18<sup>th</sup> International Conference on  
**MULTIPHASE PRODUCTION TECHNOLOGY**

Cannes, France: 7<sup>th</sup> - 9<sup>th</sup> June 2017

**CONTENTS**

<b>FOREWORD</b>	1
<b>DEPOSITS</b>	
Prediction of asphaltene precipitation risk in oil wells using a coupled hydro-thermodynamic model <i>E Al-Safran, Kuwait University, Kuwait</i>	5
A study of wax deposition in pipeline using thermal hydraulic model <i>Y Zhao, D Limb, Petrofac Engineering &amp; Production Service, West, UK; X Zhu, China University of Petroleum, Beijing, China</i>	23
Assessing hydrate blockage risk in oil pipelines: deploying a new transient simulation capability <i>B W E Norris, M L Johns, E F May, Z M Aman, University of Western Australia, Australia</i>	39
<b>EXPERIMENTAL</b>	
Wall shear stress measurements of horizontal two-phase slug flow for high viscosity liquids using constant temperature anemometry <i>L Buitrago, T Kim, E Pereyra, C Sarica, The University of Tulsa, USA</i>	55
Flow structures in low-inclination stratified oil-water pipe-flows using laser-based diagnostic techniques <i>R Ibarra, O K Matar, C N Markides, Imperial College London, UK</i>	71
An experimental study of two-phase flow in horizontal and inclined annuli <i>J Nossen, L Liu, O Skjæraasen, M Tutkun, J E Amundsen, H G Sleipnæs, N Popovici, K Hald, M Langsholt, R Ibarra, Institute for Energy Technology (IFE), Norway</i>	87
Experimental investigation of vertical high-velocity two-phase flows in large-diameter pipes <i>M S Capovilla, P J Waltrich, Louisiana State University, USA; P Cavalcanti de Sousa, Texas A&amp;M University, USA</i>	103

## DOWNHOLE APPLICATIONS

- Transient simulations on ESP pump compared to measured data 121  
*M A H Changoluisa, Schlumberger UK PLC, UK; Z Xu, SWT, Schlumberger, Norway; M Haavelsrud Selberg, X C Billdal, Schlumberger Information Solutions AS, Norway*
- Multiphase downhole screw assembly (MDA) – A new chapter in conveying hydrocarbons 133  
*J – U Brandt, J Lewerenz, F Böker, D Müller-Link, ITT Bornemann GmbH, Germany*
- Unstable well behaviour in gas well liquid loading – stability tests 145  
*A van Wijhe, S P C Belfroid, TNO, The Netherlands*
- The use of surfactants for gas well deliquification: a comparison of research projects and developed models 161  
*J M C van 't Westende, TNO, Heat Transfer and Fluid Dynamics, The Netherlands; R A W M Henkes, Delft University of Technology and Shell Projects and Technology, The Netherlands; A Ajani, M Kelkar, The University of Tulsa, USA*

## MODEL ENHANCEMENTS

- Velocity profiles in stratified two-phase flow: Comparison of measurements and model predictions 185  
*P Andersson, J Henriksson, Schlumberger, SNTC, Norway*
- Wall transform mechanism in a viscosity stratified turbulent flow 199  
*S Ahmadi, A Roccon, A Soldati, Università di Udine, Italy and Technische Universität Wien, Austria; F Zonta, Technische Universität Wien, Austria*
- Assessment and sensitivity analysis of multiphase flow pipeline models against experimental and field data 209  
*P Dhoorjaty, D Erickson, R Kowta, M Mai, P Parthasarathy, Wood Group, USA*
- Validation of a multiphase flow simulator using three-phase gas condensate field data 225  
*N Jauseau, N Zambare, Kongsberg Digital, USA; E Zakarian, J Morgan, Woodside Energy Ltd, Australia*

## ÅSGARD

- Åsgard Subsea Compression – technology overview and operational experience 243  
*P E Hedne, A Aarvik, M Nordsveen, B H Pettersen, L E Hauge, Statoil, Norway*

Åsgard subsea compression inlet cooler – development, qualification and operation of world's first passive multiphase subsea cooler 259  
*A Lauvdal, H Alfredsson, Aker Solutions ASA, Norway; A Aarvik, Statoil ASA, Norway*

Åsgard subsea compression and predictions of liquid surges 275  
*G R Setyadi, K Holmås, G G Lunde, K Vannes, A Sengebusch, TechnipFMC, Norway; M Nordsveen, B H Pettersen, Statoil, Norway*

## **PIPELINES AND RISERS**

Advances in modelling hydrodynamic slug flow in production systems 293  
*T J Lockett, Y Fan, A Ajani, BP Exploration and Production, UK*

CFD for multiphase flow in vertical risers 309  
*F Tocci, Politecnico di Milano, Italy; F Bos, Dynaflo Research Group, The Netherlands; R Henkes, Shell Projects & Technology, The Netherlands and Delft University of Technology, The Netherlands*

Improvement of LedaFlow for churn flow in vertical pipes 325  
*J Kjølaas, A Shmueli, A Morin, SINTEF, Norway; R Belt, Total, France*

A model for liquid-assisted gas-lift unloading 345  
*R Coutinho, W Williams, P Waltrich, Louisiana State University, USA; P Mehdizadeh, Production Technology Inc., USA; S Scott, Petroleum ETC, USA*

## **EROSION AND CORROSION**

Minimum sand transportation conditions in multiphase pipelines: an assessment exercise 363  
*Z Zhou, L Lao, Cranfield University, UK*

Improving CO<sub>2</sub> corrosion rate predictions through the use of corrosion assessment and flow modelling – A field case study 381  
*L Barton, M Forde, A Pinto, I Laing, ROSEN, UK; R Ladwa, ROSEN Group, Switzerland*

Prolonged gas-condensate pipeline operation below minimum turndown rate 395  
*E Zakarian, J Morgan, Woodside Energy Ltd, Australia*

## **RISK AND UNCERTAINTY**

The use of a low-cost gas-liquid flow meter to monitor severe slugging 413  
*P Andreussi, University of Pisa, Italy; M Bonizzi, P Ciandri, TEA Sistemi, Italy; S Pedersen, D S Hansen, Aalborg University, Denmark*

Decision analysis in multiphase flow: uncertainty, risk and application 425  
*B L Keinath, ExxonMobil URC, USA*

## **SPECIAL REGIONAL FOCUS – TANZANIA REVISITED**

- Tanzania gas development – flow assurance challenges 439  
*H Holm, Statoil ASA, Norway*
- Pressure drop measurements in low liquid loading three-phase flows 455  
*J Kjølås, T E Unander, M Wolden, A Shmueli, SINTEF, Norway; H Holm, Statoil, Norway*
- Pressure drop in low liquid loading flows – the effect of a thin liquid film on the pipe wall 471  
*D Biberg, C Lawrence, G Staff, Schlumberger Norway Technology Center, Norway; H Holm, Statoil ASA, Norway*
- Uncertainty evaluation applied to a model-based Virtual Flow Metering system 485  
*H Ausen, M Stinessen, D Fonnes, TechnipFMC, Norway; H Holm, Statoil, Norway*

## **EMERGING APPLICATIONS**

- Development of speed controlled pigging for low pressure pipelines 501  
*M H W Hendrix, H P IJsseldijk, W-P Breugem, Delft University of Technology, The Netherlands; R A W M Henkes, Delft University of Technology, The Netherlands and Shell Projects & Technology, The Netherlands*
- Subsea water separation: a state of the art review, future technologies and the development of a compact separator test facility 511  
*H S Skjefstad, M Stanko, Norwegian University of Science and Technology, Norway*
- Unequal split of liquid content in parallel flowlines 531  
*R J Belt, F X Clément, M A Paran, D Larrey, TOTAL France; F Papot, TOTAL Angola; G Lacaille, TOTAL USA*
- FLNG, a simple way to open Pandora's Box 551  
*R Malhotra, Wood Group, Australia; I Kopperman, Assured Flow Solutions, UK*

## **ADDITIONAL PAPER**

- Use of CFD for development of sand erosion control technology 573  
*P Kane, D Pliszka, T Wood, INTECSEA WorleyParsons Group, UK*

## **AUTHOR INDEX**
