paper titles

3

3X Endurance Enhancement by Advanced Signal Processor for 3D NAND Flash Memory.....201

A

A Construction of the Progressive (3,n)-Threshold Visual Cryptography Using a BIBD and Analysis of Its Optimality.....249

A Converse Bound on Wyner-Ahlswede-Körner Network via Gray-Wyner Network.....81

A General Framework for MIMO Receivers with Low-Resolution Quantization.....599

A Generalization of Blahut-Arimoto Algorithm to Compute Rate-Distortion Regions of Multiterminal Source Coding Under Logarithmic Loss.....349

A Simpler Proof for the Existence of Capacity-Achieving Nested Lattice Codes.....564

A Tight Upper Bound on the Second-Order Coding Rate of Parallel Gaussian Channels with Feedback.....76

A User-Independent Serial Interference Cancellation Based Coding Scheme for the Unsourced Random Access Gaussian Channel.....121

Achievability bounds on quantum state redistribution using convex split and position based decoding.....474

Alphabet Size Reduction for Secure Network Coding.....309

An Achievable DoF Region for the Two-User Non-Coherent MIMO Broadcast Channel with Statistical CSI.....604

An Improved Secretive Coded Caching Scheme exploiting Common Demands.....66

An Information-theoretic Approach to Unsupervised Feature Selection for High-Dimensional Data.....434

An Iterative Algorithm to Construct Optimal Binary AIFV-m Codes.....519

An upper bound on quantum capacity of unital quantum channels.....214

An upper bound to zero-delay rate distortion via Kalman Filtering for Vector Gaussian Sources.....534

Analysis of Practical LDPC Decoders in Tanner Graphs with Absorbing Sets.....141

Applications of position-based coding to classical communication over quantum channels.....209

Asymptotic Analysis for Hidden Markovian Process with Quantum Hidden System.....469

Asymptotic High-SNR Capacity of MISO Optical Intensity Channels.....86

B

Block-Diagonal Coding for Distributed Computing With Straggling Servers.....464

C

Caching with Partial Matching Under Zipf Demands.....61

Capacity Outer Bound and Degrees of Freedom of Wiener Phase Noise Channels with Oversampling.....614

Channel Capacity and Simple Correlators for Nonlinear Communication Channel at Large SNR and Small Dispersion.....186

Coded Caching for Wiretap Broadcast Channels.....11

Codes Correcting Position Errors in Racetrack Memories.....161

Codes for Erasures over Directed Graphs.....116

Codes for T-user Asymmetric Multiple-Access Channel with Independent Sources.....359

Coding for the binary energy harvesting channel with finite battery.....554

Communication vs Distributed Computation: an alternative trade-off curve.....279

Communication-Optimal Coding Designs for Caching Networks.....6

Comparison of Noisy Channels and Reverse Data-Processing Theorems.....489

Compress-and-Estimate Source Coding for a Vector Gaussian Source.....539

Compressive Sensing with Energy Constraint.....389

Computing Framework in Biological Cells via Stochastic Methods.....339

Computing Messages that Reveal Selected Inferences While Protecting Others.....319

Construction of Parallel RIO Codes using Coset Coding with Hamming Codes.....239

Context-Aware Resiliency: Unequal Message Protection for Random-Access Memories.....166

Covert Communication over Broadcast Channels.....299

D

Decoding Dynamic Signals in Molecular Communication.....N/A

Delay Scaling Laws of Random Wireless Networks: Impact of Blocklength.....409

Delay-aware Massive Random Access: Adaptive Framing and Successive Decoding.....176

Design of Optimal Entropy-constrained Scalar Quantizer for Sequential Coding of Correlated Sources.....524

Distance Spectrum Formula for the Largest Minimum Hamming Distance of Finite-Length Binary Block Codes.....419

Double-Edge Factor Graphs: Definition, Properties, and Examples.....136

E

Effect of Local Population Uncertainty on Cooperation in Bacteria.....334

Entanglement Assisted Binary Quantum Tensor Product Codes.....219

Error Exponent for Covert Communications over Discrete Memoryless Channels.....304

Explicit Lower Bounds on the Outage Probability of Integer Forcing over Nr × 2 Channels.....569

Explicit Symmetric Pseudo-Random Matrices.....424

F

Fractional Repetition Codes Based on Partially Ordered Sets.....51

Fundamental Limits of Latency in a Cache-Aided 4x4 Interference Channel.....16

H

High Performance Non-Binary Spatially-Coupled Codes for Flash Memories.....229

Hypothesis Testing over Cascade Channels.....369

I

Improved Sliding Window Decoding of Spatially Coupled Low-Density Parity-Check Codes.....126

Information Geometry of The Family of Markov Kernels Defined by A Context Tree.....429

Information Theoretic Converse Proofs for some PICOD Problems.....284

J

Joint secrecy over the K-Transmitter Multiple Access Channel.....394

L

LDPC Coded Modulation for TLC Flash Memory.....204

LDPC Turbo Decoder using Generalized Belief Propagation over Two-Dimensional Inter-Symbol Interference Channel.....244

Learning via Active Hypothesis Testing over Networks.....374

Linear Programming based Finite Blocklength Converses for Some Network-like Problems.....544

Linear Symmetric Private Information Retrieval for MDS Coded Distributed Storage with Colluding Servers.....71

Locality-Aware Hybrid Coded MapReduce for Server-Rack Architecture.....459

Lossy Transmission of Correlated Sources over Two-Way Channels.....354

Low-Rate Regular Concatenated Zigzag Codes are Capacity-Approaching over the BEC.....111

Lowering the Error Floors of Low-Density Parity-Check Codes with Additional Check Nodes.....146

M

Maximally Recoverable Codes: Connections to Generic Network Coding and Maximal Matching.....36

Multi-Kernel Polar Codes: Proof of Polarization and Error Exponents.....101

Multilayer Codes for Synchronization from Deletions.....449

N

Novel Decentralized Coded Caching through Coded Prefetching.....1

Novel Outer Bounds for Combination Networks with End-User-Caches.....444

O

On Independent Distributed Source Coding Problems with Exact Repair.....579

On One Generalization of LRC Codes with Availability.....26

On Practical LDPC Code Construction for NAND Flash Applications.....191

On the Benefit of Delayed CSIT in Fading MIMO Broadcast Channel with CSIR Locality.....609

On the Capacity of Index Coding Problems with Symmetric Neighboring Interference.....294

On the Capacity of the Slotted Strongly Asynchronous Channel with a Bursty User.....91

On the Capacity of the Two-User Erasure Broadcast Channel with Mixed CSIT.....499

On the Duality of Fractional Repetition Codes.....56

On the Gaussian MAC with Degraded Message Sets and Long-Term Power Constraints.....399

On the Geometric Ergodicity of Gibbs Algorithm for Lattice Gaussian Sampling.....269

On the Min-Max-Delay Problem: NP-completeness, Algorithm, and Integrality Gap.....21

On the Minimum Worst-Case Cost and the Minimum Average Cost to Erase Information.....254

On the Two-User Erasure Broadcast Channel with One-Sided Feedback.....494

On the Weight Hierarchy of Locally Repairable Codes.....31

Optimal Compression of Element Pairs in Fixed-Width Memories.....156

Optimal Transmission Strategy in Full-duplex Relay Networks.....504

Order-Optimal Permutation Codes in the Generalized Cayley Metric.....234

Outage Probability Bounds for Integer-Forcing Source Coding.....574

Overflow Probability of Variable-Length Codes Allowing Non-Vanishing Error Probability.....589

P

Physical-layer Network Coding: A Random Coding Error Exponent Perspective.....559

Polar Codes for NAND-based SSD Systems: A Joint Source Channel Coding Perspective.....196

Preserving Privacy while Broadcasting: k-Limited-Access Schemes.....514

Privacy Through Familiarity.....314

Product Matrix Minimum Storage Regenerating Codes with Flexible Number of Helpers.....41

Q

Quantum and private capacities of low-noise channels.....484

R

Random-Coding Error Exponent of Variable-Length Codes with a Single-Bit Noiseless Feedback.....584

Real-Time Status Updates for Correlated Source.....274

Recovery of Sign Vectors in Quadratic Compressed Sensing.....379

Robust Decoding Schemes for Polar Coding over Compound Channels.....106

Role of Feedback in Modulo-Sum Computation over K-User Erasure Multiple-Access Channels.....344

Rumor Source Detection in Unicyclic Graphs.....439

S

Secure Computation of Randomized Functions: Further Results.....264

Sequential Coding of Gauss-Markov Sources With Packet Erasures and Feedback.....529

Simplified Cooperative Detection for Multi-Receiver Molecular Communication.....329

Spatial Coding Techniques for Molecular MIMO.....324

Spatially-Coupled LDPC Codes for Two Dimensional Erasure Channel.....131

Sphere-Packing Bound for Classical-Quantum Channels.....479

Stability threshold and phase transition of generalized censored block models.....384

Syndrome-Coupled Rate-Compatible Error-Correcting Codes.....454

T

The approximate capacity for the three-receiver writing on random dirty paper channel.....364

The Benefit of Being Flexible in Distributed Computation.....289

The Dispersion of Superposition Coding for Gaussian Broadcast Channels.....414

The Multi-Layer Information Bottleneck Problem.....404

The Necessity of Scheduling in Compute-and-Forward.....509

The Stability of Exponential Backoff Protocols for Slotted-Aloha with Saturated Queues.....549

The Storage vs Repair Bandwidth Trade-off for Multiple Failures in Clustered Storage Networks.....46

Tighter Bounds on Entropy of Secret Keys in Authentication Codes.....259

Two-letter Capacity Formula for Channels with Memory and Feedback.....96

U

Union Bound Analysis of Multilevel Flash Memory Channels.....224

Uplink Sum-Rate Analysis of C-RAN With Interconnected Radio Units.....171

W

Weakly Constrained Codes via Row-by-Row Coding.....151

Wireless Information and Power Transfer over an AWGN channel: Nonlinearity and Asymmetric Gaussian Signaling.....181

X

XY Precoder for MIMO Systems.....594
