Future 958

Kate Patterson, P.E., P.Eng., Associate; Jim Casey, P.E., P.Eng., Tailings Engineer; Lindsay Robertson, M.Sc., P.Geo., Associate; Harvey McLeod, P.Eng., P.Geo., Principal; and Leonard Murray, P.Eng., President, Klohn Crippen Berger

Tibble Fork Dam Rehabilitation 965

Jacob S. Price, P.E., Resident Engineer; Bradford E. Price, P.E., Principal and President; S. Robert Johnson, P.E., Principal; and Brandon D. Horrocks, P.E., Design Engineer, RB&G Engineering, Inc.

Rock Blasting Induced Vibration Effects on the Integrity of the Dry Cormal Creek Flood Retarding Structure 982

Geoffrey Rigsby, Southwest Regional Manager, Vibra-Tech Engineers, Inc

Design of a New Dam on the Kentucky River – Spotlighting the Renovation of Kentucky River Lock and Dam No. 10 Project 1017

Benjamin T. Webster, P.E., Project Manager, Stantec Consulting Services, Inc.
