## Session CPSCoM-1: Social Networks and CPS

|                                                                                                        |    |
|--------------------------------------------------------------------------------------------------------|----|
| The Impacts of Information on Stock Prices Assessed by Social Media Sentiment .....                    | 1  |
| <i>Guangxue Cao</i>                                                                                    |    |
| Empirical Analysis on Temporal Statistics of Pairwise Contact Patterns in Dynamic Human Networks ..... | 9  |
| <i>Lintao Yang, Tao Liu, Qianhe Hu, Shouyin Liu, and Haojun Huang</i>                                  |    |
| Collective Human Mobility Patterns: A Case Study Using Data Usage Detail Records .....                 | 17 |
| <i>Qian Li, Hao Jiang, Yuan Li, Xian Zhou, Yanqiu Chen, Shuwen Yi, Zheng Lu, and Huping Ding</i>       |    |
| Multimedia Communications in Internet of Things QoT or QoE? .....                                      | 23 |
| <i>Amulya Karaadi, Lingfen Sun, and Is-Haka Mkwawa</i>                                                 |    |
| A Novel Cyber Network Fault Diagnosis Scheme for Cyber-Physical Systems .....                          | 30 |
| <i>Shanshan Bi and Maciej Zawodniok</i>                                                                |    |

|                                                                                                                                          |    |
|------------------------------------------------------------------------------------------------------------------------------------------|----|
| Multiresolution Organization of Social Media Users' Profiles: Fast Detection and Efficient Transmission of Characteristic Profiles ..... | 37 |
| <i>Klimis Ntalianis and Nicolas Tsapatsoulis</i>                                                                                         |    |

## Session CPSCoM-2: Wireless and Ad Hoc Networks

|                                                                                                          |    |
|----------------------------------------------------------------------------------------------------------|----|
| Faith in Vehicles: A Set of Evaluation Criteria for Trust Management in Vehicular Ad-Hoc Network .....   | 44 |
| <i>Farhan Ahmad, Jordan Hall, Asma Adnane, and Virginia N. L. Franqueira</i>                             |    |
| Energy Efficiency and Achievable Data Rate of Device-to-Device Communications in Cellular Networks ..... | 53 |
| <i>Radwa Ahmed Osman, Xiao-Hong Peng, and Zuoyin Tang</i>                                                |    |
| Spatiotemporal Traffic Modeling Based on Frequent Pattern Mining in Wireless Cellular Network .....      | 60 |
| <i>Luyu Gao, Xing Zhang, Wenbo Wang, and Qiangqiang Shen</i>                                             |    |
| Who Opened the Room? Device-Free Person Identification Using Bluetooth Signals in Door Access .....      | 68 |
| <i>Wei Shao, Flora D. Salim, Thuong Nguyen, and Moustafa Youssef</i>                                     |    |
| A Controller/Architecture Co-design Framework for Wireless Cyber-Physical Systems .....                  | 76 |
| <i>Jing Liu, Ping Wang, Jinlong Lin, and Chao-Hsien Chu</i>                                              |    |

## Session CPSCoM-3: Machine Learning and CPS

|                                                                                                 |     |
|-------------------------------------------------------------------------------------------------|-----|
| An Evaluation of Deep Learning in Loop Closure Detection for Visual SLAM .....                  | 85  |
| <i>Yifan Xia, Jie Li, Lin Qi, Hui Yu, and Junyu Dong</i>                                        |     |
| 3D MoSUrF Hierarchical Learning for Hand Fine-Motion Recognition .....                          | 92  |
| <i>Yue Ming</i>                                                                                 |     |
| Detecting Cyber-Physical Threats in an Autonomous Robotic Vehicle Using Bayesian Networks ..... | 98  |
| <i>Anatolij Bezemskij, George Loukas, Diane Gan, and Richard J. Anthony</i>                     |     |
| A Bag of Features Based Approach for Classification of Motile Sperm Cells .....                 | 104 |
| <i>Maria Luisa Davila Garcia, Daniel A. Paredes Soto, and Lyudmila S. Mihaylova</i>             |     |
| Available Forward Road Capacity Detection Algorithms to Reduce Urban Traffic Congestion .....   | 110 |
| <i>James Hardy and Lu Liu</i>                                                                   |     |

## Session EDMA-1: Engineering Data- & Model-driven Applications

|                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------|-----|
| A Noise-Resilient Sparse Subspace Clustering Algorithm for Image Sequences .....                       | 120 |
| <i>Liping Chen, Gongde Guo, and Hui Wang</i>                                                           |     |
| Wheel Wear Prediction of High-Speed Train Using NAR and BP Neural Networks .....                       | 126 |
| <i>Ning Fan, Shuwen Wang, Caixia Liu, and Xiaoming Liu</i>                                             |     |
| Towards an Integrated Approach to Verification and Model-Based Testing in System Engineering .....     | 131 |
| <i>Raluca Lefticaru, Savas Konur, Unal Yildirim, Amad Uddin, Felician Campean, and Marian Gheorghe</i> |     |
| Manual Task Completion Time Estimation for Job Shop Scheduling Using a Fuzzy Inference System .....    | 139 |
| <i>Longzhi Yang, Jie Li, Phil Hackney, Fei Chao, and Mark Flanagan</i>                                 |     |
| Automatic Approaches for CE-MRI Examination of the Breast: A Survey .....                              | 147 |
| <i>Franco Alberto Cardillo, Francesco Masulli, and Stefano Rovetta</i>                                 |     |
| Towards a Data Quality Framework for Heterogeneous Data .....                                          | 155 |
| <i>Natasha Micic, Daniel Neagu, Felician Campean, and Esmaeil Habib Zadeh</i>                          |     |

## Session RTDPCC-1: Real-time Data Processing for Cloud Computing

|                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------|-----|
| Particle Swarm Optimization-Based ThrowBox Deployment Scheme for Mobile Delay Tolerant Networks .....                          | 163 |
| <i>Zhiyuan Li, Yue Song, and Chong Han</i>                                                                                     |     |
| An Optimal Travel Route Plan for Yangzhou Based on the Improved Floyd Algorithm .....                                          | 168 |
| <i>Rongyan Xu, Dejun Miao, Lu Liu, and John Panneerselva</i>                                                                   |     |
| Real-Time Communication Network Using Firebase Cloud IoT Platform for ECMO Simulation .....                                    | 178 |
| <i>Yahya Al Homs, Abdullah Alsalemi, Mohammed Al Disi, Ibrahim Ahmed, Faycal Bensaali, Abbas Amira, and Guillaume Alinier</i>  |     |
| IoT Based Compressive Sensing for ECG Monitoring .....                                                                         | 183 |
| <i>Hamza Djelouat, Hamza Baali, Abbas Amira, and Faycal Bensaali</i>                                                           |     |
| A Privacy Protection Scheme for Vehicle's Location Based on Virtual Location and Route Confusion .....                         | 190 |
| <i>Jie Cui, Jingyu Wen, Hong Zhong, and Jing Zhang</i>                                                                         |     |
| n-Dimensional QoS Framework for Real-Time Service-Oriented Architectures .....                                                 | 195 |
| <i>David Wesley McKee, Stephen Clement, Jie Xu, and Dave Battersby</i>                                                         |     |
| QRS Complexes Classification Using Dictionary Learning and Pietra Index .....                                                  | 203 |
| <i>Hamza Baali, Hamza Djelouat, Abbas Amira, Faycal Bensaali, and Xiaojun Zhai</i>                                             |     |
| The Cost Function and Improvement Strategies of Service Quality of University Library under New Information Environments ..... | 208 |
| <i>Yueqian Fan, John Panneerselvam, and Lu Liu</i>                                                                             |     |

## Session MSNCom-1: Mobile Social Networking and Computing

|                                                                                              |     |
|----------------------------------------------------------------------------------------------|-----|
| Efficient Routing in Mobile Ad-Hoc Social Networks .....                                     | 216 |
| <i>Thomas Kunz, Babak Esfandiari, and Frank Ockenfeld</i>                                    |     |
| Towards Securing Peer-to-Peer SIP in the MANET Context: Existing Work and Perspectives ..... | 223 |
| <i>Alan Davoust, François Gagnon, Babak Esfandiari, Thomas Kunz, and Alexandre Cormier</i>   |     |
| Network Traffic Based iOS Application Automatically Analyzing System .....                   | 230 |
| <i>Jiawei Zhu, Liangwen Yu, and Longtao He</i>                                               |     |

## Session SMMA-1: Social Media Mining and Analysis

|                                                                                             |     |
|---------------------------------------------------------------------------------------------|-----|
| Design of Family-Oriented Social Network Application in Digital Era .....                   | 235 |
| <i>Xiaofang Yuan, Lijun Liu, and Fei Hao</i>                                                |     |
| Research on Cultural Recreation and Interactive Design of Social Applications .....         | 239 |
| <i>Xiaofang Yuan and Yue Hu</i>                                                             |     |
| Design and Implementation of Comic and Animation APP Based on AR Technology .....           | 244 |
| <i>Wen Zhang and Xuan Qi</i>                                                                |     |
| Design and Implementation of Automatic Color Matching APP Based on Color Quantization ..... | 252 |
| <i>Xuan Qi, Wen Zhang, and Qian Xu</i>                                                      |     |
| Global Illumination of Dynamic 3D Scene Based on Light Transport Path Reusing .....         | 259 |
| <i>Yan Ding, Chao Xu, Hua Li, Xiaohan Sun, and Yunbo Yang</i>                               |     |
| Using Clustering to Explore Teacher Communication on Twitter .....                          | 264 |
| <i>Stephen Houser, Clare Bates Congdon, Doris Santoro, and Jessica Hochman</i>              |     |

|                                                            |     |
|------------------------------------------------------------|-----|
| Client Game Valuation Method Based on Social Network ..... | 270 |
| <i>Bowen Sun and Yi Wu</i>                                 |     |

## Session BigData-1: Big Data and Smart Sustainable Society

|                                                                                                     |     |
|-----------------------------------------------------------------------------------------------------|-----|
| A New Digital Forensics Model of Smart City Automated Vehicles .....                                | 274 |
| <i>Xiaohua Feng, Edward Swarlat Dawam, and Saad Amin</i>                                            |     |
| Computational Performance Analysis of Cluster-Based Technologies for Big Data Analytics .....       | 280 |
| <i>Mukhtaj Khan, Salman, and Nadeem Iqbal</i>                                                       |     |
| An Automated Cloud-Based Big Data Analytics Platform for Customer Insights .....                    | 287 |
| <i>Liangxiu Han, Muhammad Salman Haleem, Tam Sobeih, Ying Liu, Anthony Soroka, and Lianghao Han</i> |     |

## Session ALBD-1: Active Learning for Big Data

|                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Cluster Analysis on Utilization Patterns of Patients with Chronic Diseases Based on Flattened Electronic Medical Records .....             | 293 |
| <i>Debby D. Wang, Tan Xin Quan, Astrid Khoo, Srinath Sridharan, Sravan Ramachandran, Sheryl Hui-Xian Ng, and Siti Nabilah Abdul Rahman</i> |     |
| No-Load Backhaul Ratio Reduction by Interactive Routing for Small Goods Delivery with Time Window Constraints .....                        | 299 |
| <i>Zhiyan Huang, Zhixing Huang, Jiayong Li, Danxia Huang, Junxian Fan, and Wing W. Y. Ng</i>                                               |     |
| Feature Weighting for RBFNN Based on Genetic Algorithm and Localized Generalization Error Model .....                                      | 306 |
| <i>Tianyu Chen, Ting Wang, Wing W. Y. Ng, and Jianjun Zhang</i>                                                                            |     |
| Dual Denoising Autoencoder Features for Imbalance Classification Problems .....                                                            | 312 |
| <i>Ting Wang, Guangjun Zeng, Wing W. Y. Ng, and Jinde Li</i>                                                                               |     |

## Session CSCIP-1: Critical Infrastructure Protection

|                                                                                                                                     |     |
|-------------------------------------------------------------------------------------------------------------------------------------|-----|
| SDD Sentinel: A Support Tool for Detecting and Investigating Electronic Transaction Frauds .....                                    | 318 |
| <i>Gaetano Papale and Luigi Sgaglione</i>                                                                                           |     |
| Assessing the Impact of Cascading Failures in Urban Electricity Networks .....                                                      | 324 |
| <i>Leonardo Montecchi, Paolo Lollini, and Andrea Ceccarelli</i>                                                                     |     |
| Distributed System for Botnet Traffic Analysis and Anomaly Detection .....                                                          | 330 |
| <i>Rafal Kozik</i>                                                                                                                  |     |
| Malware Detection for Secure Microgrids: CoSSMic Case Study .....                                                                   | 336 |
| <i>Massimo Ficco, Salvatore Venticinque, and Massimiliano Rak</i>                                                                   |     |
| KONFIDO Project: A Secure Infrastructure Increasing Interoperability on a Systemic Level Among eHealth Services Across Europe ..... | 342 |
| <i>Luigi Coppolino, Salvatore D'Antonio, Luigi Romano, and Mariacarla Staffa</i>                                                    |     |
| Ransomware at X-Rays .....                                                                                                          | 348 |
| <i>Danilo Caivano, Gerardo Canfora, Antonio Cocomazzi, Antonio Pirozzi, and Corrado Aaron Visaggio</i>                              |     |

## Session CEWE-1: Cybercrims and Emerging Web Environments

|                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------|-----|
| Combination of Rule-Based and Data-Driven Fusion Methodologies for Different Speaker Verification Modes of Operation ..... | 354 |
| <i>Saeid Safavi and Iosif Mporas</i>                                                                                       |     |
| An Overview and Computer Forensic Challenges in Image Steganography .....                                                  | 360 |
| <i>Imrana Abdullahi Yari and Shahrzad Zargari</i>                                                                          |     |
| Towards Web Usage Attribution via Graph Community Detection in Grouped Internet Connection Records .....                   | 365 |
| <i>David W. Gresty, George Loukas, Diane Gan, and Constantinos Ierotheou</i>                                               |     |
| Internet of Things Security: A Review of Risks and Threats to Healthcare Sector .....                                      | 373 |
| <i>Nasser S. Abouzakhar, Andrew Jones, and Olga Angelopoulou</i>                                                           |     |
| Using Open Source Forensic Carving Tools on Split DD and EWF Files .....                                                   | 379 |
| <i>Gareth Palmieri and Shahrzad Zargari</i>                                                                                |     |

## Session CPSS-1: Advances in Cyber, Physical, and Social Systems

|                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------|-----|
| Road Safety in the Age of Mobile Phones: IoT and Milgram .....                                                                    | 384 |
| <i>Ali Raza</i>                                                                                                                   |     |
| Malicious Insider Threats in Tactical MANET: The Performace Analysis of DSR Routing Protocol .....                                | 390 |
| <i>Antesar M. Shabut, Keshav Dahal, M. Shamim Kaiser, and M. A. Hossain</i>                                                       |     |
| Towards a Hybrid Approach of K-Means and Density-Based Spatial Clustering of Applications with Noise for Image Segmentation ..... | 396 |
| <i>Chun Guan, Kevin Kam Fung Yuen, and Qi Chen</i>                                                                                |     |

## Session GreenCom-1: Wireless and D2D Communications

|                                                                                                                                      |     |
|--------------------------------------------------------------------------------------------------------------------------------------|-----|
| Energy Efficient Hybrid Beamforming in Massive MU-MIMO Systems via Eigenmode Selection .....                                         | 400 |
| <i>Weiheng Ni, Po-Han Chiang, and Sujit Dey</i>                                                                                      |     |
| A General Framework for Spectral Efficiency, Energy Efficiency and Delay Tradeoff in D2D Networks .....                              | 407 |
| <i>Yuanyuan Hao, Qiang Ni, Hai Li, and Shujuan Hou</i>                                                                               |     |
| Throughput Analysis of the Cache-Enabled Device-to-Device Communication and Small Base Stations Assisting in Cellular Networks ..... | 414 |
| <i>Gang Wang, Xin Dong, and Jie Wu</i>                                                                                               |     |
| Saving Energy in Mobile Devices Using Mobile Device Cloudlet in Mobile Edge Computing for 5G .....                                   | 422 |
| <i>Tshiamo Sigwele, Prashant Pillai, and Yim-Fun Hu</i>                                                                              |     |
| Joint Power and Time Resource Optimization in Full-Duplex Wireless-Powered Communication Networks .....                              | 429 |
| <i>Sun Mao, Supeng Leng, Quanxin Zhao, and Zhiwei Zhao</i>                                                                           |     |
| An Adaptive Upload Acceleration Mechanism for Wireless Upload Services .....                                                         | 437 |
| <i>Xiaowei Qin, Linlin Zhou, Ning Kong, and Junling You</i>                                                                          |     |

## Session GreenCom-2: Energy Efficiency

|                                                                                                                                               |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| An IoT-Based Smart Controlling System of Air Conditioner for High Energy Efficiency .....                                                     | 442 |
| <i>Wei Song, Ning Feng, Yifei Tian, and Simon Fong</i>                                                                                        |     |
| Measuring the Energy Consumption of Massive Data Insertions: An Energy Consumption Assessment of the PL/SQL FOR LOOP and FORALL Methods ..... | 450 |
| <i>Olivier Camp and Eric Chauveau</i>                                                                                                         |     |

|                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| An Energy-Efficient, Wireless Top-of-Rack to Top-of-Rack Datacenter Network Using 60GHz Links .....                                               | 458 |
| <i>Sayed Ashraf Mamun, Sree Gowrishankar Umamaheswaran, Siva Shankar Chandrasekaran,<br/>Md. Shahriar Shamim, Amlan Ganguly, and Minseok Kwon</i> |     |
| Towards New Metrics for Appraising Performance and Energy Efficiency of Parallel Scientific Programs .....                                        | 466 |
| <i>Thomas Rauber, Gudula Rünger, and Matthias Stachowski</i>                                                                                      |     |
| Mobile Edge Decoding for Saving Energy and Improving Experience .....                                                                             | 475 |
| <i>Quanxin Zhao, Tong You, Xiaohui Ma, Yuming Mao, Supeng Leng, Ning Yang, and Zhiwei Zhao</i>                                                    |     |
| Performance Study of Photovoltaic Power-Slope-Aided Incremental-Conductance Maximum Power Point<br>Tracking .....                                 | 483 |
| <i>Hung-I Hsieh, Hao Wang, Guan-Chyun Hsieh, Fu-Jun Zhong, and Hsin-Hsiang Chen</i>                                                               |     |
| Enabling Green Networking with a Power Down Approach in LEO Satellite Constellations .....                                                        | 490 |
| <i>Mohammed Hussein, Israa Elayyan, Iyad Tumar, Abdellatif Abu-Issa, Wasel Ghanem, and Sobhi Ahmed</i>                                            |     |

### Session GreenCom-3: Cloud/Datacenter and Multimedia

|                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------|-----|
| Characterisation of Hidden Periodicity in Large-Scale Cloud Datacentre Environments .....                         | 496 |
| <i>John Panneerselvam, Lu Liu, and Nick Antonopoulos</i>                                                          |     |
| A Content Caching Strategy Based on Demand Estimate Function in Small Cell Networks .....                         | 504 |
| <i>Huijie Yang, Jia Hu, Haozhe Wang, and Hao Wu</i>                                                               |     |
| Energy Efficient Multimedia Content Broadcasting in a Risky Mobile Social Network with Adversarial<br>Users ..... | 510 |
| <i>Yue Ding, Peng Liu, and Zhitao Guan</i>                                                                        |     |
| Simultaneous Wireless Information and Power Transfer in Wireless Sensor Networks with Fountain Codes .....        | 516 |
| <i>Benshun Yi, Mian Xiang, Weiqing Yao, Kang Qiu, Taiqi Huang, and Qiuying Xie</i>                                |     |
| Double-Q Learning-Based DVFS for Multi-core Real-Time Systems .....                                               | 522 |
| <i>Hui Huang, Man Lin, and Qingchen Zhang</i>                                                                     |     |
| Towards Thermal-Efficient Hadoop Clusters through Scheduling .....                                                | 530 |
| <i>Yi Zhou, Mohammed Alghamdi, Gautam Dudeja, Shubhi Taneja, and Xiao Qin</i>                                     |     |

### Session WNM-1: Wireless Networks and Multimedia

|                                                                                           |     |
|-------------------------------------------------------------------------------------------|-----|
| Ontology-Based Mission Modeling and Analysis for System of Systems .....                  | 538 |
| <i>Weixing Zhu, Hongyue He, and Zhixue Wang</i>                                           |     |
| Macro-Assisted Millimeter-Wave Small Cell Discovery in Ultra Dense Wireless Network ..... | 545 |
| <i>Chuanhao Sun, Jiaxin Zhang, Xing Zhang, and Wenbo Wang</i>                             |     |
| Realization of Dual-Hop Networks in Wi-Fi Direct and Performance Evaluation .....         | 552 |
| <i>Muhammad Asif Khan, Wael Cherif, Fethi Filali, and Ridha Hamila</i>                    |     |

### Session HWNQoE-1: Heterogeneous Wireless Networks and QoE

|                                                                                                 |     |
|-------------------------------------------------------------------------------------------------|-----|
| OpenFlow Communications and TLS Security in Software-Defined Networks .....                     | 560 |
| <i>Belema Agborubere and Erika Sanchez-Velazquez</i>                                            |     |
| A Flexible Dynamic Migration Strategy for Cloud Data Replica .....                              | 567 |
| <i>Bing Tian, Wentao Yan, Li Yan, Chengyuan Wang, Fanfan Liu, Yaoting Tang, and Shengya Han</i> |     |
| Data Driven Analysis on the Effect of Online Judge System .....                                 | 573 |
| <i>Xudong Lu, Dongyu Zheng, and Lei Liu</i>                                                     |     |

## Session iThings-1: Wireless Sensor Networks I

|                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------|-----|
| An IoT Approach for Wireless Sensor Networks Applied to e-Health Environmental Monitoring .....                             | 578 |
| <i>J. Cabra, D. Castro, J. Colorado, D. Mendez, and L. Trujillo</i>                                                         |     |
| Can the Challenges of IOT be Overcome by Virtual Sensors .....                                                              | 584 |
| <i>Atrayee Gupta and Nandini Mukherjee</i>                                                                                  |     |
| A Non-invasive Wireless Monitoring Device for Children and Infants in Pre-Hospital and Acute Hospital<br>Environments ..... | 591 |
| <i>Phillip Winderbank-Scott and Payam Barnaghi</i>                                                                          |     |
| A Real-Life Experimental Investigation of Cross Interference between WiFi and ZigBee in Indoor<br>Environment .....         | 598 |
| <i>Xiao Wang and Kun Yang</i>                                                                                               |     |

## Session iThings-2: Wireless Sensor Networks II

|                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------|-----|
| A Target Tracking Algorithm Using Grey Model Predicting Kalman Filter in Wireless Sensor Networks ..... | 604 |
| <i>Lei Huo and Zhiliang Wang</i>                                                                        |     |
| A System Calibration Model for Mobile PM2.5 Sensing Using Low-Cost Sensors .....                        | 611 |
| <i>Hao-Min Liu, Hsuan-Cho Wu, Hu-Chen Lee, Yao-Hua Ho, and Ling-Jyh Chen</i>                            |     |
| Evaluation of RPL's Single Metric Objective Functions .....                                             | 619 |
| <i>Walaa Alayed, Lewis Mackenzie, and Dimitrios Pezaros</i>                                             |     |
| Measuring Semantic Distance between LWM2M Resources .....                                               | 625 |
| <i>Maria Ines Robles, Nicklas Beijar, and Nanjangud C. Narendra</i>                                     |     |
| An Improved Fast Search and Find of Density Peaks-Based Fog Node Location of Fog Computing System ..... | 635 |
| <i>Xiaoqun Yuan, Yan He, Qing Fang, Xiaowen Tong, Changlai Du, and Yi Ding</i>                          |     |

## Session iThings-3: Internet of Things I

|                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------|-----|
| RIOTNet: Reactive IoT Control Network .....                                                                                  | 643 |
| <i>Vinay Eswara, Gaurav Srivastava, and Soumik Biswas</i>                                                                    |     |
| An Emergent Backpressure Queueing Model for Internet of Things .....                                                         | 651 |
| <i>Ruixuan Qiao, Tie Qiu, Min Han, Jianhua Ma, and Runhe Huang</i>                                                           |     |
| Developing an Adaptive Risk-Based Access Control Model for the Internet of Things .....                                      | 655 |
| <i>Hany F. Atlam, Ahmed Alenezi, Robert J. Walters, Gary B. Wills, and Joshua Daniel</i>                                     |     |
| An IoT Monitoring System for Precision Viticulture .....                                                                     | 662 |
| <i>Josman P. Pérez-Expósito, Tiago M. Fernández-Caramés, Paula Fraga-Lamas, and Luis Castedo</i>                             |     |
| Integration of Cloud Computing with Internet of Things: Challenges and Open Issues .....                                     | 670 |
| <i>Hany F. Atlam, Ahmed Alenezi, Abdulrahman Alharthi, Robert J. Walters, and Gary B. Wills</i>                              |     |
| The Pedagogical Use of the Internet of Things in Virtual Worlds to Encourage a Behavior Change in Obese<br>Individuals ..... | 676 |
| <i>Fabiana Santiago Sgobbi, Liane Margarida Rockenbach Tarouco, and Eliseo Berni Reategui</i>                                |     |

## Session iThings-4: Internet of Things II

|                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------|-----|
| A Service Oriented Routing Scheme for Internet of Things .....                                              | 683 |
| <i>Dong Wang, Xinheng Wang, Ying Liang, and Zhi Wang</i>                                                    |     |
| Extending DataTweet IoT Architecture for Virtual IoT Devices .....                                          | 689 |
| <i>Soumya Kanti Datta and Christian Bonnet</i>                                                              |     |
| IoT Paradigm into the Smart City Vision: A Survey .....                                                     | 695 |
| <i>Camilo Alejandro Medina, Manuel Ricardo Pérez, and Luis Carlos Trujillo</i>                              |     |
| Potential Forensic Analysis of IoT Data: An Overview of the State-of-the-Art and Future Possibilities ..... | 705 |
| <i>Chanyang Shin, Prerit Chandok, Ran Liu, Seth James Nielson, and Timothy R. Leschke</i>                   |     |
| OpenStack-Based Highly Scalable IoT/M2M Platforms .....                                                     | 711 |
| <i>David de la Bastida and Fuchun Joseph Lin</i>                                                            |     |
| Pokeball: A 3D Positioning System Using Magnetism .....                                                     | 719 |
| <i>Wei-Tung Chen and Ling-Jyh Chen</i>                                                                      |     |

## Session iThings-5: Trust and Privacy

|                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------|-----|
| Internet of Things and Blockchain: Legal Issues and Privacy. The Challenge for a Privacy Standard ..... | 727 |
| <i>Nicola Fabiano</i>                                                                                   |     |
| A Trust-Based Intrusion Detection System for Mobile RPL Based Networks .....                            | 735 |
| <i>Faiza Medjek, Djamel Tandjaoui, Imed Romdhani, and Nabil Djedjig</i>                                 |     |
| A Data Trustworthiness Enhanced Reputation Mechanism for Mobile Crowd Sensing .....                     | 743 |
| <i>Mengyang Yu, Hui Lin, and Jia Hu</i>                                                                 |     |
| Modelling and Evaluation of Malicious Attacks against the IoT MQTT Protocol .....                       | 748 |
| <i>Syed Naeem Firdous, Zubair Baig, Craig Valli, and Ahmed Ibrahim</i>                                  |     |

## Session iThings-6: Wireless Networks and Communications

|                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------|-----|
| Spectral Sensing Method in the Radio Cognitive Context for IoT Applications .....                                      | 756 |
| <i>Gina Roncancio, Mónica Espinosa, Manuel R. Pérez, and Luis C. Trujillo</i>                                          |     |
| Towards Optimal Access Point Selection with Available Bandwidth Estimation .....                                       | 762 |
| <i>Yueyue Dai, Du Xu, and Yong Zhan</i>                                                                                |     |
| 300 GHz Broadband Transceiver Design for Low-THz Band Wireless Communications in Indoor Internet of Things .....       | 770 |
| <i>Nabil Khalid, Naveed A. Abbasi, and Ozgur B. Akan</i>                                                               |     |
| An Association Approach that Combines Resource Consumption and Load Balancing in Heterogeneous Cellular Networks ..... | 776 |
| <i>Liqun Zhao, Hongpeng Wang, and Xiaoxiong Zhong</i>                                                                  |     |

## Session iThings-7: Smart and Intelligent Computing

|                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------|-----|
| Gesture-Based Control in a Smart Home Environment .....                                                           | 784 |
| <i>Fariz Alemuda and Fuchun Joseph Lin</i>                                                                        |     |
| Pushing Intelligence to the Edge with a Stream Processing Architecture .....                                      | 792 |
| <i>Rustem Dautov, Salvatore Distefano, Dario Bruneo, Francesco Longo, Giovanni Merlino, and Antonio Puliafito</i> |     |
| Pattern Identification for State Prediction in Dynamic Data Streams .....                                         | 800 |
| <i>Shirin Enshaeifar, Seyed Amir Hoseinitabatabaei, Alireza Ahrabian, and Payam Barnaghi</i>                      |     |

|                                                                    |     |
|--------------------------------------------------------------------|-----|
| Recognition of Human Activity Using Paired Connected Objects ..... | 806 |
| <i>Hamdi Amroun, M'Hamed Hamy Temkit, and Mehdi Ammi</i>           |     |
| Towards In-Transit Analytics for Industry 4.0 .....                | 810 |
| <i>Richard Hill, James Devitt, Ashiq Anjum, and Muhammad Ali</i>   |     |

## Session IoTBDH-1: IoT and Big Data for Healthcare I

|                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------|-----|
| Semantic Lifting and Reasoning on the Personalised Activity Big Data Repository for Healthcare Research ..... | 818 |
| <i>Hong Qing Yu, Xia Zhao, Zhikun Deng, and Feng Dong</i>                                                     |     |
| Sustainable Interoperability and Data Integration for the IoT-Based Information Systems .....                 | 824 |
| <i>Ambreen Hussain and Wenyan Wu</i>                                                                          |     |
| Feasibility Study on Wireless Passive SAW Sensor in IoT Enabled Water Distribution System .....               | 830 |
| <i>Zhaozhao Tang, Wenyan Wu, Jinliang Gao, and Po Yang</i>                                                    |     |
| A Simple, Cost-Effective and Practical Implementation of SLAM Using ROS and Arduino .....                     | 835 |
| <i>Adrián Lendínez Ibáñez, Renxi Qiu, and Dayou Li</i>                                                        |     |
| High Availability Evaluation Utilizing Service Level Agreement .....                                          | 841 |
| <i>Huahui Lyu, Yuning Xiao, Ruihong Yan, Yong Jin, Ruimin Shen, and Bin Sheng</i>                             |     |
| Failure Resilient Routing via IoT Networks .....                                                              | 845 |
| <i>Kai Fan, Jiapeng Lu, Dazhen Sun, Yong Jin, Ruimin Shen, and Bin Sheng</i>                                  |     |
| A Forensic Investigation of the Robot Operating System .....                                                  | 851 |
| <i>Iroshan Abeykoon and Xiaohua Feng</i>                                                                      |     |

## Session IoTBDH-2: IoT and Big Data for Healthcare II

|                                                                                                                                    |     |
|------------------------------------------------------------------------------------------------------------------------------------|-----|
| Digital Forensics Challenges to Big Data in the Cloud .....                                                                        | 858 |
| <i>Xiaohua Feng and Yuping Zhao</i>                                                                                                |     |
| Internet of Things Enabled Technologies for Behaviour Analytics in Elderly Person Care: A Survey .....                             | 863 |
| <i>Lee Newcombe, Po Yang, Chris Carter, and Martin Hanneghan</i>                                                                   |     |
| Uncertainty Investigation for Personalised Lifelogging Physical Activity Intensity Pattern Assessment<br>with Mobile Devices ..... | 871 |
| <i>Jun Qi, Po Yang, Martin Hanneghan, Kieran Latham, and Stephen Tang</i>                                                          |     |
| Analysis Disease Progression Using Data Visualization .....                                                                        | 877 |
| <i>E. Liu, Y. Zhao, H. Wei, E. Kaldoudi, and S. Roumeliotis</i>                                                                    |     |
| Automatic Tool Detection in X-Ray Images for Robotic Assisted Joint Fracture Surgery .....                                         | 883 |
| <i>YingLiang Ma, Giulio Dagnino, Ioannis Georgilas, and Sanja Dogramadzi</i>                                                       |     |
| Study of Group Route Optimization for IoT Enabled Urban Transportation Network .....                                               | 888 |
| <i>Koh Song Sang, Bo Zhou, Po Yang, and Zaili Yang</i>                                                                             |     |
| Tracking Objects Robot for Healthcare Environments .....                                                                           | 894 |
| <i>Saranya Kanjaruek and Dayou Li</i>                                                                                              |     |

## Session SITN-1: Securing IoT Networks

|                                                                                                     |     |
|-----------------------------------------------------------------------------------------------------|-----|
| The Stone Cooperation with Sustainable Jeju Island for Mobile Crowdsensing Internet of Things ..... | 900 |
| <i>Moon Ho Lee and Md. Abdul Latif Sarker</i>                                                       |     |
| Data Validation and Sensor Life Prediction Layer on Cloud for IoT .....                             | 906 |
| <i>Viju Chacko and Vikram Bharati</i>                                                               |     |

|                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------|-----|
| Seamless Cryptographic Key Generation via Off-the-Shelf Telecommunication Components for End-to-End Data Encryption ..... | 910 |
| <i>Rameez Asif and William J. Buchanan</i>                                                                                |     |

## Session IoT4e-1: Energy Internet

|                                                                                                                               |     |
|-------------------------------------------------------------------------------------------------------------------------------|-----|
| An Open-Source IoT Power Outlet System for Scheduling Appliance Operation Intervals Based on Real-Time Electricity Cost ..... | 917 |
| <i>Óscar Blanco-Novoa, Tiago M. Fernández-Caramés, Paula Fraga-Lamas, and Luis Castedo</i>                                    |     |
| The Blockchain in Microgrids for Transacting Energy and Attributing Losses .....                                              | 925 |
| <i>Eleonora Riva Sanseverino, Maria Luisa Di Silvestre, Pierluigi Gallo, Gaetano Zizzo, and Mariano Ippolito</i>              |     |
| Demand Side Management Using the Internet of Energy Based on Fog and Cloud Computing .....                                    | 931 |
| <i>Kolsoom Shahryari and Amjad Anvari-Moghaddam</i>                                                                           |     |

## Session CCIoT-1: Advances in Communications and Computing for IoT

|                                                                                                   |     |
|---------------------------------------------------------------------------------------------------|-----|
| Impact of the Positions Transition of a Smartphone on Human Activity Recognition .....            | 937 |
| <i>Hamdi Amroun, Nizar Ouarti, M'Hamed Hamy Temkit, and Medhi Ammi</i>                            |     |
| Best Feature for CNN Classification of Human Activity Using IOT Network .....                     | 943 |
| <i>Hamdi Amroun, M'Hamed Hamy Temkit, and Mehdi Ammi</i>                                          |     |
| The Design of Campus Monitoring and Managing System for WaterSaving Based on Webgis .....         | 951 |
| <i>Shi Guo-Bing</i>                                                                               |     |
| A Novel QoS-Based QoE Evaluation Method for Streaming Video Service .....                         | 956 |
| <i>Zhaolong Ning, Yuqing Liu, Xiaojie Wang, Yufan Feng, and Xiangjie Kong</i>                     |     |
| PMIPv6-Based Mobility for Realtime Communications on Hierarchical P2PSIP Systems .....            | 962 |
| <i>Abel Diatta, Ibrahima Niang, Bassirou Gueye, and Mandicou Ba</i>                               |     |
| Internet of Things Based Wireless Patient Body Area Monitoring Network .....                      | 970 |
| <i>M. H. Riaz, U. Rashid, M. Ali, and L. Li</i>                                                   |     |
| Sensor Node Enabled by a Miniaturised Planar Antenna for IoT Applications at TV White Space ..... | 974 |
| <i>Qianyun Zhang and Yue Gao</i>                                                                  |     |
| Context-Aware Personalized Activity Modeling in Concurrent Environment .....                      | 977 |
| <i>Muhammad Safyan, Zia Ul Qayyum, Sohail Sarwar, Muddesar Iqbal, and Mehtab Ahmed</i>            |     |

## Session SmartData-1: Big Data Processing and Analytics

|                                                                                                     |      |
|-----------------------------------------------------------------------------------------------------|------|
| FORtÉ: A Federated Ontology and Timeseries Query Engine .....                                       | 983  |
| <i>Charbel El Kaed and Matthieu Boujonnier</i>                                                      |      |
| Exploring Energy Certificates of Buildings through Unsupervised Data Mining Techniques .....        | 991  |
| <i>Evelina Di Corso, Tania Cerquitelli, Marco Savino Piscitelli, and Alfonso Capozzoli</i>          |      |
| Mining Information on Bitcoin Network Data .....                                                    | 999  |
| <i>Jiawei Zhu, Peipeng Liu, and Longtao He</i>                                                      |      |
| Improving the Accuracy of Link Prediction Using Consensus Clustering .....                          | 1004 |
| <i>Tao Liu, Lintao Yang, and Shouyin Liu</i>                                                        |      |
| Evaluation of Partitioning Around Medoids Algorithm with Various Distances on Microarray Data ..... | 1011 |
| <i>Nwayyin Najat Mohammed and Adnan Mohsin Abdulazeez</i>                                           |      |

|                                                                      |      |
|----------------------------------------------------------------------|------|
| Advances in Event Detection .....                                    | 1017 |
| <i>Julio Borges, Peter Bozsoky, Simon Sudrich, and Michael Beigl</i> |      |

## Session SmartData-2: Big/Smart Data Applications

|                                                                                           |      |
|-------------------------------------------------------------------------------------------|------|
| A Map-Based Gender Prediction Model for Big E-Commerce Data .....                         | 1025 |
| <i>Ling Cen and Dymitr Ruta</i>                                                           |      |
| Smart Stream-Based Car Information Systems that Scale: An Experimental Evaluation .....   | 1030 |
| <i>Philipp M. Grulich and Olaf Zukunft</i>                                                |      |
| Deep Neural Networks with Confidence Sampling for Electrical Anomaly Detection .....      | 1038 |
| <i>Norman L. Tasfi, Wilson A. Higashino, Katarina Grolinger, and Miriam A. M. Capretz</i> |      |
| Event Detection and Key Posts Discovering in Social Media Data Streams .....              | 1046 |
| <i>Lei-Lei Shi, Yan Wu, Lu Liu, Xiang Sun, and Liang Jiang</i>                            |      |
| Exploring Online Ad Images Using a Deep Convolutional Neural Network Approach .....       | 1053 |
| <i>Michael Fire and Jonathan Schler</i>                                                   |      |

## Session SMED-1: Smart Mining of Multimedia Big Data

|                                                                                                                                |      |
|--------------------------------------------------------------------------------------------------------------------------------|------|
| Spectral-Spatial Classification of Hyperspectral Image Using Extreme Learning Machine and Loopy Belief Propagation .....       | 1061 |
| <i>Faxian Cao, Zhijing Yang, Mengying Jiang, Weizhao Chen, Qiuliang Ye, Tequan Li, and Wing-Kuen Ling</i>                      |      |
| Combining Image Analysis and Smart Data Mining for Precision Agriculture in Livestock Farming .....                            | 1065 |
| <i>He Sun, Qiming Zhu, Jinchang Ren, David Barclay, and Willie Thomson</i>                                                     |      |
| Image Haze Removal Using Depth-Based Cluster and Self-Adaptive Parameters .....                                                | 1070 |
| <i>Chunmei Qing, Yiwei Hu, Xiangmin Xu, and Wenyong Huang</i>                                                                  |      |
| Design and Optimization of Nonlinear Dimensionality Reduction Algorithm for Hyperspectral Images on Heterogeneous System ..... | 1076 |
| <i>Haifang Zhou, Chang Gao, and Xunyun Liu</i>                                                                                 |      |
| Combining Deep Convolutional Neural Network and SVM to SAR Image Target Recognition .....                                      | 1082 |
| <i>Fei Gao, Teng Huang, Jun Wang, Jinping Sun, Erfu Yang, and Amir Hussain</i>                                                 |      |
| Face Verification Based on Feature Transfer via PCA-SVM Framework .....                                                        | 1086 |
| <i>Xiaofen Xing, Guicong Xu, Bolun Cai, Chunmei Qing, and Xiangmin Xu</i>                                                      |      |
| Research on Data Process Method of Engineering Training Based on Cloud Service .....                                           | 1092 |
| <i>Minglong Xiao, Qingyun Dai, Meilin Wang, Qing Liu, Zhijing Yang, and Yuping Gui</i>                                         |      |
| Compressive Sensing Based Feature Residual for Image Steganalysis Detection .....                                              | 1096 |
| <i>Huimin Zhao, Jinchang Ren, Zhenzhen Pei, Zhengye Cai, Qingyun Dai, and Wenguo Wei</i>                                       |      |
| Combined Deep Learning and Multiscale Segmentation for Rapid High Resolution Damage Mapping .....                              | 1101 |
| <i>Genyun Sun, Yanling Hao, Jun Rong, Shuna Shi, and Jinchang Ren</i>                                                          |      |

## Session DARLI-AP-1: Data Analytics solutions for Real-Life Applications

|                                                                                                                                                               |      |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Semi-Automatic De-identification of Hospital Discharge Summaries with Natural Language Processing: A Case-Study of Performance and Real-World Usability ..... | 1106 |
| <i>Ioan Calapodescu, David Rozier, Svetlana Artemova, and Jean-Luc Bosson</i>                                                                                 |      |
| GeoGuide: An Interactive Guidance Approach for Spatial Data .....                                                                                             | 1112 |
| <i>Behrooz Omidvar-Tehrani, Plácido A. Souza Neto, Felipe M. Freire Pontes, and Francisco Bento</i>                                                           |      |

|                                                                                                                  |      |
|------------------------------------------------------------------------------------------------------------------|------|
| Graph Constraints in Urban Computing: Dealing with Conditions in Processing Urban Data .....                     | 1118 |
| <i>Laurent D’Orazio, Mirian Halfeld-Ferrari, Carmem Satie Hara, Nadia P. Kozievitch, and Martin A. Musicante</i> |      |
| Defining a NoSQL Document Database of Accessible Transport Routes .....                                          | 1125 |
| <i>Belén Vela, José María Caveno, Paloma Cáceres, Almudena Sierra, and Carlos E. Cuesta</i>                      |      |
| Correlating Digital Footprints for Discovering Social Connections in Crowds .....                                | 1130 |
| <i>Javier A. Espinosa-Oviedo, Genoveva Vargas-Solar, Vassil Alexandrov, and José L. Zechinelli-Martini</i>       |      |
| Analyse Lifestyle Related Prostate Cancer Risk Factors Retrieved from Literacy .....                             | 1136 |
| <i>Emmanuel E. Effiok, Enjie Liu, and Jonathan Hitchcock</i>                                                     |      |

## Session SBDP-1: Advances in Smart Big Data Processing

|                                                                                                        |      |
|--------------------------------------------------------------------------------------------------------|------|
| Collaborative Topic Regression Based on the Social Network and Sequential Behaviors .....              | 1141 |
| <i>Bin Pan and Junyi Wang</i>                                                                          |      |
| Anomaly Detection in Evolving Heterogeneous Graphs .....                                               | 1147 |
| <i>Simon Sudrich, Julio Borges, and Michael Beigl</i>                                                  |      |
| Trajectory Segmentation for a Recommendation Module of a Customer Relationship Management System ..... | 1150 |
| <i>Susheel Sagar, Lars Lundberg, Lars Skold, and Julia Sidorova</i>                                    |      |
