Index page

CGAP Fatigue Life Developments with Improved Elastoplastic Constitutive Modelling, p.1-6

Airplane Component Weight Estimation Method Development, pp.7-12

Air Traffic Flow Optimisation Incorporating Wind Models, pp.13-18

An Aerospace Conformal Phased Array Slotted Waveguide Antenna Stiffened Structure,
pp.19-25

C-17 Conversion for Fire Fighting Operations, pp.26-31

Comparison of the Body Size of Australian Defence Force Aircrew and US Military
Personnel, pp.32-39

A Rule Based Track Anomaly Detection Algorithm for Force Protection, pp.40-47

Autonomous Communication Between Air Traffic Control and Remotely Piloted Aircraft, pp.48-57

The development of bar-coded marker band load sequences to enhance fatigue test outcomes, pp.58-63

Multi-sensor Data Fusion Techniques for RPAS Navigation and Guidance, pp.64-72

The Impact of Digital Diffusion and Adaptation on Small Unmanned Aircraft Systems (SUAS), pp.73-80

Kinetic Energy does not quantify the safety of personnel and materiel impacted by small UAS, pp.81-86

Challenges to the Development of an Airworthiness Regulatory Framework for Unmanned Aircraft Systems, pp.87-98

Virtual design of inhibited primers, pp.99-105

A Ground and Operational Vibration Assessment of the RAAF PC-9/A Airframe, pp.106-111

Maintenance Requirements Determination and Reliability Availability Maintainability Disciplines in support of Army Aviation – *From There to Here to Where?*, pp.112-138

An environment model for simulating small aircraft flight in the marine atmospheric boundary layer, pp.139-145

A Method for Autonomous Navigation of UAVs using Landmarks, pp.146-152

Tests of Alternative Fuels in a Micro-Turbojet Engine, pp.153-158

Antenna System Optimisation of UAS Datalinks, pp.159-166

Equivalence of Magnetometer Calibrations and Soft Iron Magnetic Field Characterisation, pp.167-172

Micro-Autopilot for Research and Development, pp.173-183

A CFD analysis of a passive flow control device on a Sphere, pp.184-189

Automated ATM System for 4-Dimensional Trajectory Based Operations, pp.190-197

Bistatic Measurement System for Characterisation of Aviation Pollutant Concentrations, pp.198-206

Using Alternative Airports for Ultra Short-Range and High-Demand Scheduled Domestic Services, pp.207-212

Computational Benchmark of Commercial Fluid-Structure Interaction Software, pp.213-218

Effect of Structural Nonlinearity on the Dynamic Response of a Coupled Acoustic-Aeroelastic System, pp.219-224

Extending range and endurance estimates of battery powered electric aircraft, pp.225-230

Intermediate Failure of Bolted Joints in Composite Materials, pp.231-236

Entrainment Defects in Aluminium Alloys, pp.237-242

Assessment of Allowable Blade Damage Size for a Blisk, pp.243-248

Fault Diagnosis of Electrical Discharge Machining Pulse Generator using Artificial Neural Networks, pp.249-255

Feasibility Study of a Mach 4.0 Supersonic Business Transport, pp.256-261

Thoughts on accounting for the scatter seen in delamination growth, pp.262-267

Logistic Support for Unmanned Systems, pp.268-285

Design for Additive Manufacture: Design of Computationally Efficient Structural Micro-Lattices, pp.286-291

LMI-Based Steering Control Law of Variable-speed Control Moment Gyros for Flexible Spacecraft, pp.292-297

Development of Conductive coatings for Aircraft Skin Application, pp.298-303

Comparison of Numerical Methods for the analysis of Expansion-Deflection nozzle, pp.304-309

Effects of uneven stroking on the aerodynamic efficiency of a Dragonfly-inspired wing-actuation system, pp.310-317

Airframe Surface Heating by a High Speed Micro Gas Turbine Exhaust Plume – Preliminary Results, pp.318-323

Path Planning for Autonomous Soaring MAVs in Urban Environments, pp.324-331

A generic model for quantification of risk posed by UAS ground impacts, pp.332-338

Exploiting wind to optimize flight paths for greener commercial flight operations, pp.339-346

Is Engine Failure on the Runway at Takeoff the most limiting case? Pp.347-355

Data Integrity and the PC-9/A Edge of Envelope Flight Test, pp.356-362

Theoretical and Experimental Study of Rotary Deceleration as a Means of Multi-Rotor Recovery, pp.363-369

Design of Bio-Inspired Autonomous Aircraft for Bird Management, pp.370-377

Effect of Structural Non-Linearities on the Aeroelastic Response, pp.378-383

Effect of Structural Uncertainty on Flutter Velocity, pp.384-389

The work potential of two-spool gas turbine engines, pp.390-395

Design of a Light, Four-Seat, Zero-Emissions Aircraft., pp.396-402

Self-Organised Swarms; A Technology for Aerospace, pp.403-408

A Methodology of Integrating Convex Hull into Data Mining for Simulation of Helicopter Autorotation, pp.409-414

Design, Analysis, and Control Allocation of an Over- Actuated, Multirotor Helicopter, pp.415-420

Development of an Airworthiness Framework Assessment Tool; Novel and Visual, pp.421-430

The changing face of Military Airworthiness Interactions, pp.431-436

Communication, Navigation and Surveillance Performance Criteria for Safety-Critical Avionics and ATM Systems, pp.437-448

A Laser Obstacle Avoidance System for Manned and Unmanned Aircraft Detect-and-Avoid. Pp.449-459

Closed-Loop Alternate Navigation Demonstration: Bilateral UAS Program, pp.460-468

Avionics-Based GNSS Integrity Augmentation Performance in a Jamming Environment, pp.469-479

Assessing GNSS Integrity Augmentation Techniques in UAV Sense-and-Avoid Architectures, pp.480-492

Numerical Analysis of a Linear Expansion-Deflection Nozzle at Open Wake Conditions, pp.493-498

An Investigation of an Elastic Plastic Crack Tip Plastic Zone Size Parameter for Fatigue= Analysis in Highly Stressed Aerospace Structures, pp.499-504

Effect of Anodising Treatment on Equivalent Crack Size of the 7XXX Aluminium Alloy, pp.505-510

Real-time Risk Management of Aircraft Fleet Based on the Probability of Failure of Aircraft Structures, pp.511-516

Computational Fluid Dynamic study of a Supersonic Ejector-Diffuser System, pp.517-524

Exploring Future Display Concepts to Enhance the Effectiveness of Unmanned Aerial Systems, pp.525-530

Residual stress effects in extruded wing panels on large military transport aircraft, pp.531-536

An Infrared Vision System for UAV Close Formation Flight, pp.537-542

Engineer Resilience in High Reliability Aerospace Organisations. Pp.543-551

Optimization of a counter-rotating propeller in UAV Application, pp.552-557

Aerodynamic noise simulation of synthetic jet actuator application for stall delay, pp.558-565

Active Flow Control Methods on Dynamic Stall, pp.566-574

Multifunctional Composites Exhibiting Structural and Thermal Management Capabilities, pp.575-581

Effect of the Leading Edge Shape on the Formation of Asymmetric Vortex Flow over Delta Wing of Varying Sweep Angles, pp.582-589

Experimental Determination of Critical Crack Size for an Aircraft Bulkhead with Oversized Fastener Holes, pp.590-595
