# High Temperature Corrosion and Materials Chemistry 10

---

## Editors:

### T. M. Gür

Stanford University  
Stanford, California, USA

### D. Shifler

Office of Naval Research  
Arlington, Virginia, USA

## Sponsoring Divisions:

**High Temperature Materials**

**Corrosion**

Published by

**The Electrochemical Society**

## **Table of Contents**

|                |     |
|----------------|-----|
| <i>Preface</i> | iii |
|----------------|-----|

### **Chapter 1** **Solid Oxide Fuel Cell Materials**

|                                                                                                                                                                                                                       |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| (Invited) Insights into SOFC Ni/YSZ Anode Degradation Using In-Situ Spectrochronopotentiometry<br><i>J. D. Kirtley, M. D. McIntyre, D. M. Halat, R. A. Walker</i>                                                     | 3  |
| Improved Sintering Property of Y-Doped BaZrO <sub>3</sub> by Mn Addition<br><i>D. Kim, S. Miyoshi, T. Tsuchiya, S. Yamaguchi</i>                                                                                      | 17 |
| A Study of Nickel-Substituted Lanthanum Cobaltite as Cathode Materials for SOFCs<br><i>Y. Uzumaki, S. I. Hashimoto, K. Amezawa, T. Kawada</i>                                                                         | 29 |
| Oxygen Transport in Perovskite Type Oxide La <sub>0.6</sub> Sr <sub>0.4</sub> Co <sub>0.2</sub> Fe <sub>0.8</sub> O <sub>3-δ</sub><br><i>H. Kudo, K. Yashiro, S. I. Hashimoto, K. Amezawa, T. Kawada, J. Mizusaki</i> | 37 |
| Measuring Cr Volatility from Ferritic Stainless Steels: Novel and Conventional Methods Compared<br><i>J. J. Eziashi, C. Key, R. Smith, R. Amendola, P. E. Gannon, J. Froitzheim</i>                                   | 43 |

### **Chapter 2** **High Temperature Electrolysis**

|                                                                                                                                                                                                                                    |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Nickel and Its Alloys as Perspective Materials for Intermediate Temperature Steam Electrolysers Operating on Proton Conducting Solid Acids as Electrolyte<br><i>A. V. Nikiforov, I. M. Petrushina, J. O. Jensen, N. J. Bjerrum</i> | 53 |
| High Temperature Electrolysis for Liquid Iron Production<br><i>E. Kvalheim, G. M. Haarberg, A. M. Martinez, S. Rolseth, K. S. Osen, H. Gudbrandsen</i>                                                                             | 63 |

### Chapter 3

#### High Temperature Materials and Coatings

|                                                                                                                                                                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Multiscale Analysis on Gas Phase and Surface Chemistry of SiC-CVD Process from $\text{CH}_3\text{SiCl}_3/\text{H}_2$<br><i>Y. Fukushima, K. Hotozuka, Y. Funato, N. Sato, T. Momose, Y. Shimogaki</i>                                                                  | 75  |
| Intragranular Nanocomposites Via Internal Reduction of Carbide Solid Solutions<br><i>D. W. Lipke, K. H. Sandhage</i>                                                                                                                                                   | 85  |
| Ceramic Dusting Corrosion of Yttria Stabilized Zirconia in Ultra-High Temperature Reverse-Flow Pyrolysis Reactors<br><i>C. Chun, S. Desai, F. Hershkowitz, T. A. Ramanarayanan</i>                                                                                     | 95  |
| Chemical Densification of Oxide Based Coatings for High Temperature Wear and Corrosion Resistance<br><i>P. J. Masset, M. Faulstich, K. T. Fehr, C. Weih, G. Wolf, Y. Ye</i>                                                                                            | 109 |
| Transition Metal Spinel Oxide Coatings for Solid Oxide Fuel Cell Interconnects<br><i>J. W. Fergus, C. J. Dileep Kumar, Y. Liu, W. Tilson, A. Dekich, H. Wang</i>                                                                                                       | 117 |
| Improvement of the Resistance of Titanium Aluminides to Environmental Embrittlement<br><i>P. J. Masset, F. Bleicher, L. Bortolotto, G. Geiger, A. Kolitsch, C. Langlade, J. Paul, B. Pelic, F. Pyczak, D. Rafaja, P. Schumacher, M. Schütze, G. Wolf, R. A. Yankov</i> | 127 |
| Author Index                                                                                                                                                                                                                                                           | 143 |
