Contents

Additive Manufacturing/3D Processing

- High Pressure Heat Treatment—Optimized Material Properties by HIP** 1
J. Hjarne¹, M. Ahlfors¹, and A. Eklund²
(1) Quintus Technologies LLC
(2) Quintus Technologies AB
- Heat Treatment of IN 718 Produced by Laser Powder Bed Fusion Process—Effect of Thickness on the Microstructure Characteristics** 4
A. Sadek¹, R. Xu², and R.S. Mishra³
(1) EWI
(2) Rolls-Royce
(3) University of North Texas

Advances in Heat Treating

- Applicability of Modified T5 Temper for Aluminium Forged Parts** 12
Ö. Sürmen¹, M. Tarakçı², Y. Gençer², and S. Zeytin³
(1) Fatih Sultan Mehmet Vakif University
(2) Gebze Technical University
(3) Sakarya University
- On Predicting Quenched and Tempered Hardness of Mixed Microstructures Using Steel Chemistry** 19
V.A. Athavale and D.C. Van Aken, Missouri University of Science and Technology
- Developing Aluminized Coatings on Stainless Steels by Hot Dipping** 27
F. Farhadi, C. Soderhjelm, and R.D. Sisson, Worcester Polytechnic Institute
- Impact of Various Heat Treatments on the Microstructure Evolution and Mechanical Properties of Hot Forged 18CrNiMo7-6 Steel** 33
P. Mandal, A. Al Mamun, L. Da Silva, H. Lalvani, M. Perez, and L. Muir, University of Strathclyde
- The Use of Low Pressure Carburizing and High Pressure Gas Quenching for In-Line Heat Treat Processing** 39
D. Beauchesne, ECM-USA, Inc.
- Low Drift Type K and N Mineral Insulated Thermocouple Cable for Aerospace Applications** 44
T.D. Ford¹ and Michele Scervini²
(1) CCPI Europe Limited
(2) University of Cambridge
- Everything Matters to Reach ASM HTS's Vision 2020 Goals** 54
J.A. Powell, Akron Steel Treating Company

Induction Heating Nonferrous Metals—Physical Characteristics and Process Optimization 65

C. Russell¹ and Y. Pleshivtseva²

(1) Inductoheat Inc.

(2) Samara State Technical University

Applied Technology/Miscellaneous

RSM Optimization of Laser Processing Parameters to Improve Biowettability of Ti-6Al-4V Alloys 70

A. Kumar, University of North Texas

Heat Treatment with a Turbulent Twist 78

A. Malas, Linde LLC

The State of the Art in Heat Treat Simulation 82

G. Petrus, J. Miller, J. Walters, and R. Shankar, Scientific Forming Technologies Corporation

Process Prediction and Control by an Empirical Model Based on Equivalent Diffusion for Carburizing or Carbonitriding Processes 87

R.W. Simons, Paulo

Hydrogen Generation Makes Switching from Dissociated Ammonia Attractive 91

D. Wolff, Proton OnSite

Applied Technology

Nikrothal® PM 58 and Kanthal APMT™—Alumina Forming High Temperature Steels Offering New Opportunities in Heat Treatment 99

D. Chandrasekaran, T. Helander, and J.N. Olovssjö, Sandvik Materials Technology

3D Multiphysics Modelling Applied to Parametric Analysis on Inductors Design 106

D. Ciscato and M. Cesano, SAET S.p.A.

Key Considerations When Planning to Upgrade Existing Vacuum Furnaces 112

P. Kerbel, Ipsen

FNC and Post-Oxidation—Comparisons of Corrosion Resistance Performance 118

J. Oakes and C. Thomas, Super Systems Inc.

Aqueous Quenchants for Induction Hardening 126

C. Faulkner, Houghton International Inc.

Solving Critical Heat Treatment Challenges with Practical Process Modeling 129

J. Sims, T. Yu, Z. Li, and B.L. Ferguson, Dante Solutions Inc.

Considerations for Induction Quench and Temper of Tubular Products with Upset Ends—A Case Study of API 5CT L80 and P110 Casing and Tubing	138
<i>O. Tupalo, M. Abbas, and L.D. Frame, Thermatool Corp.</i>	

Atmosphere Technology

Improved Reliability of Dew Point Measurements of Furnace Atmosphere on a Continuous Basis	146
<i>L. He, D. Bowe, P. Thomas, and R. Ghosh, Air Products & Chemicals, Inc.</i>	
Endothermic Generator Advanced Diagnostics	149
<i>A.D. Kominek, Surface Combustion, Inc.</i>	
A Troubleshooting Guide for Brazing Furnace Atmospheres	153
<i>T. Philips, L. He, and R. Ghosh, Air Products & Chemicals, Inc.</i>	
Metallurgical Sample Preparation Study for Compound Layer Examination in Nitrided Components	157
<i>O.K. Rowan and Z.S. Birky, Caterpillar Inc.</i>	

Automotive Lightweighting

Flash® Bainite—Room Temp Stamping 1500 to 1800 MPa Structural and Energy Absorbing Components to <2T Bend Radii	163
<i>G.M. Cola, Jr., SFP Works, LLC</i>	
Role of Thermal Processing in Tailored Forming Technology for Manufacturing Multimaterial Components	172
<i>R. Goldstein¹, B.-A. Behrens², and D. Duran²</i>	
<i>(1) Fluxtrol Inc.</i>	
<i>(2) Leibniz Universität Hannover</i>	
Automotive Designers and Heat Treaters Have Choices—Pros and Cons of Competing Hardening Processes and Materials	180
<i>W. Titus and M. Neumann, AFC-Holcroft, L.L.C.</i>	
Development of a Duplex Microstructure in a Medium Carbon Steel	185
<i>M. Alshwigi and S.K. Putatunda, Wayne State University</i>	

Induction Heat Treating

Modeling of Short Time Dilatometry Testing of High Carbon Steels	190
<i>R. Goldstein¹, E. Buchner², and R. Cryderman²</i>	
<i>(1) Fluxtrol, Inc.</i>	
<i>(2) Colorado School of Mines</i>	

Induction Hardening Inductors and Process Development <i>S.J. Midea and D. Lynch, Induction Tooling, Inc.</i>	197
Influence of Vanadium Microalloying on the Microstructure of Induction Hardened 1045 Steel Shafts <i>L. Rothleutner¹, C. Van Tyne², and R. Goldstein³</i> (1) <i>The Timken Company,</i> (2) <i>Colorado School of Mines</i> (3) <i>Fluxtrol Inc.</i>	201
Microstructure and Notched Fracture Resistance of 0.56% C Steels after Simulated Induction Hardening <i>R. Cryderman and J. Speer, Colorado School of Mines</i>	211
A Novel Integrated Tool for Parametric Geometry Generation and Simulation for Induction Hardening of Gears <i>L. Capone¹, T. Petzold¹, D. Hoemberg¹, and D. Ivanov²</i> (1) <i>Weierstrass Institute for Applied Analysis and Stochastics</i> (2) <i>EFD Induction AS</i>	219
New Technology Advancing Induction Heat Treatment Quality, Flexibility, and Performance <i>C.A. Russell and M.J. Zaharof, Inductoheat Inc.</i>	228
Computer Simulation of Single-Shot Induction Hardening Processes <i>C.A. Russell¹, V. Rudnev¹, Z. Li², and B.L. Ferguson²</i> (1) <i>Inductoheat Inc.</i> (2) <i>DANTE Solutions, Inc.</i>	232
Inductors and Coils New Production Solutions Using Additive Manufacturing Such as EBM 3D Printing and Precision Casting—A Presentation of the Current State-of-the-Art Technologies <i>F. Marquis, AJAX-TOCCO – GH Induction</i>	236
Induction Hardening for Large Bearing Rings—Case Study and Process Optimization <i>D. Munteanu, T. Bedo, D. Cristea, C. Gabor, M.A. Pop, I. Milosan, and S.I. Munteanu, Transilvania University of Brasov</i>	242
Successful Application of Intensive Quenching, Including the Elimination of Carburizing <i>E. Rylicki, Ajax TOCCO</i>	250
A New Standard Guide for Induction Heat Treating—Explanation of ASTM A1100 <i>L.D. Frame, University of Bridgeport</i>	255
Metallurgical Case Studies in Induction Hardening <i>S.J. Midea, Induction Tooling, Inc.</i>	258
Understanding the Induction Hardening Circuit <i>W.I. Stuehr, Induction Tooling Inc.</i>	264

Internet of Things

Big Data for Heat Treatment—How Data Analytics Can Contribute to Heat Treating Operations 270

L.D. Frame, B. Vo, and O. Abuzaghleh, University of Bridgeport

Achieving Production Flexibility with Automated Multicell Systems 274

J. Kowalewski, Ipsen

Empowered Heat Treat Operators—Using Mobility Solutions and Data Analytics to Make Workers More Productive 280

P. Sherwin, Eurotherm by Schneider Electric

Software Solutions for Streamlining Furnace Compliance 284

N.K. Wright, C3 Data

Microstructure Development

Influence of Test Method and Microalloy Additions on Measured Austenite Grain Size of Heat Treated SAE 1045 Steel 288

R. Cryderman¹, D. Hyer-Petersen¹, and R. Glodowski²

(1) Colorado School of Mines

(2) RJG Metallurgical LLC

Development of 0.2%C Low Alloyed Steel Hardened by Copper Precipitation 296

J. Dlouhy and J. Zrník, COMTES FHT a.s.

Solidification and Homogenization Modeling of High Entropy Alloys 302

A.T. Hope¹, H.-L. Chen¹, J.P. Oliveira², and C. Fink²

(1) Thermo-Calc Software

(2) The Ohio State University

The Effects of Heating Rates on the Tempering of 4140 Steel 305

X. Cai¹, R. Sisson¹, and L.D. Frame²

(1) Worcester Polytechnic Institute

(2) Thermatool Corp.

Life Extension of High-Temperature Structural Alloys RA602CA in Gas Carburizing Atmosphere 311

A. Wang, H. Yu, and R.D. Sisson, Jr., Worcester Polytechnic Institute

Processes and Applications

Effects of Forming Route and Heat Treatment on the Distortion Behaviour of Case-Hardened Martensitic Steel Type S156 321

D. Easton, M. Perez, J. Huang, and S. Rahimi, University of Strathclyde

Advancements in Control and Data Management	331
<i>S. Miller, Eurotherm, Ashburn</i>	
A Match of Material and Process—A Slip for Downhole Isolation Tools Made of a Cast Iron by Surface Hardening Treatments	335
<i>X. Yang¹, H. Liu¹, L. Wang¹, J. Xu², and Y. Liu²</i>	
<i>(1) Tarim Oilfield Company, CNPC</i>	
<i>(2) CNPC USA Corporation</i>	
Achieving Uniformity through Burner Spacing, Arrangement and Emerging Combustion Technology	341
<i>M. Cochran and S. Brown, Bloom Engineering Co. Inc.</i>	
Sources of Distortion Study during Quench Hardening Using Computer Modeling	350
<i>Z. Li, B.L. Ferguson, J. Sims, and T. Yu, DANTE Solutions, Inc.</i>	
Test Piece Representation of Carburized Gear Heat Treatment	357
<i>M.A. Pershing and M. Maniruzzaman, Caterpillar Inc.</i>	
Preventing Plant/Process Shutdowns Related to Momentary Short Circuits in Heat Treat Furnaces	363
<i>T. Bako, Gefran, Inc.</i>	
Comparison of Various Methods for Specifying and Determining the Case Depth of Nitrided Components	367
<i>Z. Birky and O. Rowan, Caterpillar Inc.</i>	
Quenching and Cooling	
Quenchant Characterization Using the Tensi Probe	374
<i>R.L. Simencio Otero¹, J.M. Viscaino¹, L.C.F. Canale¹, G.E. Totten², and L. Meekisho²</i>	
<i>(1) University of São Paulo</i>	
<i>(2) Portland State University</i>	
Developing Rotary-Arm Type Test System with a Small Platinum Ball Probe for Determination of Cooling Characteristics of Quenchants	380
<i>K. Arimoto¹, M. Shimaoka², and F. Ikuta³</i>	
<i>(1) Arimotech Ltd.</i>	
<i>(2) Nara College</i>	
<i>(3) Neturen Co. Ltd.</i>	
A New Test Method to Characterize Heat Transfer Coefficient Distribution in Industrial Gas Quenching Systems	387
<i>Y. Lu, H. Yu, and R.D. Sisson, Jr., Worcester Polytechnic Institute</i>	
The Effect of Contamination on Cooling Curve Behavior of Polymer Quenchants	389
<i>D.S. MacKenzie, Houghton International, Inc.</i>	

Comparative Study of the Effect of Section Thickness of Steel during Quenching in Neem and Mineral Oil	394
<i>U.V. Nayak and K.N. Prabhu, National Institute of Technology</i>	
Identification of the Important Process Parameters to Control Distortion and Residual Stress during Heat Treating	403
<i>H. Yu, Y. Lu, T. Zhou, and R.D. Sisson, Jr., Worcester Polytechnic Institute</i>	
An Inverse Method for Determining Steel Properties for Simulation of Phase Transformations during Quenching	407
<i>N.V. Biba¹, A.A. Shitikov², and A.I. Alimov²</i>	
<i>(1) Micas Simulations Limited</i>	
<i>(2) Bauman Moscow State Technical University</i>	
CFD Investigation of Quench Media and Orientation Effects on Structural Stress Induced in the Intense Quenching Processes for Aluminum Cylinder Heads	411
<i>J. Jan and M. Nannapuraju, Ford Motor Company</i>	
Numerical Model of Controlled Cooling of Steel Hot Rolled Bars	422
<i>B. Smoljan¹, D. Iljkić¹, B. Senčić², and Robert Vertnik²</i>	
<i>(1) University of Rijeka</i>	
<i>(2) Štore Steel d.o.o.</i>	
An Experimental Study on Blade Curving Due to Quenching in the Japanese Sword	430
<i>K. Arimoto¹ and M. Iyota²</i>	
<i>(1) Arimotech Ltd.</i>	
<i>(2) Osaka Institute of Technology</i>	
Re-Wetting Behavior and Heat Extraction during Laboratory-Scale Quenching Experiments Using Two Probe Geometries	436
<i>R. Cruces-Reséndez, B. Hernández-Morales, and E.I. Durán García, Universidad Nacional Autónoma De México</i>	
Evaluation and Control Technique of Cooling Unevenness by Quenching Oil	444
<i>R. Homma¹, K. Ichitani¹, Mika Matsumoto², and Greg Steiger²</i>	
<i>(1) Idemitsu Kosan Co., Ltd.</i>	
<i>(2) Idemitsu Lubricants America Corporation</i>	
Quenching and Partitioning in Hot Stamped Steels	451
<i>C. Ramón-Reyna¹, I. Álvarez-Elcoro¹, R. Mercado-Solís¹, L. Leduc-Lezama¹, A. Salinas-Rodríguez², and O. García Rincón³</i>	
<i>(1) Universidad Autónoma De Nuevo León</i>

<i>(3) TERNIUM Planta Guerrero Cd. de Los Ángeles</i>	

Surface Engineering

- Thermal Fatigue in Hot Work Tool Steels—A Review** 457
R.R. da Silva, Jr.¹, G.E. Totten², J.C. Vendramim³, and L. de Campos F. Canale¹
(1) University of São Paulo
(2) Portland State University
(3) ISOFLAMA Industry and Trade Equipment Ltda.
- Boriding of AISI 440B Stainless Steel and Coating Characterization** 469
P.G.B. de Oliveira¹, R. Tadeu, Jr. Aureliano¹, F.E. Mariani¹, G.E. Totten², and L.C. Casteletti¹
(1) University of São Paulo
(2) Portland State University
- Corrosion Resistance of Niobium and Vanadium Carbide Layers Produced by Thermoreactive Diffusion Treatments on Spheroidal Cast Iron** 474
C. Soares¹, F.E. Mariani¹, G.C. Rêgo¹, G.S. Takeya¹, G.E. Totten², and L.C. Casteletti¹
(1) University of São Paulo
(2) Portland State University

Surface Engineering/Nitriding

- Nitriding and Ferritic Nitrocarburizing Atmospheres—Prediction and Control** 480
W.J. Bernard, III, Surface Combustion, Inc.
- Alternative Surface Activation Techniques when Nitriding Stainless Steels** 483
S. Nousir and J.A. Kalucki, Nitrex Metal Inc.
- Effects of Composition, Starting Microstructure, and Tempering Conditions on the Changes in Core Properties after a Simulated Nitride Thermal Cycle** 493
J. Klemm-Toole¹, K. Findley¹, R. Cryderman¹, and M. Burnett²
(1) Colorado School of Mines
(2) TimkenSteel

Thermal Mechanical Processing

- Uphill Quenching of Aluminum Alloys—A Progress Report** 502
W. da S. Mattos¹, T. Ferreira², G.E. Totten³, and L. de Campos F. Canale²
(1) Federal Institute of São Paulo
(2) University of São Paulo
(3) Portland State University

Thermal Mechanical Processing/Welding

Effect of Post Weld Heat Treatments on Electron Beam Welded SAE 5137 Steel 511

V. Bhavar, P. Kattire, S. Thakare, S. Mane, S. Patil, V. Pawar, and R.K.P. Singh, Bharat Forge Limited

Simulation of Temperature Profile in Longitudinal Welded Tubes during High-Frequency Induction Welding 519

P. Das¹, J.I. Asperheim¹, B. Grande¹, T. Petzold², and D. Hömberg²

(1) EFD Induction A.s.

(2) Weierstrass Institute for Applied Analysis and Stochastics

Aspects of Precise Heat Input Control for High-Frequency Welding 524

L.D. Frame, K. Davis, O. Tupalo, T. Ignatowski, and M. Nallen, Thermatool Corp.

Vacuum Processes and Technology

True Single-Piece Flow Case Hardening for In-Line Manufacturing 534

T. Hart¹ and M. Korecki²

(1) SECO/Vacuum Technologies LLC

(2) SECO/WARWICK S.a.

Low-Pressure Carburizing of Powder Metal Components 541

V. Heuer¹, G. Schmitt¹, P. Kauffmann², K. Faerber², R. Lawcock³, and R. Shivanath³

(1) ALD Vacuum Technologies GmbH

(2) Stackpole, Aachen, Germany

(3) Stackpole, Mississauga, Canada

A New, Innovative Approach to Designing a Vacuum Furnace Hot Zone 545

W.R. Jones¹ and R.J. Fradette²

(1) Solar Atmospheres Inc.

(2) Solar Manufacturing Inc.

Low Pressure Carburizing Distortion Data Comparing Oil and High Pressure Gas Quenching 550

V. Lelong and D. Beauchesne, ECM-USA, Inc.

Multiple Chamber Vacuum Furnaces vs. Single-Chamber Vacuum Furnaces—A Review 554

B.T. Bernard and W.J. Bernard, III, Surface Combustion, Inc.

Advanced Nickel Alloy for High-Temperature Vacuum Baskets 557

M. Glasser¹ and R. Jones²

(1) Rolled Alloys Metallurgical Services

(2) Solar Atmospheres Inc.

Vacuum Carburizing Steel Alloys Containing Strong Carbide Formers	560
<i>B.L. Ferguson, Z. Li, J. Sims, and T. Yu, DANTE Solutions, Inc.</i>	
Copper Evaporation during Low Pressure Carburizing	565
<i>T. Jones, V. Osterman, and D. Jordan, Solar Atmospheres, Inc.</i>	
Optimizing Cycle Time and Process Flexibility Using Vacuum Sealed Quenching	568
<i>D. Marteeny¹ and M. Korecki²</i>	
<i>(1) SECO/Vacuum Technologies, LLC</i>	
<i>(2) SECO/WARWICK S.a.</i>
