2017 IEEE PES Innovative Smart Grid Technologies Conference - Latin America (ISGT Latin America)

Title

Model order reduction by a statistical metric 1

Biogeography based Optimization Algorithms Applied to AC Transmission Expansion Planning 7 Failure Probability Metric by Machine Learning for Online Risk Assessment in Distribution Networks 13 Power Quality with Solid State Transformer Integrated Smart-Grids 19 Control and Protection of Active Distribution Systems Using a New Multiobjective Mathematical Model 25 Intervention Scheme Based Heuristic Optimizer for Online Reactive Power Management 31 Enterprise Architecture for the Utility of the Future: Case Study Ecuador 37 Grid-Connection Strategy with Reduced Current Spikes for Grid-Tie Module-Integrated Converter 43 A Nodal Pricing Approach for Reactive Power in Distribution Networks 49 Details and implementation of a SiC-based solid state transformer prototype 55 Concentrated Solar Power: Analysis of Economic Aspeccts in Brazil 61 Determining Nodal Interruption Capacity with Reliability Assessment Method 67 Spatial-Temporal Model to Estimate the Load Curves of Charging Stations for Electric Vehicles 73 Electrical Vehicles: Facing future challenges in Quito 79 Roles, Challenges, and Approaches of Droop Control Methods for Microgrids 85 Development of an ANN Model to Multi-Region Short-Term Load Forecasting based on Power Demand Patterns Recognition 91 Minimax approaches to optimal transmission expansion planning considering non-probabilistic scenarios of market-based renewable generation capacity additions 97 Risk allocation & economic incentives for the sharing of network facilities for the connection of renewables to the transmission grid 103 Evaluation of the Impact of Different Neural Network Structure and Data Input on Fault Detection 109 Distributed Energy Management System for V2G Networked Microgrids 114

Master of Power: A Power Plant Controller and Energy Management System Concept 120 Optimal Distribution Feeder Reconfiguration for Integration of Electric Vehicles 126 Novel Protection Schema for a Radial Microgrid System 132 Aggregation Architecture for Data Reduction and Privacy in Advanced Metering Infrastructure 138 Standalone Photovoltaic System, using a Single Stage Boost DC/AC Power Inverter Controlled by a Double Loop Control 143 Metaheuristic Approach for Online Optimal Reactive Power Management in Near-Shore Wind Power Plants 149 Sliding-Mode Control on DC-DC converters of a Virtual Power Plant 155 EMC Research of Transformer-Thyristor Regulator 161 Load Estimation Based on Self-organizing Maps and Bayesian Networks for Microgrids Design in Rural Zones 167 Battery Energy Storage System for a Hybrid Generation System Grid Connected using Fuzzy Controllers 173 Optimal Location of Sliding Mode Control and Power System Stabilizers in Order to Damp Electromechanical Oscillations Using the Residue 179 Optimum Location and Tuning of PSS devices considering Multi-machine criteria and a Heuristic Optimization Algorithm 185 Optimal Control of Reactive Power in an Offshore Wind Farm with HVDC Link 191 Impact Assessment of Demand Response and Distributed Generation in the Colombian Power System Chargeability 197 Optimal Location and Size for Various Renewable Distributed Generators in Distribution Networks 203 Joint Reconfiguration of Feeders and Allocation of Capacitor Banks in Distribution Systems Using a Multi-Start Strategy 209 A Tariff System for EV Smart Charging to Increase Renewable Energy Sources use 215 Public Policies Proposals for the Deployment of Electric Vehicles in Ecuador 221 Spatial-Temporal Model for Demand Estimation Due to Appliances with High Energy Consumption 227 An Analysis of the Optimal Switching Problem in Transmission Systems 233 Optimal Placement, Sizing and Control of Distributed Series Reactor to Improve System Reliability 238 Pitfalls of implementing multi-vendor IEC 61850 Substation Automation Systems 244

Voltage Regulators, Capacitor Banks and Distributed Resources Allocation in a Distribution Network System 249 Voltage Stability Assessment using Synchrophasor Measurements: Trends and Development 255 An Approach Based on Remedial Action Scheme to Increase Resiliency Under Failures in the Central American Power Grid 261 Time Response Laboratory Analysis for Residual Current Devices 267 Paralleling a Synchronverter and a PWM-based Converter for Supplying a Microgrid 273 Smart grids: A multi-scale framework of analysis 279 Smart Charging of PEVs to Reduce the Power Transformer Loss of Life 285 Identification of Power System Oscillations by a Decentralized Methodology 291 Electrical Load Curve Reconstruction required for Demand Response using Compressed Sensing Techniques 297 Control of Mechanical Loads in Wind Turbines Using an Integrated Aeroelastic Model 303 A Study of Microgrids through Cooperative Games including the Effect of Geographical Proximity 309 Investigation of Infrastructural Solutions to Mitigate the Impacts of EV Recharging at LV Networks 314 Development and Research of the Universal Coupling Device for Different Kinds of Electric Power Sources 320 Analysis of Voltage Sags Due to Induction Motors in Distribution Systems with High PV Penetration 326 Incorporation of Dynamic Voltage Support Requirements in PV Systems to Mitigate the Effects of Voltage Sags in Distribution Networks 332 Development of a spatial load-forecasting module for optimizing planning of electricity supply 338 Study for Determination of Projected Maximum Unit Demand Case Study: Cuenca-Ecuador 344 Dynamic state estimation of an electric power system 350 Performance of Phasor Estimation Algorithms in Instability Cases of Electric Power Systems 356 Modeling, Simulation and Construction of the D-ICAZA-A1 wind turbine destined for the rural areas of Ecuador 362 Grid Parity Analysis for Low Power Photovoltaic Systems in Santa Fe (Argentina) 368 Testbed for PSS Tuning Using Synchrophasor Measurements and a Real-Time Digital Simulator 374 Methodology for defining the Functionality of Advanced Measurement Infraestructure in Colombia 380

Microgrid Architectures for Distributed Generation: A Brief Review 386 Study and Analysis of Harmonic Disturbances in the Network of the Quito Electric Company to the Incorporation of the Metro System in Quito 392 Voltage Control in Low Voltage Distribution Networks with High Penetration Photovoltaic System 398 Sizing of Hybrid Energy Storage Systems for Frequency Response of Solar Farms in Ecuador 404 Noise reduction for faults in HVDC lines using mathematical morphology 411 Strategic Bidding in Regional Electricity Markets: Alternative Approach using Mixed Complementarity Problems 417 Assessing the Performance of Smart Inverters in Large-Scale Distribution Networks with PV Systems 423 Using distribution-level locational marginal pricing to value distributed generation: impacts on revenues captured by generation agents 429 Applications of Geothermal Energy in the Ecuadorian Context 435 Energy Storage for Frequency Control in Microgrids 440 Impact of Electric Vehicle Charging on the Distribution System in Cuenca, Ecuador 445 Optimal Fault Location in Transmission Lines Using Hybrid Method 451 Smoothing of Photovoltaic Power Generation Using Batteries as Energy Storage 457 Design of Secondary Circuits of Distribution Networks using Clustering and Shortest Path Algorithms 463 Real-time Transient Stability Assessment of Electric Power Systems using Predictive-SIME based on Machine Learning 469 Adaptive Distance Protection with Compensation for Remote Infeed Effect 475 Feasibility of Distributed Monitoring and Distributed Control in Power System 481 Importance of Hourly Multi-Bus Unit Commitment Models in the context of High Adoption of Variable Renewable Energies: A Chilean Example 487
