Contents

INTRODUCTION

Symposium Overview.....	1
Report Organization.....	2

OPENING SESSION

Welcome from the Transportation Research Board.....	3
Welcome from the Association for Unmanned Vehicle Systems International	4
Welcome to California.....	4
Keynote Address.....	5

GENERAL SESSION

Vehicle Automation Technology Deployment	6
Socially Acceptable AI-Based Urban Driving.....	6
Automated, Connected, and Electric Vehicles	7
Bringing Autonomous Vehicles into Production: An Automotive Original Equipment Manufacturer Perspective	7
Connected–Automated Trucks.....	8
Nontechnical Issues	10
Ethics of Autonomous Vehicles: Beyond Weird Crash Dilemmas	10
Are Consumers Ready and Waiting for Automated Vehicles?	11
The Public Safety Case	13
Human Factors Recommendations for Highly Automated Driving in the EU Project ADAPTIVE.....	14
Policy Development and Automated Vehicles	15
The Traffic Jam of Robots: Implications of Autonomous Vehicles on Trip Making.....	17
The Right Role for Autonomous Vehicle Technology in Cities.....	18
Keynote Session	20
Transportation Research Board and Transformational Technologies	20
Welcome from the Transportation Research Board.....	21
National Highway Traffic Safety Administration and the Future of Automated Vehicles	21

GENERAL SESSION

International Experience	23
Connected and Autonomous Vehicles in the United Kingdom	23
European Activities on Connected and Automated Driving: The Present and Beyond—The ADAPTIVE and AUTONET2030 Use Cases.....	24
Connected and Automated Driving in The Netherlands: Challenge, Experience and the Declaration of Amsterdam	26
i-GAME: From Platooning to Cooperative Automated Maneuvering	27

CityMobil2: Four Years of Demonstrating Automated Road Transport Systems in European Cities	28
Drive Sweden: A National Effort for an Automated Transportation System.....	29
Key Enablers: Standards, Safety, and Cybersecurity	31
Automated and Connected Transportation Standards:	
Key to New Vehicle Technologies	31
Cybersecurity Challenges for Automated Vehicles.....	32
Safety Assurance for Highly Automated Driving: The PEGASUS Approach.....	33
Panel: Starting Up a Transportation Revolution.....	34
Update from Europe, Japan, and U.S. Federal Agencies	36
European Collaboration on Road Automation.....	36
Latest Developments in the Strategic Innovation Promotion Program: Innovation of Automated Driving for Universal Services and Related Activities in Japan.....	38
U.S. Department of Transportation Automation and Smart Cities Research	39
Beyond Traffic: The Smart City Challenge—Automation in the Smart City	40
Automated Vehicles: Accelerating Their Safe Arrival.....	42
Transportation as a System	43
Driving to the Future.....	44

CLOSING SESSION

Reports from the Breakout Sessions	46
User-Related Automated Vehicle Issues	48
Breakout Session 3: Human Factors in Road Vehicle Automation.....	48
Breakout Session 14: Reducing Conflicts Between Vulnerable Road Users and Automated Vehicles	49
Breakout Session 9: Methods for Assessing Market Acceptance, Adoption, and Usage of Automated Vehicles.....	50
Breakout Session 15: Behavioral Experiments for Modeling Adoption and Use of Automated Vehicles	51
Automated Vehicle Application Areas	52
Breakout Session 1: Public Transport and Shared Mobility.....	52
Breakout Session 7: Future Challenges for Automated Trucks.....	54
Breakout Session 16: Aftermarket Systems (ADAS-Related).....	55
Policy and Societal Issues.....	56
Breakout Session 2: Law and Policy as Infrastructure	56
Breakout Session 10: Ethical and Social Implications of Automated Vehicles	57
Breakout Session 17: Policy Making for Automated Vehicles: A Proactive Approach for Government.....	59
Planning for Automated Vehicles.....	60
Breakout Session 4: Impact Assessment.....	60
Breakout Session 18: Effects of Vehicle Automation on Energy and Carbon Intensity	61
Breakout Session 11: Early Implementation Alternatives for Automated Vehicles: An Interactive Scenario Planning Session.....	62
Breakout Session 12: AV-Ready Cities or City-Ready AVs?	64

Breakout Session 22: Transformational Technologies— Can Our Research Processes Keep Up?.....	65
Technology Issues.....	66
Breakout Session 5: Enabling Technologies.....	66
Breakout Session 6: Safety Assurance.....	67
Breakout Session 19: Cybersecurity and Resilience Challenges and Opportunities for Self-Driving Vehicles.....	69
Operational Issues for Automated Vehicles	70
Breakout Session 13: Design and Operational Challenges and Opportunities for Deploying AVs on Freeways and Managed Lanes.....	70
Breakout Session 20: Infrastructure, Work Zones, and Digital Infrastructure	72
Breakout Session 21: Traffic Flow of Connected–Automated Vehicles	73
Breakout Session 8: Traffic Signal Control with Connected and Automated Vehicles	74

POSTER SESSIONS

Research Poster Session.....	76
Special Interest Poster Session.....	80

APPENDIXES

A. Breakout Session 1: Public Transport and Shared Mobility	84
B. Breakout Session 2: Law and Policy as Infrastructure	91
C. Breakout Session 3: Human Factors in Road Vehicle Automation.....	97
D. Breakout Session 4: Impact Assessment.....	101
E. Breakout Session 5: Enabling Technologies.....	108
F. Breakout Session 6: Safety Assurance.....	111
G. Breakout Session 7: Future Challenges for Automated Trucks.....	116
H. Breakout Session 8: Traffic Signal Control with Connected and Automated Vehicles.....	122
I. Breakout Session 9: Methods for Assessing Market Acceptance, Adoption, and Usage of Automated Vehicles.....	126
J. Breakout Session 10: Ethical and Social Implications of Automated Vehicles	130
K. Breakout Session 11: Early Implementation Alternatives—An Interactive Scenario-Planning Session.....	133
L. Breakout Session 12: AV-Ready Cities or City-Ready AVs.....	137
M. Breakout Session 13 Design and Operational Challenges and Opportunities for Deploying Automated Vehicles on Freeways and Managed Lanes.....	143
N. Breakout Session 14: Reducing Conflicts Between Vulnerable Road Users and Automated Vehicles.....	147
O. Breakout Session 15: Behavioral Experiments for Modeling Adoption and Use of Autonomous Vehicles.....	150
P. Breakout 16: Aftermarket Systems (ADAS-Related).....	156
Q. Breakout Session 17: Policy Making for Automated Vehicles— A Proactive Approach for Government	159

R.	Breakout Session 18: Effects of Vehicle Automation on Energy and Carbon Intensity.....	170
S.	Breakout Session 19: Cybersecurity and Resilience Challenges and Opportunities for Self-Driving Vehicles.....	174
T.	Breakout Session 20: Infrastructure, Work Zones, and Digital Infrastructure	178
U.	Breakout Session 21: Traffic Flow of Connected–Automated Vehicles	184
V.	Breakout Session 22: Transformational Technologies—Can Our Research Processes Keep Up?	189
W.	List of Acronyms	193
