#### **Robotics, Computer Vision Applications and Computational Intelligence**

|                                                                                                                                                                                                   |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Time-to-Contact Forecasting by Modeling the Apparent Size of Obstacles .....                                                                                                                      | 3  |
| <i>Angel Sanchez Garcia, Homero Rios Figueroa, Gustavo Quintana Carapia,<br/>Aurora Montano Rivas, and Antonio Marin Hernandez</i>                                                                |    |
| Path Planning for a Mobile Robot using Genetic Algorithm and Artificial Bee Colony .....                                                                                                          | 8  |
| <i>Emori Alain Sérvulo Carballo, Lluvia Morales, and Felipe Trujillo-Romero</i>                                                                                                                   |    |
| State of the Art and Elements of the Brain Automatic Image Recognition .....                                                                                                                      | 13 |
| <i>Keila Vasthi Cortés-Martínez, Manuel Mejía-Lavalle, and José Ruíz Ascencio</i>                                                                                                                 |    |
| Brain-Motion Interaction Analysis Through the Study of Brainwaves .....                                                                                                                           | 26 |
| <i>Luis Gerardo Carvajal Fernández</i>                                                                                                                                                            |    |
| Start Up of a Mobile Robot Experimental Platform with Embedded Hardware and Free<br>Software .....                                                                                                | 31 |
| <i>Celso Márquez-Sánchez, Ramón Silva-Ortigoza, César Noé Pérez-Catalán,<br/>Mayra Antonio-Cruz, José Rafael García-Sánchez, Victor Manuel Hernández-Guzmán,<br/>and Mariana Marcelino-Aranda</i> |    |
| Spatial Resolution Optimization for Terrain Coverage with UAVs .....                                                                                                                              | 37 |
| <i>Juan Irving Vasquez-Gomez, Juan Carlos Herrera-Lozada, and Mauricio Olguin-Carbajal</i>                                                                                                        |    |
| The Effects of Using a Noise Filter and Feature Selection in Action Recognition: An<br>Empirical Study .....                                                                                      | 43 |
| <i>Carolina Gabriela Maldonado Mendez, Sergio Hernandez Mendez, Ana Luisa Solis,<br/>Homero Vladimir Rios Figueroa, and Antonio Marin Hernandez</i>                                               |    |

|                                                                                                                                                                                                |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Chaotic Synchronization of Sprott Collection and RGB Image Transmission .....                                                                                                                  | 49 |
| <i>Ashley Melendez-Cano, Jorge Sanchez Rodriguez, Yuma Sandoval-Ibarra,<br/>Jose Ricardo Cardenas-Valdez, Manuel Jesus Garcia-Ortega, Esteban Tlelo-Cuautle,<br/>and Jose Cruz Nuñez-Perez</i> |    |
| Evaluation of Classic Super-Resolution Algorithms for Magnetic Resonance Images .....                                                                                                          | 55 |
| <i>Jaime Sacramento Pérez, Andrea Magadán, and Raúl Pinto</i>                                                                                                                                  |    |
| Qualities of Hilbert Huang Transform in the Study of Spontaneous Pupillary Data .....                                                                                                          | 62 |
| <i>Fabiola M. Villalobos-Castaldi, Silvia Garcia, José Ruiz-Pinales, and Nicolas Kemper</i>                                                                                                    |    |

## **Mechatronics, Control Systems and Industrial Applications**

|                                                                                                                                                                                                  |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Connection Between Optimal Risk-Sensitive Filtering and Contro for Third Degree<br>Stochastic Polynomial Systems .....                                                                           | 71  |
| <i>María Aracelia Alcorta García, Mauricio Torres Torres, Nora Elizondo V.,<br/>Facundo Cortés Martínez, and Agustín Sáenz</i>                                                                   |     |
| Passivity Based Control for the “Boost Converter-Inverter-DC Motor” System .....                                                                                                                 | 77  |
| <i>Víctor Hugo García-Rodríguez, José Rafael García-Sánchez, Ramón Silva-Ortigoza,<br/>Eduardo Hernández-Márquez, Hind Taud, Mario Ponce-Silva,<br/>and Griselda Saldaña-González</i>            |     |
| Programming Enviroment of Control Algorithms .....                                                                                                                                               | 82  |
| <i>Mizantha Concepción Mota-Martínez, Fernando Reyes-Cortés, and Jaime Cid-Monjaraz</i>                                                                                                          |     |
| Regulation of the DC/DC Buck-Boost Converter-Inverter-DC Motor System:<br>Sensorless Passivity Based Control .....                                                                               | 88  |
| <i>Eduardo Hernández-Márquez, Ramón Silva-Ortigoza, Carlos Alejandro Avila-Rea,<br/>José Rafael García-Sánchez, Mayra Antonio-Cruz, Hind Taud, Shihai Dong,<br/>and Mariana Marcelino-Aranda</i> |     |
| Design of a Delta Wing Aircraft .....                                                                                                                                                            | 93  |
| <i>Luis Raul Montaña Pérez, Miroslava Cano Lara, and Higinio Juarez Ríos</i>                                                                                                                     |     |
| Modeling and Simulation of a DC Motor Fed by a Full-Bridge Buck Inverter .....                                                                                                                   | 98  |
| <i>Eduardo Hernández-Márquez, Carlos Alejandro Avila-Rea, Ramón Silva-Ortigoza,<br/>José Rafael García-Sánchez, Mayra Antonio-Cruz, Hind Taud,<br/>and Mariana Marcelino-Aranda</i>              |     |
| Alternative Mathematical Models for the DC/DC Buck-Boost Converter .....                                                                                                                         | 104 |
| <i>Eduardo Hernández-Márquez, Ramón Silva-Ortigoza, José Rafael García-Sánchez,<br/>Mayra Antonio-Cruz, Hind Taud, Fernando Carrizosa-Corral,<br/>and Mariana Marcelino-Aranda</i>               |     |
| Decentralized Direct MRAC of a Self-Balancing Robot Mounted on a Ball .....                                                                                                                      | 108 |
| <i>Francisco Jurado and Rubén Ontiveros–Guerrero</i>                                                                                                                                             |     |
| Decentralized Control of the Quadrotor’s 6-DOF .....                                                                                                                                             | 114 |
| <i>Francisco Jurado, Sergio Lopez, Alejandro Dzul, and H. Rodríguez–Cortés</i>                                                                                                                   |     |

|                                                                                                                                                                                                  |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Dynamics Modelling of an Underactuated Gyroscope System .....                                                                                                                                    | 120 |
| <i>José Manuel Reyes-Rodríguez, Fernando Reyes-Cortés, and Moisés Gutiérrez-Arias</i>                                                                                                            |     |
| <b>Computer Science, Communications and Mobile Applications</b>                                                                                                                                  |     |
| ID3 and k-means Based Methodology for Internet of Things Device Classification .....                                                                                                             | 129 |
| <i>Joan Nolla Suárez and Ante Salcedo</i>                                                                                                                                                        |     |
| Operating Frequency Displacement on Patch Antenna due to Positioning Structure<br>Effect .....                                                                                                   | 134 |
| <i>Adriana Lorena Yáñez-Cortés, Margarita Tecpoyotl-Torres, Alejandra Ocampo-Díaz,<br/>and Jose Gerardo Vera-Dimas</i>                                                                           |     |
| Optimal Coverage Path Planning Based on the Rotating Calipers Algorithm .....                                                                                                                    | 140 |
| <i>Juan Irving Vasquez Gomez, Magdalena Marciano Melchor,<br/>and Juan Carlos Herrera Lozada</i>                                                                                                 |     |
| Design and FEM Analysis of a New and Simple Electro-Thermal Actuated<br>Microgripper .....                                                                                                       | 145 |
