

International Colloquium on Stability and Ductility of Steel Structures (SDSS'2016)

Timisoara, Romania
30 May – 1 June 2016

Volume 1 of 2

Editors:

**Dan Dubina
Viorel Ungureanu**

ISBN: 978-1-5108-5770-4

Printed from e-media with permission by:

TABLE OF CONTENTS

<i>Foreword</i>	xiii
<i>Organization</i>	xv
Keynote papers	
Research, theory and practice of second order direct analysis for design of steel and composite structures <i>S.L. Chan, Y.P. Liu and S.W. Liu</i>	3
Further development of Eurocode 3: improvement and harmonization <i>U. Kuhlmann, A. Just and A. Zizza</i>	15
Structural stability and ductility of drive-in racks under seismic loading <i>T. Ahmed, K.J.R. Rasmussen and H. Zhang</i>	27
Models for stability analysis and design of steel and composite plate girders <i>I. Vayas</i>	39
Advanced Structural Design	
Buckling solutions for thin-walled members by using the constrained finite element method: Demonstrative examples <i>S. Ádány, D. Visy and R. Nagy</i>	51
Statics and kinematics in structural dynamic response to wind action <i>F. Blaga and P. Alexa</i>	59
Elastic critical buckling mode as imperfection on frame with non-uniform cross-section along the members with imperfection according EN 1993-1-1 clause 5.3.2 (11) <i>J. Brodniansky</i>	67
Analysis of steel members using FEM and Big data <i>R. Chacón, E. Mirambell and E. Real</i>	75

Steel bridge launching analysis using advanced numerical simulations <i>R. Chacón, R. Zorrilla, N. Uribe and C. Duñó</i>	83
Assessment of the overall capacity of tapered members with non-symmetrical restraints <i>J.D.R. Ferreira, P.J.M.M.F. Vila Real and C.A.S. Couto</i>	91
Stiffness reduction method for the in-plane design of steel frames <i>M. Kucukler, L. Gardner and L. Macorini</i>	99
Asymptotic and path-following analyses of thin walled structures using a mixed solid finite element <i>D. Magisano, L. Leonetti and G. Garcea</i>	107
Adaptation of the Ayrton-Perry formula for the global-distortional-local buckling of thin-walled members <i>M. Nedelcu</i>	115
Finite element model with semi-rigid connections for vibration assessment of steel moment resisting framed structures <i>H.F. Ozel, A. Saritas and T. Tasbahji</i>	123
Using advanced numerical models to estimate the fire safety of truss frame structures made out of cold-formed steel <i>L. Schueremans, L. Driesens, J. Meylemans and J. De Cock</i>	131
Benchmark problems for design by advanced analysis - Members subject to major- and minor-axis flexure <i>R.D. Ziemian and J.C.B. Abreu</i>	139
Connections	
Strength of cold-formed steel frame base connections <i>M.A. El Aghoury, E.A. Amoush and A.M. El Hady</i>	149
Analytical prediction of the bearing resistance of bolted connections for tubular racking structures <i>V. Armenante, M. D'Antimo, J.-F. Demonceau, J.-P. Jaspart, M. Latour and G. Rizzano</i>	157
The effect of M/V ratio on ledger-framing performance of cold-formed steel buildings <i>D. Ayhan and B.W. Schafer</i>	167
Simplified methodology of stress calculation in slip-joint connections <i>M. Botló and J. Brodniansky</i>	175
Influence of local buckling on the shear resistance of bolted connections for tubular racking structures <i>M. D'Antimo, J.-F. Demonceau, J.-P. Jaspart, M. Latour and G. Rizzano</i>	181
Behaviour of over-roofing structures with semi-rigid column-base connections <i>A. Floricel, V. Ungureanu and A. Ciutina</i>	189
To prediction of the connection deformation capacity by component based finite element method <i>L. Gödrich, F. Wald, L. Šabatka, M. Kurejková and J.Kabeláč</i>	197

Experimental study on mechanical behavior of beam to square CFT column connections with built-in reinforcing bars <i>S. Matsuo</i>	205
Assessment of locking devices for bolted connections – experimental study and evaluation for practical application <i>T. Misiek</i>	213
Monotonic and cyclic backbone response of single shear cold-formed steel screw-fastened connections <i>C.D. Moen, F. Tao and R. Cole</i>	221
Stiffness of welded brace to lipped channel column joints: An experimental and numerical approach <i>F. Roure, T. Peköz, J. Bonada, M.R. Somalo, M.M. Pastor and M. Casafont</i>	231
Finite element model vs. Experimental test results for compound columns and their exposed base plate connections <i>G. Sarracco, G. Della Corte and R. Landolfo</i>	239
Bolted beam to column joints with haunches: Experimental and numerical investigations <i>C. Vulcu, K. Lee, A. Stratan, C. Maris and D. Dubina</i>	247
Column web buckling component analysis <i>C. Zhu and K.J.R. Rasmussen</i>	257
 <i>Lightweight steel constructions</i>	
Stability analysis of thin-walled members with curved cross-section parts: elastic behavior <i>S. Ádány, D. Jobbágy, A.L. Joó and D. Visy</i>	267
Comparison of different Eurocode verifications of a thin-walled member portal frame <i>R. Ároch and J. Brodniansky</i>	275
Stability and load-bearing capacity of the light gauge cold-formed purlins at the slope roofs <i>E.L. Ayrumyan, N.I. Kamenshchikov and M.A. Liplenko</i>	283
Analytical evaluation of lateral response of CFS shear walls <i>N. Baldassino, M. Accorti, R. Zandonini, F. Scavazza and C.A. Rogers</i>	289
GBT calculation of elastic buckling loads of cold-formed steel rack columns <i>M. Casafont, J. Bonada, M.M. Pastor and F. Roure</i>	297
Optimization of trapezoidal sheet geometry by improving stiffeners distortional behavior <i>M. Georgescu and V. Ungureanu</i>	305
Critical stresses of steel plate elements on elastic foundation subjected to compression <i>P. Hegyi, L.P Kollár and L. Dunai</i>	313
Shear tests of rivet fastened rectangular hollow flange channel beams with web openings <i>P. Keerthan, M. Mahendran and S. Wanniarachchi</i>	321

Influence of the distortional-lateral buckling mode on the interactive buckling of short channels <i>Z. Kolakowski and T. Kubiak</i>	329
Test based finite element development for diaphragm action <i>A. Lendvai and A.L. Joó</i>	337
Mechanics of the local-distortional interaction in fixed-ended lipped channel columns <i>A.D. Martins, D. Camotim and P.B. Dinis</i>	345
Experimental investigation of the cross-sectional stability of cold-formed steel built-up columns <i>F. Meza, S. Cheng, J. Becque and I. Hajirasouliha</i>	353
Buckling analysis of steel rack-section members by the GBT-based ECBL approach <i>S. de Miranda, D. Melchionda, V. Ungureanu and D. Dubina</i>	361
The “combined approach” for the design of shear diaphragms made of trapezoidal sheeting <i>T. Misiek, G. Huck and S. Käpplein</i>	369
Local and global stability analysis of CFS structural members with particular shapes using spot welding technology <i>Zs. Nagy and R. Ballok</i>	379
Experimental investigations of cold-formed steel trapezoidal beams of screwed corrugated webs <i>Zs. Nagy, V. Ungureanu, D. Dubina and R. Ballok</i>	387
Buckling mode and elastic buckling strength estimation of corrugated light-gauge panel under shear loading <i>A. Sato, S. Ito and T. Ono</i>	395
Benefits of load redistribution to the reliability of a cold-formed steel joist-supported floor system <i>B.H. Smith, A. Chatterjee, S.R. Arwade, C.D. Moen and B.W. Schafer</i>	403
Web crippling tests of rivet fastened rectangular hollow flange channel beams under two-flange load cases <i>E. Steau, M. Mahendran and P. Keerthan</i>	411
Slender steel arch stabilized by a textile membrane <i>O. Svoboda and J. Machacek</i>	419
Plastic behaviour of thin-walled cold-formed steel members under eccentric compression <i>V. Ungureanu, M. Kotelko, J. Grudziecki, A. Floricel and D. Dubina</i>	427
Optimisation of cold-formed steel sections for maximum energy dissipation capacity and strength <i>J. Ye, I. Hajirasouliha, J. Becque and J.Lim</i>	435
Distortional-global buckling interaction of perforated rack uprights: numerical study and design <i>X. Zhao and C. Ren</i>	443

Members' behavior: tension, compression, beams, beam-columns

Elastic stability of U-shaped members under bi-axial bending <i>A. Beyer, N. Boissonnade, A. Khelil and A. Bureau</i>	453
Numerical investigation into strong axis bending-shear interaction in rolled I-shaped steel sections <i>R.W.A. Dekker, H.H. Snijder and J. Maljaars</i>	461
Structural efficiency assessment of hot-rolled steel profiles <i>G. Di Lorenzo, A. Formisano and R. Landolfo</i>	469
Behaviour and design of short-to-intermediate hot-rolled steel angle columns <i>P.B. Dinis, D. Camotim and V. Preto</i>	477
Member buckling behaviour of high-strength steel in fire <i>R. Ebel, C. Scandella, M. Fontana and M. Knobloch</i>	485
Ductility requirements for structural details with stress concentration and diffuse necking <i>P. Hradil, L. Fülöp, A. Talja and P. Ongelin</i>	493
Flexural buckling behaviour considering different residual stress approaches <i>M. Käsmaier, R. Ebel, M. Kraus and M. Knobloch</i>	501
Comments about the buckling check in EN 1993-1-1:2005 for built-up compressed members <i>H. Köber</i>	509
Welding residual stresses in high-strength steel. Experimental results <i>B. Launert, M. Rhode, H. Pasternak and T. Kannengießer</i>	517
Bow imperfections for flexural buckling according to Eurocode 3 Part 1-1 <i>J. Lindner, A. Just and U. Kuhlmann</i>	525
Experiments on the rotational capacity of beams made of high strength steel <i>N. Schillo and M. Feldmann</i>	533
Global buckling behaviour of high strength steel hollow section columns <i>B. Somodi and B. Kövesdi</i>	541
Design imperfections for steel beam lateral torsional buckling <i>H.H. Snijder, R.P. van der Aa, H. Hofmeyer, B.W.E.M. van Hove</i>	549
Stabilizing of I-beams with discrete intermediate torsional restraints <i>R. Stroetmann</i>	557
Experimental study on the buckling behavior of tapered structural members <i>T. Tankova, J. Rodrigues, L. Marques, J.P. Martins and L.S. da Silva</i>	565

Plate, shell and space structures

Experimental analysis of monotonic and cyclic behaviour of longitudinally stiffened girders <i>D. Abdelkarim, L.G. Vigh, P. Hegyi and B. Kövesdi</i>	575
---	-----

Plate girders under bending <i>R. Abspoel</i>	583
Distortion and torsion of experimental box-girder calculated using analogy with bending <i>I.J. Baláz and Y.P. Koleková</i>	591
Influence of structural openings on the buckling strength of cylindrical shells under axial compression <i>E. Brunesi, R. Nascimbene and J.M. Rotter</i>	599
Comparison of FE-calculated buckling strengths of locally supported steel silos to relevant Eurocode interaction curves <i>A. Jansseune, J. Belis and W. De Corte</i>	607
Buckling behavior of stiffened plate under biaxial compression <i>J. Ndogmo, M. Mensinger and I. Both</i>	615
The new method of reference resistance design for shell structures <i>J.M. Rotter</i>	623
Length effects in the buckling of imperfect axially compressed cylinders <i>J.M. Rotter and H. Al-Lawati</i>	631
On the elasto-plastic stability analysis of circular cylindrical shells <i>R. Shamass, G. Alfano and F. Guarracino</i>	639
Transversal load introduction into unstiffened girder webs - Proposal for a simplified Eurocode-compatible design check <i>H. Unterweger and A. Taras</i>	647
Elephant's foot buckling and imperfection sensitivity of internally pressurized thin-walled metal cylinders subjected to bending <i>M. Vathi and S.A. Karamanos</i>	655
Design requirements for intermediate ring stiffeners on discretely supported cylindrical steel shells <i>Ö. Zeybek, C. Topkaya and J.M. Rotter</i>	663
Robustness	
T-stubs response to extreme loading <i>I. Both, R. Zaharia, I. Mărginean, C. Neagu, F. Dinu and D. Dubina</i>	673
Experimental evaluation of progressive collapse resistance of steel moment frame connections <i>F. Dinu, I. Mărginean, D. Dubina and C. Neagu</i>	681
Experimental testing of 3D steel frame with composite beams under column loss <i>F. Dinu, I. Mărginean, D. Dubina, I. Petran, M. Pastrav, A. Sigauan and A. Ciutina</i>	691
Effects of close range blasts on steel frames. Experimental testing and numerical validation <i>F. Dinu, I. Mărginean, A. Sigauan, A. Kovacs, E. Ghicioi and D. Vasilescu</i>	699

Experimental assessment of connection response in composite floor construction following a column loss <i>A. Jamshidi and R.G. Driver</i>	709
Numerical modeling of dynamic response of steel moment frames following sudden column loss <i>I. Mărginean, F. Dimu, D. Dubina, I. Petran, M. Senila and H. Szilagyi</i>	717
Progressive collapse of multi-storey steel frame buildings: Developing catenary action <i>A. Sigauan, F. Dinu and D. Dubina</i>	725
<i>Seismic-resistant structures</i>	
Development of a seismic testing facility to test full scale steel storage racks <i>T. Ahmed, M. Shaheen, K.J.R. Rasmussen and H. Zhang</i>	735
Down-aisle seismic tests of drive-in rack systems <i>T. Ahmed, K.J.R. Rasmussen and H. Zhang</i>	743
Evaluation of seismic response factors for BRBFs using FEMA P695 methodology <i>M.B. Bozkurt and C. Topkaya</i>	751
Design of concentrically braced steel frames for optimized performances in moderate earthquake areas <i>H. Degée, C. Castiglioni, A. Kanyilmaz, I. Calderon and P.-O. Martin</i>	759
The buckling-restrained brace having high structural performance <i>M. Iwata, M. Midorikawa and K. Koyano</i>	767
Spectral-matched ground motions for seismic performance assessment <i>J.P. Judd</i>	775
Seismic collapse risk of steel-concrete composite moment-frame buildings <i>J.P. Judd</i>	785
The use of reduced cross-sections in aseismic structures <i>H. Köber and M. Stoian</i>	795
Eccentrically braced frames equipped with vertical truss elements <i>M. Stoian and H. Köber</i>	803
Relation between plastic deformation capacity and cumulative plastic deformation capacity for H-shaped beams with local buckling <i>A. Suzuki and Y. Kimura</i>	811
Modelling strategy for the seismic response of a moment resisting steel frame building <i>L. Tirca, M. Bosco, N. Lin and L. Lin</i>	819
Nonlinear response of a CBF hospital building with and without friction damper devices <i>L. Tirca, M. Ohira and O.M. Serban</i>	827
Strap-braced CFS walls: Experimental characterization of the seismic response <i>M.T. Terracciano, B. Bucciero, V. Macillo, T. Pali, L. Fiorino and R. Landolfo</i>	835

Influence of cyclic loading for steel eccentrically braced frames with short link under lateral loads <i>A. Vătăman, A. Ciutina and D. Grecea</i>	843
Energy state of multi-story structures equipped with passive protection <i>P. Alexa and A. Mathe</i>	851
Energy approach to modal analysis <i>I. Ladar</i>	859
<i>Steel-concrete composite members and structures</i>	
Strength of square laced steel-concrete composite columns using GFRP and silica fume <i>M.A. El Aghoury, E.A. Amoush, I.M. El Aghoury and M.A. Ghanem</i>	869
Nonlinear inelastic analysis of 3D composite steel-concrete frameworks with partial shear connection <i>C.G. Chiorean and S.M. Buru</i>	877
Theoretical and experimental investigation on performances of composite steel concrete shear walls with steel fiber reinforced concrete <i>D. Dan, V.A. Stoian, S.C. Florut, A. Fabian and E. Boita</i>	885
Buckling resistance of hybrid steel-concrete column <i>P. Keo, H. Somja, Q.H. Nguyen and M. Hjiqj</i>	893
Experimental and numerical investigations on the flexural behaviour of boxed steel beams encased in concrete <i>S. Peltonen, M.V. Leskela, P. Kiriakopoulos, A. Iliopoulos, I. Vayas and K. Spyrakos</i>	901
Layer arrangements influence on buckling, post-buckling and collapse of channel section composite profile <i>A. Gliszczynski and T. Kubiak</i>	909
<i>Tubular constructions</i>	
GBT-based assessment of the vibration and buckling behaviour of cold-formed steel CHS members <i>C. Basaglia, D. Camotim and N. Silvestre</i>	919
Design of equal-width RHS truss X-joints for side wall buckling in the presence of chord pre-load <i>S. Cheng and J. Becque</i>	927
Experimental and numerical investigation of the bending capacity of spiral-welded steel tubes <i>S.H.J. van Es, A.M. Gresnigt, D. Vasilikis and S.A. Karamanos</i>	935
Strain-based design procedures for spiral-welded steel tubes in combined walls <i>A.M. Gresnigt, S.H.J. van Es, D. Vasilikis and S.A. Karamanos</i>	945
Experimental investigation of cold-formed ferritic stainless steel tubular X-joints <i>Y. Huang and B. Young</i>	955

Analysis of pre-compressed steel tubular members under lateral impact: A parametric study <i>T. Manco, J.P. Martins, C. Rigueiro and L.S. da Silva</i>	963
Study on deformation capacity of square steel tubular columns <i>K. Mitsui and A. Sato</i>	973
Crushing behavior of thin-walled frusta – Experimental study <i>A. Moldawa and M. Kotelko</i>	981
Initial imperfections for FEA of tubular beams based on validated experiment results <i>M. Pavlović and M. Veljković</i>	989
Axial behaviour of prestressed high strength steel tubular members <i>J. Wang, S. Afshan and L. Gardner</i>	997
